GENERAL ANALYSIS

Objectives

Sonoma State Hospital provides care and treatment for mentally retarded patients principally from the northern counties of the State.

Program and Performance

The level of care and treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases which is set forth in tabular form as follows:

	1958-59	1959-60	1960-61
Total admissions	468	394	210
Total net releases	225	160	199
Net transfers from other hospitals	58	—71	—80

GENERAL ANALYSIS

Objectives

The Military Department includes: the California National Guard, to help guarantee internal security of the State and provide an organization prepared in an emergency to become a part of the active federal military forces; the California National Guard Reserve, to provide for defense and security of California while the California National Guard is in active federal service; and the California Cadet Corps to provide a program of military education for high schools and junior colleges.

Program and Performance

The primary programs of the Military Department are the operation of the California Army National Guard and the California Air National Guard. Within these programs the State provides a personnel procurement program which enters the field of selection and appointment of officers and warrant officers and recruitment of enlisted personnel; maintains records of the military history of individuals, recording personnel actions, verification of service or deeds, and qualifications for federal retirement; publishes orders and directives on policies and procedures affecting the military; determines locations of organizations and units allocated to the State; provides for training, in conformance with the discipline prescribed by the Department of the Army and Department of the Air Force; operates army officer candidate schools at Glendale and Stockton; prepares plans for use of National Guard as state military forces and uses such forces as required for emergency situations, such as flood duty and fire fighting; participates in the air defense program of the United States both in missiles and aircraft; maintains and operates armories, airfields, rifle ranges, supply points, repair and other facilities; establishes priorities for the use and distribution of federal funds, equipment, and supplies; and administers federal funds in excess of $20,000,000 allocated to California covering pay, schools, uniforms, equipment, material, and supplies.

The California National Guard Reserve program encompasses all the activities of the California Army National Guard except for the officer candidate schools and those activities financed from federal funds. All activities are conducted at a reduced level compared to the National Guard operation, due to the cadre nature of the organization.

The following tables show personnel strength, units, and
stallations of the state military forces:

	Actual 1960-61	Estimated 1961-62	Prop 1962-
Army National Guard			
Personnel	20,500	20,100	20,1
Units	260	260	2
Air National Guard			
Personnel	4,436	4,523	4,6
Units	37	39

Units	33	33	
Army Installations			
State-owned	101	105	1
Leased	25	22	
Air Bases			
Flying bases	4	4	
Other bases	3	3	

To stimulate and strengthen the California National Gu
Reserve so that it can better perform its civil defense functi
an unallocated item in the amount of $100,000 is included
1962-63. It is essential that the reserve be prepared to repl
the National Guard when and if it is called into federal servi
This organization will provide a military force to assist ci
authorities in preserving law and order, as well as rescue a
relief operations, during emergencies resulting from natural
war caused disasters. One civil defense operations officer creat
administratively during the current year is presented as p
posed new in the budget year. This position, one-half federa
financed, is urgently needed to provide operational informati
to the California Disaster Office in times of emergency throu
the utilization of trained intelligence teams and to provide lo
governments with military support during times of disast
One additional custodian is also proposed for maintenance
the new armory at Redding scheduled for completion during t
budget year. The information and recruiting office—major p
sition will be reclassified to lieutenant colonel on July 1, 19
in accordance with the table of organization. The budget a
ticipates the reduction of 18 security guard positions which w
be financed directly by the Federal Government in lieu of fe
erally reimbursed state expenditure.

GENERAL ANALYSIS

Objectives

This regulatory and tax collection agency is responsible for issuing the license which is required for each motor vehicle operated in California, issuing the license to the qualified individual to operate motor vehicles on public roads, and ascertaining the financial responsibility of individuals involved in motor vehicle accidents.

Program and Performance

The department operates through 4 divisions headquartered in Sacramento. Branch offices are maintained in principal cities of the State and part-time service is provided in many communities by traveling crews. Through these media the department's basic functions are: the registration and titling of vehicles; the examination of applicants for and the issuance of drivers' licenses; the collection of fees; the maintenance of records in accordance with the laws; the administration of the driver improvement program; the administration of the Financial Responsibility Law; the licensing and control of driving schools and driving instructor services; the licensing of motor vehicle dealers, salesmen, wreckers, manufacturers, and transporters; and the investigation and enforcement of laws pertaining to the registration of vehicles and of driver licensing.

Chapter 2132, Statutes of 1961, transfers the function of registering small boats from the Department of Motor Vehicles to the Division of Small Craft Harbors, Department of Parks and Recreation, effective July 1, 1962. This transfer of function is reflected in the budget year by a reduction of $153,994. The major increases in the budget year result from 4 factors. One is the anticipated opening of the new Sacramento headquarters office building number 2, during the latter part of 1962. The cost of moving to the new building and properly furnishing and maintaining the building is estimated at $742,328. The second is the issuance of 1963 license plates for all registered vehicles in the State. The cost relating to this function is proposed at $904,257. The third is the preinstallation work which must be done in order to install a data processing system which is proposed for the Division of Registration. The cost related to this training, programing, and conversion work is estimated at $207,522. The fourth is the establishment of a new field office at Fontana. The cost of activating this new office on July 1, 1962, is estimated at $34,535. With the exception of other program adjustments discussed under the appropriate division and uncontrollable items of expense, such as merit salary increases, no other significant increases over the current year level are proposed.

The following are the major workload factors for this department:

	Actual 1960-61	Estimated 1961-62	Estimated 1962-63	
Registrations	8,864,000	9,164,000	9,548,000	384,000 (4.2%)
Drivers' licenses	3,092,802	2,384,000	2,827,300	443,300 (18.6%)

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 60-61 (Filled)	NO. OF POSITIONS 61-62 (Auth.)	NO. OF POSITIONS 62-63 (Auth.)	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

DEPARTMENTAL ADMINISTRATION

Objectives

The director is responsible for the administration of all sections of the Vehicle Code not delegated to the Department of the California Highway Patrol. He establishes departmental policy and directs the work of the 4 divisions.

Program and Performance

The Division of Administration provides the director with information on fiscal expenditures; develops budget plans for current and long-range fiscal requirements; projects workload estimates for the divisions; accounts for all revenues derived from the department's fee collection activities, and accounts for all property owned by the department. Department-wide service activities consist of assisting the director and the division chiefs in personnel matters, including in-service training. Real property rentals are located, negotiated, and executed for the department. Supplies, including license plates and tabs, are purchased, stored, and distributed. Departmental programs and procedures are analyzed to provide more efficient and economical administration. Departmental communication and information request services are co-ordinated among the divisions both in Sacramento headquarters and field offices.

Budget year increases include 2.5 man-years needed for mailing of 1963 license plates by the headquarters office and 0.8 man-years needed for additional record keeping during the 1963 license plates renewal period. These 3.3 man-years will not be available after June 30, 1963. Temporary help increase of 2.2 man-years authorized during the current year for reimbursable service is shown as proposed new for the budget year. This increase is financed from money received for services rendered in connection with sale of accounting copies of drivers license applications.

A reduction of 1 man-year in the Fiscal and Business Management Section is due to the transfer of the boat registration function to the Department of Parks and Recreation by Chapter 2132, Statutes of 1961.

DIVISION OF REGISTRATION

Objectives

This division is responsible for the administration of the provisions of the Vehicle Code relating to the following: issuance, suspension, and revocation of vehicle registrations; issuance of certificates of ownership for all vehicles; licensing and suspension of automobile truck and trailer manufactu transporters, dealers, and wreckers; assessment of vehicles collection of vehicle license fees.

---

[a] Reduction of 1 man-year in Fiscal and Business Management Section due to transfer of boat registration function to Depart of Parks and Recreation by Chapter 2132, Statutes of 1961. 1961-62 also includes 2.2 man-years established for the sale of acco ing copies of drivers license applications and shown as proposed new for 1962-63.

[b] Funds made available through savings effected under "Agency Plan" of organization.

DEPARTMENT OF MOTOR VEHICLES—Continued

DIVISION OF REGISTRATION—Continued

Program and Performance

This division will register approximately 9,548,000 vehicles in the State during the 1962-63 fiscal year. Accomplished through the processing and service units, registration provides a system of ready identification and control, provides a means of establishing ownership, and provides the mechanism for collecting fees. This division has in its Sacramento files a history of every motor vehicle registered in California. The records are maintained under the registered owner's name in alphabetical order, under the license number in numerical sequence, and by engine or identification number in numerical sequence. The Automation Section of this division employs punched cards to record all data concerning all registered vehicles. As the fees are changed from year to year, the mechanical equipment is used to rerate the vehicles, and prepare potential registration cards which are mailed in advance of the renewal period.

This division has researched the field of computer applications and in the interest of better service and greater economy has recommended to the Department of Finance that an order be placed for a specific data processing system for installation in the calendar year of 1963.

The investigation of automobile dealers and wreckers is accomplished by this division through the use of trained investigators. The investigators also serve briefs for the department, collect fees in the event of improper or inadequate payments, and perform other allied investigative functions, among them being the licensing and regulation of salesmen and the enforcement of the registration compliance program.

Changes in the Wrecker Section of the Vehicle Code, by Chapter 1640, Statutes of 1961, imposed additional requirements on the wrecker and increased the responsibility of the department to establish controls insuring compliance with the law. An additional 8.2 man-years is proposed for this purpose.

Proposed increases for this division include 10 positions required for establishment of teletype service in the new Sacramento headquarters office building and 35.8 man-years preinstallation costs for the data processing system which is planned for installation in the 1963-64 fiscal year. Other increases are 41 man-years in the Vehicle License and Title Section and 42.6 man-years in the Automation Section for abnormal increase in workload due to the 1963 license plate renewal. These positions will not be available after June 30, 1963.

Proposed reductions for this division include 10.2 man-years in the Vehicle License and Title Section and 6 man-years in the Automation Section due to the transfer of the boat registration function to the Department of Parks and Recreation by Chapter 2132, Statutes of 1961. There is also a reduction of 7 positions in the Automation Section because of a procedural change.

Major increases in various operating expense allotments relate to issuance of 1963 license plates. These include such items as increased postage, freight cost, and rental of tabulating equipment. The decrease in the allotment for license plates and tabs also occurs as a result of the new plate issued in 1963.

DIVISION OF DRIVERS LICENSES

Objectives

This division is responsible for the issuance of all original drivers' licenses, the renewal of expiring licenses, and maintaining of driving histories of all drivers, the direction of the driver improvement program, and the administration of the State's financial responsibility laws.

Program and Performance

This division licenses and maintains a post licensing control of approximately 8,680,000 drivers. It is estimated that approximately 2,827,300 original and renewal licenses will be issued in the 1962-63 fiscal year, an increase of 443,300 over the issuance estimated for the 1961-62 fiscal year. The drivers license file contains more than 33,000,000 driver record documents. The licensing function is accomplished primarily by clerical forces in handling applications as received from the field offices.

An electronic study group was organized in October 1960, to review the present workload and methods of the division and to study the feasibility of using electronic data processing equipment to accomplish the present work processing. As of November 1961, this group had completed 90 percent of its review on drivers' licenses issuance; 30 percent on files and identification; and 30 percent on driver control. The review of information requests function has not yet started. It is expected that the entire review will be completed by July 1962. Upon the completion of the review, the manufacturers of data processing equipment will be furnished with a copy of the Division's study as a basis for their recommendation for a data processing system for the division.

The electronic study group will analyze the recommendations submitted by the various manufacturers. After a complete analysis is made by the group, the division may submit a proposed data processing system to the manufacturers requesting bids. Bids received will be analyzed for system adequacy and conformance with specifications.

Another use of driver records is the Information Request Service in which the division furnishes driver record transcripts. This activity is completely reimbursed since statu provides that this information be furnished upon payment of least the cost of producing the information report.

Driver improvement includes the general function of po licensing control of drivers with problems that cause the records to show that they are a hazard to themselves or tl general public. The mandatory actions are those spelled out the law requiring automatic action after certain specific co victions, such as drunken driving and certain other offens including felonies. Discretionary actions are provided for habi ual violators. The discretionary provision is extended to phys cal or mental disabilities which would result in danger to tl individuals themselves or to the general public. To carry o these functions the division uses re-examination, interview investigations, warnings, and hearings before a driver improv ment analyst. Under this discretionary program the divisio endeavors to improve poor driving habits and attitudes.

The division is also responsible for the administration of tl financial responsibility laws. It is the purpose of this functio to provide reasonable assurance that persons suffering bodi injury or property damage in motor vehicle accidents are co pensated by those responsible for such injury or damag Drivers who fail to meet their financial obligations by insuran or otherwise, are deprived of the privilege of operating a mot vehicle, and their vehicle registration may be suspended for tl same cause.

Provision is made for the continuation of the photographs drivers' licenses program.

Four clerical positions established during the current ye are shown as proposed new positions. These positions we established on a workload basis and are financed by reimburs ments for services they render in connection with driver licenses information requests.

The negligent operator warning letter program was react vated during the 1961-62 fiscal year and 4.6 positions we established and are proposed in the budget year to continue th program.

DIVISION OF FIELD OFFICE OPERATIONS

Objectives

This division provides a statewide network of field offices responsible for examining applicants for drivers licenses; issuing vehicle licenses; receiving, processing, and accounting for applications and fees for both vehicle registration and drivers license, as well as for dealers and vehicle salesmen; providing information on financial responsibility laws, brief service, and driving school licensing.

---

[a] Three and six-tenths positions established in current year for negligent operator warning letter program and shown as proposed new in 1962-63.

DEPARTMENT OF MOTOR VEHICLES—Continued

DIVISION OF FIELD OFFICE OPERATIONS—Continued

Program and Performance

This division maintains 138 permanent full-time offices and 27 travel crews serving 64 smaller and isolated communities. Complete vehicle registration and drivers licensing services are provided in the permanent offices. Trained examiners are used in the travel crews to provide drivers licensing service. Applicants for drivers licenses are required to submit to a written test of their knowledge of the Vehicle Code, a vision screening test, an actual demonstration of their ability to operate a vehicle, and their ability to read simple English. A $3 application fee entitles the applicant to 3 tests within 6 months. Complete registration service is available in all permanent branch offices located in all principal cities of the State. In addition, during the annual registration renewal period service on potential registration cards is offered at approximately 150 banks. Certain registration services are also rendered by automobile clubs. This service is reviewed and audited by field office Traveling registration crews visit many other points for state periods as a convenience to the public. Many field offices ser as headquarters for the motor vehicle investigators and driv improvement analysts.

Sixteen and nine-tenths man-years are proposed for the budg year to meet the increased personnel needs for the new licen plate year. These positions will not be available after June 3 1963. Related to this program is the increased postage cost approximately $117,000 for mailing of license plates.

A new field office proposed for Fontana will require an i crease of 3.5 man-years.

A reduction of 8.9 man-years is due to the transfer of th boat registration function to the Department of Parks and Rec reation by Chapter 2132, Statutes of 1961.

[a] 1961-62 and 1962-63 reflects 1 position transferred to Division of Administration, and 4 positions related to Chapters 889, 2138 an 2140, Statutes of 1961, for establishment of field offices at Turlock, Manteca, and Los Banos.

[b] Reduction of 8.9 man-years in 1962-63 fiscal year due to transfer of boat registration function to Department of Parks and Recrea tion by Chapter 2132, Statutes of 1961. 1961-62 and 1962-63 fiscal years reflect an increase of 3.6 man-years in temporary hel due to the establishment of additional part-time janitor positions at various field offices.

[c] Four positions in 1961-62 and 1962 63 are related to Chapters 889, 2138, and 2140, Statutes of 1961, for establishment of field office at Turlock, Manteca, and Los Banos.

DEPARTMENT OF MOTOR VEHICLES—Continued

LAND AND BUILDINGS

Program and Performance

This function includes the maintenance, operation, and repair of all office buildings owned or leased by the department. This function provides operating expenses for the maintenance and operation of all department facilities. Personnel is not provided and it is not an operating function.

The increases for the budget year are due mainly to the anticipated opening of the new Sacramento headquarters office building. The sum of $430,000 is estimated for moving expense and cost of building maintenance.

GENERAL ANALYSIS

The Administrator of the Resources Agency of California advises the Governor and co-ordinates the programs of the Departments of Water Resources, Fish and Game, Conservation, Parks and Recreation, the State Water Pollution Control Board, the 9 regional water pollution control boards, and the Water Rights Board. In addition, in accordance with assignment given by the Governor, the Administrator serves as liaison for information and co-operation with certain unattached units. For the constituent departments of the Resources Agency of California, the Administrator supervises general operations and assists in the development of plans and execution of programs. The Administrator operates through a council of directors and executive officers of the departments and commissions that make up the agency. A series of ad hoc task forces made up of specialists and experts drawn from the staffs of the constituent departments operate to carry out co-ordination measures and to plan and recommend procedures and actions for consideration by th executive staff of the Administrator and by the Administrato

The Administrator is a member of the Governor's Cabinet, a well as of the Governor's Council. As a member of the Gove nor's Cabinet, the Administrator represents all of the constituen departments of the Resources Agency in consideration of matter applying through the operation of the executive branch of th State Government as a whole and in the development of co-ord nated programs and activities.

The Administrator functions to effectuate decentralized con trols and delegated authority in such areas as program review budget review, administrative matters, and other activities gen eral to more than one of the constituent departments. Direc tors of the constituent departments are responsible to the Ad ministrator and through him to the Governor for the executio of predetermined policies and programs.

GENERAL ANALYSIS

Objectives

This department was created by Chapter 2037, Statutes of 1961, effective October 1, 1961. Under provisions of this statute the Department of Natural Resources was abolished and the divisions of the old department were divided between the new departments of conservation and parks and recreation.

This new department has as its principal objective the conservation, development, and utilization of the State's primary natural assets in the fields of forest, mineral, and soil resources.

Program and Performance

The department is organized into 5 divisions; Administrative Services, Forestry, Mines and Geology, Oil and Gas, and Soil Conservation.

The Division of Administrative Services provides personnel, accounting and general office services, and organizational and procedural analysis for the other divisions of the department.

The Division of Forestry has primary responsibility for the prevention and suppression of fires occurring on about 30,000,000 acres of state-owned and private lands. In addition, the division also carries forward various land management programs such as the administration and enforcement of forest practice rules, forest advisory services, range improvement programs, production of nursery stock, management of state forests, and underwriting forest and fire research programs.

The Division of Mines and Geology, through its staff of field geologists, assists the State's mineral industries in discovering, developing, and utilizing the abundant mineral resources found within the State.

The Division of Oil and Gas has supervision of the location, drilling, use or maintenance, and abandonment of all oil and gas wells to prevent waste and damage to the oil and gas deposits, to prevent contamination of fresh water sources penetrated by the wells, and to further the maximum recovery of oil and gas. The division also has responsibility for supervising repressuring operations in connection with the land subsidence which has occurred in the Wilmington area.

The Division of Soil Conservation assists in the organization and operation of local soil conservation districts and co-ordinates, under policy guidance of the State Soil Conservation Commission, the planning of the "small watershed" or Public Law 566 program.

Shortly after October 1, 1961, with the creation of the new departments under Chapter 2037, Statutes of 1961, a task force group was assigned the responsibility of preparing a plan for splitting the administrative service positions available in the old department on an equitable basis between the 2 new departments. During the 1961-62 fiscal year it is proposed that the major amount of administrative services be handled for both departments by the Department of Conservation. The Division of Administrative Services in the old Department of Natural Resources was assigned to the Department of Conservation to carry on this workload.

The effects of the task force group's report are reflected in both the Division of Administrative Service, Department of Conservation and the Division of Administrative Service, Department of Parks and Recreation budgets for the 1962-63 fiscal year.

This budget reflects administrative services provided independently to each department as proposed in the task force recommendations. This is accomplished by a transfer of 34 positions to the Department of Parks and Recreation from the Department of Conservation. The positions remaining in this department will be augmented by transfer of 13 positions from the Division of Forestry, which had formerly been engaged in certain phases of administrative services.

DIVISION OF FORESTRY

GENERAL ANALYSIS

Objectives

The primary mission of the Division of Forestry is the protection of over 39,000,000 acres of state and private lands having statewide interest with regard to timber production, rangelands, recreational uses, and watershed values. The various land management programs include the prevention and suppression of fires; the administration and enforcement of forest practice rules; forestry advisory services; range, improvement programs; production of nursery stock for public planting, windbreaks, soil erosion control and reforestation purposes; management of state forests; control of white pine blister rust and forest insect infestations in co-operation with federal agencies and private owners; and co-operation with the Federal Government on forest surveys.

The division directly provides fire protection for approximately 30,000,000 acres of state-owned and private lands. Under a contract arrangement with the United States Forest Service, 5,000,000 acres are protected, and 4,000,000 acres are protected through contracts with 5 counties. In addition to the fire protection provided for lands of statewide interest, the division protects about 6,000,000 acres of rural agricultural land under contracts providing for reimbursement of costs from 26 counties.

Program and Performance

The critical problems in the management and protection of California's wild land areas have been brought about by the pressures of a continually growing population. The use of wild land areas for permanent and summer homesites and for recreational purposes has increased greatly during the past few years. Along with the increased use of these lands, the values for timber and rangelands and for watershed purposes have also increased with the demands of a growing population. Because of these expanding uses and pressures, the division is continuously reviewing its basic fire plan to provide personnel, equipment, and facilities planned to meet statewide needs.

As a part of the continuing conservation camp program, 1 new 100-man camp and 2 80-man camps are scheduled for activation in 1962-63. As of July 1, 1962, it is estimated that 1980 Department of Corrections inmates and 345 Youth Authority wards will occupy 28 permanent camps, 3 mobile camps, and 3 spike camps.

Included in the 1962-63 Budget is provision for the Division of Forestry to assume direct protection over Zone 1 and 2 lands within San Mateo County. Formerly the county fire department received payments from the State for the prevention and suppression of fires in areas of state responsibility.

Several of the division programs which affect the national interest are reimbursed under grants from the Federal Government. Under terms of the Clarke-McNary Act, the State will receive $1,198,200 during 1961-62 and $1,198,200 during 1962-63 for fire protection on timberlands and primary watershed areas. These payments include recognition of forestation of denuded or understocked timberlands.

ADMINISTRATION

Program and Performance

The function of administration includes the office of the State Forester and the following staff functions: fire control; business management; engineering and conservation camps; training; fire prevention education; operation of the Davis warehouse and equipment repair shop; administration of the state nursery; and forest, range, and watershed management. The prime objectives are to develop operating policies, rules and regulations in accordance with forest and fire laws and administrative procedures of the State. In addition, technical assistance is provided to the field forces in the specialized staff fields.

The fire control section co-ordinates the statewide fire fighting forces both within the division and with other fire control organizations. In addition, they assume staff responsibility for equipment development and maintenance, communications, fire plan development and statistics, and forest fire research.

The business management section is responsible for the budget development, fiscal control, procurement agreements, and personnel matters. The section also supervises the activities of the Davis warehouse and shops.

The engineering and conservation camps section prepares administrative and fire control maps for the division's area of responsibility. In addition, they prepare construction plans and give guidance and supervision to the capital outlay and maintenance program. The section also co-ordinates the activities of the Forestry Conservation Camp Program and develops standards for construction and maintenance of roads, firebreaks, and telephone services.

The training section is responsible for the co-ordination of 2 training centers and the development of other in-service training programs.

The fire prevention education section co-ordinates the fire prevention program with other co-operating governmental agencies, industrial firms and citizen groups. It is also responsible for the law enforcement program of the division involving both civil and criminal cases.

In the field of education the division utilizes all major types of public contacts, including television, radio, and motion pictures. Motion picture films for television and other educational media have been developed including television spot announcements providing different fire prevention messages and others for motion picture theater use. These films are distributed to theaters and television stations throughout the State.

The forest and range management section includes the forest management unit which is divided into 3 functions consisting of management of state forests, forest practice, and service

DIVISION OF FORESTRY—Continued

ADMINISTRATION—Continued

Program and Performance—Continued

forestry, and deals primarily with the programs concerning the management of the timber resources on private land within the State of California. The prime objective is to assist private landowners in attaining sustained yield forest management programs and to return to full production those timber producing lands that are presently understocked or devoid of timber.

The division is responsible for the administration of 8 state forests. Three of these forests are of sufficient size to be managed as demonstration units to illustrate proper sustained yield, forest management techniques, and to be utilized in forest management research. In the orderly conversion of these managed forests from old growth to sustained yield second growth stands, the State presently realizes annual revenue in excess of $500,000 from timber sales.

The function of forest practice administers the forest practice rules which govern logging practices on privately owned timberlands.

The function of service forestry provides technical advice to small timberland ownerships throughout the State, in an effort to teach the owners proper management techniques. The service foresters provide technical assistance for the federal co-operative programs concerned with the Soil Bank and the Agricultural Conservation Program. Due to the interest in the federal co-operative programs and the realization of the true worth of the timber on small ownerships, the division is receiving an ever-increasing number of requests for assistance from private owners.

Range improvement personnel are responsible for providing technical assistance to private landowners in the conversion of brushlands to more productive range types in order to increase the carrying capacity of the California rangelands.

Range improvement technicians advise private landowners regarding the most effective and economical methods to apply in converting brushlands. They also supply information concerning the adaptability of the various soil types for rangeland conversion and the recommended species of forage plants to be sown to achieve the most effective sustained results.

Demonstration ranges are maintained in co-operation with private landowners to study and demonstrate the effects of conversion by mechanical means, chemical sprays, controlled use of fire, and various combinations of these methods.

In co-operation with regular fire control forces, continuing experiments are being conducted to provide an adequate and economical method of attaining a satisfactory burn during the relatively nonhazardous periods of the year.

Emergency revegetation projects to prevent serious erosion and flood damage on critical watersheds that have been denuded by fire are also carried out under this function. These reseeding projects are financed on a matching fund basis by the State and private landowners or local political subdivisions concerned.

The state nursery program provides for operation of a nursery located near Davis and for 3 branch nurseries located at forestry conservation camps. The nurseries provide stock for public planting, windbreaks, soil control, and reforestation purposes.

In order to reflect a more accurate organizational placement of positions, the 1962-63 Budget for administration includes 15.8 positions engaged in statewide engineering, planning, and inspection services. These positions are reimbursed from Capital Outlay funds.

A total of 13 existing positions are shown as transferred to the Division of Administrative Services of the Department of Conservation during the 1962-63 fiscal year.

FOREST PROTECTION—DISTRICT HEADQUARTERS

Program and Performance

The Division of Forestry is divided into 6 administrative districts with activities in each district co-ordinated through district headquarters under the direction of a deputy state forester. Besides providing general direction for all forestry activities, the district headquarters provides services of specialists in forest fire prevention, law enforcement, forest management, range and watershed management, engineering, construction, and automotive maintenance.

The forest ranger units receive direction and guidance in all activities from the district deputy state forester. His staff and ranger unit programs are developed and administered from this headquarters. The various specialists assist the ranger units in providing an efficient and effective program operation.

Completion of the new headquarters office for District V in January of 1963 will require additional maintenance service. One full-time janitor is requested to maintain these quarters and a half-time groundsman is requested to maintain the general landscaping.

FOREST PROTECTION—FIELD SERVICES

Program and Performance

The Field Services function provides for the operation of fire suppression stations, forest fire lookouts and ranger unit headquarters offices. The prime objective is to provide adequately staffed, trained suppression crews and related equipment to make prompt and efficient initial attack on forest, brush, and range fires in order to provide "basic fire protection." The field units are designed to provide a flexible organization to develop the required manpower and equipment needs to deal with large campaign fires in line with the concept of "basic fire protection."

The 30 ranger units in the division operate 230 fire suppression stations, 79 lookouts and utilize 35 patrolmen for the protection of over 31,000,000 acres of state lands, private lands and intermingled federal lands under the division's direct protection responsibility. Related equipment includes fire trucks, bulldozers and transports. These units are integrated into the division's radio network to provide for prompt dispatch to and direction on fires.

The 1962-63 Budget provides for a continuation of the operational Initial Air Attack Program throughout the State. This program allows the division to contract for observation planes, aerial tankers to drop fire retardant material, and helicopters to assist the initial attack forces in making prompt effective attack in order to control fires while they are small.

Administrative personnel and key fire control personnel are hired on a year long basis. Fire fighters, cooks at suppression stations, lookouts, and a portion of the forest fire truck drivers are hired during the declared fire seasons. Crews are brought to peak strength as the fire season progresses in its intensity and are reduced as weather conditions become more favorable in the fall.

Ranger unit administrative personnel and patrolmen are actively engaged in fire prevention within their respective units. The program of fire prevention stresses both group contacts and on-the-ground contacts with individual landowners and forest users, in an effort to reduce the increasing numbers of man-caused fires as the population increases and constantly heavier use is made of our wild land areas.

The division is placing increasing emphasis on law enforcement, particularly in the field of civil action. Field administrative personnel supply the basic information for fire cost reimbursement claims that are processed through the Attorney General's Office for collection.

In addition, field administrative personnel are active in all programs of the division in forest and range management. One of the major activities in the timbered region is the inspection of logging operations to report compliance with the Forest Practice Act and to continue to develop active timber operator participation in fire prevention and suppression in his area of operation.

The 1962-63 Budget proposes the establishment of a forest fire station at Lucerne in San Bernardino County to meet critical fire control needs in this area. This station is recommended for establishment in the 1960 Fire Plan of the Division of Forestry. The standard crew of 4.6 positions will be housed in temporary quarters until such time as funds are available for a permanent station.

FORESTRY CONSERVATION CAMPS

Program and Performance

The conservation camps are operated in co-operation with the Department of Corrections and the Department of the Youth Authority. The Division of Forestry is responsible for determining the need for a camp in a given area and for the construction of such camps. Under existing agreements the division is responsible for the work program and the supervision of the inmates during the working day. In addition to the work program, the camps provide added manpower for forest protection and fire suppression work.

As of July 1, 1962, it is estimated that 1,980 Department of Corrections inmates and 345 Youth Authority wards will occupy 28 permanent camps, 3 mobile camps, and 3 spike camps. The 1962-63 fiscal year will see 3 new camps activated; 2 with a strength of 80 men each: Konocti in Lake County, Mono-Inyo in Inyo County, and a third, Antelope in Lassen County with a strength of 100. These camps will house Department of Corrections inmates. During the budget year, 36 positions are proposed to provide staffing for these new facilities.

In conjunction with the establishment of training schools by the Department of Corrections at conservation centers, 9 additional positions are requested to instruct inmates in forest fire control and conservation project subjects at the California Conservation Center at Susanville and the California Institution for Men at Chino. The Department of Corrections will reimburse forestry for the division personnel utilized as instructors.

AGRICULTURAL FIRE PROTECTION

Program and Performance

The Division of Forestry contracts with certain counties to provide fire protection for local rural agricultural areas known as Zone 3 lands. The State is reimbursed for these expenditures.

DIVISION OF MINES AND GEOLOGY

GENERAL ANALYSIS

Objectives

The primary objective of this division is to serve and assist the State's mineral industries in discovering, developing, and utilizing the abundant mineral resources found within the State. As required by law, the division also maintains and operates a mineral museum, laboratory, and library in San Francisco and licenses purchasers of gold and silver.

Program and Performance

As the means of accomplishing its objectives the division encourages and makes special studies of the mineral resources and mineral industries of the State. The results of these studies are published for distribution to libraries and for sale to the public. Typical geological and mineralogical specimens are collected and displayed, and with its library and laboratory the agency serves as an information bureau for the mining industry and the public.

The mineral research and field study function consists of a program of research and field studies on mineral utilization, beneficiation of ores, geologic mapping, mineral commodities, petrography, mineralogy, and mining methods and problems. Co-operative programs have produced positive results. A successful clay research program in co-operation with the University of California has been operative and yielding tangible results useful to the clay industries in California. An important advance in the recovery of metallic tungsten and molybdenum from concentrates has been achieved with the co-operation of the U. S. Bureau of Mines.

The budget proposed for 1962-63 provides for a continuation of the level of service provided in 1961-62. Several moves are contemplated in the 1962-63 fiscal year. Space inadequacy in Redding requires that new space be provided in a building for state offices anticipated to be available on July 1, 1962. Space requirements of other large agencies in Sacramento necessitate the provision of new space on January 1, 1962 for this location. The move scheduled by the headquarters office in San Francisco for July 1, 1961 has had to be postponed until later in the year due to delays in construction.

[a] Janitor position was shown abolished in the 1961-62 budget based on the assumption that new quarters in San Francisco would be occupied on July 1, 1961. Janitorial costs will be borne in the rental charge of the new quarters. Delays have been experienced in preparing the new quarters for occupancy.

DIVISION OF OIL AND GAS

GENERAL ANALYSIS

Objectives

The primary responsibilities of the division are the supervision of locating, drilling, use or maintenance, and abandonment of all oil and gas wells to prevent waste and damage to the oil and gas deposits, to prevent contamination of fresh water sources penetrated by the gas or oil wells, and to further the maximum recovery of oil and gas.

The division also has the responsibility of supervising the formation and operation of repressuring operations for the purpose of arresting or controlling subsidence of land overlying oil and gas deposits when such lands are in danger of inundation by the sea.

DEPARTMENT OF CONSERVATION—Continued

(Formerly Department of Natural Resources)

DIVISION OF OIL AND GAS—Continued

GENERAL ANALYSIS—Continued

Program and Performance

Under the direction of the State Oil and Gas Supervisor, the division is organized into six districts, each supervised by an oil and gas engineer. In District No. 1, with office at Inglewood. California, the Wilmington subsidence area has been established and certain personnel there are assigned to that phase of supervision. The general duties consist of: (1) field inspections of oil and gas wells during drilling and abandonment operations to see that operations are properly performed as required by the law; (2) passing upon proposals to do all kinds of work upon wells; (3) determining whether or not proposed locations for new wells meet the spacing requirements; (4) preparing maps and cross-sections to determine underground conditions in oil and gas fields; (5) maintaining surface maps showing locations of wells; (6) collecting data relating to wells and their production; (7) passing upon repressuring proposals for secondary oil recovery or subsidence arrestment purposes and supervising these projects; (8) passing upon proposals for underground oil field waste water disposal; (9) answering inquiries from the public; (10) preparing and writing reports for publication describing structure and history of oil and gas fields and related subjects; (11) advising oil and gas operators as to drilling procedure in California; (12) passing upon complaints and ordering remedial work or abandonment.

The general operations and subsidence programs are each supported entirely by an annual assessment on oil and gas produced. With necessary changes for price level and salary increases, the proposed budget continues the existing level of service. The work of the division in part is a fluctuating well inspection service rendered to the oil and gas operators. This service is rendered on a 24-hour basis every day in the year. When this type of service requirement decreases, the engineering time released is devoted to writing of technical reports and the basic research that must be done for this purpose and to use as a basis for answering proposals to do work upon wells or to initiate secondary recovery or disposal operations. In this manner, the technically educated and trained staff is maintained at a uniform level.

A half-time clerical position is proposed in the budget year to assist the full-time stenographer in the northernmost district office of the division. Increased gas well activity in this district has added to the clerical workload.

DIVISION OF SOIL CONSERVATION

GENERAL ANALYSIS

Objectives

The division assists in the organization and operation of soil conservation districts and, under policy direction of the State Soil Conservation Commission, co-ordinates the planning of the "small watershed" program under Public Law 566. In addition the division authorizes purchases of equipment from the Soil Conservation Development Fund. This equipment is available for rent or sale to districts.

Program and Performance

Workload of the division is divided between the nontechnical and the technical types of assistance to the various soil conservation districts organized in the State. Nontechnical assistance generally covers advice and guidance on district administration, with suggestions and encouragement for suitable soil conservation activities.

The technical phase of assistance is performed in conjunction with the provisions of Public Law 566, as amended by Public Law 1018. The division is authorized 2 watershed planning teams which with a United States Soil Conservation Service planning team, will do planning work for small watershed projects, including upland management and diversion structures, for which the commission has approved an application. The purpose of the state-supported planning teams is to more quickly establish the state eligibility for federal funds to be used for financing flood control structures up to a maximum of 5,000 acre-feet capacity. The structures may have a capacity up to 25,000 acre-feet including water conservation features if a portion of the cost of the water conservation features is borne by local interests.

The budget proposes a continuation of the current level of service.

---

[a] Reported as an expenditure in the budgets to which salaries were prorated.

[b] Federal grants received under the Clarke-McNary Act are deposited in the General Fund. and appropriated therefrom for the support of the Division of Forestry by the Budget Act. As federal funds these amounts are excluded from the overall budget totals. These funds are provided to assist in the protection of forest and watershed lands of national interest and to assist in nursery and service forestry program.

DEPARTMENT OF CONSERVATION—Continued

(Formerly Department of Natural Resources)

WATERSHED PROTECTION BY CO-OPERATING COUNTIES

The counties listed below receive payments from the State for the prevention and suppression of fires in areas of state responsibility. Payments are based on the level of service which the Division of Forestry provides for similar areas directly protected. The increased payments are computed on the level of service proposed for state-protected areas for the 1962-63 fiscal year. Provision has been made for the Division of Forestry to assume direct protection in areas of state responsibility in San Mateo County during the 1961-62 fiscal year.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 60-61 (Filled)	61-62 (Auth.)	62-63 (Auth.)	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62

PRIVATE LAND PROTECTION BY UNITED STATES FOREST SERVICE

For payment to the United States Forest Service for protection of state and private lands based upon acreages of state responsibility land inside and adjacent to national forests offset by national forest land protected by the Division of Forestry. The increased payment proposed for 1962-63 is to support a fire crew organization which will provide a level of fire protection equivalent to that provided for state lands directly protected by the division.

FOREST INSECT CONTROL

This program provides for the control of forest insect infestation, principally pine beetles, on state and private forest lands. State expenditures on private lands are on a cash or labor matching basis under rules established by the State Board of Forestry in accordance with Section 4455 of the Public Resources Code. The budgeted amount has been provided for the past several years and is proposed for 1962-63.

WILD LAND VEGETATION AND SOIL MAPPING

The University of California and California Forest and Range Experiment Station of the United States Department of Agriculture co-operate in mapping vegetation and soil types in wild land areas as recommended by the State Board of Forestry. The program was initiated under Chapter 1875, Statutes of 1953. The equivalent program level is continued for the 1962-63 fiscal year.

Allotment to the United States Department of Agriculture for watershed research	$24,000	$23,472	$23,472

FOREST AND FIRE RESEARCH

A program of basic research, field studies, and investigations with respect to the prevention and control of forest and brush fires; reforestation of burned-over land and nonproducing lands; and other resource areas related to activities under the division's jurisdiction are provided in this item.

The major portions of the research projects are contracted to the Pacific Southwest Experiment Station and to the University of California where research specialists conduct the studies. This has the twofold advantage of having specialists in the specific field conducting the program and often the program is expanded or integrated with similar research through the use of Federal or University funds.

The Forest and Fire Research Committee of the State Board of Forestry attempts to integrate all research being done by governmental agencies and private companies in order to avoid duplication of effort and to foster the exchange of information and to combine research efforts.

---

[a] Federal grants received under the Clarke-McNary Act are deposited in the General Fund, and appropriated therefrom for the support of the Division of Forestry by the Budget Act. As federal funds these amounts are excluded from the overall budget totals. These funds are provided to assist in the protection of forest and watershed lands of national interest and to assist in nursery and service forestry program.

[b] State Lands Act Fund was abolished by Chapter 892, Statutes of 1961 and all moneys in the abolished fund continues to be available to meet existing appropriations. Since the funds remaining in the State Lands Act Fund were transferred to the General Fund, balances available in subsequent years will show on the General Fund, Reconciliation with Appropriation.

GENERAL ANALYSIS

Objectives

Fundamental objectives of the department are the protection, propagation, preservation, and investigation of the State's fish and game resources, including ocean fisheries and marine products, for the utilization of and general benefit and recreation of the people of California.

Program and Performance

The director, under general policies established by the Fish and Game Commission and as prescribed by statute, administers the department and its program. Included in the department are the Wildlife Conservation Board and the Marine Research Committee.

For purposes of administration and operation the department is organized into several functions corresponding to its major activities. General policy direction is provided by the Fish and Game Commission. The commission is composed of 5 members appointed by the Governor. In addition to establishing general policy, they regulate the taking of fish and game by promulgation of regulations establishing open and closed seasons; bag and possession limits; and areas for the taking of fish and game. The commission also regulates commercial fishing to insure the taking and delivery of fish in a wholesome and sanitary condition and to prevent deterioration and waste of fish.

With the exception of the Delta Fish and Wildlife Study which is fully reimbursed by the Department of Water Resources, and a $40,000 addition to the Federal aid program under the Dingell-Johnson Act to improve fishing in Topaz Lake, there are no program augmentations in the proposed budget for the 1962-63 fiscal year. Anticipated expenditures in the budget year are completely funded from anticipated revenue with a small increase in surplus expected at the end of the 1962-63 fiscal year. In accordance with the policy of the Fish and Game Commission the pheasant program is further reduced by 7 permanent positions in the 1962-63 fiscal year. The 1961 Legislature directed that the license sale function should be centralized. Two and six-tenths positions are abolished in the current year and 2.6 in the budget year making a total reduction in the license sale program of 5.2 positions. Specific areas of major personnel change are as follows:

A. STAFF OPERATIONS

An increase of 2.6 man-years of temporary help is proposed to assist in the marking and recovery program. Salmon marked and released several years ago will return to the river systems of the State and the extra help is needed to obtain the sampling information necessary to the success of the project.

B. REGIONAL OPERATIONS

An accounting technician position is proposed for deletion at Trinity Hatchery in Region I with reduction of federal reimbursements available for salaries and wages. The total reimbursement is increased slightly because amounts available for operating expenses increased.

In Region II, a game manager and assistant are proposed for deletion in the current year due to closing of the Sacramento game farm in the budget year. Two game managers and 5 assistants are to be deleted with the closure of the Marysville and Chico game farms.

In Region III a fish and game assistant position is abolished in the current year due to the decreased workload at the Yountville Game Farm.

In Region V, a fisheries manager I position was abolished in the current year. Purchase of various items of equipment improved the efficiency of hatchery operations to allow this decrease.

COMMISSION

Objectives

The commission establishes policy for the Department of Fish and Game and fixes seasons and bag limits.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 60-61 (Filled)	61-62 (Auth.)	62-63 (Auth.)	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

---

[a] All Delta Fish and Wildlife Protection Study positions are reimbursed through a contract with the Department of Water Resources.

[b] A reduction of 0.8 man-year from authorized level in prior year occurs in the Water Projects Branch due to the termination of a contract with the Department of Water Resources for a Sacramento River Water Quality Study, and an increase of 9.5 man-years is shown for the Delta Fish and Wildlife Protection Study.

[c] Sixteen and six-tenths man-years are included for continuation of the Delta Fish and Wildlife Protection Study while a decrease of 4 man-years is shown for positions which are being transferred to the Lake Tahoe Project under the Dingell-Johnson Act. A decrease of 1 man-year is shown to reflect the termination of a contract with the East Bay Municipal Utilities District for a salmon spawning study.

REGIONAL OPERATIONS

Objectives

Regional offices were established in the department to relieve the central staff of an enormous volume of administrative work. The hunting and angling public come in contact with the department through the regional offices, which are located at Redding, Sacramento, San Francisco, Fresno, and Los Angeles. These offices provide staff familiar with problems of the locality and co-ordinate with a headquarters group responsible for statewide planning and research. Through decentralization, local supervisors of the various functions are located in the field where they can take action based on intimate knowledge and fieldwork.

Program and Performance

In general the regional program, in addition to a headquarters function, includes inland fisheries, game management, and wildlife protection. The activities of the inland fisheries operations are concentrated on hatcheries, stream improvement, fisheries investigation, and local water development problems. The act ities of the game management program in the field include phases of research, applied research, and management of game and upland game. Field operation of the patrol is und the wildlife protection function. This latter function also sup vises hunter safety programs, educational programs, and ma field maintenance responsibilities. Budgeted amounts of region operations by function, excluding employees' retirement, are follows:

	Actual 1960-61	Estimated 1961-62	Propose 1962-6
Headquarters	$609,210	$560,981	$506,6
Inland fisheries	2,112,988	2,176,506	2,169,4
Game management	1,095,198	1,171,533	1,106,1
Wildlife protection	2,692,841	2,630,310	2,654,7
Estimated salary savings	–	*—118,650*	*—109,6*

---

[a] A reduction of 1.5 man-years is shown to reflect centralization of licensing in departmental administration, and a reduction of 0. man-year reflects termination of construction help. A decrease of 1.8 man-years of seasonal help reflects the closing of game farm at Chico and Marysville during the current fiscal year.

---

[a] A decrease of 2.3 man-years reflects licensing centralization in Departmental Administration and a reduction of 0.9 man-years o seasonal help is due to curtailment of game farm program at Yountville. An increase of 0.7 man-year of temporary help i Inland Fisheries is for operating salmon and steelhead trapping and transporting facilities at Nicasio Dam. Cost of this servic is to be reimbursed by Marin Municipal Water District.

GENERAL ANALYSIS

The game and fish management programs, known as the Pittman-Robertson and Dingell-Johnson programs are administered by the Department of Fish and Game and financed jointly by the State and the Federal Government at the ratio of 75 percent by the Federal Government and 25 percent by the State.

Game Management (Pittman-Robertson)

This is a program under which the Federal Government allots to the states, under a formula set up in the federal law, the moneys derived from the excise tax on sporting arms and ammunition. It is allotted on the basis of 25 percent state to 75 percent federal money. The rules and regulations under which these funds are made available to the states are specific and diligently supervised by the federal agency. Under federal law, no state may spend more than 25 percent of its Pittman-Robertson funds for maintenance and this must be on areas under the Pittman-Robertson program.

The amount of these funds varies from year to year, depending upon the returns from the federal excise tax and the amount carried over from the previous year. Funds not entirely used in any one year may be carried over for one subsequent year before they revert to the Federal Government.

It was also the full intent to permit use of these funds to encourage basic research.

Section 400 of the Fish and Game Code authorizes the acceptance of the federal funds and further provides that . . . "no funds accruing to the State of California from license fees paid by hunters shall be diverted for any other purpose than the administration of the Department of Fish and Game and for the protection, propagation, preservation, and investigation of fish and game."

---

a Reported as an expenditure in the budgets to which salaries were pro rated.

EXPENDITURE DETAIL BY PROJECT—Continued

GAME HABITAT DEVELOPMENT

Upland game and big game habitat is developed and maintained under this project. Efforts are devoted to:

Development—provide cover, water and feed for game by spring development, guzzler construction, control burning, and range seeding ---------- 65%

Maintenance—maintain water developments and access roads and equipment ---------- 21%

Management—construct access roads, operate co-operative hunting areas, conduct special hunts, and gather game data in order to make recommendations for setting seasons and bag limits ---------- 14%

WATERFOWL INVESTIGATION AND MANAGEMENT

This project provides for detailed surveys and evaluation of waterfowl migration, breeding areas, and wintering areas. Compiled data is utilized for efficient management of waterfowl. The development of practical techniques for marshlands management for waterfowl use is also a goal. Included in this project are:

Investigations—trap, band, and analyze band returns to determine migration patterns, mortality rates, and population turnover; establish methods of growing natural foods and increasing waterfowl use of marsh areas; establish extent of annual vernal plants by waterfowl; analyze data and write reports of investigations ____________88%

Management—make periodic censuses on breeding areas and wintering grounds to determine population changes; make reports on status of waterfowl populations for Pacific Flyway Committee as the basis for recommending seasons and bag limits to the Fish and Wildlife Service; make bag check on annual game take and make recommendations to waterfowl management area managers as to marshlands management procedures__12%

UPLAND GAME INVESTIGATION AND MANAGEMENT

Under this project statewide surveys are conducted to determine the distribution, numbers, and habitat needs of the various upland game bird species pertinent to setting proper seasons and bag limits and for other management purposes. Project activities include:

Investigations—determine pre-nesting population of mourning doves; determine post-breeding season of pigeon population; determine population trends of resident upland game; trap and band pheasants to determine population changes, percent harvest, and effects of agricultural changes; select release sites and release exotic game birds and obtain follow-up information on such releases; analyze and write up data previously collected on pheasants ____________83%

Management—determine hunting pressure and harvest trends on upland game; compile statistics on various types of upland game hunting programs, prepare a leaflet on habitat development of valley quail; and advise regions of upland game matters and prepare special reports ____________17%

FISHERIES MANAGEMENT (Dingell-Johnson)

Federal aid in fish restoration is carried on under the Dingell-Johnson Act, which became effective in 1952. The funds allocated to the states are derived from the federal excise tax levied upon sport fishing tackle and equipment, and activities so financed are limited to the improvement of sport fishing. The states contribute 25 percent of the project costs.

California is one of 6 states which are able to conduct Dingell-Johnson financed work on marine or anadromous species because of the extensive sport fishery which is based upon at least 20 marine fishes.

The department's policy in suballotting the federal aid funds to marine projects and to inland or fresh water projects (including salmon and steelhead) has been to base the split upon the ratio of fishing days in coastal waters including bays and estuaries to the number of fishing days in inland waters as determined by sampling surveys. The ratios are revised occa-

DEPARTMENT OF FISH AND GAME—Continued

Game and Fish Management in Co-operation With the Federal Government—Continued

FISHERIES MANAGEMENT (Dingell-Johnson)—Continued

sionally. This results in a present annual apportionment of approximately 28 percent of the federal aid program to projects operated in conjunction with the Marine Resources Operation. This basis is a practical, workable method for making such a division of funds. Unusual or emergency conditions may give rise to a greater need for research or management and development on marine sport fisheries, in which event an adjustment to this ratio may be desirable to meet this emergency. Such an adjustment between the 3 projects currently conducted in conjunction with marine resources has recently been effected.

All of the department's federal aid to fisheries projects come under the general administrative supervision of a coordinator stationed at Sacramento headquarters. One project leader is stationed at the headquarters for Northern California investigations at Stanford; 2 project leaders are located at Terminal Island. Each project leader is subject to a chain of supervision, beginning with the supervisor of Northern California investigations at Stanford and the equivalent supervisory position at Terminal Island. Combined supervisory authority is vested in the manager of Marine Resources Operations at Terminal Island. Ultimately the projects come within the administrative responsibility of the above-mentioned federal aid coordinator at Sacramento. There is further intermediate technical direction of marine federal aid projects by a marine resources operations coordinator, located at Terminal Island. The U. S. Fish and Wildlife Service, in monitoring the program, will look to the headquarters coordinator, not the Marine Resources Operations.

The federal aid projects are subject to requirement for periodic quarterly reports of progress. This is a more rigid standard of reporting than is applied to the normal marine resources projects.

Section 401 of the Fish and Game Code authorizes the acceptance of these funds and further provides that . . . "no funds accruing to the State of California from license fees paid by fishermen shall be diverted for any other purpose than the administration of the Department of Fish and Game and for the protection, propagation, preservation, and investigation of fish and game."

Two projects are to be completed in 1961-62: Trout Management and Barracuda and White Bass Management studies. Two new projects are proposed in 1962-63. One of these is the Southern California Marine Sport Fish Survey. This project will provide data necessary to the management of this fishery. The other project is the Lake Tahoe Fisheries Study which has been financed in support for two years but is better oriented to Dingell-Johnson research.

STREAM AND LAKE IMPROVEMENT

The purpose of this statewide project is to increase the yield of sport fishes through the restoration and improvement of habitat, as well as the development of access. During the 1962-63 fiscal year it is estimated that the program will receive the following emphasis:

Habitat improvement by removal of barriers to migrati fish 29

Construction and evaluation of stream and lake improvemen devices 7

Habitat improvement by control of undesirable fish populatio and aquatic plants 60

Improvement and maintenance of existing structures 4

STURGEON AND STRIPED BASS STUDY

The main purpose of this project is to follow trends in the State's important striped bass fishery in order to provide adequate regulation of the take. All investigational work and virtually all striped bass and sturgeon management functions fall within the scope of this project. During the 1962-63 fiscal year it is estimated that the various phases of the project will receive the following emphasis:

Analysis of tag returns to determine angler harvest, mortality rate, and migrational patterns of striped bass 15%

Creel census to obtain measurements of angler success, composition of the catch, and total catch during each of the major striped bass fishing seasons 20%

Carrying out and analyzing the annual tow net survey of striped bass in order to obtain an index of spawning success, and analysis of past tow net data 15%

Analysis of striped bass party boat catch records to obtain angler success and abundance 5%

Striped bass food habits studies 15%

Development of methods for capturing yearling and 2-year-old bass 5%

Study of factors controlling survival of striped bass eggs and larvae 10%

Other miscellaneous striped bass studies 10%

Miscellaneous work on sturgeon 5%

COASTAL STREAMS ANADROMOUS TROUT AND SALMON STUDY

The purpose of this study is to determine the most effective means of maintaining and increasing runs of salmon and steelhead in coastal streams. During the 1962-63 fiscal year it is estimated that the different phases of the project will receive the following emphasis:

Evaluation of the results of stocking yearling of steelhead and silver salmon in coastal streams ______________________40%

Obtaining the basic facts necessary for sound regulation of the salmon and steelhead fishing on coastal streams. This includes determination of the time of downstream migration of yearling fish, sizes and abundance of juvenile fish at different times of the year, and angling pressures on the streams __ 20%

Evaluation of the effects of logging activities on the anadromous trout and salmon fisheries of the north-coastal area 20%

Investigation of stream flow and gravel requirements for the successful spawning of salmon and steelhead ____________10%

Participation in the annual salmon and steelhead spawning inventories in north-coastal streams ____________________10%

NORTHERN CALIFORNIA MARINE SPORT FISH SURVEY

The purpose of this project was to determine angler use, make estimates of total catch, and compare the relative importance of the different sport fish species taken by ocean anglers in the area from Point Concepcion to the Oregon border. Different sport fisheries were studied such as that done from party boats, skiffs, piers, shore, and skin diving. Comparisons were also made of the importance of the species landed in the sport and commercial catches in order to determine the interfishery competition. This project terminated on June 30, 1961 and was replaced by the Blue Rockfish management study.

BARRACUDA AND WHITE SEA BASS MANAGEMENT STUDY

The purpose of this study was to obtain data on the abundance, distribution, range, and life history of barracuda and white sea bass in order to institute proper management practices. During the 1961-62 fiscal year it is estimated that the program received the following emphasis:

Analysis of tag recoveries to determine movement, rate of exploitation, and distribution of barracuda and white sea bass ____ 10%

Biological studies including age, and rate of growth, maturity and fecundity, food habits, and racial studies____________ 60%

Maintenance and analysis of catch statistics of both species ____ 5%

Collection and analysis of oceanographic data in order to evaluate these data with respect to barracuda and white sea bass ____ 5%

Sampling the sport and commercial catches to learn their age and size composition, and to obtain material for biological studies ____ 20%

This project will terminate June 30, 1962, with some of the white sea bass work carrying over to the new Southern California Marine Sport Fish Survey.

EXPENDITURE DETAIL BY PROJECT—Continued

OCEAN FISH HABITAT DEVELOPMENT

The purpose of this study is to increase the yield of marine sport fishes through the development, testing, and application of methods for the restoration and improvement of their environment. During the 1962-63 fiscal year it is estimated that the program will receive the following emphasis:

Evaluation of devices designed to increase and concentrate marine sport fishes in order to improve the angler harvest. Scuttled ships, boats, old car bodies, rock, concrete rubble, and other objects and material have been used to create artificial fishing banks. This is done principally through underwater observations by diver-biologists ________ 80%

Establish new kelp beds on artificial fishing banks and on existing apparently suitable areas where kelp beds are absent_ 10%

Miscellaneous development work including obtaining of access areas, introduction and transplantation of fishes, and related work ________ 10%

EXPERIMENTAL MANAGEMENT OF WARMWATER RESERVOIRS

The objectives of this project are to develop and evaluate effective management techniques that will maintain good fishing in new warmwater impoundments such as Lake Berryessa, Folsom Lake, and Nacimiento Reservoir; and raise production and/or yields of game fishes in older reservoirs such as Millerton and Shasta lakes. Typical warmwater reservoirs will be used as test waters. During the 1962-63 fiscal year the following emphasis will be placed:

Thorough study of the warmwater fishery of Folsom Lake includes measurements of angler catch, mortality rate, growth rate, and determining the role of rough fish and threadfin shad. It is expected that the threadfin shad will be introduced as a forage species during the 1961-62 fiscal year________ 40%

Evaluation of the effect of partial clearance of reservoir basins on angler catch________ 20%

Development of methods for sampling warmwater fishes. This will include use of SCUBA diving, electrofishing, trap netting, gill netting, and use of chemicals ________ 40%

BLUE ROCKFISH MANAGEMENT STUDY

The Dingell-Johnson Project F12R, Northern California Marine Sport Fish Survey project which terminates June 30, 1961, revealed that about one-half of the annual party boat and skiff catch from Bodega Bay to Avila is made up of 1 species—the Blue Rockfish. In view of the overall importance of this species and the fact that so very little is known of its life history, this project is being started to provide the necessary information for proper management. During the 1962-63 fiscal year, it is estimated that the different phases of the project will receive the following emphasis:

Biological studies including rate of growth, spawning seasons, spawning areas, food habits, and age compositions of the population or populations________ 15%

Tagging and analysis of tag recoveries to determine migration patterns and rate of exploitation________ 25%

Sampling the sport catch to determine angler success and to collect material for biological studies________ 40%

Maintenance and analysis of catch statistics on blue rockfish and other bottomfish, including the important ling cod in the key fishing areas of Bodega Bay, Princeton, Santa Cruz, Morro Bay, and Avila________ 20%

EXPENDITURE DETAIL BY PROJECT—Continued

SOUTHERN CALIFORNIA MARINE SPORT FISH SURVEY

The purpose of this new project is to provide data necessary for the management of Southern California marine sportfishes. The area to be covered will extend from United States-Mexican boundary to Point Concepcion, including the marine waters around the offshore islands. Research on the white sea bass, begun under the Barracuda and White Sea Bass Management Study, will be completed on this new project. During 1962-63 it is estimated that the program will receive the following emphasis:

Studies on abundance, harvest, range, and life history of the white sea bass 25%

Sampling of Southern California marine sport catch. This sampling will be designed to obtain total catch, species composition, and angler use. Fishermen fishing from private boats, piers, shore, and by skin diving will be interviewed 50%

Collection of data for life history studies on important species other than white sea bass 10%

Determination of the relative value of Southern California marine sport fishing to other fisheries and recreational pursuits and the degree of competition for the same species of fishery sport and commercial interests 15%

LAKE TAHOE FISHERIES STUDY

This study was begun in 1960-61, and was financed solely from the Fish and Game Preservation Fund for the first 2 years. It is being transferred to federal aid to relieve the regular support budget and because it is well suited for inclusion as a Dingell-Johnson research project. The purpose of this project is to test methods of improving angling at Lake Tahoe. One method is the experimental planting of large numbers of trout of various species and strains. To evaluate these plants and to provide background data for future test methods, a creel census program has been instituted. So little is known about aquatic life at Lake Tahoe that a broad life history study of fishes and invertebrates is planned. These studies will help establish a base line and may reveal leads on factors preventing game fish populations from increasing. During 1962-63 fiscal year it is estimated that the various phases of the project will receive the following emphasis:

Creel census to establish base line and to evaluate fish plants 30%

Experimental fish planting 15%

Age and growth rates of important game fishes 20%

Tributary stream studies designed to show the contribution natural reproduction in tributary streams is making to the Tahoe fishery and also to reveal possible methods for increasing natural production in the tributaries 25%

Miscellaneous life history studies 10%

GENERAL ANALYSIS

Objectives

Objectives of the Marine Research Committee are the development of commercial fisheries of the Pacific Ocean and of marine products susceptible to being made available to the people of this State.

Program and Performance

Research projects are selected by the 9-member committee which includes 5 members actively engaged in the sardine industry, at least 1 representative of organized sportsmen's groups, and at least 1 representative of organized labor.

Research is financed from a privilege tax of 5 cents per 100 pounds of sardines, Pacific and jack mackerel, squid, herring, and anchovies. Under provisions of Section 8046, amended, Fish and Game Code, the privilege tax will expire December 31, 1963.

Carrying out of research projects selected by the committee is accomplished by contracting with other public and private agencies. The principal agencies whose services are utilized are the United States Fish and Wildlife Service, Scripps Institute of Oceanography, and the Department of Fish and Game.

Principal research and investigations sponsored by the committee have concerned the Pacific Sardine Fishery which declined to a very low ebb in 1947-48. It was during this period the Marine Research Committee was formed by the Legislature. The committee has devoted a major share of its revenue to sardine investigations in an effort to restore this fishery.

In addition to sardine research, the committee sponsors research and investigations of mackerel, anchovy, herring and related species; studies of oceanographic factors, including food habits, relating to the life history of these fish; and assesses the abundance and distribution of the various species.

The budget proposed for 1962-63 continues these investigations and research projects at a level commensurate with available funds.

Staff assistance to the committee is provided by contract with the Department of Fish and Game.

GENERAL ANALYSIS

Objectives

Under provisions of the Wildlife Conservation Law of 1947 the board is authorized to acquire, restore, and maintain in a high state of productivity areas which can successfully sustain wildlife and provide adequate and suitable recreation for the people of the State. To accomplish this end the board may study and investigate suggested programs.

Program and Performance

The board is composed of the Director of Finance, the Director of Fish and Game and the President of the Fish and Game Commission. The board is advised by a joint interim investigating committee consisting of 3 Members of the Senate and 3 Members of the Assembly. Annually $750,000 is transferred to the Wildlife Restoration Fund from license fees collected for conducting horse races. The board is charged with the administration of this fund.

Through its staff the board conducts necessary investigations and studies to determine the areas within the State most essential and suitable for wildlife production and preservation and which will provide recreational advantages.

As a result of such studies the board determines which lands or rights in lands or water should be acquired by the State to effectuate the wildlife conservation and recreation program. After acquisition and completion of such development and facilities as are necessary for the purpose for which the lands were acquired, the areas are managed and maintained by the Department of Fish and Game. The department is authorized to contract with other public agencies for such construction, management or maintenance.

GENERAL ANALYSIS

Objectives

The Department of Parks and Recreation was created by Chapter 2037, Statutes of 1961. This statute likewise abolished the Department of Natural Resources. The new department consists of 3 statutory divisions: the Division of Beaches and Parks, Division of Recreation, and the Division of Small Craft Harbors. To provide administrative services for these divisions, a Division of Administrative Services was created.

The objectives of the new department are to stimulate as well as provide recreational facilities for the use and enjoyment of the people of the State.

Program and Performance

The program is carried on by the 3 statutory divisions of the department. The Division of Administrative Services will provide personnel, fiscal, and general office services and organizational and procedural analysis to the program divisions.

The Division of Beaches and Parks acquires, develops, and operates recreation units of statewide significance as well as preserves noteworthy or significant scenic and historic areas of the State.

The Division of Recreation, with the recommendation of the Recreation Commission, develops policy and program for assisting and co-ordinating recreation programs of other levels of government and private enterprise.

The Division of Small Craft Harbors, together with the Small Craft Harbors Commission, assists local government and harbor districts in the development of small craft harbors and waterways. Beginning on July 1, 1962, small craft registration will be transferred to this division from the Department of Motor Vehicles in accordance with Chapter 2132, Statutes of 1961. Other programs in boating safety education, harbor of refuge planning, and review of local boating ordinances are proposed for implementation in 1962-63 as a result of legislation passed at the 1961 legislative session.

Specific program and performance information relative to each division's activities are shown in the budget presentation for each division.

DIVISION OF ADMINISTRATIVE SERVICES

Objectives

With the creation of the Department of Parks and Recreation by Chapter 2037, Statutes of 1961, the Division of Administrative Services was organized to provide staff services and office facilities for the director and to provide administrative services for the department's operations.

Program and Performance

This division, in addition to providing administrative and office services, assists the director through exercise of the review function with regard to the fiscal, budgetary, and personnel operations of the department.

The new director's office was organized in the current year with the establishment of 4.5 positions. The director's position and a secretary position are financed from savings made by various divisions of the former Department of Natural Resources while 2.5 staff positions were transferred from the former department.

The Administrative Services section will be staffed in the 1962-63 fiscal year mainly through transfer of 34 positions from the former Department of Natural Resources and the transfer and consolidation of the Division of Beaches and Parks' administrative service unit into this division. The administrative services are being provided by contract with the Department of Conservation in the current year.

Chapter 2132, Statutes of 1961, transferred boat registration from the Department of Motor Vehicles to this department's Division of Small Craft Harbors. The following positions are being added in Administrative Services to carry out the provisions of this statute: 1 accounting technician II, 1 intermediate typist-clerk, 1 senior tabulating machine operator, 4 key punch operators and 4.7 man-years of temporary help.

---

[a] A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals. For a statement of fund condition see Local Assistance for Public Works.

DIVISION OF BEACHES AND PARKS

Objectives

The State Park System is directly administered by this division through its headquarters office in Sacramento and district headquarters and field locations throughout the State. The 3 essential objectives of the State Park System are to acquire and develop those recreation areas that are of statewide importance, to preserve for public enjoyment and education outstanding scenic areas of the State, and to acquire, restore and preserve significant historic sites and buildings.

Program and Performance

The Director of Parks and Recreation is responsible for the administration of the program; however, general policies established by the State Park Commission provide guidance to the director and the chief of the division in the administration, protection, and development of the State Park System. The commission consists of 7 members appointed by the Governor with the advice and consent of the Senate for 4-year staggered terms.

---

[a] The staff for the new director's office is provided by a transfer of 2.5 positions from the Division of Administrative Services of the former Department of Natural Resources. One of these positions (shown as assistant to the director—planning) was reclassified to deputy director. In addition, 2 new positions (the director and secretary II) are financed from savings made by the various divisions of the old Department of Natural Resources.

[b] The staff for Administrative Services contains 32.7 positions transferred from Division of Beaches and Parks Administration, 34 positions transferred from Department of Conservation, Division of Administrative Services and 7 positions and 4.7 man-years of temporary help added to implement Chapter 2132, Statutes of 1961, which transferred boat registration from the Department of Motor Vehicles to the Division of Small Craft Harbors.

[c] Funds made available within each category through savings effected under "Agency Plan" of organization.

DEPARTMENT OF PARKS AND RECREATION—Continued

(Formerly Department of Natural Resources)

DIVISION OF BEACHES AND PARKS—Continued

Program and Performance—Continued

Major efforts of the division for the past several years have been on an extensive acquisition and development program established in 1956 and 1957. The workload of the division for the 1962-63 fiscal year is predicated upon a $6,000,000 development program along with a new acquisition program to be financed from bond funds. The details of the development program will be found in the Capital Outlay section.

The State Park System was previously funded from the State Beach and Park Fund. This special fund was abolished by Chapter 1878, Statutes of 1961 and beginning in the 1961-62 fiscal year the program is financed from the General Fund as supplemented by the revenue earned from service fees along with the proposed bond funding for the new acquisition pr gram.

The work of the division is divided into 4 functions: admi istration, technical services, operations and the Squaw Valle operation. The support budget for the 1962-63 fiscal year pr vides personnel, equipment, and operating funds for increase workload in the division. The addition of new developments an increased public use and attendance at existing parks, beache and historical monuments account for the principal budget i creases. Detail of the various program changes are reported i the program and performance for each function.

ADMINISTRATION

Program and Performance

The administration program includes the staff and funds for operations of the State Park Commission and the chief of the division. The divisional business management activities were formerly conducted by the administrative services section. However, this section has been consolidated into the Department of Parks and Recreation, Division of Administrative Services, a the result of a task force committee study of the provision o administrative services to the statutory divisions of the de partment.

TECHNICAL SERVICES

Program and Performance

Under the supervision of a deputy chief, this function includes the interpretive services unit; the acquisition section which negotiates for beach and park properties; the development section which plans and supervises the construction of public use facilities in state parks; and a new appraisal program unit. This new unit was established in the current year as a result of the recommendations contained in a Department of Finance survey. In keeping with the recommendations of this survey, the appraisal of proposed beaches and parks acquisitions will be performed to a greater extent by staff appraisers as opposed to independent appraisers. The staffing is based upon the acquisition workload and is fully reimbursed from the acquisition portions of the Capital Outlay appropriations.

OPERATIONS

Program and Performance

The operations function is composed of the district headquarters and the field services. For administrative and operational purposes, the State is divided into 6 districts under the general direction of a deputy chief. Each district is directly supervised by a district superintendent who is responsible for the operation and maintenance of state park facilities in his district for the beneficial use of the public. All matters pertaining to the staffing and operations of park units are administered and co-ordinated through the district headquarters. Districts are assisted in the historical and conservation fields and with the acquisition of property by divisional staff headquartered in Sacramento.

Field services includes the park unit supervisors, park ranger and park attendant staffs, and the various specialized technicians needed for continuing operation and maintenance of the State Park System. Types of facilities provided include ocean beaches, lakes and reservoirs, inland and mountain parks, historical monuments, and roadside rests.

The following additional positions with related operating expenses and equipment are proposed for the 1962-63 fiscal year to provide operating personnel necessary to staff new and existing state park units and facilities:

1. Initial development of new park areas:

New park areas which received development funds in the 1961-62 Budget will require staffing to provide recreational services to the public in the 1962-63 fiscal year. In order to staff the developments at San Elijo Beach State Park (San Diego County), 1 state park ranger III, 1 state park ranger II, 2 state park ranger I, 5 state park attendant, 1 junior intermediate stenographer, 24 man-months seasonal park aid, and 12 man-months seasonal lifeguard are proposed.

Hendy Woods State Park (Mendocino County) was budgeted for major development with the provision for 92 camp units and 25 picnic units along with utilities, roads and parking, sanitary facilities, and contact stations. The proposed staff for this workload is 1 state park ranger III, 1 state park ranger I, 2 state park attendant, and 4 man-months seasonal park aid.

A new unit was added to the State Park System in the 1961-62 fiscal year under the name of Julia Pfeiffer Burns State Park (Monterey County). This unit was a gift to the State and contains many high cost dwellings which will require protection from vandalism. Other features will require personnel to provide the necessary service to the public. For this unit, 1 state park ranger I and 1 state park attendant are proposed.

At Butano State Park (San Mateo County) in an area of heavy recreational demand, 90 camp units and related facilities are proposed in the 1962-63 Budget. Staffing of 1 state park ranger I and 8 man-months seasonal park aid is proposed for this unit when it opens in the 1962-63 fiscal year.

Alameda County Beach has become a state park in the 1961-62 fiscal year and already has developments on the land requiring staffing of 1 state park ranger II, 1 state park attendant, and 6 man-months seasonal park aid.

Three museums have been completed and will require minimal staffing to provide interpretive services for the public and maintenance of the facilities. At Marshall Gold Discovery Museum (El Dorado County) 1 historic guide is proposed; 1 state park naturalist II, and 1 janitor are proposed for Morro Bay Museum (San Luis Obispo County); and 1 historic guide and 6 man-months seasonal park aid are proposed for Donner Memorial Museum (Nevada and Placer County).

2. Additional development of existing park areas:

Additional recreational developments at several existi
park units, either completed in the 1961-62 fiscal year
to be completed in the 1962-63 fiscal year, will requi
additional staffing to serve the public need and to provi
protection and maintenance for the facilities. Leo Carri
Beach (Los Angeles County) has recently been provid
with an additional 40 campsites and related facilities. F
this increased workload 1 state park ranger I, 1 state pa
attendant, and 12 man-months seasonal park aid are pr
posed.

At McArthur-Burney Falls (Shasta County) 1 sta
park attendant and 14 man-months seasonal park aid a
proposed due to the addition of 66 camp and picnic uni
together with a combination building and 3 restroo
buildings.

A campground has been completed in the current ye
at New Brighton Beach (Santa Cruz County) and 2 sta
park attendants are proposed for the increased worklo
at this heavily used unit.

Pismo Beach (San Luis Obispo County) is another w
patronized beach area at which a 100-unit campgroun
roads and parking, and sanitary facilities were complete
Staffing of 1 state park ranger I, 2 state park attenda
and 18 man-months seasonal park aid are proposed for t
added facilities.

With the completion of 45 new camp units at Branna
Island (Sacramento County), 1 state park attendant
proposed to service the new units at this heavily used are

A new 150-unit camp development at Plumas-Eurel
State Park (Plumas County) will be completed in t
1962-63 fiscal year and 6 man-months of seasonal park a
is proposed.

Due to the addition of a 40-unit campground with sa
tary facilities at Caswell Memorial State Park (S
Joaquin County), 6 man-months of seasonal park aid
proposed.

The Mecca Beach campground at Salton Sea State Pa
(Riverside County) has been completed and 1 state pa
attendant will be required for necessary maintenance a
clean-up services.

3. Staffing for existing state historical monuments:

Additional personnel are proposed at 3 existing historic
monuments to handle workload increases due to additi
of facilities and to alleviate special operational problem

Opening of the new visitor center at Hearst-San Sime
(San Luis Obispo County) occasions the need for 1 janit
to service the center and the existing buildings. A speci
operational problem has arisen at Heart-San Simeon d
to the large size of the historic guide staff. At prese
there is not sufficient staffing for proper supervision a
co-ordination of the 17 permanent guide positions and t
larger number of seasonal guides hired for peak visit
loads resulting in difficulties in scheduling the guided tou
for visitors. A state park historian I is proposed to provi
the necessary supervision and co-ordination. Also, wi
nearly 50 permanent employees, and a larger numb
during the peak of the season, the state park ranger I
in charge and the state park ranger II, the assistant, ha
experienced a heavy adimnistrative workload. The additio
of a state park ranger III is proposed to provide top lev
assistance in handling this workload.

At Columbia Historic Monument (Tuolumne County)
total of 124 buildings have been restored. Besides t
monument superintendent, the present staff consists of
positions to handle public contact, maintenance, and othe

DIVISION OF BEACHES AND PARKS—Continued

OPERATIONS—Continued

Program and Performance—Continued

activities incidental to the operation of the monument. To assist with this workload 1 janitor and 12 man-months of seasonal park aid are proposed.

The only remaining construction work to be done at the San Francisco Maritime Museum is the completion of the pier rehabilitation and mooring of the ships at the pier. A number of positions have been provided in the Capital Outlay funds to complete the restoration of the ships. Some of these positions have required special knowledge of the ships of the period. In order to provide continuing maintenance for the ships and facilities, and to provide interpretive services for visitors to the museum, 1 boatswain-deckmaster and 5 deck hands are proposed to be transferred from Capital Outlay to support as permanent maintenance staff. In addition, 2 state park attendants are proposed to provide fee collection and clean-up services.

4. Other staffing proposals:

The permanent position of lifeguard supervisor proposed is in lieu of 12 man-months seasonal lifeguard supervisor which is proposed to be abolished. This is to provide continuity of services for the year-round beach activity in District 6—Southern California area.

The 10.8 positions authorized in the 1961-62 Budget for operation of Ocean Beach (San Diego County) are proposed to be abolished in the current year.

This beach, which is principally owned by the City of San Diego, was originally scheduled to be turned over to the State for development and operation. In order that recreational facilities can be immediately made available to the citizens of this large metropolitan area, the decision was made that the State provide the development. Owing to the heavy drain on operation funds necessitated by the State Park System and since operation of metropolitan beach areas serve mainly the local area, it was decided that once developed Ocean Beach should be returned to the City of San Diego for operation.

SQUAW VALLEY

Program and Performance

The State provides custodial, maintenance, and fire protection services and certain utilities for this park area under the terms of concession agreements.

Three sanitary engineers and 1 institution fireman positions are proposed in lieu of the 48 man-months seasonal help presently authorized which is to be abolished. These positions ar requested on a permanent basis to provide the continuity o services necessary for the plant facilities and fire protectio operations in this park area.

DIVISION OF RECREATION

Objectives

The Division of Recreation, established as the Recreation Commission in 1947 by the Legislature and the Governor, became a division of the Department of Natural Resources by legislative act of 1959, and subsequently under the provisions of Chapter 2037, Statutes of 1961 became a division of the newly established Department of Parks and Recreation. The division chief, appointed by the Governor, serves at the pleasure of the director of the department. A 7-member citizen board of recreation commissioners, appointed by the Governor, advises the director and chief on matters of recreation policy. The commissioners serve for staggered 4-year terms.

The Chief of the Division of Recreation is administratively responsible to the Director of Parks and Recreation and has a field staff of 4 recreation specialists working out of a headquarters office in Sacramento and a field office in Los Angeles. This staff provides field services to communities throughout the State.

Program and Performance

The division and commission develop policy and program for assisting and co-ordinating recreation programs of other levels of government and private enterprise. Community recreation agencies call upon the division for advice, co-operation, aid, and encouragement in the use of or development of recreation facilities and programs for public benefit.

The division assists in developing standards for recreation personnel and the promotion of training programs for administrators and volunteer and employed recreation leaders. In addition, the division is authorized to make studies and surveys and long-range plans of recreational facilities and programs necessary to meet recreation needs throughout the State. It participates with federal, state, and local governmental agencies in advance planning with respect to the development and co-ordination of recreation facilities and programs to eliminate gaps and overlaps.

Studies are conducted by the division to collect data on the more than 300 local recreation agencies in California which employ a year-round administrator. An inventory of land and water areas suitable for outdoor recreation as owned, leased or operated by local jurisdictions was prepared for the California Public Outdoor Recreation Plan Committee. A directory of recreation and park officials in federal, state, and local agencies in California is published annually.

The work program proposed for the budget year contemplates continuation of the present level of service.

DIVISION OF SMALL CRAFT HARBORS

Objectives

The division was created by Chapter 2362, Statutes of 1957 (Sections 5801 to 5882 of the Public Resources Code), to implement the State's small craft harbors program. The division may prepare plans for, and acquire, construct, develop and improve small craft harbors, facilities in connection therewith, and connecting waterways. Contained in these statutes is a directive to conduct studies or surveys to determine needs for harbor or boating facilities. The agency is to assist cities, counties, and harbor districts in small craft harbor and waterway developments. All financial assistance given by the division has been on a loan basis. Chapter 2101, Statutes of 1961 now authorizes the division and commission to make grants to local governmental units for launching facilities.

Chapter 1454, Statutes of 1959 provided for 4 related programs: small craft registration, accident reporting, equipping regulation, and operating regulation. Chapter 2132, Statutes of 1961 provided for the small craft harbor registration program to be accomplished by this division. Formerly the Department of Motor Vehicles had been providing this service.

Program and Performance

The general policies guiding the division are set by the 7-member Small Craft Harbors Commission. The commissioners are appointed by the Governor with the advice and consent of the Senate and they serve staggered 4-year terms.

The general operations of the division, consisting of the administrative staff and the engineering and economic analysis staff are funded from the Small Craft Harbor Revolving Fund. The boating regulations function has been funded through June 30, 1962 from the General Fund. It is now proposed to finance this function out of the Small Craft Harbor Revolving Fund in the 1962-63 fiscal year.

Funds have been provided administratively in the current year ($10,000) to accomplish a study to define more closely the amount of unrefunded gasoline tax funds accruing annually as a result of boat operation (ACR 47, 1961 Legislative Session). Currently $750,000 is estimated to be the amount from this source and is the specific amount appropriated continuously to the Small Craft Harbor Revolving Fund by Revenue and Taxation Code Section 8352(g).

In addition, a study has been funded in the current year ($30,000 from the Small Craft Harbor Revolving Fund) as set forth in ACR 48, 1961 Legislative Session to study the need for, location, and major components of coastal small craft harbors.

Related to this study is a program initiated by Chapter 2101, Statutes of 1961. This legislation authorizes the division to plan and/or construct or contract for planning and construction of nonrevenue producing features of coastal small craft harbors and to grant funds to local governmental units for small craft launching ramps. In order that the State might better procee in an orderly manner, the division was authorized to contrac for a study from the Small Craft Harbor Revolving Fund t identify these features in the 1961-62 fiscal year. To give effec to the initial phases of the planning and construction progra 1 economist, 2 engineers, 1 delineator, and 3 clerks are propose in the 1962-63 fiscal year also from the Small Craft Harbo Revolving Fund.

Chapter 2088, Statutes of 1961, authorizes the division t initiate a boating safety program. Two boating regulations representative positions and a clerk have been provided administratively in the current year. The total program for boating safety education proposed in 1962-63 includes 4 boating regulation representatives and 1 clerical position. This program is financed from the Small Craft Harbor Revolving Fund.

Chapter 609, Statutes of 1961, requires that local boating ordinances be submitted to the division for review prior to their adoption. One boating regulations representative was authorized administratively in the current year from the Small Craft Harbor Revolving Fund to handle this workload. This position is proposed for continuation in the 1962-63 fiscal year.

Chapter 2132, Statutes of 1961 transferred responsibility for small craft registration from the Department of Motor Vehicles to the Division of Small Craft Harbors, effective July 1, 1962. In order that the transition could take place with as little disruption as possible a small initial staff of 1 boating regulations representative and 4 clerical personnel were provided in the current year from the Small Craft Harbor Revolving Fund. These positions will be augmented in 1962-63 with 5 more clerical positions to carry forward the registration program and this program will be financed in 1962-63 entirely from the General Fund.

In addition to the foregoing, the program of the commission and the division is funded from a $5,000,000 advance from the Investment Fund (California Water Fund) which is available for construction loans. These funds were provided by Item 421.5, Budget Act of 1958. In addition the commission has an authorization to make loans from $10,000,000 to be derived from the sale of bonds under the provisions of the Harbor Development Bond Law of 1958.

To date the division has allocated the entire $5,000,000 advance from the Investment Fund (California Water Fund) for loans and has authorized 6 loans from the Small Craft Harbor Bond Fund. Of the authorized $10,000,000 issue, $6,000,000 has been sold to provide funds in the Small Craft Harbor Bond Fund. The detail for the loan programs is included in the Local Assistance section of this budget.

As a general program, the commission will continue to grant planning loans from the Small Craft Harbor Revolving Fund and construction loans from the balance of the $10,000,000 Harbor Development Bond Law of 1958.

[a] One associate harbor engineer position and 1 junior-intermediate stenographer position authorized to June 30, 1962, for a study of harbors of refuge pursuant to Assembly Concurrent Resolution 48, 1961 General Session.

[b] Two boating regulations representatives and 1 junior-intermediate stenographer were approved to June 30, 1962, to implement a program in boating safety education as provided by Chapter 2088, Statutes of 1961. One boating regulations representative was approved to June 30, 1962 to review and approve local boating ordinances as provided by Chapter 609, Statutes of 1961.

[c] One boating regulations representative, 1 senior clerk, 2 intermediate typist-clerk, and 1 intermediate clerk were approved for preliminary work in establishing a boating registration program as provided by Chapter 2132, Statutes of 1961.

[d] Includes 1 boating regulations representative, 1 senior clerk, and 2 intermediate typist-clerk continued from the current year and in addition 6 intermediate typist-clerk and 1.3 man-years of temporary help for boating registration under the provisions of Chapter 2132, Statutes of 1961.

GENERAL ANALYSIS

Objectives

The Department of Public Health, in co-operation with local health departments, is responsible for the prevention of disease and the provision of a healthful environment for the people of California.

Program and Performance

The department has fully implemented the program for migratory agricultural workers authorized by the legislature with the establishment of 11 programs in local areas. Venereal disease, infectious hepatitis, and occupational diseases continue to show increases indicating the necessity for continued effort in control of these diseases. The program begun last year and authorized for continuance in the current year for providing better care in nursing homes is progressing satisfactorily.

Air pollution continues to be a major public health problem in California. During the past year standards were set for the smog producing emissions from crankcases. The department continues to work closely with the Motor Vehicle Pollution Control Board.

The department is continuing its program of providing consultative services to local health departments particularly in the fields of maternal and child health, tuberculosis, public health nursing, and social work, mental health, nutrition, vector control, and dental health. Field studies and consultation are provided in industrial disease, chronic disease, and water and sewage sanitation, and disposal of radiological wastes.

The vital records program provides registration and certified copies of birth, death, and marriage records.

A Crippled Children Program is operated in co-operation with local health and welfare departments. This program is partially supported by a state subvention and provides medical care for crippled children whose parents are unable to provide needed services. It now includes nephrosis and residual effects of polio.

Licensing programs are operated for hospitals, laboratories and laboratory technicians, audiometrists, canneries, and a number of related food producing establishments.

The Food and Drug Inspection Program continues to provide protection from adulterated foods, drugs, and beverages including a program initiated by the 1961 legislature for the control of hazardous substances and cosmetics.

The Health Education Program stimulates education in the health field by consultation to departmental staff and local agencies and the development of media.

The 1962-63 Budget proposes 15.5 new positions. Of these positions 5.5 are based on workload, 4.5, in the Division of Administration, and one in the Division of Research. The other 10 provides services in connection with new programs authorized by the 1961 Legislature, and are discussed under the appropriate divisions.

Five positions were created administratively during the current year in order to implement the regional hospital planning program enacted by Chapter 1754, Statutes of 1961. These positions are proposed for continuation in the budget year and are shown as proposed new positions.

Three positions are proposed to provide services in connection with the divorce and annulment registry. This activity will be self-supporting since the revenues to be received will equal or exceed the cost of services to be provided.

Two positions were created administratively during the current year in order to provide staff services for the Co-ordinating Council on Programs for Handicapped Children as enacted by Chapter 472, Statutes of 1961. These positions are proposed for continuation in the budget year, and are shown as proposed new positions.

Two expanded programs are being initiated in the field of air sanitation. The first is designed to improve air quality standards. Studies will be directed toward refining standards for atmospheric pollution as well as studies of motor vehicle emissions. The second program expansion would improve the present air monitoring network by the addition of monitoring stations in new locations.

DIVISION OF ADMINISTRATION

Objectives

The Division of Administration includes the Director's Office, Bureau of Business Management, Bureau of Personnel and Training, Bureau of Vital Statistics and Data Processing, and Management Analysis. It provides administrative direction and staff services for the department, and consultation to local health departments in these functions.

---

[a] Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF PUBLIC HEALTH—Continued

DIVISION OF ADMINISTRATION—Continued

Program and Performance

Business services for the department are centralized in the Bureau of Business Management. They include general administrative and operative services, stockroom, mail and messenger service, operation of building and telephone switchboard, accounting, budget preparation and control, licensing, purchasing, a car pool of specialized vehicles, field audit of public health subvention programs, and fiscal consultation to local governmental agencies on subventions.

The Bureau of Personnel and Training has a dual responsibility: first, to develop and administer a comprehensive personnel management program, second, to initiate and carry out a training program.

The Management Analysis unit is responsible for review of systems and procedures, and establishment of workloads and staffing patterns within the department.

The Bureau of Vital Statistics and Data Processing provides direction and assistance as well as related processing services in the development of public health records and vital statistics. This unit provides service to local health agencies as well as units of the department, and includes the preparation of special interpretive reports, analysis of statistical data relating to births, deaths, marriages, population, and data processing consultation to specific programs.

A total of 7.5 new positions is proposed for the division.

In the Bureau of Business Management, 1 janitor, 1 stock clerk, and 1 typist-clerk, are required to provide housekeeping services for additional special projects financed with funds from the National Institutes of Health. The cost of these additional services and of other increased operating expenses in the Division of Administration, are offset by anticipated increase in reimbursement made by the special projects.

Hospital construction aid continues at a high level, and this program and the necessity for auditing subvention programs by the department, result in the need for the continuation of the additional auditor authorized in the current year.

In the Bureau of Personnel and Training, 1-half-time additional clerical position is proposed to meet the increased workload resulting from expanding special projects. This position will be financed from anticipated increased reimbursements from special projects.

In the Bureau of Vital Statistics and Data Processing, 1 tabulating machine operator, 1 key punch operator, and 1 clerical position are proposed to provide services in connection with the divorce and annulment registry enacted by Chapter 1722, Statutes of 1961. Initiation of this service will result in the anticipated increased revenues for the General Fund of $25,000 per year.

[a] Positions temporarily approved in the 1959-60 and 1960-61 fiscal years only to perform studies on medical aid and health for Governor's Committee on Medical Aid.

[b] Public information officer I position transferred from Bureau of Health Education in 1960-61 due to transfer of the public information activity to Division of Administration. Reclassified as public information officer II.

[c] Increase in 1962-63 fiscal year is to meet anticipated workload related to general legislative session.

[d] One position authorized to June 30, 1962 only in accordance with 1961-62 budget.

[e] Five positions transferred from other units in 1960-61 due to reorganization of clerical activity in Los Angeles offices: 2 from Bureau of Sanitary Engineering, 1 from Bureau of Chronic Disease Control, 1 from Bureau of Maternal and Child Health, and 1 from Bureau of Hospitals.

[f] One-half time position temporarily approved in the 1961-62 fiscal year and financed by reimbursement from federal funds. Continuance of the position in 1962-63 shown under "Proposed New Positions."

[a] Ten positions transferred to the Division of Research in 1960-61 due to the centralization of research service activity in that new division. Following positions transferred: 4 associate public health analyst, 3 assistant public health analyst, 1 junior public health analyst, and 2 junior-intermediate typist-clerk.

[b] Funds made available within each category through savings effected under "Agency Plan" of organization.

DEPARTMENT OF PUBLIC HEALTH—Continued

DIVISION OF ALCOHOLIC REHABILITATION

Objectives

This division engages in the demonstration treatment and rehabilitation of alcoholics. All phases of the rehabilitation of alcoholics are investigated and studied as well as all factors necessary to the reduction and prevention of chronic alcoholism and other excessive uses of alcohol.

Program and Performance

The present program consists of research, education, and demonstration treatment. Research is conducted both by state staff and other agencies under contract in the following areas:

1. Experimental methods of treating alcoholics.
2. Follow-up studies to evaluate the effectiveness of treatment methods.
3. The nature of alcoholism and the metabolism of alcohol in the human body.
4. The cause of alcoholism.

Demonstration treatment of alcoholics is conducted through 7 pilot community clinics. Public information and education programs include the publication of a monthly bulletin, dissemination of appropriate information, distribution of pertinent literature, and sponsorship of training institutes. The demonstration projects for hospital care, recovery homes and detoxification centers, and the Long Beach clinic added by the 1961 Legislature are administered by this division but shown elsewhere in the budget.

DIVISION OF COMMUNITY HEALTH SERVICES

Objectives

This division has responsibility for integrating the policy and program objectives of the State Department of Public Health with those of the local health departments of the State, providing local health services (by contract) to areas without organized health departments, and for providing nursing, social work, and health education consultation and services to local health departments and other units of the State.

Program and Performance

Liaison is maintained with each of the individual local health departments, with the Conference of Local Health Officers and all other divisions and bureaus of this department. For small counties who do not maintain their own health departments a minimal public health program is operated under contract. The program for public health residency training is co-ordinated in this division. The Bureaus of Public Health Social Work, Public Health Nursing, and Health Education provide recruiting, training, consultation, technical, and administrative assistance to local health departments. Information and education services are furnished for the balance of the department.

DIVISION OF DENTAL HEALTH

Objectives

This division has responsibility for the administration of a program to protect and improve the dental health of the public.

Program and Performance

The program is implemented by advisory and consultative services to local health departments, and community groups, agencies and educational institutions; epidemiological studies of dental diseases; and promotion of training, clinical facilities, water fluoridation, and other public health preventive measures.

DIVISION OF ENVIRONMENTAL SANITATION

Objectives

This division has the primary responsibility for the services necessary to provide a healthful environment for the people of California.

Program and Performance

The division consists of: Bureau of Radiological Health, Bureau of Air Sanitation, Bureau of Sanitary Engineering, Bureau of Vector Control, and Bureau of Food and Drug Inspection, including a cannery inspection section.

The Bureau of Radiological Health has been established to bring together all activities concerned with radiation. These include maintenance of environmental surveillance of radiation sources, collection of data and interpretation of significant fluctuations in radiation levels, observation of radiation users facilities and practices, assisting in site location, and other safety factors of reactor developments, and registration of all radiation sources.

The Bureau of Sanitary Engineering administers a program of consultation, inspection, and regulation in the fields of sew-

DIVISION OF ENVIRONMENTAL SANITATION—Continued

Program and Performance—Continued

age disposal, industrial waste disposal, water supply, sanitation of bathing places and recreational areas, and water contamination, inspection of radioactive waste sources, and evaluation of the public health aspects of waste disposal and use of isotope tracers.

The program of the Bureau of Air Sanitation includes investigation of the effects of air pollution, assistance to local agencies in the measurement and control of air pollution and its effects, establishment of standards for maximum allowable contaminants in motor vehicle exhaust, and establishment of standards for quality of ambient air. An air monitoring network is maintained in co-operation with local air pollution authorities.

The Bureau of Food and Drug Inspection insures the purity of foods and drugs in California by an inspection program of the manufacturing, wholesale, and retail outlets throughout the State. This program not only removes particular lots of foods and drugs from consumer channels, but operates to provide a long-range program of correction and prevention of unsatisfactory environmental conditions. It also has responsibility for enforcement of kosher food labeling and investigates fraudulent cancer cure devices.

Canneries are licensed and inspected to provide sanitary operation and prevent the occurrence of botulism.

A field program is maintained by the Bureau of Vector Control to stimulate adequate local vector control programs; endemic surveys are conducted to determine the existence of vector-borne disease hazards and control techniques; and methods and equipment are evaluated and demonstrated.

DIVISION OF LABORATORIES

Objectives

This division provides laboratory services to the department and to local areas without laboratories, consultation, investigation and reference service for local laboratories, and regulation of laboratories and laboratory technicians.

Program and Performance

Individual laboratories are maintained in the fields of sanitation and radiation, industrial hygiene and air pollution, food and drug, viral and rickettsial diseases, and microbiology.

The field services section provides consultation, inspection, and licensing of hospital, clinical and local health department laboratories, laboratories using animals, firms producing biologics, and bone and artery banks.

DIVISION OF PREVENTIVE MEDICAL SERVICES

Objectives

The Division of Preventive Medical Services is responsible for the medical, hospital, and other services necessary for the prevention of disease.

Program and Performance

The division consists of 9 units: maternal and child health, crippled children services, communicable diseases, chronic disease control, prevention of blindness, occupational health, nutrition, mental health services, and hospitals.

A program of maternal and child health services includes studies and investigations of child health problems, and provides technical consultation to local health departments, hospitals, maternity homes, schools, physicians, and other professional groups.

The program for crippled children provides consultation and assistance to the counties in their operation of a crippled children's program including:

1. Establishment of standards for care and consultation in the maintenance of such standards.
2. Provision of funds for diagnosis and treatment.
3. Planning and consultation in the provision of treatment and rehabilitation services.

---

4. Maintenance of records on these children.

In the communicable disease field, surveillance is maintained of all communicable diseases which are significant to public health in California. Clinical and administrative consultation is provided to local agencies both on a routine and emergency basis, and epidemiological field investigations are conducted. Tuberculosis control is accomplished by a subsidy program to counties for assistance in the care of tuberculosis patients, and consultation in case finding, clinic, and nursing services.

The program in chronic disease control, including the investigation of the medical aspects of air pollution, consists of:

1. Consultation to local health agencies, hospitals, and private physicians with regard to preventive measures, and early identification of chronic diseases.
2. Demonstration and evaluation of specific chronic disease control services.
3. Epidemiologic investigations and special studies of the public health significance of chronic diseases.

The occupational health program of the department consists of:

1. Assistance to local health departments in developing preventive health programs for detecting, preventing, and correcting health hazards in industry.
2. Consultation and educational programs to professional, industrial, and labor groups interested in occupational study of industry-wide problems affecting large segments of working population.
3. Analysis of occupational health statistics.
4. Direct services to industry in study of occupational health hazards where other resources are not available.

Consultation and advisory services are provided to local and state health departments to help them to meet mental health problems associated with public health practices.

A subsidy program for the construction of general hospitals, nursing homes, diagnostic and treatment centers, chronic disease hospitals, and rehabilitation centers is administered by the Bureau of Hospitals. It also establishes standards for hospital and related facilities (including tuberculosis sanitariums), inspecting and licensing these institutions, and providing limited technical consultation to them.

A program is operated to improve care in nursing homes. A program to provide medical services for migratory agricultural workers is operated chiefly through locally operated temporary projects.

Technical and administrative assistance in nutrition services are provided local health agencies, as well as assistance in recruitment and training of staff.

An administrative assistant and a clerical position are proposed to provide services for the coordinating council for handicapped children authorized by Chapter 472, Statutes of 1961. Operation of this council will result in better coordination of the various departments offering services to handicapped children.

An additional assistant chief for the Bureau of Hospitals, a consultant in hospital planning, an architectural associate, and 2 clerical positions have been temporarily authorized during the current year and are proposed for continuation in the budget year to provide services in developing regional plans for hospitals. Chapter 1754, Statutes of 1961 authorized such plans in 2 regions of the State. The Department is to report to the 1963 legislature on the results of this program.

The administrative allowance for the crippled children subvention program was increased July 1, 1961. As a result, 3 additional counties are going independent during the current year. Seven clerical positions in the Bureau of Crippled Children Services are being abolished as a result of this workload decrease.

DIVISION OF RESEARCH

Objectives

This division is responsible for co-ordination of the research activities conducted by the department both with state funds and with funds from outside sources.

Program and Performance

The division of research stimulates an active and effective public health research program in California by:

1. Defining major unsolved health problems.
2. Assisting in the design of research proposals.
3. Co-ordinating requests for funds from other agencies.
4. Consultation and assistance in the operation of research projects.

One clerical position is proposed to provide services in connection with expanded special projects. This position will be financed completely from overhead charges made to these special projects.

MOTOR VEHICLE POLLUTION CONTROL BOARD

Objectives

The Motor Vehicle Pollution Control Board was established in the Department of Public Health under the provisions of Chapter 23, Statutes of 1960 and is responsible directly to the Governor. The board is composed of 13 members including the Director of Public Health, Director of Agriculture, Commissioner of the Highway Patrol, Director of Motor Vehicles, and 9 other members appointed by the Governor with consent of the Senate.

The board is charged with the responsibility to:

a. determine and publish the criteria for approval of motor vehicle pollution control devices;
b. issue certificates of approval for acceptable devices;
c. exempt certain classes of vehicles from compliance with Chapter 3, Division 20, Health and Safety Code.

Program and Performance

The provisions of the law requiring installation of control devices on vehicles specify a timetable which goes into effect only after the control board has certified 2 or more devices. When such devices are approved, they will be required as follows:

1. One year after certification date on all new vehicles registered in the State.
2. One year after the certification date on used motor vehicles upon transfer of registered owner.
3. After the second December 31, following the certification date on all used commercial vehicles.
4. After the third December 31, following the certification date on all vehicles.

The requirements for new vehicles will apply automatically throughout the State. The law allows boards of supervisors or air pollution control districts to determine whether control devices shall be required on used vehicles.

AIR SANITATION STANDARDS

Objectives

The objective of the program is the improvement of existing air quality standards. Studies will be directed toward refining standards for atmospheric pollution as well as studies of motor vehicle emissions.

Program and Performance

The existing standards were established on the basis of available information as related to hydrocarbon and carbon monoxide concentration measurement. It was subsequently learned that other compounds are equally significant in the photochemical reaction which causes smog. It was further learned that equal concentrations of hydrocarbons produce varying degrees of eye irritation and other harmful effects due to the activity of the specific compound within the hydrocarbon family. A program of intensive study is to be conducted in order to resolve these basic questions in order that a solid foundation may be laid for the State's air pollution control program.

Although the need for air quality standards is recognized to require long term preparation and maintenance, contractual services are initially proposed for the technical and scientific skills. This is done to take advantage of the available supply of existing information and technical ability at a minimal expenditure and to begin this program as soon as possible. The minimal staff of employees proposed here will be expanded in future years as needed by assimilation of contract personnel.

AIR QUALITY MONITORING

Objectives

The objective of this program is the improvement of the present air monitoring network by the addition of monitoring stations in new locations and the inclusion of additional air pollutants.

Program and Performance

The present air monitoring network was planned and developed prior to the establishment of standards for air quality and motor vehicle emissions. Current information on air sampling indicates the need to expand the number of tests and the scope of tests in order to evaluate the effectiveness of the State's motor vehicle pollution control program. This addition will provide equipment and personnel to expand the network to a total of 16 monitoring stations and will add the measurement of hydrocarbons and carbon monoxide. Provision is also made for data processing to more effectively evaluate information from the expanded network.

SPECIAL PROJECT ACTIVITIES

Objectives

Research, investigations, demonstrations, and special services of value to the development of the California public health program for which funds can be obtained from the Federal Government or private foundations are conducted by the department.

Program and Performance

Numerous organizations interested in furtherance of public health make funds available to the department, for activities not financed by the State. Each special activity must be related to public health needs in California or be related to investigations or research being conducted by the State. Projects finance by nonstate funds include overhead charges to reimburse th State for additional costs incurred. Expenditures and reimbursements are not included in budget totals.

Known activities are listed indicating the type of activit and source of funding. Since project fiscal years may not coincide with the state fiscal year, projects are assigned to the stat fiscal year which most nearly coincides with the project fisca year.

OFFICE OF THE DIRECTOR

Cancer Field Research (National Institutes of Health)

This grant provides the resources to conduct a general reserach program in the causes of cancer, through studies in human cancer epidemiology, cancer in animals, the connectio of viruses and cancer, and physical-chemical surveillance o the atmosphere for causative agents.

BUREAU OF VITAL STATISTICS AND DATA PROCESSING

Medical Certification Study (National Institutes of Health)

This is an evaluative study of the reliability and accuracy of medical and health data on certificates of death. It is being conducted to extend information available for general interpretation of mortality statistics and to develop a plan of actio for California to improve the quality of medical certification of death.

BUREAU OF MATERNAL AND CHILD HEALTH

Child Health Research Unit (Children's Bureau, Department of Health, Education, and Welfare)

This unit conducts studies of major child health problems, and provides technical assistance to state and local special studies. Current emphasis is on study of the distribution and quality of medical care for children, particularly care provided by public agencies.

Childhood Accidents (National Institutes of Health)

The frequency of medically attended injuries among a large population of children under 15 years is being investigated. This study is designed to determine whether certain personal and environmental factors are associated more with "accident" children than with "nonaccident" children.

Reproductive Loss (National Institutes of Health)

Methods are being sought for determining the relation between certain factors affecting pregnancy (particularly early stages), and the frequency of infant deaths and malformed children.

Maternal and Child Health Postgraduate Training (Children's Bureau, Department of Health, Education, and Welfare)

This was to enable the School of Public Health, University of California (Berkeley), to strengthen its curricula for all candidates for the master at Public Health degree, and to provide training grants for physicians and nurses wishing to specialize in maternal and child health or school health administration.

Kauai Pregnancy Study (Children's Bureau, Department of Health, Education and Welfare)

The University of California studied the incidence of feta deaths among all women on the island of Kauai, Hawaii. The medical, social, and psychological factors that may influence fetal deaths, premature births, and the factors and conditions associated with favorable pregnancies were investigated.

Mental Retardation Field Clinics (Children's Bureau, Department of Health, Education, and Welfare)

Field diagnostic services are provided for mentally retarded children in Southern California communities. Diagnostic techniques are being taught and local agencies encouraged to assume sponsorship of the clinics.

Berkeley Nutrition Project (Children's Bureau, Department of Health, Education, and Welfare)

This was a demonstration of the utility of a public health nutritionist in an urban health department; is also provided a training center for nutritionists.

Farm Labor Child Health (Children's Bureau, Department of Health, Education, and Welfare)

The Western Branch, American Public Health Association, will co-ordinate the efforts of health agencies in the Western States on health programs for seasonal agricultural workers and their families. The Western Branch will serve as an information center on current and past efforts in this field.

Seatbelt Study (National Institutes of Health)

A study of the attitudes affecting the public's acceptance of automobile safety belts. The principal investigator is currently conducting the childhood accidents project.

---

[a] Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF PUBLIC HEALTH—Continued

SPECIAL PROJECT ACTIVITIES—Continued

BUREAU OF CRIPPLED CHILDREN SERVICES

Congenital Heart Evaluation (Children's Bureau, Department of Health, Education and Welfare)

Crippled Children Services will devise methods to follow up children undergoing treatment for congenital heart diseases. This will enable them to evaluate the efficacy of treatment methods.

Regional Congenital Heart Program (Children's Bureau, Department of Health, Education, and Welfare)

Diagnosis and treatment are provided children with congenital heart disease in the western region. These services are furnished in California at centers where medical staff are continually developing and improving such diagnostic and treatment procedures; only in such centers can such service be made available to children in the less populous surrounding states.

Training Program for Audiologist (Children's Bureau, Department of Health, Education, and Welfare)

Stanford University's graduate training program in audiology is being strengthened to provide both more qualified audiologists and more teachers in the field. There is currently a shortage of both types of personnel.

John Tracy Clinic (Children's Bureau, Department of Health, Education, and Welfare)

The medical and audiological needs of preschool children with hearing defects are being explored in an attempt to re-examine diagnostic categories and develop appropriate audiological programs to fit them.

Prosthetics for Child Amputees (Children's Bureau, Department of Health, Education, and Welfare)

The School of Medicine, University of California (Los Angeles) conducts this project to prepare and evaluate prostheses suitable for the growing child, perform basic research in prosthetics, and disseminate findings through teaching and written material.

Crippled Children Administrators Conference (Children's Bureau, Department of Health, Education, and Welfare)

The conference provides crippled children program administrators in the western states an opportunity to discuss problems in administration common to the program.

BUREAU OF COMMUNICABLE DISEASES

Venereal Disease Casefinding (Communicable Disease Center, Public Health Service)

To counteract the rising number of cases of infectious venereal disease, casefinding and educational efforts have been increased in the State. The objectives are to demonstrate to private physicians and laboratories in local health jurisdictions, the importance of their co-operation with the health department in tracing contacts. In addition, educational material and films are being distributed to physicians, schools, and service organizations.

BUREAU OF CHRONIC DISEASE CONTROL

Cancer Chemotherapy (National Institutes of Health)

A data collection center for California's part in a national cancer chemotherapy evaluation program is provided. It is a part of the California Tumor Registry. Newly reported cases of cancer are registered, and previously reported cases are followed. Quality control is maintained on the abstracting of cases in hospitals; the necessary mechanical procedures are carried out to prepare punched cards for the Cancer Chemotherapy National Service Center. This provides basic data for many other cancer studies.

Human Population Laboratory (National Institutes of Health)

One population will be carefully defined for intensive study with attention focused on its personal characteristics and behavioral patterns to determine how these are related to the development of disease in this population. Studies of several chronic diseases and their interrelation are being made.

Cancer Monograph Tabulation (National Institutes of Health)

Tabulations, describing in detail some 200,000 cases of patients with neoplasms who were reported to the Tumor Registry, are being supplied to the Cancer End Results Program. This data is to allow correlation of variables such as age, sex, and treatment with the survival experience of the patients. A monograph based on this data is being prepared.

Cervical Cytology Methodology (Bureau of State Services, Public Health Service)

This is a study of methods to ascertain the extent of knowledge about, and the degree of usage of cervical cytology as a cancer detection device in the community.

Air Pollution Medical Conference (National Institutes of Health)

The conference will bring together annually persons doing research in the health effects of air pollution, to exchange information, and establish goals for new studies. The department conducted a similar conference on a smaller scale in prior years. The grant provides for the publication and distribution of the proceedings.

Air Pollution Time Series Analysis (National Institutes of Health)

The statistical methods of time series analyses, which have been successful in economics and business, are being adapted to the study of the effect of air pollution and weather phonomena on health.

Longshoremen Heart Study (Bureau of State Services, Public Health Services)

In co-operation with Kaiser Foundation Hospital and the International Longshoremen's and Warehousemen's Union, a follow-up multiphasic examination of a group of longshoremen is being conducted, to determine what tests and symptoms may lead to early detection of heart disease.

Area-Wide Tumor Registry (Bureau of State Services, Public Health Service)

A tumor registry which will report all cases in Alameda County is being established. This is to provide a pool of information on a concentrated population for use in epidemiologic studies of cancer.

Lead Study (Bureau of State Services, Public Health Service)

The amount of lead in blood and urine are being checked against the amount in the atmosphere, to determine the relationship of the two.

Effects of Inhaled Air Pollutants (National Institutes of Health)

This study has the aim of resolving certain problems in methods to be used in the study of associations between inhalation of polluted air and diseases of the respiratory system.

BUREAU OF NUTRITION

Obesity Study (National Institutes of Health)

This is a study with the object of developing accurate, nonlaboratory methods, for assessing obesity and caloric intake and expenditure, applicable to large-scale studies of morbidity and mortality.

BUREAU OF HOSPITALS

Hospital Utilization (National Institutes of Health)

A program on a statewide basis is being devised for the regular collection and evaluation of data relating to hospital utilization. The program which will be developed can be applied on a national basis; information collected to date by independent surveys, by official and private agencies, provides an inadequate factual basis for effective planning on a statewide and community basis.

SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS 60-61 (Filled)	NO. OF POSITIONS 61-62 (Auth.)	NO. OF POSITIONS 62-63 (Auth.)	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

SPECIAL PROJECT ACTIVITIES—Continued

DIVISION OF ALCOHOLIC REHABILITATION

Drinking Patterns (National Institutes of Health)

An exploratory study to develop valid methods of eliciting, measuring, and analyzing patterns of alcoholic beverage usage and associated conditions. The way in which alcoholic beverages are consumed; i.e. where, when, why, with whom, as well as the amount consumed, is to be studied with the intent of developing hypotheses which relate drinking patterns and attitude to socio-economic data, general health, and general parental marital, and cultural beliefs regarding alcoholic consumption.

DIVISION OF LABORATORIES

Viral Disease Study (National Institutes of Health)

A study of etiology, immunology and epidemiology of viral diseases. New means are being sought to diagnose viral diseases in order to facilitate epidemiological studies of them; the role of viruses in the causation of human diseases is being evaluated.

Encephalitis Study (Rockefeller Foundation)

A general study of arthropod-borne virus diseases is being conducted. Rodents and arthropods are being investigated as reservoirs of virus.

Influenza Project (Department of Army)

This study is concerned with the etiology and prophylaxis of viral respiratory disease in military recruits. As the importance of various etiologic agents is determined, vaccines will be developed or applied and their efficacy evaluated.

Influenza Supplement (National Institutes of Health)

Viral respiratory diseases are being investigated in conjunction with the Influenza Project described above.

Zincuria Study (National Institutes of Health)

A simplified technique for the early detection of liver damage through alcoholism is being developed by studying the amount of zinc excreted by the body under various conditions.

Fluorescent Antibody Technique (Bureau of State Services Public Health Service)

The State is to test and demonstrate a new technique. This is a nationwide project to bring about the use of new equipment giving rapid standard test results, for the identification of bacteria associated with rheumatic fever.

Enterovirus Sera Testing (National Institutes of Health)

Type-specific Enterovirus Immune Sera, produced in a laboratory outside the State, are to be tested and certified by us for the National Cancer Institute.

BUREAU OF SANITARY ENGINEERING

Water Quality Study (National Institutes of Health)

This is a study of the public acceptance of water with a high concentration of dissolved mineral solids. Potential new sources of water for drinking, particularly in arid areas, may have a high concentration of these minerals. Existing standards, based on past practices are not necessarily applicable to California water supplies.

BUREAU OF VECTOR CONTROL

Organo-phosphorous Resistant Mosquitoes (National Institutes of Health)

A study is being made of mosquitoes resistant to organo-phosphorous insecticides, which are the primary control agents at this time. The physiological basis for organo-phosphorous resistance is being sought by comparing strains of mosquitoes which are, and are not, resistant to such insecticides.

Blue-Green Algae (National Institutes of Health)

An inquiry into the toxic effect upon mosquito larvae of blue-green algae found in rice fields. The action and effect of this algae on mosquito larvae, and their nutritive requirements, are being studied to determine the feasibility of encouraging their growth to reduce the mosquito population.

Physiology of Mosquito Egg Hatching (National Institutes of Health)

The eggs of certain mosquitoes hatch under external stimulus. This is a study of the physiology of this phenomenon, in an attempt to find methods of interfering with or precipitating the stimulus, thereby controlling mosquitoes in the egg stage.

Biologic Control of Mosquitoes (National Institutes of Health)

Means of conducting germ warfare on mosquitoes are being sought. Some microbic parasites produce sickness and death in mosquitoes. By finding and fostering these parasites, it may be possible to devise a new and alternative method of controlling the mosquito population.

DIVISION OF DENTAL HEALTH

Dental Hypoplasias (National Institutes of Health)

The optimum levels of fluoride ion concentration in water supplies are being sought for different temperature zones. Concurrently, the distribution of dental caries among children in areas with varying fluoride levels is being described and compared.

BUREAU OF PUBLIC HEALTH SOCIAL WORK

Medical Social Work Training (Children's Bureau, Department of Health, Education, and Welfare)

Under this training program, more public health content is incorporated into the graduate study for the medical social worker at the University of California as well as a year of internship in a public health department under the supervision of a qualified medical social worker. Scholarship assistance is provided through stipends for graduate students, and internships for those continuing in public health.

Consultation in Public Health (National Institutes of Health)

Although consultation is widely used in public health, no attempt has been made to describe the process, or clearly define the limits of consultation. It is the aim of this project to delineate the process and indicate under what conditions it is most effective.

DEPARTMENT OF PUBLIC HEALTH—Continued

SPECIAL PROJECT ACTIVITIES—Continued

DIVISION OF RESEARCH

Administrative Research and Training (Kellogg Foundation)
Mechanisms designed to stimulate, promote, co-ordinate, and evaluate public health administrative research activities are developed and tested. In co-operation with other units in the department and with local agencies, the project director: encourages and co-ordinates administrative research activities: participates in existing studies in administrative research, giving consultation in project design and development; conducts administrative research. In co-operation with the Schools of Public Health, University of California, (Berkeley and Los Angeles) areas of study in public health administration valuable to student and faculty are sought.

Training Program for Epidemiologists (National Institutes of Health)
Persons from various professional disciplines receive practical training in epidemiology, as a supplement to academic studies, and an introduction to epidemiologic practice. A unique opportunity is also offered for participation in interdisciplinary study of public health problems in an operating health agency.

Training Program in Rehabilitation (Office of Vocational Rehabilitation)
This program is to provide training to a limited number of trainees in rehabilitation practices and techniques by acquainting them with the activities of such groups as the Vocational Rehabilitation Service, the Committee on Rehabilitation of the California Medical Association, and the rehabilitation programs of selected local health departments. Trainees are shown the methods for study of rehabilitation needs, programs, and problems.

GENERAL ANALYSIS

Objectives

The Highway Transportation Agency has responsibility for the overall administration of the following departments: Public Works, Motor Vehicles, and California Highway Patrol. The Highway Transportation Agency was created by Chapter 2073, Statutes of 1961; in effect on October 1, 1961.

Program and Performance

The Agency is under the supervision of an executive officer known as the Administrator of Highway Transportation who has the power of general supervision over, and is directly responsible to the Governor for, the operations of each department, office, and unit within the agency.

The administrator develops and reports to the Governor on legislative, budgetary, and administrative programs to accomplish comprehensive, long-range, co-ordinated planning and policy formulation in the matters of public interest related to the agency.

For the purpose of administration, the administrator reviews the organization of the agency and reports to the Governor on such changes as he deems necessary.

The current year budget is based on only 9 months of operations and reflects a minimum staffing for initial implementation of the new statute.

GENERAL ANALYSIS

Objectives

Departmental Administration has responsibility for the overall administration and direction of the Department of Public Works.

Program and Performance

The executive group consists of the director, a chief deputy, 2 other exempt deputies (1 for planning and 1 for management), and 2 assistant directors.

The director's office performs the primary functions of departmental policy formulation, co-ordination, and overall direction of the activities of the organization.

The director carries out the work of the department through broad delegations of authority to 4 division chiefs, each of whom is fully responsible to the director for the work in his division. Two of these division chiefs, the State Architect (Division of Architecture) and the State Highway Engineer (Division of Highways) are statutory positions heading statutory divisions, but most of the authority and responsibility they exercise is by delegation from the director. The other 2 division chiefs head divisions (Division of San Francisco Bay Toll Crossings and Division of Contracts and Rights-of-Way) which were created by order of the director, rather than by statute.

The director also exercises important policymaking respons bilities over the highway program as chairman of the Californi Highway Commission, to which the Legislature has given broa authority and responsibility. This includes determining the stat highway budget and the exact location of state highway route within legislative guidelines, and for authorizing condemnatio of property for highway use.

The director is also a member and secretary of the Californi Toll Bridge Authority, an ex-officio body which is concerne with the construction or acquisition of toll highway crossing and transportation facilities appurtenant thereto. The department provides all of the staff work for the authority.

Effective September 1961, the Division of Aeronautics wa placed by law in the Department of Public Works. However the State Aeronautics Board and the director of the division who serves at the pleasure of the board, have the full statutor authority and responsibility for this activity. The Division o Aeronautics is financed primarily by appropriation from th General Fund.

The State Highway Fund and the Division of Architectur Revolving Fund are charged on a pro rata basis for the entir cost of Departmental Administration.

GENERAL ANALYSIS

Objectives

Under the provisions of Chapter 2071, Statutes of 1961, the State Board of Aeronautics was created as successor to the Aeronautics Commission and the staff to the commission became the Division of Aeronautics, Department of Public Works.

The State Board of Aeronautics, which consists of 5 members appointed by the Governor for 4-year terms, provides planning, engineering, zoning, air safety and use (schools vs. airport noise and hazards) and economic analyses services to and for public utilities and corporations (districts) integrated with the local and the State's public interest in a statewide system of airports.

Program and Performance

The more important activities performed by the division are shown in the following table:

	Actual 1959-60	Actual 1960-61	Estimated 1961-62	Estimated 1962-63
Airport site approvals and permits	38	47	59	85
New airport site studies	66	171	214	255
Airport improvement studies	46	131	164	230
Aerial surveys and studies	40	131	164	238
Airports closed or abandoned	13	11	14	25
Obstruction to air navigation, noise and airspace problems	359	322	418	510
Hazard and noise studies, proposed school sites	117	132	148	165
Advisory service on airport financing (FAAP)	67	279	307	491
Public utility co-ordination, meetings	71	387	390	507
Aviation education and safety programs	56	104	180	129
Public service information furnished and public appearances	84	265	330	440
Zoning assistance provided cities and counties	37	45	56	72

Chapter 2127, Statutes of 1961, amended the Revenue an Taxation Code, and provides for the creation of the Airpor Assistance Fund which makes $350,000 available each year fo the purpose of assisting cities, counties, and airport district which own and operate airports under a valid permit issued b the division. This fund is administered by the division.

Federal aid is available to local airports through Public Law 377. During the past year the division, upon request, assisted in the preparation of federal aid applications for public airports the airports receiving approximately $6,800,000. The airport will receive an estimated $7,200,000 during the current year and $7,600,000 during the budget year. Other activities included aviation safety, promotion of public acceptance and use o air transportation through publications, maintenance of a film library, and radio and television presentations. Direct assistance is rendered to various state departments in advising on industry needs.

Two additional positions are proposed for the 1962-63 fiscal year. These additional positions are needed to handle the additional workload which has resulted from increased aeronautical activity within the State as well as additional responsibilities which were imposed by the last session of the Legislature. These responsibilities include those set forth in Chapter 2028, Statutes of 1961, which gives the Aeronautics Commission regulatory power over parachute jumps; Chapter 1142, Statutes of 1961 which provides for public hearings in connection with the division's school site inspections under Section 15005 of the Education Code; and Chapter 2127, Statutes of 1961, which creates the Airport Assistance Fund.

AERONAUTICAL CHART AND AIRPORT DIRECTORY

This program is included to provide adequate aeronautical charts for the State of California. The California aeronautical charts are being printed in the current fiscal year and will replace charts more than 11 years old. The 9 charts prepared by the Federal Government are limited to airports in the National Airport Plan, and cover only 20 percent of California's airports. The new charts will have all the airports on 1 chart. There are 102,000 pilots in California, and these charts are necessary for the safety of California pilots. Industry requests these charts to aid in the location of new plants.

GENERAL ANALYSIS

Objectives

The Division of Architecture's basic assignment is to plan, design, and supervise construction of state building projects. It is the central architectural and engineering service for the State Government. In addition, it approves for safety the plans and construction of all public school building projects.

By law, the division serves as clients all state departments and agencies except the University of California, the San Francisco Port Authority, the Department of Water Resources, and (since July 1, 1961) the California State Colleges. The Trustees of the California State Colleges have, however, entered into an agreement with the Department of Public Works by which major part of the architectural services for the colleges will obtained from the division during an initial 3-year period.

In addition, the division provides a variety of related service such as architectural and master planning consulting services state college campuses and at all state institutions; surve of potential sites and preparation of site suitability reports; a phases of construction contract administration; minor constru tion; repair and alteration projects; and special architectur and engineering investigations.

GENERAL ANALYSIS—Continued

Program and Performance

General Process—Construction projects, in written program form, originate in the several state agencies and are submitted to the Department of Finance for consideration for inclusion in the Capital Outlay budget. After approval by the Department of Finance each project is then transmitted to the Division of Architecture. The division then prepares for the client agency preliminary plans, outline specifications, and estimates of cost for the proposed major and minor construction projects. These documents then form the basis for a request to the Legislature for appropriation and project authorization.

Upon passage of the Budget Bill by the Legislature, and its signature by the Governor, and after specific authorization by the State Public Works Board, working drawings and specifications and final construction estimates of cost are prepared and the project advertised for construction bids. Award of contract to the successful bidder, pursuant to the requirements of the State Contract Act, initiates the final phase of the division's responsibility in the continuous supervision of construction.

Where the Director of Public Works determines that the obtainable staff is unable to perform the particular work within the time required by public interest, he contracts, with approval of the Department of Finance and of the State Personnel Board, with qualified architects and engineers for the performance of the work (Section 14101, Government Code). No new contracts are anticipated during the 1962-63 fiscal year.

State Colleges—The Trustees of the California State Colleges were established by Chapter 49, Statutes of 1960, First Extraordinary Session, to take over the administration of the state colleges from the Department of Education. This legislation granted the trustees complete authority to handle architectural and construction services for the state colleges in such manner as the trustees determine. The State College Contract Act, enacted in 1961, is identical with the State Contract Act, but vests authority in the Trustees of the State Colleges for administering all construction contracts for college building projects. Any services performed by the Division of Architecture for the state colleges are, therefore, entirely at the discretion of the trustees and based solely on interagency agreement between the trustees and the department, with the approval of the Director of Finance.

School Building Safety—The Schoolhouse Section of the Division of Architecture checks and approves plans and specifications and supervises construction of all new public school building construction and all alterations and additions exceeding $10,000 in estimated cost, under the authority of Sections 15451 through 15465 of the Education Code.

The school construction review function is entirely self-supporting. All funds appropriated for the support of the unit are payable from the Architecture Public Building Fund which, in turn, is the respository for statutory fees charged for services rendered by the division in connection with the checking of plans and specifications and supervision of construction.

All other division costs, both direct and indirect, are financed from the Architecture Revolving Fund, to which funds are transferred from the appropriations for various capital outlay projects and related activities.

The Architecture Revolving Fund Budget for this division is presented on a program basis in this part of the document and the usual organizational budget, with categories, is shown in detail in the Appendix. The capital outlay program estimates were the best available at the time of budget preparation. However, to the extent that the amount of actual authorized building projects assigned to the division vary above or below estimates, the funds available to the division are increased or decreased accordingly.

These budgets are presented herein by 3 major programs. The management and general administration costs of divisional activities, including operating expenses, are distributed to the 3 programs.

Preliminary Planning—The preparation of plans and specifications and estimates of cost form the basis for requests to the Legislature for appropriations in the capital outlay section of the budget.

Preliminary planning also includes preparation of preliminary plans, specifications, and estimates for projects financed under continuing appropriations rather than annual authorizations on the Budget Act, such as structures for the Division of Highways.

Additionally, this program includes architectural consulting and master planning services and a large volume of surveys, reports, and recommendations on suitability and feasibility of sites and other special studies.

Working Drawings—The preparation of drawings, specifications, and estimates of cost for advertising and contracting by the division and also the preparation of the same documents for advertising and contracting by other agencies, such as the Federal Government and the Division of Beaches and Parks.

Supervision of Construction—Continuous, full-time inspection of projects under construction to insure conformity with plans and specifications.

1962-63 Architecture Revolving Fund Program

The reorganization of the division and the establishment of a new control system, implementing a comprehensive management study, showed major benefits in the current year which will continue during the budget year.

On the basis of the building program known to the division at this time and considering the effects of reorganization and increased efficiency, the division is reducing its estimate of positions required for the current year by 66 authorized positions. This reduction is carried into the budget year together with a further reduction of 15 authorized positions and eleven man-years of temporary help.

Evaluation of the 1962-63 program must necessarily be made on the 3 separate portions of the total program in which the division is actively participating, all within a single budget year. During any particular year the division is actively preparing: (1) preliminary planning for projects to be included in the budget in the succeeding year; (2) contract drawings and documents for projects previously approved by the Legislature, the funds for which became available during the current year; and (3) supervising construction of projects approved in both preceding and current years.

ADMINISTRATION

PROGRAM SUMMARY

A pro rata share of the management and general administration expense of divisional activities, including operating expenses, is distributed to each of the 3 major programs. Included in this area are the executive positions of the State Architect and the deputy chiefs in the fields of administrative and technical services; Project Management Service, responsible for authorizing projects, co-ordinating requirements and solutions with client agencies and the Department of Finance, scheduling and timing the projects according to statewide priority; and support personnel in the fields of administration, office services, accounting, contracts, personnel functions, secretarial services, public relations, management analyst, training, safety, and central files.

The head of technical services is the deputy chief, architecture and engineering. This management position has direct line authority over 3 subpositions, 2 with titles of assistant state architect, who in turn are responsible for technical services in the Sacramento and the Los Angeles offices, respectively, and 1 with title of chief construction engineer, who has the responsibility of all construction supervision.

The deputy chief, administrative, has direct line authority over the production control system named "Project Management Service" along with other support units. Emphasis is being placed on proper and better utilization of effort on authorized projects and on the reporting, analyzing, and controlling of the status of project production and workload distribution. In addition, a strict conformance with the agreed scope of the projects is emphasized in this responsibility.

PRELIMINARY PLANNING

PROGRAM SUMMARY

Preliminary planning is the initial phase of the program involving participation in a project by the division. After the basic needs of a state agency are presented in a written program and approved by the Department of Finance, the division proceeds with architectural and engineering studies based on approved criteria. During the course of the initial planning, and upon completion of the preliminary plans, meetings are held with the client agencies and Department of Finance to obtain approval of the preliminary plans and specifications which approval indicates that the plans conform to the requirements of the client agency.

Preliminary planning involves primarily consideration by the architectural design group with necessary supporting design from the engineering fields of structural, mechanical, electrical, civil and sanitary, and service from the estimating unit. Included in this work is delineation of the written program to reach concurrence with the client agency as to intent, purpose, function, and design of the proposed facility; inspection of site to properly orient the facility and arrive at a compatible design; negotiation with municipalities for access, egress, and utilities; initial land surveys and test borings; determination of availability of water and other utilities; preparation of elementary architectural diagrams, plans, and studies; determination of proper material and construction techniques; preparation of elementary structural, mechanical, electrical, civil, and sanitary engineering designs.

The ultimate product in the preliminary planning program is a package consisting of preliminary plans, outline specifications, and estimates of cost for the proposed project.

This preliminary package, signed by authorized representatives of the using agency, is transmitted to the Budget Division, Department of Finance, for incorporation in the Capital Outlay portion of the budget. It is the defined scope of the project which will be the basis of the contract drawings when, as, and if the project is funded by the Legislature.

Program Emphasis

The preliminary planning cycle is predicated on receiving firm programs from state agencies beginning in the month of April, due to be resolved, translated into plans, specifications, and estimates of cost by December 1st. In practice, the time allowed is often much shorter. The emphasis in preliminary planning is to make preliminary plans, specifications, and estimates of cost as valid as time will permit because of their basic importance for budgeting and planning purposes.

When an exceedingly short time is allowed for preparation of the preliminary package, more use will be made of diagrams sketches, and single line drawings for the purpose of deriving preliminary estimates of costs. After the initial budget submission, but during the same fiscal year, preliminary plans requiring further refinement will be brought up-to-date and approved prior to commencement of working drawings.

In the current fiscal year, the division is preparing preliminary plans, outline specifications and budget estimates, based on requests from the Department of Finance and from the Trustees of the California State Colleges for projects thus far valued at $64,334,895. This amount is not static but increases as new requests are received from the Department of Finance and special fund agencies. These are the projects which may, or may not, be included in the budget for funding in the 1962-63 fiscal year. The division is also currently up-dating preliminary plans on projects valued at $54,503,601 already approved by the Legislature in the past session before proceeding with working drawings.

The anticipated workload of the division in the preliminary planning phase during the budget year cannot be predicted at this time. Using the report to the Joint Legislative Budget Committee titled "State Building Construction Programs, July 1, 1959-June 30, 1964" prepared by the Department of Finance, as a general guide, and adding projects prepared for budget submission for previous years and not yet funded, the preliminary planning workload for the budget year is projected at roughly $115,900,000. However, it is at the discretion of the Trustees of the California State Colleges what portion of the state college preliminary plans (nearly half of the total) they will decide to assign to the division during 1962-63. For budget forecast purposes, the division assumes a continuation for 1962-63 of about the same level of basic preliminary planning work from all sources, including state college work.

A large portion of the preliminary planning program is involved in the preparation of reports and recommendations for site suitability and condemnation through physical inspections, research, and engineering surveys. Billing for division services is made directly to the requesting agencies and amounted to $271,288 in the current year. There is every reason to believe that the demand for this type of work of the division technical staff will be increased to approximately $300,000 during the budget year.

PROGRAM EXPENDITURES DETAIL

Total volume of preliminary planning	$950,804	$953,424	$1,037,704
Preliminary planning appropriations	(500,000)	(445,000)	(500,000)
Services to other agencies—reimbursements	(283,686)	(271,288)	(300,000)
Agency authorizations from construction appropriations	(167,118)	(247,136)	(237,704)

WORKING DRAWINGS

PROGRAM SUMMARY

Work Within the Division

That portion of the total program devoted to the preparation of contract documents, including construction drawings, specifications, and estimates of cost to enable effective contracting, is defined as the Working Drawing Program. The extent of such documents is indicated by Section 14270, Government Code, a portion of the State Contract Act.

Working drawings are initiated only upon specific authority as indicated by the appropriation in the Budget Bill and specifically authorized by subsequent action of the State Public Works Board. Work in this phase involves responsibilities by the technical units of architectural design, architectural drafting, landscape architecture; mechanical, electrical, structural,

---

[a] As indicated in the analysis, these costs are distributed to the 3 major programs: Preliminary Planning, Working Drawings, and Supervision of Construction. Therefore these costs are included in the totals shown for these programs, but are presented separately here for illustrative purposes.

Department of Public Works

DIVISION OF ARCHITECTURE—Continued

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

WORKING DRAWINGS—Continued

PROGRAM SUMMARY—Continued

Work Within the Division—Continued

civil and sanitary engineering, specification writing, and cost estimating. Included in this work is land surveying; foundation investigations; architectural plans, elevations, and details; structural design of frame and system, mechanical design involving heating, ventilating, air conditioning, refrigeration, and plumbing; boiler plant and central steam distribution; elevator systems; electrical design of power, illumination and communication systems, primary and secondary distribution, load transformer and circuits, closed television circuits, telephone and signal systems, sanitary engineering design of sewage disposal, storm drainage, reservoirs, and filtering systems; civil engineering of roads, walks, pavement, dams, culverts, and canals, and landscape architecture of site planning.

The division prepares its construction working drawings for segregated bidding whenever the contract cost is in excess of $300,000 and when several major groupings of work, such as general, mechanical, and electrical are clearly indicated. Bids are also invited on a combined basis on these projects. Although some extra care and effort is required in preparing plans for segregated bidding, such bidding results in lower total construction costs, frequently amounting to as much as 5 percent below the combined bid.

Also included in the Working Drawing Program is the necessary work that must be performed after award of the contract in the area of checking shop drawings submitted by contractors; reviewing and taking action on submittal of materials for approval; field inspections to co-ordinate intent of drawings with construction progress; issuance of change orders; interpreting and clarifying intent of documents; negotiating and resolving quotations from contractors of change ordered items.

The division in the past year advertised for bids on projects with a value of $98.8 million. In the current year it is anticipated that a project value of $94.6 million will be accomplished with reduced staffing. Again, maintenance of the same high rate of accomplishment per capita is possible through the reorganization and newly installed control system. In the budget year it is anticipated that projects with a value of 96.7 million will be handled in the working drawing phase.

Working Drawing Program by Private Architects

Where the Director of Public Works determines that the obtainable staff is unable to perform the particular work within the time required by public interest, the director may contract, with the approval of the Department of Finance and the State Personnel Board, with qualified architects and engineers for the performance of the work. (Section 14101, Government Code.)

Even under this program it is the responsibility of the division personnel to perform all work for a project under the preliminary planning phase prior to inclusion in the budget, including site investigation and preparation of preliminary plans, specifications, and estimates of cost.

Also under this program the division provides a substantial review and checking of contract drawings prepared by the private architect before requesting bids and a substantial review of shop drawings and material submittals after award of contracts. Issuance of change orders during the progress of construction is also executed essentially by the division personnel, as well as the entire program of supervision of construction.

The division's responsibility in connection with private architect work discussed herein refers only to those projects contracted by the Department of Public Works. The responsibility demanded of the division on state college work contracted to private architects by the trustees is undetermined at this time.

The division in the past year advertised for bids on projects by private architects with a value of 9.0 million. In the current year the project value by private architects is expected to aggregate 1.5 million. The division does not anticipate using private architects in 1962-63.

PROGRAM EXPENDITURES DETAIL

Working drawings by Division of Architecture personnel	$5,835,506	$5,895,140	$5,800,560
Working drawings by private architects under contract	$76,295	$116,367	$68,267

SUPERVISION OF CONSTRUCTION

"The State Architect . . . shall have an inspector at each building during the whole time of its construction" (Government Code Section 14100). Under this portion of the total program, resident inspectors of the number required by the size and type of project are assigned to supervise construction. The chief responsibilities are to insure construction in full conformance to the intent expressed in the contract plans and specifications; to co-ordinate work, work schedule and work areas among separate contractors and subcontractors; to interpret and resolve inquiries from contractors; to determine and evaluate actual progress made on construction; and to prepare progress payment estimates; to make periodic and final inspection of workmanship and materials; to recommend final acceptance of project; to keep records of overrun of contract time at completion of construction for determination and justification of liquidated damages; to perform reinspection prior to expiration of guarantees.

Explanation of Program Emphasis

Conformity of construction with the requirements of the plans and specifications is more than a contractural requirement demanded by the State, it also serves to insure safety, usability, and proper functioning of the project as designed by specialized professionals in their separate fields. In addition, it is an obligation to the State to assure fairness to successful and unsuccessful bidders alike by enforcing compliance with plans, specifications, and all related items of the contract documents.

As of November 1, 1961, the division had a total of $116,500,000 contracts in force for which annual disbursements total $85,000,000 (estimated).

It is anticipated that for the budget year $120 million to $130 million in contracts will be in force and annual disbursements in contract progress payments would total $90,000,000.

With a view towards increased economy in State Government which is reflected by decreased construction inspection costs, the division effected a reduction of 25 construction inspection positions which was effected through positions abolished in the 1961-62 printed budget. An additional 13 positions are shown as deleted in the current year of this budget together with a further decrease of 7 positions in the budget year.

These reductions are possible through better utilization of inspection personnel by job-grouping and controls, yet maintaining the quality of supervision of construction.

PROGRAM EXPENDITURES DETAIL

Supervision of construction	$2,226,052	$2,201,196	$2,122,456

Department of Public Works

DIVISION OF ARCHITECTURE—Continued

CONSTRUCTION OF PROJECTS (DIRECT)

PROGRAM SUMMARY

The State Contract Act provides that all projects shall be done under the contract awarded to the lowest responsible bidder, except that it may be done by days' labor under direction of the Department of Public Works under certain specified situations, some of which are:

1. In case of emergency due to damage to a state-owned building or any other state-owned real property or improvements located thereon by an act of God.
2. At any time after approval of plans, specifications, and estimates of cost, if the director deems the advertising or award of a contract, the acceptance of any bid, or the acceptance of any further bids after the rejection of all submitted bids is not to the best interest of the State.

It is the policy to contract for the performance of construction and improvement projects wherever it is feasible to do so and to do so in full conformance with the spirit and provisions of the State Contract Act rather than to use day labor under force account or to use civil service maintenance crews.

Generally the use of day labor or maintenance crews is limited to the following situations:

1. When there is a clear showing that a particular project cannot be accomplished by contract at a reasonable cost to the State because contractors do not appear intereste in the project and where there is an urgent need for th project.
2. Improvement or repair work to be done in an area wher prisoners are being confined or where mental patients ar being cared for, making it necessary to have workme under state control.
3. Minor construction in a remote location where neithe contractors nor a supply of skilled laborers is available.
4. Projects affected by conditions of site or existing structure where it is impracticable to define the details of work wit sufficient accuracy to permit competitive bidding.
5. Work which is useful for vocational training at certai state colleges.
6. Historical restoration projects.

Almost all of the projects that fall into these categories ar minor construction projects wherein participation by the division is requested on a current basis. It is difficult to projec the workload of the day labor force. During the past year, th division accomplished $564,017 worth of restoration projects $1,626,544 other projects, for a total of $2,190,561 on day labo construction.

PROGRAM EXPENDITURES DETAIL

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Estimated disbursements for construction of projects by the division's direct construction forces	$1,233,931	$2,190,000	$1,800,000

CONSTRUCTION OF PROJECTS (CONTRACT)

PROGRAM SUMMARY

For the purposes of construction supervision, the State is divided into 3 areas as follows:

Area I with headquarters in Oakland comprises the northern coastal area. It extends from San Luis Obispo to Arcata.

Area II with headquarters in Sacramento comprises the central valley area, extending from Porterville to the Oregon line and to the Nevada line.

Area III with headquarters in Los Angeles comprises the Southern California area.

The amount of contract construction of projects in force is currently $116,500,000 for which progress payments of $85,000,000 will be disbursed. The workload in November 1961 was distributed to the 3 areas as follows:

Area I	$36,250,000
Area II	33,600,000
Area III	46,650,000

It is anticipated that the amount of construction in force for the budget year will average approximately $120,000,000 at any given time and that the distribution to the areas will be as follows:

Area I	$20,000,000
Area II	35,000,000
Area III	65,000,000

Progress payments of $90,000,000 are estimated for 1962-63.

Methods of construction include conventional systems of wood frame, steel frame, monolithic concrete, concrete block; and contemporary systems of prestressed concrete, lift slab, tiltup walls, and parabolic roofs.

Continued emphasis will be placed upon exploring best construction techniques and methods to reflect lowering construction costs.

PROGRAM EXPENDITURES DETAIL

	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Estimated disbursements for contract construction of projects	$71,432,857	$85,000,000	$90,000,000

SUPERVISION OF PUBLIC SCHOOL BUILDING CONSTRUCTION

GENERAL ANALYSIS

This unit checks and approves plans and specifications for all new public school building construction and for all alterations and additions exceeding $10,000 in estimated cost. By authority of the Field Act (Sections 15451 to 15465, inclusive, of the Education Code), the division is responsible for the checking and approval of all public school building plans, including alterations, and for the inspection of such projects during construction to make certain that public school buildings are properly designed to meet all safety requirements, including earthquake, fire, panic and storm. The unit is entirely self-supporting in that all funds appropriated for the support of the unit are from the Architecture Public Building Fund which, in turn, is supported by fees charged for services rendered by the division in connection with the checking of plans and specifications and supervision of construction. The fee schedule is established in Title 21, California Administrative Code.

The volume of public school construction for Budget Year 1962-63 is estimated at $330 million. The following table reflects the estimated and actual volume of public school building plan checking that is the responsibility of the function under the Field Act for the period July 1, 1960 through June 30, 1963:

ESTIMATED COSTS OF PUBLIC SCHOOL CONSTRUCTION IN CALIFORNIA

	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Local construction	$123,002,477	$175,000,000	$150,000,000
State-aided Program:			
State funds	172,904,000	120,000,000	140,000,000
Local funds	30,649,000	35,000,000	40,000,000
Total, State-aided Program	$203,553,000	$155,000,000	$180,000,000
Totals, Public School Construction	$326,555,477	$330,000,000	$330,000,000

SUPERVISION OF PUBLIC SCHOOL BUILDING CONSTRUCTION—Continued

GENERAL ANALYSIS—Continued

Local School Districts, upon application, and approval by the State Allocations Board receive loans with provisions for repayment of the principal according to an equalization formula which usually allows 30 years and up to 40 years of deferment provisions are used. Since the start of this program, an estimated $90,180,986 will have been repaid to the State as of June 30, 1961.

Total debt services charges to the General Fund on this program through 1960-61 have been $209.8 million. Interest costs to the General Fund for 1961-62 are estimated at $24,457,625 and $27,483,895 for 1962-63.

Since the inception of the State-aided Program in 1947, the State has authorized $1.2 billion to assist school districts in school construction. The State has approved $1,119 million in state aid through December 31, 1961, which, together with $434 million in local district contributions, bring the total construction approved under this program to $1,553 million. Present available funds are estimated to carry the program through June 1962. A total of 37,561 classrooms had been financed through December 31, 1961, providing seating for 1,255,093 children.

The costs of administering these programs are incurred in the Division of Architecture, Department of Education, State Controller, and Department of Finance. They are summarized here for informational purposes:

ESTIMATED COSTS OF STATE OPERATIONS, PUBLIC SCHOOL CONSTRUCTION PROGRAM

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Division of Architecture	$1,189,981	$1,333,766	$1,353,259
Department of Education	257,479	268,314	273,009
Division of Local Allocations	800,907	836,217	871,354
State Controller	189,123	181,997	189,305
Total Costs, State Operations	$2,437,490	$2,620,294	$2,686,927

PROGRAM SUMMARY

The volume of public school construction for Budget Year 1962-63 is estimated at $330,000,000. With this anticipated workload and the revised fee program authorized by Chapter 1767, Statutes of 1961, it is to be noted that the anticipated revenue from plan approval fees will increase approximately $100,000 in the budget year. Concurrently, the estimated deficit as shown in the Fund Condition Statement will be decreasing. It is contemplated that with the application of the higher fee structure over the last 2 years the deficit will disappear and some accumulated surplus should be apparent.

Personnel man-years	3.6	5	5.6	0.6

GENERAL ANALYSIS

Objectives

The Building Standards Commission, which consists of the Director of Public Works and 6 members appointed by the Governor, was established by the Legislature to screen building regulations for conflict, duplication, and overlap. The commission also is to write a complete code which will supersede all building regulations by other state agencies.

Program and Performance

There are 23 administrative agencies in the State, 17 of which write and enforce building regulations and standards. There are 10 state statutory code provisions dealing with building regulations and 19 general laws. A workable program has been established by the commission to consolidate the various state codes into a single uniform code and this will continue into the budget year.

No increase in services is contemplated in this budget over the budget for the 1961-62 fiscal year. This budget does reflect the 2 additional positions authorized by the Legislature for the 1961-62 fiscal year. These 2 positions are included in this budget with the understanding that they will be discontinued upon the printing of the consolidated code.

GENERAL ANALYSIS

Objectives

The principal functions of the Division of Highways are to plan, construct, and maintain the 16,307 miles of the state highway system. Other functions include various special studies in the transportation field and certain responsibilities in connection with county roads on the Federal-aid Secondary System, with the expenditure of state gasoline tax funds on city streets, and with supervision of the Outdoor Advertising Act.

Program and Performance

The planning and construction of state highway improvements is carried as a continuous long-range planning program in accordance with policy established by the Legislature and is tailored to funds available from various sources, including federal aid, as provided by the Legislature and to statutory controls governing geographical distribution of construction expenditures in the northern and southern county groups and within individual counties. Funds for construction and rights-of-way are allocated by the California Highway Commission in accordance with these statutory requirements and on the basis of priority of need to best serve traffic. The California Highway Commission is a statutory body of 7 members, 6 of whom are appointed by the Governor, with consent of the Senate, for staggered 4-year terms. The Director of Public Works serves as ex officio seventh member and chairman of the commission. The commission also has the responsibility for adopting the location of state highways on routes authorized by the Legislature, and for declaring certain routes as freeways.

This program is financed through the State Highway Fund. The first highway fund was authorized by the "State Highway Act" of 1909 which provided for the First State Highway Bond Issue. Subsequently 2 more bond issues and several other highway funds were established. The State Highway Fund as it now stands was created by an act of the 1933 Legislature. The major sources of revenue to the fund are from fuel taxes, registration and weight fees, transportation tax, and federal subventions, summarized below.

REVENUE SOURCES *(State Highway Fund)*

	ACTUAL 1960-61	ESTIMATED 1961-62	ESTIMATED 1962-63
Fuel License Tax (6¢ per gallon)[b]	$252,127,674	$259,705,941	$272,904,056
Use Fuel Excise Tax (7¢ per gallon)	21,188,767	22,797,976	24,000,000
Transportation License Tax	11,512,634	11,756,904	13,131,549
Vehicle Registration, Weight Fees, Drivers' Licenses, etc.	61,973,910	56,779,024	58,709,104
Federal Aid:			
Major State Highways[c]	199,642,653	265,106,390	277,415,417
Federal-aid Secondary	11,443,232	8,457,807	9,215,600
Miscellaneous	33,268,232	10,910,926	2,994,291
Estimated Revenue Adjustment	4,438,140	–	–
Total Revenues	$595,595,242	$635,514,968	$658,370,017

---

[a] These positions financed from toll bridge revenues.

[b] This is the amount of the 6-cent tax going to the State Highway Fund.

[c] For the major interstate highway system, primary and urban. Other federal aid is carried in federal aid miscellaneous.

Department of Public Works

DIVISION OF HIGHWAYS—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS—Continued

Program and Performance—Continued

There are additional revenues which go directly to local agencies for highway purposes without going through the State Highway Fund. In 1960-61 this amounted to $74,812,588. An additional $61,742,538 was subvened from the State Highway Fund in 1960-61 to local agencies bringing the total revenues received by local agencies from these tax sources to $136,555,126.

Because the state highway program reaches into every corner of California, the division operates in the field through 11 districts. Nine of these districts are headed by district engineers; the 2 metropolitan districts (San Francisco and Los Angeles) are headed by assistant state highway engineers. Each district is organized along the lines of the headquarters office. Construction of bridges and other highway structures on a statewide basis is administered by the Bridge Department, having offices in Sacramento and Los Angeles.

The first expenditures for the State Highway System commenced January 1, 1912, and the total expenditures to June 30, 1961, are $5,352,580,428. In order to gain a better perspective on the entire highway program, the expenditures from all parts of the budget are summarized below.

SUMMARY OF EXPENDITURE PROGRAM *(State Highway Fund)*

	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
State Operations	$54,160,897	$59,500,346	$63,029,906

CONTRACTS AND RIGHTS-OF-WAY

Program and Performance

The Division of Contracts and Rights-of-Way is a division of the Department of Public Works, administratively established by the director under Government Code Section 14005, which provides legal services for the department, including the Division of Highways. It handles legal problems and litigation arising out of such activities as eminent domain and other legal phases of highway right-of-way acquisition, including matters involving public utilities, contracts, claims, financial affairs and collections, operations of toll bridges, and activities involving other governmental agencies.

DIVISION OF HIGHWAYS—Continued

MAINTENANCE OF STATE HIGHWAYS

Program and Performance

The function of state highway maintenance is to preserve roadways and structures in the safe and usable condition to which they have been built or improved. This description covers hundreds of different tasks, ranging from routine patching to emergency slide removal. About one-fifth of the employees of the Division of Highways are engaged in maintenance work.

Replacement and restoration work on highway facilities is performed by the division forces, with major work of this nature, including resurfacing, being done by contract.

MAINTENANCE OF TOLL BRIDGES

Program and Performance

The Division of Highways is responsible for the operation and maintenance of 5 major bridges in the San Francisco Bay area: the San Francisco-Oakland Bay Bridge, the Richmond-San Rafael Bridge, the San Mateo-Hayward Bridge, the Dumbarton Bridge, and the Carquinez Bridge. All of these are toll facilities. Since September 1957, toll bridge maintenance costs are paid from the State Highway Fund as provided by Chapter 2249, Statutes of 1957. Formerly these costs were paid from toll bridge revenues.

Operation of these bridges is a function of the Bridge Department, with specific responsibility assigned to a principal bridge engineer, whose office is located at the east end of the San Francisco-Oakland Bay Bridge.

HIGHWAY PLANNING

Program and Performance

Broad-gauge special investigations and studies not closely tied in with localized projects are grouped under the heading of highway planning. These includes the annual and monthly traffic counts, long-range research studies of all types, and studies of the economic and other effects of freeways. Current and imminent major projects include co-ordination of the statewide city and county street and road deficiency studies called for by Senate Concurrent Resolution No. 62 of the 1959 Session, and a scheduled re-estimating of Interstate Highway System deficiencies as required by federal legislation.

SUPERVISION OF OUTDOOR ADVERTISING

Program and Performance

Administration of the Outdoor Advertising Act has been assigned to the Division of Highways in accordance with Article 2 of that act, and is carried on as a function of the Maintenance Department. It is a self-supporting function, financed from revenues received from license and permit fees paid by outdoor advertisers who place displays within view of public highways, outside incorporated areas.

DIVISION OF SAN FRANCISCO BAY TOLL CROSSINGS

Office at Berkeley

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	
SUMMARY				
TOTAL EXPENDITURES				
San Francisco to Marin County Toll Crossing Feasibility Studies *(State Highway Fund)* Chapter 2142, Statutes of 1961	–	$150,000	$300,000	

GENERAL ANALYSIS

The division was established by the Director of Public Works under Section 14005 of the Government Code and is assigned by the Director various studies and surveys, and the preparation of plans, specifications, and estimates for additional toll crossings of the San Francisco Bay. It also supervises construction of such projects. The operation of crossing facilities after completion, however, is assigned to the Division of Highways.

At present the division's assignments include studies and plans for a Southern Crossing, and a crossing between San Francisco County and Marin County, improvement of the San Francisco-Oakland Bay Bridge under Chapter 2316, Statutes of 1957, and improvement of the San Mateo-Hayward Bridge under Chapter 1784, Statutes of 1959. Proposed expenditures on these projects, except on Chapter 2142, Statutes of 1961, are shown in the schedules for the Southern Crossing Engineering Fund, and the San Francisco-Oakland Bay Bridge Toll Revenue Fund.

In accordance with the provisions of Chapter 2142, Statutes of 1961 the expenditures under the act will be repaid to the State Highway Fund from the proceeds of the first sale of revenue bonds issued for the construction of a toll crossing. If the bonds are not sold, repayment will be made from the San Francisco-Oakland Bay Bridge Toll Revenue Fund.

GENERAL ANALYSIS

Objectives

The Commission was created by Chapter 1693, Statutes of 1953, to confer with a similar commission etsablished by the State of Arizona to define a common boundary between the states along the Colorado River. Membership in the commission consists of the Attorney General, Director of Water Resources, and Executive Officer of the State Lands Commission. One member of the Senate, appointed by the Senate Rules Committee and one member of the Assembly, appointed by the Speaker are advisors to the commission.

Program and Performance

The ultimate goal in the work of this agency is the adoption by the Legislatures of California and Arizona of a compact between the states defining the common boundary along the Colorado River. This compact would be based on recommendations made by the Boundary Commissions of the two states.

An apparent impasse delaying the adoption of the boundary by the commissions of the two states was resolved at a joint commission meeting held early in 1961. A compromise was reached with respect to the proposed location of the boundary

GENERAL ANALYSIS—Continued

Program and Performance—Continued

in the so-called "Yuma Island Area", where the location of the line had previously been the subject of political disputes.

After reaching this compromise, the California Commission at a meeting held in August 1961 adopted a twofold program for the current and budget years. This program will accomplish:

1. The drafting of a form of compact, to be submitted to the Legislatures of the respective states;
2. Further study of the engineering problem related to physically locating and fixing the boundary along the river from Nevada southward to the Mexican Border.

The compact will require:

1. Provisions for the protection of land titles where such titles may have stemmed from the State of Arizona or California and the boundary adopted will put the property under the legislative jursidiction of the other state.
2. Conclusion on the engineering problem of a description of the boundary.
3. Conferences with the Arizona Commission to resolve inherent legal and property problems.
4. The drafting of appropriate language for completion of th agreement.

The engineering phase of the program will require the location or fixing of at least 34 major points by ground survey alon the river. Subsequent to this, aerial photographs taken wil permit the development of locations for 200-plus intermediat or minor points to be established.

The program outlined for the current year has resulted in re-estimate of expenditures for 1961-62. An emergency authorization has been given in the current year to provide for a specia consultant and contractual services to carry out the necessar work. In 1962-63 provision is made to continue the consultan position and to finance contractual services, primarily with th U. S. Coast and Geodetic Survey to establish the major point along the boundary. California, Arizona and the Federal Government will share equally in the expense of this latter project.

GENERAL ANALYSIS

The Golden Gate Authority Commission, established by Chapter 1714 of the Statutes of 1959, studied the advisability of operating the bridges, port facilities, and airports in the San Francisco Bay Area under a single agency and made its report to the 1961 Legislature pursuant to provisions of that statute. The Legislature has not enacted any legislation pertaining to the recommendations in that report.

This project was completed at a cost of $126,929, approximately one-half of the appropriation provided for this purpose. Since the Commission's statutory life ended December 31, 1961, the Commission terminated its operations early in the 1961-62 fiscal year.

DEPARTMENT OF ALCOHOLIC BEVERAGE CONTROL

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$3,634,139	$3,760,031	$3,855,941	$95,910 (2.6%)
Personnel man-years	422.3	412.4	416.4	4

GENERAL ANALYSIS

Objectives

The department is responsible for enforcement of the Alcoholic Beverage Control Act. It issues and transfers licenses and conducts qualification and compliance investigations. In the enforcement of the Alcoholic Beverage Control Act it is responsible for preventing the sale of alcoholic beverages where any activity contrary to the public welfare is associated with a licensee or licensed premises.

Program and Performance

The department functions through a headquarters office and area, district, and branch offices. The field offices take and investigate applications for new licenses and transfers of licenses, investigate the character of applicants, provide direct law compliance, and encourage, train, and assist local law enforcement agencies to enforce the Alcoholic Beverage Control Act. Compliance is determined by inspection and investigation. Areas of most frequent violation include sales to minors, sales during restricted hours, sales to obviously intoxicated persons, operating disorderly premises, and business practices contrary to rules and regulations on fair trade, price posting, and secret rebates. During 1960-61 there were approximately 45,500 active licensees subject to this act. Licenses include on-sale beer, beer and wine, and general licenses for trains, boats, airplanes, and bona fide business establishments, retail package off-sale establishments, dealers, wholesalers, importers, warehousers, brokers, and manufacturers of beer, wine, alcohol, brandy, and distilled spirits. The total number of licensees has remained fairly constant in recent years. The number of transfers and licensing actions other than renewals, processed by the department annually approximates 15,000. The department conducts approximately 750 investigations per month concerning alleged violations of the act.

As of December 1, 1961, 228 new licensees and 32 intercounty transfers have been effected pursuant to Chapter 783 Statutes of 1961. These include 49 new on-sale general, 115 off-sale general, and 64 new on-sale beer and wine licenses, plus intercounty transfers of 10 on-sale general and 22 off-sale general licenses.

During 1960-61 1,894 disciplinary hearings were held, and 1,627 licensees were disciplined.

Included in this budget is $24,607 for converting to a machine licensing program. At the present time, the department is handling about 56,000 licensing transactions annually. There are 32 different kinds of licenses involved. The allocation of new, transfer, renewal, and offer in compromise fees, 90 percent of which goes to cities and counties where the licensees are located, involves 57 counties and 371 cities. It was estimated by the Division of Organization and Cost Control, Department of Finance that there would be an annual savings through mechanizing this process of $15,000 per year after the conversion costs are absorbed. As a part of this proposal, the budget includes 2 proposed new positions to begin the conversion.

GENERAL ANALYSIS

Objectives

The Alcoholic Beverage Control Appeals Board provides administrative review for any person aggrieved by a decision of the Department of Alcoholic Beverage Control.

Program and Performance

The appeals board, as provided in the Constitution, consists of 3 members appointed by the Governor and serve at his pleasure. The board determines whether the Department of Alcoholic Beverage Control has proceeded in the manner required by law, whether the department's actions are supported by the findings, and whether the findings are supported by substantial evidence in light of the whole record. Meetings are held monthly in Los Angeles, San Francisco, and Sacramento to review appealed cases. The board meets approximately semimonthly or as required in Sacramento to discuss cases and approve decisions prepared by the legal counsel in accordance with instructions from the board.

Since the creation of the board in 1954 more than 1,497 cases had been decided as of June 30, 1961. During 1960, 198 cases were appealed.

GENERAL ANALYSIS

Objectives

The Districts Securities Commission is charged with the direction and supervision of certain fiscal and physical affairs of irrigation districts and other entities of the State.

Program and Performance

The District Securities Commission carries out its duties pursuant to the provisions of Division 10 of the Water Code. The commission consists of the Attorney General, the Director of Water Resources, the Superintendent of Banks, and 2 members appointed by the Governor for 4 years. In 1960-61 the commission reviewed and inspected the financial and physical condition of 178 districts as compared to 170 in 1958-59, and 173 in 1959-60; and assisted district officials with respect to financial problems involving the incurrence of indebtedness and other matters affecting the financial soundness of their districts. Investigations are made by the staff to determine the engineering, economic, and financial soundness of proposals by districts to incur additional indebtedness through the issuance of bonds or warrants or by contract with the federal government providing for water service, construction of facilities, or loans. The commission passes upon the incurrence of major indebtedness by irrigation, water, and other districts and local agencies which request certification of the eligibility of bonds as legal investments pursuant to the Districts Securities Commission Act. The commission also passes upon the expenditure of bond funds during the period of acquisition or construction of district facilities. Co-operative assistance to banks, investment companies, and other lending agencies is provided by making available factual information regarding the economic and financial condition of the districts. This is of substantial importance to both the investment companies and the districts, for, when the financial soundness of a district can be supported, the credit of the district is strengthened, and financing can be more readily secured at a reasonable rate of interest.

The federal program for assisting water resources and development by providing water service, construction of facilities, interest free loans, and/or grants for non-reimbursable parts of project costs has had a substantial effect upon the commission's workload. The execution by districts of contracts providing for such assistance is subject to commission approval, requiring substantially the same degree of investigation as would be required in the case of financing by the issuance of bonds. As of June 30, 1961, there were applications, or letters of intent, filed with the United States Bureau of Reclamation by 56 districts under commission supervision requesting contractual assistance.

The first district indebtedness incurred as a result of a state loan to water districts was examined and approved by the commission during 1960. This is the first of such loan contracts expected to be negotiated by local agencies pursuant to the provisions of the Davis-Grunsky Act.

As a result of legislation enacted in the 1961 session of the state legislature (Chapter 919, Statutes of 1961, effective September 15, 1961), the per diem pay for the non-governmental commission members was increased from $10 to $50.

SUMMARY				
TOTAL EXPENDITURES				
Support *(Fair and Exposition Fund)* [c]	$199,134	$204,139	$205,211	$1.072 (0.5%)
Personnel man-years	**17.1**	**17.3**	17	—0.3

GENERAL ANALYSIS

Objectives

The Horse Racing Board regulates and supervises the operation of horse racing meetings where there is parimutuel betting.

Program and Performance

The board, which consists of 3 members appointed by the Governor for 4-year terms, licenses trainers, jockeys, track officials, and other persons employed by the racing associations. Investigators check to determine compliance with rules and regulations. Before each race, horses are inspected and after each race drug tests are made on horses under the supervision of the board veterinarian. The workload of the board is indicated by the number of racing days and the number of licenses as follows:

	Actual			Estimated	
	1958-59	1959-60	1960-61	1961-62	1962-63
Number of racing days	538	535	539	545	545
Number of licenses	9,397	9,673	9,374	9,700	10,000

Provision is made in 1962-63 to continue the same level of service as now authorized. The budget is based on a program of 545 days of racing of which 346 days are to be at major tracks consisting of 291 days of thoroughbred and 55 days of harness horse, 89 days at fair tracks, 55 days for quarter horses, and 55 days for a combination meeting.

GENERAL ANALYSIS

The Department of Investment carries out its duties and responsibilities in accordance with the provisions of Title 2, Division 3, Part 7, Government Code. The department is under the control of a Board of Investment consisting of the Superintendent of Banks, the Commissioner of Corporations, the Insurance Commissioner, the Real Estate Commissioner, and the Savings and Loan Commissioner. Each member serves as chairman in established rotation. During his service as chairman of the board, the chairman is known as the "Director of Investment" and is a member of the Governor's Council.

The board meets monthly at the State Capitol and its members then, and at other times as the Governor may require, make reports of their work to the board.

Personnel man-years	61.6	68	70	2

GENERAL ANALYSIS

Objectives

The primary objective of the Banking Department is to protect and safeguard the funds of depositors.

Program and Performance

The main programs of the department are to grant licenses for new state banks or branches, examine all state banks annually, and liquidate the affairs of banks when this becomes necessary.

Applications for new state banks or branches require surveys to determine: the competition offered by existing banks; the opportunity for profitable employment of the bank's funds; the number of potential depositors; and the volume of banking business which the community may provide. Licenses are then granted or denied after a public hearing of all interested parties.

The staff examines each state bank and branch annually. During September, 1961 there were 532 state banking offices, including 95 main offices and 437 branch offices. The examination covers the condition and resources of the bank, the mode of management of its affairs, the actions of its board of directors, the investment and disposition of its funds, the safety and prudence of its management, and the security afforded its depositors and creditors.

The Banking Department is supported by a tax on all state banks. This tax is assessed at a rate limited by law to 0.01 percent or less of the total resources, less secured deposits and bills payable. The Banking Department is maintaining a reserve which is sufficient to pay the cost of operating the department without assessing any tax for a period of approximately 9 months.

TOTAL EXPENDITURES				
Support *(General Fund)*	$2,255,826	$2,708,328	$2,783,736	$75,408 (2.8%)
Personnel man-years	342.2	392	394	2

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Corporations is the protection of the public from fraud in the sale of corporate securities. The division is also charged with responsibility for preventing fraud and usury, as well as unsound business practices, in industrial loan companies, personal property brokers, small loan brokers, credit unions, check sellers and cashers, escrow agents, and retirement systems.

Program and Performance

The Division of Corporations carries out its duties and responsibilities under the authority of the Corporations Code. It is established under the provisions of Section 25300, Corporations Code.

Before many types of corporate securities can be offered for sale in California, application must first be made to this division. As of the fiscal year ended June 30, 1961, there had been 50,280 such permits, licenses, and orders issued pursuant to provisions of the Corporate Securities Law. The division investigates properties, books, and prospects of the applicants and a permit or license is issued or denied. It is estimated that 56,621 permits, licenses, and orders will be issued in 1961-62 and 61,747 in 1962-63.

Industrial loan companies, personal property brokers, small loan brokers, credit unions, check sellers and cashers, escrow agents, and retirement systems are regulated by first issuing a permit or license and, second, by conducting annual examinations in accordance with law. In 1960-61 there were 2,644 licensees subject to regulation. It is estimated that there will be 2,844 such licensees in 1961-62 and 3,070 in 1962-63. On July 1, 1960, trading stamp companies became subject to regulation by the division and 39 such companies were licensed on June 30, 1961.

GENERAL ANALYSIS

Objectives

The purpose of the Department of Insurance is to protect insurance policyholders and the rights of beneficiaries in California.

Program and Performance

The Department of Insurance is established under the provisions of Section 12906, Insurance Code. It is supported from license fees, examination fees, assessments, taxes, and other revenues derived from the insurance business. The main programs of the department are to: license companies and individuals who engage in the insurance business, admit insurers to operate in California, grant permits to issue securities and make changes in capital structure, approve certain types of policy forms, approve minimum workmen's compensation insurance rates, examine financial condition and procedures of insurers through field audits and analysis of financial statements, take over the California affairs of insurers in financial difficulty for the purpose of liquidation or rehabilitation, investigate complaints against licensees, and check activities of licensees for compliance with all insurance laws.

Compliance and Legal Division

In 1962-63 there are 12 new positions included. In 1961 several laws were enacted in the area of approval of policy forms placing additional responsibility and burden on the department in securing compliance by the insurance industry. In order to comply with the new legislation to become effective July 1, 1962 and the further fact that the workload in legal problems has continued to rise, 3 junior-assistant counsel positions, 3 policy examiners (new classification to be established instead of junior-assistant counsel), and 2 typist-clerks must be added to the legal staff.

The 1962-63 budget provides for the addition of 2 insurance service officers and 2 junior intermediate typists in the Policy Services Bureau because of the continued increased workload in cases from 3,340 in 1955-56, to 8,044 in 1960-61 and to an estimated 8,900 in 1962-63.

License Division

In 1962-63 there is 1 new position included for the division. In the Examination Unit there has been an increasing workload due to the steady increase in numbers of applicants for various insurance licenses. All persons must pass a qualifying exam-

GENERAL ANALYSIS—Continued

ination before being permanently licensed. The addition of 1 typist-clerk position will enable this unit to maintain its present level of services.

Examination and Financial Analysis Division

A total of 13 new positions is included for this division. The Examination Bureau was increased by 7 additional field examiners in the 1960-61 budget. However, this addition to the staff failed to meet the department's examination schedules as the workload increased due to the continued increase in admissions of insurance companies from 691 in 1953-54, to 727 in 1958-59, and to 771 in 1960. Since January 1961, an additional 19 insurers have been admitted and there are over 50 companies with applications pending. Consequently, 6 additional examiners are proposed to meet and maintain the necessary examination schedule both for the California companies and the necessary out-of-state examinations of insurance companies in co-operation with the National Association of Insurance Commissioners.

Since the rate regulatory Act of 1947, the Rate Regulation Bureau has examined 301 insurance companies. There have been 16 examinations of rating or advisory organizations or underwriting groups out of 13 license rating organizations, 18 advisory organization, and 29 joint underwriting and reinsurance groups. Due to the increase in company admissions and the fact that examinations of insurance companies would be desirable at a 5-year interval, instead of at an average of 10-15 years, the staff is increased by 5 positions including 2 senior rate analysts, and 3 semi-senior rate analysts in 1962-63.

Even though there has been a dynamic growth of the insurance industry since 1940 in California, the Financial Analysis Bureau's staff has actually decreased from 16.5 persons in 1940 to 11 persons in 1961. With the limited staff in this bureau, the tax functions, the auditing procedures, service to the public, and service to the other divisions have been curtailed to such an extent as to lower the level of service. It is proposed in the reorganization of this unit to increase the staff by 2 including 1 insurance examiner III and 1 intermediate account clerk.

GENERAL ANALYSIS

Objectives

The primary objective of the Division of Real Estate is to protect the general public in all matters relating to real estate, subdivision, business opportunities, mineral oil and gas, and real estate securities transactions handled through licensees; and to provide funds for education and research in the field of real estate.

Program and Performance

The Division of Real Estate carries out its responsibilities and duties in accordance with the provisions of Division 4 of the Business and Professions Code. The division issues an original license to real estate, business opportunity, and mineral, oil and gas applicants after the applicant has passed a written examination. The Real Estate Commissioner also grants permits to real property securities dealer. In former years both brokers and salesman applicants were required to take a second examination towards the end of the first year as a licensee to qualify for a renewable license. This second qualifying examination is s
required to be taken by all salesman applicants for renewal
license. The provisions of Chapter 272, Statutes of 1961, eli
nates the second examination for brokers. Consequently, aft
September 15, 1961, it was necessary to change from the machi
scored original examination to the more qualitative type
examination scored by a deputy real estate commissioner. A
thorized positions include 1 new deputy real estate commission
in 1961-62 and 1962-63 to handle the increased workload
quired due to the change in the original brokers examinatio
under the provisions of Chapter 272, Statutes of 1961.

Total examinations given in 1961-62 increased 4,116 ov
1959-60 or 9.2 percent. Original examinations increased 2,3
or 7.9 percent and second examinations increased 1,859 or 15
percent. The increase in original examinations in the past ye
will be reflected in the number of second examinations to
given in the current year. The effects of Chapter 272, Statut
of 1961, will not be felt in the second examination until 1962-6

Workload in the examination section will continue to increas

Each subdivision to be sold in California must have a filing with this division. If after investigation it would work a fraud on the public to permit the sale, a stop order is issued. During 1960-61, 3,014 subdivisions were filed. The subdivision law requires impounding buyer's deposits, or employing alternative methods of protecting them. A subdivider may post a surety bond to guarantee return of deposits in event the subdivider cannot deliver clear title, or post a bond and impound all sums above the principal amount of the bond; or impound the deposits and later furnish a bond to release them. The number of promotional subdivisions and the number of complaints in connection therewith have materially increased. This imposes a burden on the deputy and audit staff in investigating the complaint and in checking the accounts and bond requirements of these operators. Subdividers in the State had on file with the commissioner 293 bonds in the total amount of $6,360,200 as of June 30, 1961. Many subdivisions are revived necessitating reinvestigation and amended reports to be written. During 1960-61, preliminary, original and amended reports written totaled 4,097 as against 3,014 new filings. The law requires the commissioner to investigate and write a report on out-of-state subdivisions offered for sale in California. Last year there were 86 such subdivisions filed, an increase of 45 over 1959-60. Inspection fees received from the subdividers in accordance with the law for these out-of-state investigations totaled $12,452 as against $2,462 in 1959-60 indicating more investigation at distant points. An assembly interim committee, pursuant to HR 446, is now studying the problems incident to out-of-state subdivisions and additional man-hours will be required to investigate and complete studies for this committee.

During 1960-61, 5,678 complaints against licensees, subdividers, and real property loan brokers were received as compared with 4,838 in 1959-60, an increase of 840 complaints, or 17.4 percent. In recognition of the seriousness of many of these complaints dealing with the "10 percenter" activity. Chapter 886, Statutes of 1961 was enacted. This law created stronger regulation of real property securities dealers requiring that they must obtain an endorsement on their real estate broker license to so act. Also, the passing of this law necessitated the augmentation of the division's 1961-62 budget by 24 positions and the amount of $202,000. All of this increase was in the regulation section and consisted of 16 technical positions and 8 clerical positions. A permit to issue securities must also be obtained by paying a fee in accordance with the law and establishing that the offering will be fair, just, and equitable. Real property securities dealers, under this act, are required to file an annual audit, subject to spot checking by the auditors, or to be subjected to a division audit and deliver a statement to prospective investors concerning the security being offered and places conservatorship powers in the hands of the Real Estate Commissioner. Dealers may file proposed advertising copy and are generally subjected to closer regulation than existed in the past.

The auditing staff anticipates a total workload of 28,000 man-hours in 1961-62 and 33,200 man-hours in 1962-63. This is divided in 1961-62 to 19,500 man-hours on real property security dealers; 4,100 on subdividers; 3,800 on trust accounts, and 600 for orientation and training. In 1962-63, 19,800 man-hours will be devoted to real property securities dealers; 7,200 on subdivisions, and 5,600 on trust accounts with 600 for orientation and training.

Licenses of all type issued and in effect on June 30, 1961 totaled 144,183. Of these 3,467 were corporations, 1,941 partnerships, 79,946 salesmen, 58,362 brokers and 467 limited salesmen. In addition to these there were 10,117 branch licenses in effect. This is an increase of 8,542 licenses in effect on June 30, 1960 or 6.3 percent. It is estimated that a total of 154,101 licenses will be in effect June 30, 1962 and 160,265 will be in effect on June 30, 1963.

Continuing under the administration of the Real Estate Commissioner is the general real estate education and research program financed by appropriation from the Real Estate Education and Research Fund established for the advancement of real estate education and research at the University of California, the state colleges, and the junior colleges. The state college and junior college programs are co-ordinated with each other and with the activities in real estate education and research at the University of California through the Commissioner's office by means of the Commissioner's Real Estate Education and Research Advisory Committee, comprised of representatives of the University, the colleges, and the real estate industry.

In accordance with an overall master policy plan of this committee defining areas of activity, financial aid in 1961-62 is made available to 10 state colleges for faculty travel in connection with real estate programs; to 6 state colleges for 14 research and educational aid projects; to 3 state colleges and the University for 5 teacher's workshops; to 3 junior colleges for production of teaching aids, and to 25 junior colleges for initiation and upgrading of real estate courses. This is in addition to the major real estate research program conducted by the University of California, the University Extension Real Estate Certificate Program, and the extension correspondence courses which are in preparation. Junior college interest and performance in the program has increased rapidly, resulting in requests on their part for an increased proportion of fund support.

GENERAL ANALYSIS

Objectives

The Division of Savings and Loan is responsible for safeguarding investors' funds in savings and loan associations.

Program and Performance

The Division of Savings and Loan carries out its responsibilities and duties pursuant to Division 2 of the Financial Code, the Savings and Loan Association Law.

This division annually licenses eligible associations and their agents and salesmen, examines each association and its branches annually to determine compliance with law and to prevent unsound business practices in order to safeguard funds of the investing public. Applications for licenses made to the division are the subject of examination and public hearings to determine issuance or denial.

Limitations on operations of associations are dependent to a considerable degree upon appraised value of realty securing their loans. Division appraisers attempt a 7 percent sampling of association appraisals on new loans and the appraisal of the security underlying delinquent loans.

The division takes over the assets and business of associations in financial difficulties for the purpose of rehabilitation or liquidation.

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62

GENERAL ANALYSIS—Continued

Program and Performance—Continued

This division, wholly supported by annual assessment of operating associations, maintains 2 offices, 1 in Los Angeles and 1 in San Francisco.

Facilities Requiring Examinations:

	Actual 1958-59	Actual 1959-60	Actual 1960-61	Estimated 1961-62	Estimated 1962-63
Number of associations	173	174	192	200	208
Number of branches	131	149	161	180	199
Total Facilities	304	323	353	380	407

The trend of an increasing number of facilities shown above is expected to continue through 1962-63.

Because of the increasing number of associations and branches and their growing assets together with applications for new facilities, 24 new positions have been added to handle the related increased workload. These include 1 supervising savings and loan appraiser, 1 senior savings and loan appraiser, 5 assistant savings and loan appraisers, 14 auditor I positions, 1 stenographer, and 2 intermediate typist-clerk positions.

BOARD OF OSTEOPATHIC EXAMINERS

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62
SUMMARY				
TOTAL EXPENDITURES				
Support *(Contingent Fund of the Board of Osteopathic Examiners)*	$65,526	$74,185	$73,049	—$1,136 (—1.5%)
Personnel man-years	6.3	6.3	6.3	–

GENERAL ANALYSIS

Objectives

This board was established to maintain high standards for the osteopathic profession; to assist and protect licentiates and the public; to effect economics consistent with efficient administration; and to provide adequate policing of the profession.

Program and Performance

The Board of Osteopathic Examiners was created by initiative measure in 1922 and consists of 5 members appointed by the Governor for 3-year terms from graduates of osteopathic schools who are licensed to practice in this State and have been citizens for 5 years preceding appointment. It is a licensing and policing agency which has the responsibility of licensing as physicians and surgeons, graduates of osteopathic schools meeting the requirements of Division 2, Chapter 5, Business and Professions Code.

The board receives applications for examination for licensure as a physician and surgeon, investigates and approves approximately 220 applications per year, conducts a 3-day written examination, generally once a year, processes the examination, grades and licenses those applicants who have passed the written examination and have completed a year of internship in an approved hospital. Applicants may take the examination upon completion of their medical course, but a license may not be issued until they have completed a year of intern training. The board also receives and investigates an average of 40 applications for physician and surgeon certificates by reciprocity each year.

The number of licentiates has increased since 1956 as follows:

Year	*Number of Licentiates*	*Increase over prior year*
1956	2,340	–
1957	2,429	89 (3.8%)
1958	2,492	63 (2.6%)
1959	2,596	104 (4.2%)
1960	2,706	110 (4.2%)
1961	2,838	132 (4.9%)
1962 (estimated)	3,000	162 (5.7%)
Total Increase		660 (28.2%)

Approximately 120 medical groups or medical clinics are licensed under Section 2393, Business and Professions Code.

To maintain fiscal solvency of the board, effective in 1960-61, the annual tax and registration fees were raised administratively from $17 to $25 and the examination fees were increased from $25 to $35.

GENERAL ANALYSIS

Objectives

The purpose of the board is to protect the public and users of the San Diego port facilities by assuring that pilots are qualified to perform their function.

Program and Performance

The board licenses pilots operating vessels on the San Diego Bay, after careful examination of qualifications; fixes rates of pilotage, and records fees received by each pilot as submitted to the board on monthly reports. The 3-member board is appointed by the Governor to serve at his pleasure for terms not exceeding 4 years. Members include the mayor of San Diego as ex officio member, a nautical man, and 1 citizen, who must be residents of San Diego.

---

[a] Composed of savings in salaries and wages, $450; operating expenses, $3,523; and equipment, $394.

GENERAL ANALYSIS

The Board of Pilot Commissioners for the Bays of San Francisco, San Pablo, and Suisun consists of 3 members appointed by the Governor for 4-year terms. This board qualifies persons as pilots operating vessels on San Francisco, Suisun, and San Pablo Bays. At the present time 35 pilots are licensed by the board. Revenues are received from pilotage fees.

Chapter 2227, Statutes of 1961 created the Pilotage Rate Committee for San Francisco, San Pablo, and Suisun Bays, consisting of 5 members appointed by the Governor. Operative July 1, 1962, the committee's function is to make biennial reports to the Legislature concerning pilotage rates.

The estimated increase in the current year reflects higher pro rata and hearing fee charges. The budget year increase is caused by the operation of the Pilotage Rate Committee and includes $1,500 for hearing services and $1,000 for auditing services.

GENERAL ANALYSIS

Objectives

To protect the public health, welfare and safety by licensing only persons and firms of demonstrated knowledge and abilities to perform services for the public, to prevent unauthorized practices upon the public, and to discipline those licensed who fail in their public trust.

Program and Performance

The 27-member boards and commissions of this department are responsible for regulating over 600,000 persons practicing some 50 professions and vocations in the State of California. A total of over 1,700 people are needed annually to fulfill the department's responsibilities, including 230 board and committee members, 562 permanent employees, and approximately 1,000 part-time expert examiners, proctors, and other temporary help.

The member boards of the Department of Professional and Vocational Standards are headed by boards of 5 to 13 members appointed by the Governor from members of the particular profession or vocation regulated. The members usually serve overlapping 4-year terms. One additional board member, to represent the public has been added to most of the member boards pursuant to Chapter 1821, Statutes of 1961.

In general, the boards have authority to determine the qualifications of applicants for licenses, to give examinations and issue licenses, and to regulate licenses by means of inspection, investigation, and formal disciplinary action.

Each board employs a staff to assist with these functions. The cost of operations of the member boards is generally paid by the fees collected from those engaged in the occupations regulated.

Significant changes in the department have been made in the revised 1961-62 Budget and in the proposed 1962-63 as the result of legislation enacted during the 1961 Session. An important law change was the enactment of Chapter 366, Statutes of 1961, which initiated the biennial licensing cycle during 1962-63 for most of the member boards. This has the effect of leveling the Data Processing Operation workload by removing the peaks and valleys during renewal and reregistration periods.

One of the most significant changes to affect this department was the enactment of Chapter 2048, Statutes of 1961, which transferred the former Division of Administrative Procedure to the Department of Finance and changed the name to the Office of Administrative Procedure. 1960-61 and a part of 1961-62 expenditures, while under the jurisdiction of this department, are included for reporting purposes only. The office's revised 1961-62 Budget and proposed 1962-63 Budget may be found in the Department of Finance Budget (see page 331).

Finally, in addition to other legislation ranging from fee increases for specific member boards to new types of regulation, Chapter 1413 transferred the support of the Athletic Commission from the Athletic Commission Fund to the General Fund and abolished the Athletic Commission Fund.

A major administrative improvement was accomplished by centralizing most of the investigative services in the Division of Investigation, which was activated in March of 1961 by executive order of the Governor. A discussion of this improvement is included in the budget of Departmental Administration.

The 1962-63 department budget of the member boards and administration provides for the following proposed new positions:

Organization	Program	Number of positions	Cost
Departmental Administration	Administration, clerical, and investigation	24	$129,516
Contractors License Board	Administration and Regulation	22	124,008
Board of Cosmetology	Administration	1.1	4,981
Bureau of Furniture and Bedding Inspection	Laboratory	1	4,860
Board of Medical Examiners	Licensing	2	8,275

GENERAL ANALYSIS

Objectives

The departmental administration co-ordinates and supervises the administrative and financial affairs of its member boards and commissions.

Program and Performance

In carrying out the duties required under the provisions of the Business and Professions Code beginning with Section 100, the departmental administration performs centralized accounting, budgeting, business data processing, internal auditing, legal, management and procedures analysis, and personal services for these boards and manages the Business and Professions Building Annex.

Legislative and administrative actions bringing about the centralization of many functions on a departmental basis have been made in recent years to achieve operating economies, secure greater public participation, and to provide improved services without increasing costs.

To carry out these various duties 24 new positions are included for 1962-63.

---

[a] Expenditures and revenues of the Professional and Vocational Standards Fund are not carried into the budget totals, since the assessments against the various boards and the rent receipts for the building have been included as expenditures in the budgets of the respective boards and agencies.

Department of Professional and Vocational Standards

DEPARTMENTAL ADMINISTRATION—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Administration—a total of 9 new positions are proposed including 1 senior stenographer for the executive office to provide stenographic and clerical assistance to the chief deputy director position which was authorized in accordance with provisions of Chapter 1663, Statutes of 1961.

In administrative services 8 new positions are being proposed as follows: 1 budget analyst position to provide professional assistance in the formulation, preparation, and execution of the member boards' budgets as well as the departmental administration budget; 3 accounting technician positions to meet workload increases in the accounting office; 2 clerical positions to meet workload increases in the personnel section; 1 clerk to meet workload increases in the stenographic pool; and 1 financial examiner position to meet internal auditing workload increases.

Data Processing Operation—For 1962-63 2 additional positions are proposed including 1 accounting tabulating machine supervisor and 1 clerical position to handle workload increases.

Building Maintenance and Operation—The Business and Professions Building Annex was constructed in 1949 in accordance with the provisions of Sections 400 through 404 of the Business and Professions Code.

Section 403 of the Business and Professions Code provides that the costs of operation, maintenance, repairs, and other reasonable and necessary expenses shall be paid from rentals and that the building will be subject to the supervision of the Department of Professional and Vocational Standards in accordance with rules and regulations established by the Department and the Department of Finance.

The Annex is being operated with the main building as a self-sustaining enterprise. Tenants, other than units of the Department, include the Board of Equalization, the State Controller, the Division of Corporations and the Department of Finance. The special repairs and maintenance planned for 1962-63 total $37,000 for painting the interior and reroofing. Repayments to investing boards are estimated at $20,000.

Division of Investigation—This new division, which was activated in March of 1961 by executive order of the Governor, centralizes investigation and inspection activities for the participating member boards. The major goals are operating economies through reduction in expense, improved quality of investigation and inspection and better service to the public. The division headquarters is in Sacramento with principal offices in Los Angeles and San Francisco and field offices in Eureka, Fresno, Oakland, Red Bluff, San Bernardino, San Diego, San Jose, Santa Barbara, and Santa Rosa. Of the 27 member boards, 22 are now participating in the program. For this purpose 105.5 positions have been transferred from the various participating boards to staff the organization. Eight new Civil Service positions were approved administratively during 1960-61 to provide the divisions with administrative and clerical personnel as follows:

1 Chief of division;
1 Assistant chief—Southern California;
1 Assistant chief—Northern California;
1 Barber inspector—Northern California;
3 Clerk—Northern California;
1 Clerk—Southern California.

The 1962-63 Budget for this division includes 13 proposed new positions, 8 of which have been temporarily approved on an administrative basis, and 5 additional clerical positions to meet workload increases and organizational needs. These 5 clerks will have a limited term through June 30, 1963 pending a clerical workload-staffing study of the division by departmental personnel.

BUSINESS AND PROFESSIONS BUILDING ANNEX

Section 403 of the Business and Professions Code provides that the costs of operation, maintenance, repairs, and other reasonable and necessary expenses shall be paid from rentals and that the building will be subject to the supervision of the Department of Professional and Vocational Standards in accordance with the rules and regulations established by the department and the Department of Finance. Out of the rentals received from state boards occupying space in the building and fees paid by users of its parking facilities, are defrayed th cost of operating and maintaining the building. Generally, th remaining receipts are apportioned back to the boards contrit uting to the cost of the building in proportion to their respectiv investments.

Repayments to investing boards are estimated on an accrua basis. Actual repayments are made semiannually, after the clos of the period in which net rentals accrued.

Support *(Collection Agency Fund)*	$137,909	$209,030	$200,845	—$8,185 (—3.9%)
Personnel man-years	9.7	17	15.5	—1.5

GENERAL ANALYSIS

The Collection Agency Licensing Bureau examines, licenses, and regulates collection agencies, their officers and employees. Also, this bureau registers employees and licensees, examines the financial accounts of licensees, and appoints conservators for liquidations when necessary. The chief of the bureau is appointed by the Governor and serves under the direction and supervision of the Director of the Department of Professional and Vocational Standards. In addition, the chief serves in the same capacity for the Bureau of Private Investigators and Adjusters with his salary being shared equally by each bureau. There is within this bureau a California Advisory Board of Collection Agencies which consists of 5 members appointed by the Governor for 4-year terms.

Legislation will be introduced at the 1962 Budget Session of the Legislature to increase fees in order to continue the program on a self-supporting basis at the presently authorized level of service. The revenue estimates for 1962-63 reflect these proposed fee increases.

The bureau's workload is indicated in the following figures:

	Actual			Estimated	
	1958-59	1959-60	1960-61	1961-62	1962-63

GENERAL ANALYSIS

Objectives

This board of 8 members, each appointed by the Governor for a 4-year term, examines, licenses, and regulates contractors in the various branches of the construction industry.

Program and Performance

The budget includes 22 new positions in 1963-63. Of these, 21 positions are recommended in a survey report by the Organization and Cost Control Division of the Department of Finance. The purpose of this survey was to alleviate the increasing problem areas encountered by the agency because of increasing workload and need for a more effective organizational structure to provide supervision and dispersement of the field staff in relation to major workload needs in geographical areas. The positions as recommended in the survey and included in this budget are: 1 administrative assistant I; 4 supervising special investigators; 7 senior special investigators; and 9 clerical positions.

The budget also provides for 1 intermediate stenographer for the Oakland office to provide minimum clerical services and to meet increased workload.

One of the major provisions of the Organization and Cost Control Division's survey is a change in methods of filing and file searching which will expedite the gathering, furnishing, and reporting of information. The current year budget provides for an augmentation to partially put into effect these improved methods.

The following table indicate's the board's workload:

	Actual			Estimated	
	1958-59	1959-60	1960-61	1961-62	1962-63

Personnel man-years	25.3	20.8	21.8	1

GENERAL ANALYSIS

The Board of Cosmetology, which consists of 6 members appointed by the Governor for 4-year terms, examines, licenses, and regulates the practice of hairdressers, cosmeticians, manicurists, electrologists, beauty shops, and cosmetology schools.

The board maintains headquarters in Sacramento with branch offices in San Francisco, Los Angeles, and San Diego and in addition maintains examination facilities in San Francisco and Los Angeles.

The budget provides for 0.5 clerical position arising from the distribution of clerical services in the Los Angeles office to provide counter and public service. In addition, the equivalent of 0.6 man-year in temporary help is proposed to handle a general increase in workload.

A change in examination procedures has been instituted, which will result in less time being spent by board members in conducting examinations. Expert examiners are being provided which will result in economies in traveling and board member per diems.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1958-59	1959-60	1960-61	1961-62	1962-63

SUMMARY				
TOTAL EXPENDITURES				
Support *(Dry Cleaners' Fund)*	$245,133	$300,821	$300,691	—$13
Personnel man-years	17.6	10.9	11	(

GENERAL ANALYSIS

This board, which consists of 7 members appointed by the Governor for 4-year terms, inspects and licenses dry cleaning plants and press shops and examines and licenses operators.

Reimbursements to the State Fire Marshal during 1961-62 for dry cleaners' inspection services have been reduced by $8,704, due primarily to the depletion of available balances in the Dry Cleaners Fund. Over the past few years the board's expenditures have exceeded revenue. During the 1961 Session of the Legislature, legislation was passed amending the fee schedule to increase revenues. This increase has proven insufficient to maintain the budgeted level of expenditures during 1962-63 and therefore, additional revenues will be required. The 1962- revenue estimate, which is the beginning of the biennial licensi cycle, is based upon legislation to be proposed at the 19 Budget Session of the Legislature and which will produce estimated $100,000 additional revenue to the fund.

The board's workload is indicated in the following table:

	Actual			Estimated

Personnel man-years	33.5	16.5	16.4	—0.1

GENERAL ANALYSIS

The bureau, under the director, licenses and regulates sellers and processors of furniture and articles of bedding containing any types of filling materials. There is in the bureau an advisory board of 7 members appointed by the Governor for 4-year terms. A laboratory to insure compliance with legal requirements is maintained and provides the necessary analysis of filling materials for the protection of public health and welfare. Because of the many advances in materials and fabrics, the laboratory must maintain a continuing analysis program. In addition, the laboratory furnishes analytical services to the Purchasing Division of the Department of Finance on a reimbursement basis. The budget provides for 1 additional laboratory technician to handle the workload received from the Purchasing Division.

The bureau's workload is reflected in the following table:

	Actual			Estimated	
	1958-59	1959-60	1960-61	1961-62	1962-63

Personnel man-years	32.3	22.6	23.7	1.1

GENERAL ANALYSIS

The Board of Medical Examiners consists of 11 members appointed by the Governor for 4-year terms. Within the board there is a podiatry examining committee of 6 members, a psychology examining committee of 8 members, and a physical therapy examining committee of 5 members. Each committee member is also appointed by the Governor for 4-year terms.

The board examines, licenses, and regulates physicians and surgeons, podiatrists, drugless practitioners, and midwives. Within the board, the podiatry examining committee reviews applications and examines applicants for licensing as podiatrists; the psychology examining committee examines and passes upon the qualifications of applicants for certification and registration as psychologists; and the physical therapy examining committee reviews applications and examines applicants for licensing as physical therapists, subject to approval by the board.

The Board of Medical Examiners will take action to increase fees for both licensed and registered physical therapists, to balance the budgets for these functions. Sufficient legal latitude exists to permit such increase without necessity of legislation at this time.

For 1962-63, 2 clerical positions are included to handle increased workload.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1958-59	1959-60	1960-61	1961-62	1962-63

GENERAL ANALYSIS

The Board of Nursing Education and Nurse Registration, which consists of 6 members appointed by the Governor for 4-year terms, examines, licenses, and regulates nurses and schools of nursing in California. This board is currently being studied by the Organization and Cost Control Division, Department of Finance, for the purpose of establishing procedures, and proper staffing patterns. Pending the outcome of this survey, no additional positions are provided for either the current or 1962-63 fiscal year. Should it be found necessary to augment the staff it will be done administratively and such positions shown as proposed new positions for legislative review at the time the 1963-64 budget is considered.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1958-59	1959-60	1960-61	1961-62	1962-63
School of nursing	55	55	59	65	69

BUREAU OF PRIVATE INVESTIGATORS AND ADJUSTERS

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62
SUMMARY				
TOTAL EXPENDITURES				
Support *(Private Investigator and Adjuster Fund)*	$95,528	$127,269	$127,935	$666 (0.5%)
Personnel man-years	7.6	6.5	4.6	—1.9

GENERAL ANALYSIS

This bureau examines, licenses, and regulates private detectives, adjusters, repossessors, and employees and officers of private investigator agencies.

The chief of the bureau is appointed by the Governor and serves under the direction and supervision of the Director of the Department of Professional and Vocational Standards. In addition, the chief serves in the same capacity for the Collection Agency Licensing Bureau, with his salary being shared equally by each bureau. A transfer of a 0.5 clerical position was made to the Collection Agency Licensing Bureau when this bureau's San Francisco office was closed upon transfer of the investigative personnel to the Division of Investigation.

Legislation will be necessary in the 1962 budget session to maintain the authorized program on a solvent basis beyond 1963-64.

The following table indicates the bureau's workload:

	Actual 1958-59	1959-60	1960-61	Estimated 1961-62	1962-63
Licensees	1,261	1,690	1,433	1,450	1,450
Registrants	–	2,124	1,190	1,200	1,200
Applications	259	260	406	400	400

---

[a] Composed of savings in salaries and wages, $1,526; operating expenses, $6,140; equipment, $698; and an increase in reimbursements, $252.

STRUCTURAL PEST CONTROL BOARD

Headquarters Office at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62
SUMMARY				
TOTAL EXPENDITURES				
Support *(Structural Pest Control Fund)*	$106,198	$251,046	$272,519	$21,473 (8.6%)
Personnel man-years	6.8	17.9	16.2	—1.7

GENERAL ANALYSIS

The Structural Pest Control Board, which consists of 6 members appointed by the Governor for 4-year terms, examines, licenses, and regulates operators, salesmen, and establishments engaged in pest control. Legislation enacted at the 1961 Session makes mandatory the filing of copies of all structural pest control reports with this board. In addition, the board must furnish certified copies of such reports to escrow holders or real estate brokers involved where transactions concerning transfers of real property including structures are being processed. It is estimated that 283,500 reports and 56,700 certified copies per year will be the workload. Reports must be retained for a period of 2 years. One assistant registrar, 12.5 clerical positions and the equivalent of 2 man-years in temporary help were approved during the current fiscal year to meet the increased workload as a result of this legislation. Fees are charged for reports and certified copies, sufficient to insure the recovery of all costs involved.

The board's workload is indicated in the following table:

	Actual			Estimated	
	1958-59	1959-60	1960-61	1961-62	1962-63

GENERAL ANALYSIS

Objectives

It is the duty of the commission to secure adequate and safe services at rates that are fair and reasonable for both the public and the privately owned utilities and transportation companies.

Program and Performance

The commission consists of 5 members appointed by the Governor with the consent of the Senate for 6-year terms. It hears matters relating to rates, charges, services, safety, and affairs of the utilities and carriers under its jurisdiction. The commission exercises exclusive regulatory and supervisory jurisdiction over all intrastate operations of public utilities and in some instances over interstate operations. The commission determines intrastate rates and service of privately owned utilities and transportation companies. These include gas, electric, telephone, and telegraph utilities; street cars, trucks, buses, airlines, and vessels transporting freight or passengers in intrastate commerce; warehousemen, wharfingers, carloaders, and pipeline operators.

The commission regulates the issuance of securities and other transactions relating to the capital structure of public utilities, and protects the public interest by appearing before federal agencies and courts as an advocate in interstate proceedings.

During 1960-61 charges to utility customers were reduced $1,512,705 per year, including cuts of $831,700 in gas rates, $449,625 in electric charges, $4,850 in water and $226,530 in telephone charges. In addition, there were downward revisions amounting to $2,420,000 because of population and customer density growth, under which 458,500 gas customers were rezoned. The total of all these reductions amounted to $3,932,705 per year. At the same time, in spite of all its continuing efforts to hold down the price of out-of-state gas purchased for sale in California, the commission found it necessary to authorize rate increases for utilities estimated to produce $57,484,083 per year in gross revenue. It is worthy to note that 94% ($54,304,400) out of the total was for natural gas, of which more than $20,000,000 was to offset higher charges for imported gas over which the state commission has no control. In 49 separate proceedings water rate increases were authorized, amounting to $2,314,105 in gross revenue per year, and telephone and telegraph raises were $598,578 in gross revenue per year. Higher wages, increased taxes, and the other rising prices paid by utilities caused their other applications for permission to raise rates.

The commission intensified its campaign to hold down rates for out-of-state natural gas paid by California utilities, which in turn are paid by their customers. Importation of natural gas and the price paid for it are important because California imports three-fourths of its total supply, or 838.8 billion cubic feet of gas. The commission is actively participating in Federal Power Commission hearings on area pricing of gas at wellhead, a new concept which the FPC hopes will make it possible to eliminate many individual rate proceedings. Technical experts on the staff are preparing for FPC hearings on 4 rate increases dating back to April, 1955.

Transportation companies were affected by the same inflationary forces which resulted in higher utility charges. During the year, the commission authorized passenger fare increases which averaged 7.9 percent of fares in effect and were estimated to raise total gross revenues of the carriers $8,958,274 before payment of income taxes. Upward adjustments also were necessary in minimum rates for truck carriers of freight. Revenues of for-hire carriers operating intrastate showed a slight rise in 1960 to another new record total. Railroad, truck, and water carriers collected $770,135,766 in gross revenue for intrastate hauling in 1960 compared with $764,424,044 the previous year. Protection of the public by several comprehensive safety programs was a major part of the commission's work. Railroad-highway grade crossings in 3 counties were inspected in special area surveys, and many other inspections were made of potentially hazardous crossings. Two state funds aided cities and counties in paying their share of costs for construction of grade separations and for better warning signals at grade crossings for improved public protection. Inspections for impaired clearances along railroad tracks, overhead power and communication lines, and gas lines and underground gas storage facilities were made to insure their safe construction and maintenance.

The commission recently instituted 2 statewide general investigations. An investigation into all the various phases of the natural gas industry in California will include production, transportation, transmission, sales, and price at wellhead. The investigation is to determine whether regulation of natural gas production in this State would make more effective the regulation of gas corporations now under commission jurisdiction. The other investigation was ordered into operations of all transportation companies under commission jurisdiction, which include air, rail, water, and automotive carriage of both passengers and freight.

ADMINISTRATION

Objectives

The Administrative Division carries out the statutory duties provided for in the Public Utilities Code and maintains the general services necessary to the commission and its operating divisions.

Program and Performance

The statutory duties include receiving and recording all official filings; processing and distribution of all commission decisions and orders; release of all official correspondence; administering oaths; certifying all official acts; issuing subpoenas for attendance of witnesses; processing notices of commission actions; authenticating official documents and testimony in any inquiry, investigation, hearing, or proceeding.

Other services provided by this division include the preparation of the annual budget; internal fiscal accounting; revenue collection; supervision of general business affairs of the commission; reporting of all hearings; preparation of transcripts of hearings either for the commission or for outside parties; central personnel services; records management; sale of documents to the public; reproduction of papers; controlling incoming and outgoing mail; custody of official property; maintaining storeroom; execution of all contracts, agreements, and leases of property; advising the commission on administrative matters; and handling inquiries regarding commission actions and procedures.

The number of overall formal filings received by the commission in 1960-61 amounted to 8,171, as compared with 7,784 for 1959-60.

Work volume connected with formal pleadings continued its upward trend with 1,830 such matters docketed as compared with 1,574 the preceding fiscal year. These consisted of 1,148 applications, 7 supplemental applications, 128 complaints, 113 petitions for rehearing, and 434 investigations.

PUBLIC UTILITIES COMMISSION—Continued

ADMINISTRATION—Continued

Program and Performance—Continued

During 1960-61 189,547 copies of 2,527 decisions and orders were prepared and served by registered mail, regular mail, or personal service to interested or affected parties as required. This compares with 101,419 copies of 1,805 decisions and orders during the preceding fiscal year. Similarly, notices of hearings were directed to 116,516 parties, an estimated increase of 20 percent over the preceding fiscal year.

During the past year the functions of the Administrative Division were examined in detail and immediate and long range plans were adopted to simplify and expedite the division activities. As a result there have been significant improvements in management in 3 general areas: organization, operating policies and procedures, and in records management.

UTILITIES DIVISION

Objectives

The Utilities Division assists the commission in protecting the public by the regulation of privately owned gas, electric, communication, water, and steam heat utilities within the framework of the Public Utilities Code.

Program and Performance

Assignments of the Utilities Division include processing certain phases of rate increase applications for utility service, valuations of utility property for condemnation purposes, future requirements of utility service and adequacy of supply, certification matters, abandonment of service, analysis of special rate agreements, operational aspects of transfers and sales of properties, utility status, separation of plant, revenues and expenses between jurisdictions, and others.

The work program of the division includes the assignment of 65 percent of its personnel to formal proceedings. A considerable number of staff assignments are concerned with certificates to establish new utility systems and/or facilities and utility engineering aspects of utility tariffs, services, and facilities. The determination of property life and net salvage for depreciation purposes is an essential regulatory control. Emphasis will be continued in ascertaining the cost to produce and deliver out-of-state gas as well as the adequacy of the gas and electric resources to meet the growth of California.

Investigating informal complaints, disputed bills, and other public inquiries is expected to conform with experience of recent years. It is estimated that about 2,200 informal complaints and 9,000 public inquiries will be investigated and answered in this fiscal year. This represents about 8 percent of the division's activity.

Administration of general orders, including many phases of public safety, is expected to require 15 percent of the staff's time. Eleven percent of its time, is for division administration and various activities designed to insure reasonable utility service and rates, as well as a small amount of time for in-service training.

UTILITIES FINANCE AND ACCOUNTS DIVISION

Objectives

This division reviews applications for authorization to issue securities, participates in financial aspects of rate and certificate proceedings, makes accounting examinations of financial data of carriers and other utilities, reviews annual and other financial reports, supervises the application of accounting procedures prescribed by the commission, and conducts financial review and interpretation and rate and cost studies in connection with out-of-state natural gas suppliers regulated by the Federal Power Commission.

Program and Performance

The major portion of this division's time and manpower is consumed in formal proceedings. During the 1960-61 fiscal year this division actively participated in 108 formal rate proceedings before this commission and 5 rate proceedings involving utilities regulated by the Federal Power Commission. This division also participated in 146 other formal proceedings concerning, among other things, the issuance of securities and related matters.

Applications considered by the commission resulted in the granting of authorization for the issuance of securities aggregating $384,978,053 for the 1960-61 fiscal year.

Annual and other financial reports of utilities filed with this division for 1960-61 totaled 3,893.

During 1960-61, this division commenced and completed 73 audits of motor carriers disclosing under reporting of revenues subject to audit, and resulting in billings for additional fees in excess of $16,000.

[a] Temporarily approved to handle increased workload in connection with the study for the Monterey Peninsula Water District to be completed in 1961-62.

PUBLIC UTILITIES COMMISSION—Continued

TRANSPORTATION DIVISION

Objectives

This division regulates rates, service, safety, and operating conditions of privately owned, for-hire carriers of passengers and property by railroad, highway, and water, and to a limited extent, by air.

Program and Performance

The division studies cost factors, service rates, and regulations applicable to the movement of freight and passengers by railroad, highway, airlines, water carriers, express corporations, freight forwarders, warehousemen, wharfingers, and carloaders. These studies are presented as exhibits in public hearings before the commission involving the establishment of minimum rates throughout the State. The staff examines tariffs filed with the commission for compliance with statutes and commission regulations; audits summaries of rates charged by carriers to determine violations of established rates; quotes rates to the public; and participates and presents evidence in transportation rate hearings before the Interstate Commerce Commission to protect the interests of California shippers. Formal proceedings involving increased tariff rates sought by carriers are expected to be 10 percent over the current year.

There will be an increase in the inspections for compliance with safety standards of railroad bridges, trestles, and tunnels, and in inspections of the operations and equipment of motor truck carriers and bus companies under commission jurisdiction. As to the railroads, for the 1961-62 fiscal year, 3,925 miles of main line track and 734 miles of short line track are to be inspected for unsafe conditions. In the 1962-63 fiscal year, it is planned to inspect 4,360 miles of main line track and 621 miles of short line track.

The systematic inspection of main and subterminals for carriers by motor truck and passenger bus will continue to receive particular attention. For 1961-62 fiscal year it is planned to inspect 1,050 main truck terminals, 400 subterminals, and 5,500 trucks for compliance with prescribed maintenance and safety regulations. For passenger bus operations, inspection will involve 375 main terminals, 75 subterminals, and 750 buses. This activity is increased over the 1960-61 fiscal year due to the enactment of Chapter 2146, Statutes of 1961, which brings all charter buses under regulation.

The work involving railroad highway crossing safety and protection matters will increase approximately 16 percent. This is due to informal complaints received last year involving requested improvement in grade crossing protection. Since 1954, a total of $1,446,320 has been allocated from the State Highway Fund to install better warning devices at 565 crossings, which resulted in expenditure of $6,399,873 for improved protection to the public.

The 14 field offices effect compliance of the carriers transporting property within the State by field investigations of carrier records, as well as advising carriers regarding operating procedures and practices directed toward a dependable and adequate transportation system in the State. In order to handle the increased workload in the field offices in Eureka, Santa Barbara, Santa Ana, San Diego, and El Centro, it is proposed that the clerical staff in each of these offices be increased from 0.5 of a position to one full time position. Therefore, the budget includes the equivalent of 2.5 clerical positions as proposed new for the License and Compliance Branch.

Enforcement activities involving other than formal proceedings will increase about 8 percent. The rate analysis summaries will increase from 2,457 in the 1961-62 fiscal year to an estimated 2,653 in the 1962-63 fiscal year. In the same period misdemeanor prosecution proceedings are expected to increase from 272 in 1961-62 to 294 in 1962-63.

LEGAL DIVISION

Objectives

This function provides legal service to the commission and staff counsel in certain proceedings before the commission.

Program and Performance

This division represents the commission in proceedings in all of the federal courts and all of the California courts, as well as federal regulatory agencies. It also represents the public interest in proceedings before the commission. A very important part of the federal litigation involves the oil and gas producers and pipeline corporations.

The chief counsel and assistant chief counsel review all proposed commission orders and actions. The Legal Division staff co-ordinates with the Division of Corporations on security issues of utility corporations; provides staff counsel in certain proceedings before the commission; handles legislative matters and just compensation proceedings; analyzes records and recommends action on petitions for rehearing; advises concerning legality of pleadings and filing problems; handles complaints seeking immediate injunctive relief by interim order; advises the commission, the technical staff, political subdivisions, utilities, carriers, and the public on legal and procedural matters; reviews the technical staff's informal investigations and determines and recommends whether or not formal proceedings or court action should be taken.

The Legal Division spent a substantial amount of time representing the commission in proceedings in the United States Supreme Court, courts of appeal, and district courts, in the California Supreme Court, district courts of appeal, and superior courts, as well as before the Federal Power Commission and Interstate Commerce Commission. It also represented the public interest in matters before the California Public Utilities Commission itself.

The interest of the California consumer of natural gas in just and reasonable rates is of vital importance and must be protected. Since California purchases three-fourths of its natural gas from out-of-state sources, the commission, in order to represent such interest adequately, is required to appear before the Federal Power Commission in cases involving oil and gas producers, as well as pipeline corporations.

The commission was a party in 38 proceedings before the Federal Power Commission, 37 of which were natural gas matters. There were 2 cases involving natural gas before the United States Supreme Court, and 3 such cases before other federal courts. It is inevitable that growth of the State and increasing reliance upon natural gas as a basic energy source will require continued participation in proceedings involving federal regulation in this field.

During 1960-61, there were 7 proceedings before the Interstate Commerce Commission, involving such matters as discontinuance of intrastate trains, consolidation of interstate trains, abandonment of an intrastate branch line, increased rail rates, and control of the Western Pacific Railroad. One proceeding is pending before the Federal Communications Commisssion.

In 1960-61, there were 23 review proceedings before the California Supreme Court, of which 8 were pending at the close of the fiscal year. There are 17 cases pending in the superior court.

In 1962-63 one additional senior legal stenographer is included to handle increased workload.

PUBLIC UTILITIES COMMISSION—Continued

EXAMINER DIVISION

Objectives

This function provides the hearing examiners to assure due process to those seeking formal relief from this agency.

Program and Performance

Examiners are assigned to all formal filings which require a decision of the commission. During 1960-61, a total of 2,529 decisions and orders were issued of which 621 were render after public hearings. 1,065 days of hearings were held in th 1960-61 fiscal year. During 1960-61, a total of 1,830 form filings were received. As of June 30, 1961, there were 6 matters pending.

REPORTING

Objectives

This function provides the hearing reporters and transcribers for commission proceedings.

Program and Performance

Hearing reporters are assigned to all proceedings held before the commission. The reporters' notes are not transcribed unless ordered by either the litigants or the commission. Transcrip were prepared in 62 percent of the hearings reported in 1960-6 There were 211,264 original folios produced in 1960-61 con pared with 198,688 produced in 1959 60. The number of hea ing days totaled 1,065.

GENERAL ANALYSIS

The Health and Welfare Agency Administrator is responsible for the establishment of policies and management of programs to achieve the objectives provided for by Chapter 2037, Statutes of 1961, which became operative October 1, 1961. The Health and Welfare Agency consists of the Departments of Social Welfare, Mental Hygiene, and Public Health.

Accounting and other general administrative services are performed for the Health and Welfare Agency Administrator by the Department of Social Welfare.

GENERAL ANALYSIS

Objectives

The basic objectives of the Department of Social Welfare are (1) to assure that programs for assistance of needy persons are administered uniformly and humanely throughout the State in such a manner as to minimize distress, encourage self-respect and independence, and preserve family life; (2) to develop and strengthen services to children, to protect them, to prevent delinquency, and to provide substitute homes for children who cannot live in their own homes, and whenever possible provide permanent homes through adoption; (3) to provide protection and care through family homes or institutions for aged persons who cannot live in their own homes; (4) to promote and develop methods to assure the most economical and effective means of administration of the social welfare programs through other agencies.

Program and Performance

Programs are carried out within the framework of state and federal law. For administration of public assistance to the aged, blind, children and disabled, the department is responsible for assuring the Federal Government that these programs are administered uniformly and in accordance with state and federal standards in all counties of the State. The department develops the annual state plan under which federal funds for child welfare services are received and allocated. Except for direct licensing responsibilities and reporting to courts on independent adoption petitions, the administration of these programs is discharged through other agencies, public and private.

During the 1962-63 fiscal year, approximately 720,000 persons will receive money or services provided by agencies under the supervision of or licensed by the department. The total amount paid for these persons, and for administrative costs, is expected to amount to about $750,000,000 in state, federal, and county funds. Statewide and nationwide concern require a search for the methods whereby these services shall be provided and the money spent with optimum benefits both to the recipients and to the State. Current national trends are toward services related to specific problem areas: e.g., training and incentive for self-support; care and services for children in questionable homes; and absent parent services; physical restoration and rehabilitation of the disabled, incapacitated and chronically ill. California is ahead of other states in its planning and ability to implement work in these areas as a result of legislative and public interest and support.

The production of effective rehabilitation and prevention services cannot be done without additional cost and considerable additional effort. The budget, as proposed, provides:

1. Positions for workload increases, fully implementing authorized new programs, additional services representing legislative interest, and present work services not adequately performed.
2. Higher position classifications in the Program Development and Community Welfare Services Branches designed to obtain personnel of optimum quality for the additional responsibilities to be undertaken. These new classifications have been included in the current year to enable the department to take more expeditious action.
3. A rearrangement of organization structure designed to simplify internal relationships and group services more appropriately.

During 1959 and 1960, an overall management survey of the department was made by the Organization and Cost Control Division, Department of Finance. The 1961-62 Budget reflected some of the organizational changes recommended by this report. This budget anticipates the remaining organizational recommendations. Although the planning has been initiated to place the new organization into effect, execution is being delayed subject to legislative approval of the budget.

As recommended, a detailed review of the area office operation was made by the department's Bureau of Management Analysis. They also assisted in the organization of the Program Development Branch below the division level. As a result of these organizational changes during the 1960-61, 1961-62, and 1962-63 fiscal years the total number of positions exclusive of those for uncontrollable workload increases is reduced; however, the level of some is upgraded to conform to the increasing demands of local agencies for increased technical assistance.

The significant organizational changes are:

1. Responsibility for formal evaluative testing for policy planning or modification and supervision of the teams which determine disability in the Aid to the Totally and Permanently Disabled program are transferred to the Program Development Branch from the Community Welfare Services Branch.
2. Responsibility for formal evaluation of local agency operations is placed in a Division of Administrative Review, Community Welfare Services Branch. This reflects a change of operation from an individual case review to one of review of methods and procedures used to administer the programs which will aid in achieving more effective and economical administration.
3. In each area office, an area deputy and 1 assistant will assume the primary liaison functions between the department's aims and the community. They will be responsible for mobilizing local efforts and relating local needs to the statutory resources made available through the department so as to effect the greatest possible advances. The other assistant will assume primary responsibility for co-ordination of the operating and consulting staff.

   Each of the major area activities is unified in a section to provide a structure similar to that of the Program Development Branch, simplifying co-ordination between the area offices and the central office.

   These sections, which report to the assistant area deputy, are administrative services, aged and handicapped, family and children, and medical care. This arrangement reduces the span of control of the area deputy, allowing him to function in a planning capacity.
4. Implementation of the management survey organization recommendations in the Program Development Branch to group activities into functional activities in 5 divisions: Aged and Disabled; Family and Children; Medical Care; Methods and Standards; and Social Planning.

---

[a] The summary of expenditures from state, federal, and county funds for social welfare programs administered by the department and county administration of Child Welfare Services appears in the Local Assistance Budget, "Subventions for Social Welfare."

[b] Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF SOCIAL WELFARE—Continued

DEPARTMENTAL ADMINISTRATION

Objectives

This unit includes the Social Welfare Board, office of the director, administrative advisor, public information officer, and is responsible for the direction and co-ordination of departmental programs.

Program and Performance

Policies, rules, and regulations for the administration of the department's programs are established by the Social Welfare Board, consisting of 7 members appointed by the Governor. The director, also appointed by the Governor, is the administrator of the department and secretary of the board.

The administrative advisor's unit furnishes legal advice and guidance to the department and the Social Welfare Board, and hears appeals for the Social Welfare Board.

A total of 3 new positions are proposed for the 1962-63 fiscal year. One intermediate typist-clerk, authorized administratively to June 30, 1962, is continued as a proposed new position because of the greatly increased correspondence reaching the director's office from persons outside the department. The 2 social service specialists III are based on workload increase in appeals to the Social Welfare Board.

COMMUNITY WELFARE SERVICES

Objectives

This branch carries responsibility for supervision, consultation, guidance, and assistance to local agencies directly administering one or more of the functions of the department, providing for the enforcement of statutory and regulatory provisions, and providing consultation to various types of organizations as well as individuals. Area offices are in Los Angeles, San Francisco, and Sacramento.

Program and Performance

Review of the functions assigned has required a revaluation and redirection of emphasis of staff effort. Those functions reflecting increased staff effort are the public assistance medical care program, the new medical assistance for the aged program, and the projects for improvement of local administration and assistance for community services for older citizens.

A total of 13 new positions are proposed for the 1962-63 fiscal year. Of these, 6 are child welfare specialists in licensing and independent adoptions programs and based on workload increases. The licensing "yardsticks" are currently under study for the next budget. A medical social work consultant position is required, in each of the 3 area offices to assist local agencies in the implementation and administration of the medical assistance for the aged program. Clerical workload is expected to require 3 additional clerk positions in the area offices. As part of the reorganization, and to effectively carry out the added responsibilities imposed on the administrative staff by new legislation, an administrative assistant to the deputy director is required.

MANAGEMENT SERVICES

Objectives

Management Services is responsible for the development and execution of fiscal and administration policies, personnel management, research, management studies, training, and housekeeping functions.

Program and Performance

All equipment and general departmental operating expenses are budgeted under this unit.

Preliminary studies have been prepared which indicates that certain existing functions can be done more effectively by electronic data processing equipment. In addition, the increasing number of such installations in county welfare operations makes mandatory some central programming control for assistance procedures, so they will be developed in a consistent and comparable manner.

One associate administrative analyst, and funds for specialized systems analyses under contract are provided for to further analyze department systems and procedures. This staff will proceed with feasibility studies and prepare the necessary programs and procedural changes to develop certain operations on electronic data processing equipment owned by other state

DEPARTMENT OF SOCIAL WELFARE—Continued

MANAGEMENT SERVICES—Continued

Program and Performance—Continued

agencies. Delivery of such equipment for this department will be planned for the 1963-64 fiscal year.

The work of this branch is carried out through 6 units. Their responsibilities are as follows:

FISCAL OFFICE

This unit is responsible for administrative and aid accounting, field audit of aid programs, review of county claims, development of accounting systems, consultation concerning life care agencies, and all housekeeping activities including centralized files and stenographic pool.

The personnel of this unit direct the fiscal and office management functions of the department and develop the fiscal policies and regulations applicable to local agencies. This unit prepares the budget and supervises its execution. It is also responsible for operation of the drug rebate program. A total of 8 new positions are proposed for new program authorized by the 1961 Legislature and increased workload.

Three governmental auditor II and 1 intermediate account clerk are required for the field audits of the medical assistance for the aged program, more adequate audit of the public assistance medical care program, and audit of local projects.

Four additional intermediate clerical positions are necessary on a workload basis for increased work in the central clerical pool.

MANAGEMENT ANALYSIS

This bureau is responsible for administrative progress reporting, reports control, forms control, management and procedural analysis, consultation to counties in machine processing, yardstick studies, and maintenance of procedure manuals. Management studies are made of the department and local agencies. Consultation is provided on organization, methods, space, and equipment to management of the department and local agencies. One associate administrative analyst is requested to be continued in support of the case management activity.

MANUAL SECTION

This unit is responsible for co-ordinating, editing, and publishing departmental rules and regulations in codified form. During legislative sessions, legislation is analyzed and distributed to staff and a status file is maintained on that affecting welfare programs.

PERSONNEL

The bureau administers a merit system for counties not having a civil service system, supervises the operation of the county civil service system covering personnel engaged in the administration of public assistance and child welfare programs and performs the personnel work for the state department. County civil service systems are reviewed and evaluated to assure conformity with state and federal requirements. Consultation is provided to counties on personnel activities. All county welfare department personnel transactions for the noncivil service counties are processed by this bureau.

One additional personnel analyst is required for increased workload in connection with merit system and civil service counties. The present staff devoted to merit system and civil service counties operations was justified on the basis of maintaining the department's regular day-to-day operations of surveillance, review, and approval of personnel transactions, document processing and keeping plan material flowing to the federal agency. In the last few years the State Social Welfare Board has regarded personnel management as an important factor in moving the quality of local performance toward the more positive program ends now being emphasized, e.g. rehabilitation, decrease in dependency, and more effective social services. This has meant that much attention has been devoted to matters of salary, minimum qualifications, and duties of local social work personnel not at all contemplated in the present on-going assignments. The result has been that staff emphasis has been shifted to special studies, projects or reports urgently requested by the board and the department in an effort to improve the manpower situation. The staff work on these assignments however, has been done and continues to be done at the expense of the normal day-to-day assignments. To achieve the objectives of the ongoing assignments and the additional workload, the additional personnel analyst position is needed.

RESEARCH AND STATISTICS

This unit is responsible for analysis of statistics for all operations of the department, for preparation of estimates and special studies, and for the preparation of departmental and statistical reports. Statistical reporting and program research are planned, directed, and co-ordinated by this unit. It also analyzes trends, economic conditions, and proposed program changes for effects on programs and budgets.

A total of 9 new positions are proposed; 6 of these, 2 tabulating machine operators, 2 key punch operators and 2 intermediate account clerks were established administratively in the current year to process prescriptions for claiming rebates from drug compaines expected to total $250,000 in the budget year. Continuation is requested. One associate research technician to support the case management activities (discussed under Program Development) is requested to be continued on a permanent basis.

One associate research technician and 1 assistant research technician positions are proposed for more adequate attention to the disabled and blind caseloads, for assistance in preparation of estimates of future costs, and for studies involving the verification of program trends in respect to specific changes in legislation.

TRAINING

This bureau is responsible for the development and administration of in-service training program for county and departmental personnel. The 1961 legislative session added an orientation center for new county staff and a social work scholarship program to the department activities; both are directed through this bureau. It also added 3 half-time positions for supervising graduate student field work in social welfare. It was found impossible to use part-time positions for this work. Continuation of an additional half-time position, established in 1961-62 on an administrative basis, is essential.

PROGRAM DEVELOPMENT

Objectives

The objectives of the Program Development Branch, with increasing emphasis on prevention of dependency and rehabilitation, are to plan and develop proposals designed to improve welfare services, meet changing social and economic patterns, evaluate welfare programs, and formulate and interpret rules, regulations, methods, standards, and procedures through which welfare programs are carried out at the local level.

Program and Performance

The following factors were considered in preparation of this budget:

1. The rapid rise in public awareness, together with some increase in dissatisfaction, of welfare programs in general and public assistance in particular.
2. Changing economic and social conditions. The growth of the income maintenance programs of Old Age, Survivors and Disability Insurance, unemployment insurance, and disability benefits has resulted in public assistance rolls predominantly composed of cases with serious social and health problems, in addition to financial need.

Specific areas of emphasis will be:

1. Care and services for children born out of wedlock, including special staffing to deal wtih these children, and protective services in their behalf.
2. Services for children in questionable homes, and programs for children placed in foster care.
3. Services to absent parents, with counseling to both parents, efforts at reconciliation, and efforts to prevent family breakup or to restore family unity.
4. Money and home management problems.
5. Vocational and employment training for recipients and older children, development of incentives for self-support, and child-care and auxiliary services to help move away from dependency.
6. Development of employment opportunities including properly safeguarded work relief.
7. Physical restoration and rehabilitation of disabled, incapacitated, and chronically ill persons to promote self-care and self-support.

The added responsibilities imposed on this branch by the reorganization and expanded program requires the addition of an administrative assistant to the deputy director's staff.

Functions and responsibilities of the divisions are as follows:

AGED AND DISABLED DIVISION

This division is responsible for programs for the aged and disabled and the licensing of boarding homes and institutions for the aged. These programs are designed to serve adults. This division drafts, interprets, and evaluates the rules and regulations, standards, criteria, and guides pertaining to the rights of people to the benefits, protections, and social services flowing from these programs and to the manner in which they should be carried out at the operating level.

DIVISION FOR THE BLIND

This division is responsible for the formulation and interpretation of standards, policies, rules, and regulations governing the administration of the blind assistance programs. The personnel of this division review reports of eye examinations, provide consultant services on medical phases, and administer the Prevention of Blindness Program.

---

[a] Funds made available within each category through savings effected under "Agency Plan" of organization.

DEPARTMENT OF SOCIAL WELFARE—Continued

PROGRAM DEVELOPMENT—Continued

CHILDREN AND FAMILY DIVISION

This division is responsible for the programs related to aid to needy children, child welfare services, licensing of boarding homes and institutions for children, and adoptions. These programs are designed to serve families with children and children who are separated from their family. This division drafts, interprets, and evaluates the rules, regulations, standards, criteria, and guides pertaining to the rights of people to the benefits, protections, and social services flowing from these programs and to the manner in which they should be carried out at the operating level.

Particular attention will be focused on the following problems through the 1962-63 fiscal year:

1. The neglect, abuse, and exploitation of children. There is increasing concern as to whether children, including those not now known to the welfare agency, are being effectively protected from neglect and abuse by the adults entrusted with their care and custody.
2. Mentally retarded children. There are long waiting lists for admission of children to state institutions for the mentally retarded. These children and their families often are without needed counsel during this waiting period.
3. Separation of children from their parents. Thousands of children are separated from their parents for long periods and shuttled from one foster home to another. A long-range plan would give them a sense of having a family. These circumstances are closely associated with crime, delinquency, and mental illness.
4. Incapacitating conditions which prevent people from remaining in or returning to productive activity. Some of the prime factors associated with dependency on public aid are physical, mental, and emotional impairments which reduce the capacity of the individual to compete successfully in the labor market.
5. Family disorganization and breakup. Much of our welfare costs can be traced directly to conditions and circumstances associated with this complex and pervasive problem.

Six new positions are proposed; 5 are to be financed entirely from federal funds.

Three social service specialist II will be used in the development and operation of programs in the fields of foster care, rehabilitation, and strengthening of family life. These positions will be used to investigate ways in which the need for foster care can be prevented or early plans made for the return of a child to his parents; to concentrate on the processes, methods, and problems involved in providing and evaluating rehabilitative services; to seek effective means for the prevention or reduction of family disorganization and breakup; and to provide the stimulus to our local agencies for the development for a family-centered approach.

One social service specialist I will be used to review special problems involved in improper adoptions.

Consultant services are requested to supplement staff resources with qualified experts on the problems associated with the prevention of child neglect and services to mentally retarded children and their families.

One intermediate stenographer will be required to provide clerical assistance to these positions.

DIVISION OF MEDICAL CARE

It is the responsibility of this division to formulate and interpret standards, policy, rules, and regulations governing the administration of the medical aspects of all welfare programs. This division will continue to give particular attention to an integrated and co-ordinated attack on the problems of disease and impairment which are of significance in the need for welfare services. Standards, guides, and procedures will be developed through which local agencies and the department can more effectively work on: treatment objectives for the ill or disabled; the cause, duration, and results of medical care; and the need to control the use of medical facilities to assure their appropriate use. It provides medical and dental consultation to department and county staff and to aid in co-ordination of medical and social services and maintains liaison with health practitioners, professional associations, and vendors involved in the provision of medical services.

One-half man-year of medical consultation is proposed to assist in the standardization of disability evaluations and development of policies.

A total of 8 positions are required on a workload basis for the increased number of disability determinations: 5 medical social work consultant I, 2 medical consultant, and 1 intermediate stenographer.

The medical assistance for the aged program has been activated, effective January 1, 1962, under contract with the Department of Public Health. The services to be provided the Department of Social Welfare include investigations, auditing and recommendations on standards of institutional care; issuance, renewal and revocation of certificates; and rates of payment to institutions.

SOCIAL PLANNING DIVISION

This division is responsible for long-range planning through which welfare programs are developed, modified, and improved to meet the changing characteristics of the State's population and economy. Its mission is to plan so that welfare programs in operation at any given time are always geared to current needs and circumstances.

The functions of this division include: investigation and research necessary to determine the need for new programs or the modification or improvement of existing programs; reflection of the result of such investigation and research in a continually updated blueprint for the future which takes into account social and economic conditions and trends and their impact on the population and on welfare programs; development in broad outline and on a time-phased basis of the essential elements of new programs or basic modification of existing ones, including identification of the issues involved, and legislative requirements; and direction and co-ordination of demonstration and research projects.

This division will give particular attention to long-range implication for welfare programming of such problems as: the socio-economic situation of itinerant farm labor families, the actual needs of this group and the most appropriate type of welfare programs, the economic and social conditions contributing to the increasing proportion of minority groups in the ANC caseload, and the implication of unemployment on changes in our welfare programs.

Consultant services are requested to supplement staff resources with qualified experts in dealing with the diverse problems of minority groups, economic trend effects on welfare program planning, and relation between welfare dependency and the method of program administration.

DEPARTMENT OF SOCIAL WELFARE—Continued

PROGRAM DEVELOPMENT—Continued

STANDARDS AND METHODS DIVISION

This division is responsible for the ways in which the knowledge, skill, and methods of social work and related disciplines can be used most effectively in attacking the problems of public concern represented in the caseload, and for the standards of operational practice required by the preventive and rehabilitative emphasis in our welfare programs.

This division will concentrate its work emphasis on the development and means through which the department can provide effective leadership in such matters as: methods of caseload management, material organization format and use of case records, evaluation of case effort, and quality and quantity control of the work of professional staff. Particular attention will be focused on methods through which recipients may be enabled to be engaged in productive work activity through programs of vocational employment counseling, work experience programs, and other methods designed to help them retain and develop skills and work habits.

One social service specialist II is proposed to develop and interpret standards, guides, and training materials related to supervisory methods and practices. The effectiveness of the work of local agencies is closely related to the quality of supervision, especially of the casework staff. This position will make it possible for the department to take the lead in developing more effective supervisory methods.

Consultant services are requested to supplement staff resources with qualified experts on problems associated with the development of employment preparation and standards programs, more effective use of group methods, and use of systematic standardized methods of family diagnosis and case classification.

Continuation on a permanent basis is requested for the division chief (case management project director) and 1 intermediate stenographer. These positions are required for continuation of the program of methods improvement in social casework activities.

WELFARE STUDY COMMISSION

GENERAL ANALYSIS

Objectives

The commission established by Chapter 2045, Statutes of 1961, is charged with studying the entire field of public welfare in California and making recommendations for improvement of all aspects thereof.

Program and Performance

The commission is composed of 26 members: 17 members appointed by the Governor to consist of 3 directors of a county welfare department, 1 county probation officer, 4 county supervisors, 3 county administrative officers, 1 superior court judge. 1 district attorney, and 4 persons representing the general public; the chairman of the State Social Welfare Board, the Directors of Employment, Mental Health, Public Health, and Social Welfare; and 4 members of the Legislature, 2 from the Senate and 2 from the Assembly, appointed by their respective houses.

In accordance with the enabling legislation, the commission is to study and make recommendations on:

1. The whole field of public welfare laws in this State, including the administration of those laws.
2. The economic and social effects of the existing programs.
3. The basic policy for public assistance programs and their relation to federal welfare and social insurance benefit programs.
4. The areas where the policies of existing programs are deficient or inconsistent with the public purpose to be served.
5. The nature and scope of service which are an appropriate part of a comprehensive and integrated public welfare program.
6. The administrative organization, methods of administration and governmental cost sharing, and research and control procedures which will be most effective in conserving human resources and public funds.
7. Statutory revisions necessary to carry out the recommendations of the commission and to simplify and integrate the Public Welfare Law.

The 1962-63 Budget represents a culmination of the efforts of the commission. Increase in the expenditures for studies is necessary to complete the required report for the Governor and Legislature. The commission will cease to exist upon adjournment of the 1963 Regular Session of the Legislature.

Services are contracted with the Department of Social Welfare in order to take advantage of federal funds available for these purposes.

GENERAL ANALYSIS

Objectives

To advise the Governor on action needed to solve the problems of aging; to encourage and provide consultation to the local communities of the State in developing programs to meet the needs of their senior citizens; to work towards a more effective use of the resources of the State in behalf of its senior citizens; and to act as information center on all aspects of aging.

Program and Performance

The committee of 8 citizen members is appointed by the Governor and is augmented by 4 members of the Legislature, 2 from the Senate and 2 from the Assembly, appointed by their respective houses.

The committee is charged with the responsibility to study the problem of aging in California and to make recommendations to the Governor for needed action. Through its staff, it provides consultation and guidance to the communities of California on the development of programs designed to meet the varied needs and problems of their older residents. Further, it receives as a result of this activity the expressions of community interest and concern regarding the needs and problems of aging persons which are helpful in the formulation of recommendations by the committee for the consideration of the Governor. The committee and its staff serve as a clearing house on activities in the field of aging at a state and local level. A library of books, periodicals, and pamphlets concerned with the field of aging is being developed. A newsletter is prepared to summarize the developments and programs in the field of gerontology and to give information regarding current activities at a state and local level in California.

The 1962-63 Budget provides for 1 additional professional position to strengthen the committee's functions of information and consultation to the communities of California on the development of programs and services for their senior citizens. This reflects the increased activity and need for information as a result of the Governor's Conference on Aging, the White House Conference on Aging, and related objectives.

EXPENSES OF WHITE HOUSE CONFERENCE ON AGING

A grant of $15,000 was made by the Federal Government to finance activities in California prior to the White House Conference on Aging held in 1961. The funds were authorized to conduct surveys of services to aged persons, to conduct conferences on aging at the state level, or to pay expenses of delegates to the White House conference in Washington, D.C. The federal grants were used to conduct a survey of services to aged persons and to issue a report of findings of the survey. A position of special consultant was established from January to October 1960 to conduct the survey and prepare the report.

GENERAL ANALYSIS

Objectives

The Department of Veterans Affairs administers the State's program of veterans benefits and provides a claims and rights service to assist veterans in obtaining benefits to which they are entitled from the Federal Government.

Program and Performance

Programs administered by the department include the financing of farm and home purchases, educational assistance for veterans and veterans' dependents, and determination of eligibility for state benefits as well as preferences granted under civil service. The department also operates the Veterans Home and Woman's Relief Corps Home. To strengthen the Department of Veterans Affairs rehabilitation program for California veterans, as was recommended by the Legislature during the 1961 General Session, a position of medical deputy director, rehabilitation program was established in 1961-62.

In addition, the department administers the subventions for county service officers through which certain counties are reimbursed for a portion of the cost incurred by these counties in providing services to veterans.

DIVISION OF ADMINISTRATION

GENERAL ANALYSIS

The administration division provides the functions of policy formulation and administrative direction to the other divisions of the department. The California Veterans Board, a policy-making body composed of 7 members appointed to 4-year terms by the Governor; the administrative head of the department; the assistant to the director; and functions common to all divisions, such as personnel; are included in this division.

[b] Under the provisions of Section 702, Military and Veterans Code, the salaries and expenses of the California Veterans Board, the secretary of the board, the director, and the assistant to the director, and related expenses are paid in full from the Veterans' Farm and Home Building Fund of 1943.

[c] Provided by reclassification and transfer of Veterans Home position.

[d] One position transferred from Division of Educational Assistance in 1961-62.

DEPARTMENT OF VETERANS AFFAIRS—Continued

General Activities

DIVISION OF EDUCATIONAL ASSISTANCE

GENERAL ANALYSIS

This division administers a program of educational assistance for California veterans, and dependents of veterans who died or were totally disabled as a result of service. The division provides educational counseling and assistance in securing admission to suitable institutions of learning. After acceptance into the program, the students' grades are reviewed periodically and only those making satisfactory progress are continued. Only candidates whose federal benefits are no longer available are eligible for this program. In addition, veterans must show a legitimate need for further training. Acceptance of nondisabled World War II applicants was discontinued July 25, 1959.

For costs of this program and more detailed information, see Educational Assistance to Veterans and Dependents, page 663.

DIVISION OF SERVICE AND CO-ORDINATION

GENERAL ANALYSIS

The function of this division is to assist veterans and dependents of veterans in establishing rights to any privilege, preference, care, or compensation provided for by the laws of the United States or the State of California.

The headquarters and field service function provides for the determination of the eligibility of veterans to state benefits, including preference in civil service examinations. This function also provides advisory service to County Service Officers and performs a quarterly review of the service officer's activities. As of July 31, 1961, a total of 562,796 applications to establish California veterans' eligibility had been approved, and 148,230 veterans had established their eligibility for preference in civil service examinations.

A major function of this division is to provide assistance to veterans in presenting and pursuing claims which the veteran may have against the United States as a result of war service.

EDUCATIONAL ASSISTANCE TO VETERANS AND DEPENDENTS

This program, administered by the Educational Assistance Division in accordance with the provisions of Section 981 to 981.8 and Sections 890 to 899 of the Military and Veterans Code provides the opportunity for California veterans and dependents of deceased or totally disabled veterans to continue their education. The total assistance is limited to $1,000 per veteran, and includes subsistence of up to $40 per month based on actual school attendance, plus necessary books and supplies up to a total cost of $50 per month. The educational aid to dependent widows and children is not limited as to total amount, but cannot exceed $900 per school year. Subsistence payments are limited to $50 per month for dependents attending college, and $20 per month for high school students. Assistance to widows is limited to not more than 4 years duration, or its equivalent in part-time training. Other eligibles may file for and receive assistance when they are between the age of 14 and 21. Assistance may continue until the course is completed, or through age 26. The maximum age is increased through age 30, if the dependent's education is interrupted by military service.

The Educational Assistance program encourages training, which might otherwise be beyond the applicant's financial means. While the subsistence paid covers only a part of the present-day cost of school attendance, it does serve as an incentive to continue in school and divert other resources toward an educational goal.

Only applicants whose federal benefits are no longer available are accepted, therefore, there is no duplication with federal educational programs. Veterans must show a legitimate need for further training and demonstrate ability to successfully pursue the educational course requested. Once in training, the student's grades are reviewed periodically and only those making satisfactory progress are continued. Division representatives also insure that the selected educational plans are financially sound, and entitlement is budgeted as necessary. As a result of these policies, substantial savings are realized and the full $1,000 veterans entitlement is seldom used, the average expenditure being approximately $500.

The 1962-63 fiscal year is based on an estimated average enrollment of 10,820; 7,700 veterans and 3,120 dependents.

GENERAL ANALYSIS

Objectives

The Veterans' Home of California was established to provide a home for qualified California veterans who have physical disabilities and need hospital, chronic, or domiciliary care which they are unable to provide for themselves.

Program and Performance

The home was founded in 1883 by the Grand Army of the Republic and the Associated Veterans of the Mexican War and was taken over by the State in 1897. As of July 31, 1961, there were 1,823 resident members, including 58 women veterans. The Federal Government acknowledges its responsibility for the veterans cared for by contributing $912.50 per year for the partial support of each member.

To be eligible for admission, a veteran must have been a resident of California for at least 10 years immediately prior to making application, and have honorable wartime service in the armed forces of the United States. He must have temporary or permanent disability to the extent that he is unable to follow a gainful occupation and be financially unable to provide for his hospitalization or domiciliary care. The home has no facilities for and does not accept veterans who are mentally ill, tubercular, chronically alcoholic, or addicted to narcotics or other drugs. Chapter 1825, Statutes 1959, authorizes the Department of Veterans Affairs to investigate the financial status of applicants and members to determine if the veteran is able to finance hospital or domiciliary care outside the home.

To carry out its medical program, the home's facilities include a fully accredited modern medical-surgical hospital of 449 beds and a 26-bed receiving ward. The home includes 1 domiciliary unit of 55 beds for women veterans, a recreation center, and various specialized buildings, including some employee housing. The hospital staff has 19 full-time physicians 103 graduate nurses, and 182 hospital aids.

Convalescent hospital cases and most chronic ambulatory patients are assigned to the convalescent barracks near the main hospital. Members placed here are normally able to take care of themselves, go to meals in their own dining room, and obtain medical care at the Domiciliary Medical Center.

Approximately 56 percent of the present membership live in the 7 domiciliary barracks on the reservation. Of these barracks, 6 are for male veterans, and 1 is for women veterans

The veterans home offers possibilities for the rehabilitation of members along physical, occupational, vocational, social, and spiritual lines. Unless employed at the home or excused by the chief of medical services, all domiciliary members are required to perform work therapy duties.

WOMAN'S RELIEF CORPS HOME

Located near San Jose

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
SUMMARY			
TOTAL EXPENDITURES			
Support *(General Fund)*	$9,517	$6,800	$6,800

GENERAL ANALYSIS

Objectives

The home provides custodial, medical, and nursing care for widows and dependent destitute unmarried daughters of Union Veterans who served honorably in the Civil War.

Program and Performance

Admissions to the home were closed in 1947 and effective May 1, 1954, the facilities were leased to private persons for the purpose of conducting a nursing home for the aged. Under the terms of a contractual arrangement between the Department of Veterans Affairs and the lessee, the remaining members will be cared for in accordance with standards of care and service prescribed by the department. An average population of one member is estimated for the 1961-62 and 1962-63 fiscal years. This budget reflects a decrease in average population of 1 member.

EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
OPERATING EXPENSES			
Hospital and medical aid for members pursuant to Section 1086.1 of the Military and Veterans Code	–	$500	$500

SUMMARY			
TOTAL EXPENDITURES			
Support *(General Fund)*	$2,943	$3,400	$3,400

GENERAL ANALYSIS

Objectives

This 5 member nonsalaried commission, created by Chapter 430, Statutes of 1957, is appointed by the Governor to promote and provide for the welfare of and assist in the maintenance of the headquarters of Department of California, United Spanish War Veterans.

Program and Performance

The program provides for the traveling expenses of the commission and for contractual services with the Department of California, United Spanish War Veterans.

GENERAL ANALYSIS

Function

The department has responsibility for planning, constructing, and operating authorized state water projects; co-operates in water projects with federal and local government units; takes responsibility for averting, alleviating, or restoring damaged property during times of emergency resulting from storms and floods, and for declaring of an emergency from such causes; compiles basic data on water resources and water use; compiles data on diversions and stream flows on the Sacramento and San Joaquin Rivers and tributaries, performs maintenance work on the Sacramento River Flood Control Project; approves designs and supervises construction of all dams, except those federally owned, as regards their safety; supervises certain flood and storm damage repairs in which the State participates financially; supervises certain public water districts, reviews federal reports on flood control and water supply projects, administers state filings on water and provides watermaster service; makes investigations of surface and underground water supplies; makes water quality investigation; licenses artificial weather control operations; administers interstate compacts relating to water; administers the reallocation program to reimburse local agencies for their costs incurred by co-operation on federal flood control projects; represents the State on matters pertaining to the Central Valley Project; conducts engineering investigations for the California Districts Securities Commission; supervises construction of hydraulic structures for other state agencies; has responsibility for investigating and correcting beach erosion; and in co-operation with other agencies, forecasts snowmelt and other runoff.

Budget Format

The state operations budget for the department is presented on a program basis in order to provide information on the department's many projects, investigations, and activities. The programs are divided into 7 major categories, ranging from basic data collection and analysis through project planning investigations to the design, construction, and operation of authorized projects. These categories have been further refined in the 1962-63 budget to improve understanding of the department's program and facilitate review and evaluation. The categories are:

General Administration—management of the department's activities.

Basic Data—collection, recording, and analysis of data bearing upon the quantity, quality, and availability of water.

General Investigations—water related studies of problems which do not require physical works.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS—Continued

Budget Format—Continued

Other Activities—certain statutory and regulatory activities and miscellaneous functions.
Project Planning—investigations having as their objective the formulation of physical works.
Design, Right-of-Way, Construction—development of authorized projects.
Operations—management of constructed facilities.

The organization budget, which represents the costs of the department in terms of positions, related operating expenses, and equipment, is shown in detail in the Appendix in the Water Resources Revolving Fund. In addition, the department provides service to other agencies including other governmental levels which are reimbursed. The departmental costs less the reimbursed services are summarized in the following schedule.

Departmental Costs:			
Support	$9,774,676	$10,286,318	$10,185,000
Capital Outlay	9,706,228	15,895,824	19,158,103
Total Departmental Costs [c]	$19,480,904	$26,182,142	$29,343,103

GENERAL ADMINISTRATION

General Administration includes the functions of direction, supervision, and management of all departmental programs, as well as certain staff and specialty costs which are allocated on a pro rata basis. This covers the area of management from the director and his staff, through the division chiefs and district engineer and the branch chiefs, to the section head level or to the point where project management costs can be identified readily with a specific project. The pro rata charge is based on a rate structure which is designed to allocate management costs to programs based as nearly as possible on the relationship of the management to the program. For instance, the costs of the director and his staff are charged to all programs. The cost of the district engineer in Southern California is charged only to programs managed in Southern California.

The increase in management costs in the budget year is generally attributable to needs for staff work and administrative services to keep pace with the increased activity on the construction program.

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

TECHNICAL CO-ORDINATION

The planning, design, and operation of water development projects require the skills of a number of engineering, scientific, and technical specialties, such as applied nuclear engineering, power planning, recreation planning, economic, land and water use, mapping and surveying, geology, delineation, machine operations, hydrology, meteorology, and water quality supervision.

These costs are reflected in the 1960-61 fiscal year. It is considered proper, however, to charge these costs in part to general administration and the balance directly to the projects. The 1961-62 and 1962-63 fiscal years reflect this approach.

---

[a] The total equipment figures in the program budget and the appendix budget, page 1124, differ by the amount of equipment charged directly to projects.

[b] Of this amount, $194,829 has been transferred from Technical Co-ordination, page 635, line 64, 1961-62 Budget. Charges will be made for the programs transferred as originally planned in the 1961-62 Budget, and financed from Item 266b, Budget Act of 1961.

[c] Shown in the Appendix—Water Resources Revolving Fund, page 1111.

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

BASIC DATA PROGRAM

See page 673 for expenditure detail.

The program of observing, collecting, analyzing, and reporting basic data is essential to water project development, flood control, and protection of water supply and its utilization. The department and other public agencies cannot accomplish their statutory and organizational directives without historical and current data concerning water supplies, water qualities, water uses, and water rights.

Basic data related to water are observed by many agencies, both public and private, with a scope and accuracy limited by their particular purposes. The department takes advantage of these limited data, and also gathers the additional data needed for the State's purposes of administration, planning, design, construction, and operation.

The basic data program is continuous. The water records of 1860 are being used with those of today.

SURFACE WATER QUALITY MONITORING

The objectives of this program are to secure continuous and reliable water quality data from a network of sampling stations representative of all major surface streams and lakes of the State; study and interpret chemical, physical, and radiological information collected to develop a comprehensive understanding of the factors which make up and alter the water quality at any station; by means of sampling, study, and interpretation, detect changes in water quality and alert the control agency (regional water pollution control boards, state and local health departments, or State Department of Fish and Game) when adverse quality changes are detected; and assemble and collate statistics from all sources for areas where water quality conditions are particularly critical.

Samples are collected monthly at approximately 180 monitoring stations located on the major streams and lakes of California. As soon as possible after collection, the results of water analyses and an appraisal of chemical water quality changes and their causes are published in a monthly report distributed to co-operators and other interested agencies.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

BASIC DATA PROGRAM—Continued

GROUND WATER QUALITY MONITORING

The objectives of this program are to secure continuous and reliable water quality information on ground waters; study and interpret chemical, physical, and radiological information collected to develop water quality parameters; and from sampling, study, and interpretation of data collected from approximatel 1,800 stations, detect changes in water quality and alert regulatory agencies when adverse quality changes are detected.

WASTE WATER QUALITY SURVEY

The program objective is to determine the quantity and quality of wastes presently being discharged to tidal waters and inland streams. Data collection for the biennial waste water reclamation report will be continued. Sampling of irrigation return waters will be incorporated in the program. It is estimated that about 72 major irrigation return flows will b sampled on a statewide basis for mineral, radiological, and sanitary analyses.

GROUND WATER MEASUREMENT

The objective of the program is to collect and make available basic ground water information. The program contains elements of co-operation with federal and local agencies. Water level and other information is provided for all significant ground water basins of the State by means of ground water contour maps, monthly water level reports, and annual reports.

Negotiations will continue in an effort to extend co-operativ arrangements within the program; monthly well observation are being improved toward a more representative picture o level fluctuations and to include all basins; and assignment o state well numbers and improvement of well information wil continue.

FEDERAL-STATE CO-OPERATIVE GROUND WATER MEASUREMENTS

This program provides for the State's share of costs involved in measurement of wells included in the federal-state program. Personnel of the United States Geological Survey make the measurements, and state funds are matched from federal sources. Current and prior year expenditures are included in federal state co-operative ground water, subsidence, and specific yiel studies (General Investigations).

SURFACE WATER MEASUREMENT

The program objective is to provide data on surface water which will be readily available now and in the future for various purposes. To accomplish this objective, the department operates about 220 gages to provide stream flow and stage data, makes measurements of water diverted from major streams, gathers salinity samples at 40 points of observation in the delta and bay, and provides technical assistance to co-operating local agencies in the obtaining of records of stream flow and diversion. There are approximately 1,610 gaging stations being operated and maintained throughout the State. About 1,000 of these stations are being operated and maintained by private and local groups outside of the department's measurement program and the federal-state co-operative program.

FEDERAL-STATE CO-OPERATIVE SURFACE WATER MEASUREMENT

This is a continuing program that provides the State's share of expenses involved in operation of stream gaging stations in the federal-state network in California. The United States Geological Survey carried out the field and office work in connection with operating approximately 390 stations included in the network, and matches the expenditures with federal funds.

FEDERAL-STATE CO-OPERATIVE ESTABLISHMENT OF GAGING STATIONS

This is a continuing program that provides for co-operation with the United States Geological Survey in establishing new stream gaging stations, and rehabilitating existing stations, in the federal-state network. The Geological Survey carries out necessary field and office work and matches this expenditure with federal funds. Twelve stations were added in 1960-61, 14 additional are planned for 1961-62, and 10 for 1962-63.

CLIMATOLOGIC DATA

The primary objective of the climatologic data program is to gather, correlate, and maintain reliable weather records for use by the department and other agencies. The program includes: the evaluation of the adequacy of current climatological data-collection program in California; the promotion of increased weather data collection in record-deficient areas through co-operating agencies and individuals; the preparation of current indexes to all climatological stations in and adjacent to California; and compilation and interpretation of weather information. As part of the program, the State assists the United States Weather Bureau in its California data collection activities.

PREPARATION OF STATEWIDE DATA REPORTS

Responsibility for the collection, tabulation, and evaluation of statewide basic data is divided among 5 area offices, with each area office responsible only for data collected within its own area. The procedure employed prior to reorganization of compiling and publishing these data and evaluation on a statewide basis, however, was retained. Since none of the area offices carried responsibility to accomplish this statewide reporting, it became necessary to establish a new program with the objective of compiling basic data tabulations and evaluations from each of the area offices into published statewide basic data reports.

FEDERAL-STATE CO-OPERATIVE MAPPING

The Co-operative Mapping Program between the State of California and the United States Geological Survey was established with the enactment of Chapter 1424, Statutes of 1945.

Under this program, topographic mapping of the State of California is carried on by United States Geological Survey with funds matched by the State. Areas to be mapped, scales of mapping, and priority schedules are mutually decided upon by both participants. Prior to publication the department reviews the maps and indicates approval of each sheet or suggests desired revisions. Expenditures for this latter purpose are included under management of federal-state co-operative mapping.

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL INVESTIGATIONS

(See page 678 for expenditure detail)

General investigations are those studies which are aimed at the analysis of one or more water-related problems, but which are not project-oriented. General investigations have specific objectives and foreseeable end points. They are concerned with such matters as the development of more accurate water use data for irrigated crops and urban areas, studies of saline water conversion, planned utilization of ground water basins, and watershed management.

In preparing the 1962-63 budget, several existing programs were rearranged and retitled in order to conform to the overall budget presentation. For this reason, comparison of the 1962-63 requested amounts with 1961-62 expenditures on a line-by-line basis in the following summary is not always valid. A case in point is the Federal-State Co-operative Ground Water Investigations Program, which was formerly part of the Federal-State Co-operative Ground Water, Subsidence and Specific Yield Program. The latter program was split into its investigational and basic data portions and shows as new programs in these 2 categories. This is actually a continuation of the same program at the same level as 1961-62. The only proposed new general investigations in 1962-63 are Flood Control Planning, Weather Modification Studies, and Archaeological Exploration and Investigation, State Water Facilities.

WATER REQUIREMENTS AND PROJECT STAGING

Water Requirements and Project Staging are two relatively distinct programs, which, because of their close relationship to each other, are discussed jointly. The Water Requirements Program collects and prepares the basic information necessary for the analysis and determination of project staging. These programs will provide knowledge of the development potential and probable rate of growth of California, the associated need for developed water supplies, the most favorable sequence, timing, and formulation of projects to meet anticipated needs, and the long-range funding requirements for water resource development.

Studies under these programs have been conducted prior to 1961-62 as 3 separate programs known as Staging and Programing, Central Valley Operations, and Inventory of Water Resources and Requirements. In 1961-62, the 3 programs, together with Investigations of Future Water Quality Investigations, were combined into 1 study under the title of Water Requirements and Project Staging Program.

This is a long-range approach designed to provide basic data and information to serve as a guide to the planning, construction, and operation activities of the department, and to agencies and individuals concerned with water development in California. The study will involve the evaluation of the probable rate of growth of both urban and agricultural developments and the associated growth of economic market for water and power throughout the State; and the determination of the cumulative effects, both as to quantity and quality, on the water supplies available in the Delta from (1) depletions resulting from increasing use of water within the watershed tributary to the Delta; and (2) increasing demands for export of water from the Delta.

During 1962-63, collection and analyses of essential basic data will continue in the Sacramento Valley and San Joaquin Valley floor area. Work will be continued on reports on water resources and requirements of major hydrographic units. Work will also continue on reports of present land and water use. Work will be initiated on periodic inventories of land use in the major agricultural and urban areas where changes in land use would be the most significant.

---

[a] Included with surface water quality monitoring and ground water quality monitoring in 1962-63 fiscal year.
[b] Included with surface water quality monitoring in 1962-63 fiscal year.
[c] Program completed in 1961-62 fiscal year.
[d] Included in ground water measurement, surface water measurement, and climatologic data in 1962-63 fiscal year.

GENERAL INVESTIGATIONS—Continued

SACRAMENTO VALLEY SEEPAGE INVESTIGATION

The Sacramento Valley Seepage Investigation has as its objectives the evaluation of seepage damages under existing and probable future conditions along the leveed watercourses in the Sacramento River Basin; determination of the most equitable basis for allocation of costs of corrective works or payments of damages; and development of recommendations for more detailed studies of corrective facilities in specific areas. Evaluation of existing damage and estimation of future seepage damage will provide a basis for determining the authenticity of claims of damage against the State due to operation of upstream water development projects, and will serve as a foundation for determination of the economic justification of seepage control works, and for cost allocation of such works among the benefited entities.

During the first 3 years of this investigation, 1959-60 through 1961-62, surveys of river stages and seepage damages, including effects of seepage on crop yields, were carried out; seepage observation wells were installed to document ground water gradients and geological characteristics in the study area; detailed hydrologic study of river regimen under present and future conditions was initiated, and collection of detailed geologic, hydrologic, and agricultural data in specific seepage problem areas were undertaken.

During 1962-63, previous investigational activities will be continued. In addition, model studies based upon the results of geologic and hydrologic investigations will be utilized to study the flow of seepage in selected, specific problem areas under various conditions of watercourse stage and stage duration. The resulting evaluations, after being compared with measured conditions, will be applied to other similar portions of the basin.

DELTA AND SUISUN BAY POLLUTION INVESTIGATION *(Support and Capital Outlay)*

Knowledge of the waste assimilation capacity of the channels of the western Delta and Suisun Bay is essential to operation of the State Water Facilities, particularly with respect to the location of the terminus of the San Joaquin Valley Master Drain, the development of operational criteria for the Delta Water Project, and advising water pollution control boards concerning waste discharges. The program for 1962-63, the second year of the investigation, will be to collect and analyze as much of the needed data as possible to define the hydraulic and waste assimilation characteristics. This will involve an intensive program of tracer studies at various locations and under various tidal conditions throughout the year. It will also involve an intensive program of water sampling for mineral and biological analysis at various locations and under various tidal conditions throughout the year. It will further involve a considerable amount of complex tidal hydraulic computations, much of which will be programmed for machine computation. Hydrographic surveys with sonar equipment will be made to supplement existing information on channel configurations. This investigation will be co-ordinated with the similar investigation by the University of California covering San Francisco Bay on a less intensive basis.

SEA-WATER INTRUSION STUDIES

The objectives of this program are to secure pertinent geologic, hydrologic, and water quality data essential for detection of the extent and rate of sea-water intrusion. Reliable information on sea-water intrusion will be utilized as one of the key factors in the development of plans for the operation of coastal ground water basins.

Principal activities included in this program are collection, analysis, and evaluation of ground water level and water quality data; collection and evaluation of water well drillers' logs; and the study of geologic conditions in the intruded areas.

During the 1962-63 fiscal year, wells acquired near Oxnard in 1960-61 will be maintained and sampled. Wells will be acquired and additional test wells will be drilled in the coastal portion of Orange County. The feasibility of acquiring and drilling test wells in Santa Barbara and San Diego Counties will be investigated. If deemed necessary, additional wells may be drilled in Ventura County.

PLANNED UTILIZATION OF GROUND WATER BASINS

The general objective of this investigation is a comprehensive study of the major ground water basins of Southern California in order to formulate a plan of operation that will permit the maximum utilization of these ground water basins.

The specific objectives of each basin investigation will be to delineate the boundaries and the geology of the ground water basin; to determine the physical factors affecting the storage and transmission of ground water in the basin; to determine the hydrologic characteristics of the basin, including a re-evaluation of the overdraft and the ground water storage available for replenishment with imported water; to determine the best methods for utilization of the basin that would achieve fullest conservation of local supplies and also provide for seasonal and cyclic regulation of imported water supplies; to make an economic comparison of alternative plans of operation and to set forth the legal problems that may be involved in each plan; and to recommend a program for the operation of each of the ground water basins making optimum use of surface and underground local waters and imported water supplies.

During 1962-63, a simplified report, designed primarily for widespread public use, will be prepared on the planned utilization of the ground water basins of the Coastal Plain of Los Angeles County. A report on the hydrologic phase of the San Gabriel Valley will be completed. The operational studies of this area and a preliminary report thereon will be completed. The geologic studies of Chino Basin and a report on this phase of study will be completed. The hydrologic studies of this basin and a preliminary report of this phase of study will also be completed. The operational studies of this area will be commenced.

COACHELLA VALLEY INVESTIGATION

This program is a co-operative 2-year investigation with the Coachella Valley County Water District involving a geologic study of the Coachella Valley Ground Water Basin, an inventory of surface and subsurface hydrologic data and the development of the amount of ground water in storage and the amount of underground storage space available.

The final report on this study will be published during the early part of 1962-63.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	

GENERAL INVESTIGATIONS—Continued

SAN DIEGO COUNTY FLOOD CONTROL INVESTIGATION

An investigation of the flood control problems in San Diego County will be initiated during 1961-62 in co-operation with the county. Costs of the investigation will be shared equally. The work program will consist basically of an inventory of existing data, a hydrologic analysis, and an evaluation of flood potential. The existing data available through previously published material will be searched, bibliographies prepared, and abstracts made of pertinent reports. The hydrologic data obtained will be evaluated and flood frequency and other pertinent hydrologic studies will be made for the area of investigation. The flood quantities obtained will be related to topographic conditions and cultural developments in order to plot and map areas which would be inundated under present conditions of development for various hydrologic intervals. This work program will be conducted on 5 of the coastal streams in San Diego County.

During 1962-63, studies of the last 2 streams, the San Luis Rey and Otay Rivers, will be completed and the final summation of information will be developed. The final report presenting the results of this investigation will be prepared and published.

INVESTIGATION OF WATER QUALITY PROBLEMS

The objective of this program is to determine the causes and sources of impairment to the quality of water and magnitude of problems in particular areas where water quality problems have been uncovered by our surveillance programs.

Quality conditions in the Livermore Valley, in Alameda County, and other areas as they are discovered, will be investigated in the 1961-62 fiscal year. During 1962-63, investigations will be made of ground water quality problems near Fresno and Sacramento, and surface water quality of the Klamath River, as well as other problem areas.

DEVELOPMENT OF STANDARDS FOR WATER WELL CONSTRUCTION

The program objective is to prepare recommendations for minimum standards of water well construction and sealing to form a basis for possible regulatory action by state or local agencies.

Particular areas are selected for study on the basis of requests of expressed interest of local agencies where improperly constructed or sealed water wells may be contributing to impairment of the quality of water in ground water reservoirs.

During 1961-62, reports recommending water well construction standards for Alameda County and for statewide use will be published. In 1962-63, field and office studies will be initiated for preparation of recommendations concerning water well construction and sealing standards for Shasta and Sutter-Yuba Counties. Recommended standards for Del Norte and San Joaquin County will be published.

UNIT WATER USE SURVEY

The department's vegetative water use studies are aimed at 3 objectives: One is to determine unit water use by irrigated and nonirrigated crops in the major agricultural climatic zones throughout the State and to correlate these data with evaporation and other agroclimatic data so that unit values of water use may be extended to other agroclimatic zones throughout the State; the second is the measurement of evaporation and other agroclimatic factors throughout the State for the purpose of subdividing the State into agroclimatic zones having similar water use; and the third is the collection of data regarding irrigation practices and efficiencies under various conditions and determining their effects upon water use. The 1962-63 program will be a continuation of the present program.

The objective of the municipal and industrial program is to determine unit values and trends of water use by various urban, industrial and recreational demands throughout the entire State. The study of urban-related water use involves the definition and delimiting of pertinent items, the collection of data on these various water uses, the analysis of these data, and the assembly and presentation of the collected data in utilitarian form.

For the 1962-63 fiscal year, collection of data on various urban-related water uses will continue, and a comprehensive study of water use by commercial establishments will be initiated.

FEATHER RIVER TRIAL DISTRIBUTION

The purposes of the program are to obtain factual data and formulate reasonable assumptions regarding the entitlement of the local water users to the water supply of the Feather River, and to assist in any negotiations between the local water users and the department. The fulfillment of these objectives will protect the interests both of the local water users and the State.

During the 1962-63 fiscal year, it is anticipated that negotiations between the State and the local water users will be essentially completed. The staff of the Trial Distribution Program will continue to assist in these proceedings by making such special studies pertaining to water right assumptions as may be required.

LAND USE AND WATER REQUIREMENT SURVEYS

Detailed knowledge of the various uses of the land in combination with the unit values of water requirement associated with the land use provide one of the most accurate and convenient means for establishing the historical and present uses of water, and trends derived therefrom provide a means for projecting future needs.

During the 1962-63 fiscal year, this activity will be continued at approximately its present level. It is expected that final reports will be completed on the Desert Area Land and Water Use Survey and the San Diego County Land and Water Use Survey, for which field studies were conducted during the 1958-59 fiscal year, the San Luis Obispo and Santa Barbara Counties Land and Water Use Survey, for which field studies were conducted during the 1959-60 fiscal year, and a draft of a report on the Los Angeles County Land and Water Use Survey, Bulletin 24-60, for which studies were conducted during the 1960-61 fiscal year.

During the summer and fall of 1962, it is planned to conduct a field resurvey to determine land use in the Upper Santa Ana River Valley and Orange County.

SALINE WATER CONVERSION INVESTIGATION AND APPLICATION

Two fields of engineering are covered in this program—saline water conversion and nuclear engineering. Activities in saline water conversion are: investigation of various processes; cooperation with public and private agencies conducting research and development; collection and analysis of technical data on conversion plants; investigation of specific areas for sea and brackish water conversion plants. Activities in nuclear engineering consist of engineering studies on the application of nuclear energy and isotopes to water resources development.

The work program for 1962-63 includes continuation of cooperative endeavors with the Federal Office of Saline Water and the University of California, investigation of application of conversion to State water planning, continuation of engineering studies in selected conversion processes, and further studies of application of heat and power from nuclear reactors.

DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL INVESTIGATIONS—Continued

FEDERAL-STATE CO-OPERATIVE LEVELING IN SUBSIDENCE AREAS

Under this co-operative program the United States Coast and Geodetic Survey conducts surveys in subsidence areas in California. The location and scheduling of operations is mutually decided upon by the co-operating agencies and costs are shared equally. The area to be surveyed in 1962-63 is in the vicinity of Los Banos-Kettleman City. Data obtained under this program are vital to safe and economic design of canal aqueducts and other engineering structures in the State. Severa areas in the State are subsiding at rates in excess of one foo per year. Presently known areas of subsidence include th San Joaquin and Santa Clara Valleys, the Delta region an the Long Beach area.

GROUND WATER BASIN PROTECTION STUDIES

Ground water provides the source of more than one-half of the total quantity of water put to beneficial use in California.

The Ground Water Basin Protection Studies program will be a continuing investigation of specific ground water problem areas, with the objective of evaluating the problems, determining the practicability of their solution, formulation of projects to protect the ground water basin from further damage, or to prevent damage, and review of plans of local agencies. It is contemplated that these individual investigations will require from 2 to 4 years for completion, depending upon the seriousness of the problem and the justification for formulation of corrective projects. Reports will be published on each specific investigation as the particular investigation is completed.

In 1962-63, the following studies will be made:

1. Continuation of investigations initiated in fiscal yea 1961-62.
2. Initiation of a 3-year study of improvement of wate quality in San Dieguito River Basin.
3. Initiation of a 2-year study of sea water intrusion in th Sunset Beach area.
4. Initiation of a 4-year study of water quality problems i San Jacinto Valley.
5. Continuation of the investigation of the ground wate basin adjacent to south San Francisco Bay, includin Livermore Valley, initiated in 1961-62.

POWER PLANNING STUDIES

The primary objective of the program is to develop and maintain on a current basis, analyses of statewide power market, and data on value and cost of power for use in the department's planning function, and to develop schemes of integration of power systems and pumping plants which will result in the greatest benefit to the State. The program is also intended to maintain and continue the studies relative to the power requirements and potential power resources in California and othe areas and to co-ordinate these studies with other planning activities. In addition, it is intended to effectuate co-ordinatio and co-operation with other power planning agencies withi the State.

FLOOD CONTROL PLANNING INVESTIGATION

As urban areas subject to flooding throughout the State increase in population and economic value, danger to life and property also increases. Despite the construction of extensive flood control works during the past 25 years, flood damages are greater today than in 1936, largely due to development on flood plains. In recognition of this condition, the Corps of Engineers has adopted the policy, in connection with the Chico Landing-Red Bluff Bank Protection Project, of requiring local flood plain zoning as a prerequisite to project construction, and there is evidence that this policy will be extended to other projects. As of 1960, only 14 of the 58 counties in California had provisions for flood protection in their zoning ordinances, and less than half of these gave evidence of having implemented and enforced these laws.

This program consolidates and extends the department's past effort in this field.

Work under this program will be directed toward: (1) developing data and information so that activities of all agencies—federal, state, and local—engaged in flood control matters may b co-ordinated toward maximum effort; (2) receiving local request for flood plain information studies to be conducted by the Corp of Engineers, and determining overall and relative need fo such studies, and assigning priorities to requests received; (3) establishing criteria for guidance in planning for optimum us of the available lands of the State in areas subject to flooding consistent with the protection to life, health, and property unde existing and future project conditions; (4) developing data an information required to form sound policy and to draft an acceptable law that will ensure effective management of areas subject to flooding; and (5) review of existing and planned flood control projects and, when necessary, plan future flood control projects, in order to co-ordinate the staging of protective works on the basis of overall need throughout the State by whomsoever proposed.

Initial efforts under this program will be devoted to problems in rapidly developing urban areas.

BASIC HYDROLOGIC ANALYSES

The objectives of this program are to provide the interpretation and anaylsis of the basic hydrologic and related data needed to establish and facilitate methods and procedures for use in design and investigations of water resources.

The activity for the 1962-63 fiscal year will continue at approximately the same level as 1961-62. Specialized studies of the hydrology of the Chino Basin will be completed, and similar studies will be initiated for the Orange County Coastal Plain. Other activities will be continued including the development of criteria for the design of drainage facilities for the California Aqueduct, the study of water supply facilities in the various areas, and the study of precipitation and runoff characteristics.

FEDERAL-STATE CO-OPERATIVE SURFACE WATER INVESTIGATIONS

This is a continuing program that provides for surface water investigations in co-operation with the United States Geological Survey. Studies of the determination of flood runoff from small drainage areas of 10 square miles or less will be continued. Processing of historical stream flow records for handling by electronic data machines will be continued. Expenditures for the current and prior years are carried under Federal-State co-operative surface water measurement (Basic Data).

FEDERAL-STATE CO-OPERATIVE GROUND WATER INVESTIGATIONS

This program for development of information on various aspects of the ground water resources of California in co-operation with the United States Geological Survey will be continued at approximately its present level. Specific studies in this co-operative program include the following: Sampling and determination of specific yield of sediments by various direct and indirect laboratory and field methods, investigation of land subsidence in the San Joaquin Valley, ground water development studies in specific areas of the San Joaquin ground water basin and basic data on the ground water geology of certain Southern California desert areas.

DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL INVESTIGATIONS—Continued

FEDERAL-STATE CO-OPERATIVE BEACH EROSION INVESTIGATIONS

This provides direct matching funds to the Corps of Engineers, United States Army, in accordance with the provisions of Public Law 727, 79th Congress, 2d Session, for the State's share of the cost of co-operative beach erosion investigations. These investigations are a necessary part of the beach erosion control program and are made prior to the expenditure of funds for beach erosion projects. Funds for the beach erosion control projects are included in the subvention section of the budget.

FEDERAL-STATE CO-OPERATIVE IRRIGATION RESEARCH

Studies in co-operation with the Agricultural Research Service, United States Department of Agriculture, will continue in 1961-62 to develop data on water uses, water requirements, and ground water recharge essential to water development planning. Specific studies will include (1) consumptive use of water by crops and native vegetation, irrigation efficiency, the contribution of rainfall to the ground water supply; and (2) research studies of water conservation by artificial recharge of underground basins including evaluation of the effect of deliberate recharge upon the quality and quantity of ground water supply.

WATERSHED MANAGEMENT AND SEDIMENTATION STUDIES

Watershed management is a potentially fruitful field of study in the department's continuing efforts to develop techniques leading to control of the State's water resources. Sedimentation is a vital factor in planning for development and construction of the State Water Facilities. Manmade projects that alter the regimen of streams, also alter the nature of sediment deposition, and therefore, information on sediment characteristics must be developed to serve as a basis for design.

For the past several years the department has partially supported the studies being carried on in brushland management. These costs have been included as a part of the hydrology technical co-ordination program.

FEDERAL-STATE CO-OPERATIVE FOREST MANAGEMENT RESEARCH

This is a program which began in 1961-62. The United States Forest Service, through the Pacific Southwest Forest and Range Experiment Station, has proposed a study of the possibilities of enhancing runoff from the commercial timber lands below the snowline. This area, which contributes 30 percent of the State's stream flow, is an area where forest management for water production may conflict with management for many other purposes. The study is aimed at developing methods for best managing forested watersheds below the snowline and will complement a similar co-operative study of forest watershed management in the snow zone, which began in 1956.

FEDERAL-STATE CO-OPERATIVE RESEARCH IN SNOWPACK MANAGEMENT

This is a co-operative program with the United States Forest Service consisting of a study of snowpack management begun in 1956. All technical activities of this project are carried on by the United States Forest Service, Pacific Southwest Forest and Range Experiment Station. Information provided by this study will be directed toward developing techniques for increasing and delaying the runoff from Sierra and Cascade snowpacks through selective timber-cutting practices.

FEDERAL-STATE CO-OPERATIVE SEDIMENT INVESTIGATION

The United States Geological Survey in co-operation with the Department of Water Resources maintains 12 continuous and 23 periodic stream sediment sampling stations and makes surveys of sediment deposited in reservoirs. The stream station data measures both characteristics and quantity of sediment transported by the streams. Analysis of sedimentation problems will be made at reservoirs for which adequate historical data is available.

FISH AND WILDLIFE ENHANCEMENT AND RECREATION—STATE WATER FACILITIES

This program provides for the enhancement of fish and wildlife and development of recreation facilities at state water projects. The Departments of Water Resources, Fish and Game, and Parks and Recreation have responsibilities for implementing the program.

The Department of Water Resources is responsible for planning of recreation facilities and fish and wildlife enhancement associated with the State Water Facilities. This includes (1) studies on the use of State Water Facilities for the purpose of recommending construction and operation of recreation and fish and wildlife enhancement features, (2) plans for the acquisition, use, and development of project lands for recreation and for fish and wildlife enhancement, and (3) co-ordination with the other 2 agencies. The department will also acquire the land for recreation and fish and wildlife enhancement at state water facilities.

The Department of Parks and Recreation will design, construct, maintain, and operate the recreation facilities.

WEATHER MODIFICATION STUDIES

Every winter for about the last 15 years, weather modification operations have been carried on in various locations in California, but no reliable quantitative estimate has been possible of the increase in precipitation resulting from these operations because of inadequate techniques for evaluating such operations. In the past, the Department of Water Resources has engaged in various activities relating to the field of weather modification. In 1955, the State Water Resources Board published Bulletin No. 16, entitled "Weather Modification Operations in California," which recommended that a statistically designed project be initiated in order to derive a quantitative estimate of precipitation increase resulting from weather modification operations. This recommendation was the basis for the Santa Barbara-Ventura Weather Modification Project, in which the department participated. Studies made in preparing the report on the Santa Barbara Project indicated that the original design of the project was such that several years of operation would be required to detect a 10 or 20 percent increase in precipitation. Since this was the amount of increase that most weather modification operators claim to be achieving, it appeared that continuation of the Santa Barbara Project was not justified.

There is a need to develop a comprehensive plan for study of weather modification procedures, costs, and benefits under actual field conditions. The objective of the program proposed herein would be to develop such a plan.

ARCHEOLOGICAL EXPLORATION AND EXCAVATION, STATE WATER FACILITIES *(Capital Outlay)*

The objective of the Archeological Program for the Department of Water Resources is to investigate, excavate, and preserve historic and prehistoric objects of antiquity situated in areas to be used for state water development purposes.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL INVESTIGATIONS—Continued

CRUSTAL STRAIN AND FAULT MOVEMENT INVESTIGATION *(Capital Outlay)*

The objectives of the program are to determine the rate, constancy, and magnitude of ground distortion at sites proposed for engineering structures; to locate active faults where the ground surface may rupture as a result of accumulating crustal strain; to estimate the amount and direction of displacement across active faults which may occur during an earthquake; to develop rational seismic and crustal movement factors for engineering design at each site as related to type of structure, and to coordinate and support the work of other agencies engaged i engineering seismology and general seismological activities. Geo ogy, geodesy, and seismology comprise the 3 major phases of th investigation of crustal strain and fault movement.

During 1962-63, analysis of data will produce very prelim inary seismic factors for engineering design with additional em phasis being placed on the seismic phase of the work. Geodeti observations will be continued.

---

[a] In the 1960-61 fiscal year, this activity was budgeted as 3 programs: staging and programming, central valley operations, and inventory of water resources and requirements. For 1961-62 and 1962-63 fiscal years these programs are combined into a single activity embracing two related but distinct programs.

[b] Included as part of water requirements and project staging for 1962-63 fiscal year.

[c] Program completed in 1961-62 fiscal year.

[d] Amount for 1962-63 included as part of water requirements and project staging, and investigation of water quality problems.

[e] Amount for 1962-63 included as part of federal-state co-operative ground water investigation and federal-state co-operative ground water measurement (Basic Data).

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

PROJECT PLANNING

(See page 682 for expenditure detail.)

Project planning investigations are those investigations which have as their objective the formulation of plans for physical works related to solution of some water-related problem. These investigations may range in scope from those of a reconnaissance nature aimed at comparing possible physical solutions, to those of a comprehensive nature aimed at determining the financial and engineering feasibility of a particular project, to those of intensive nature aimed at refining and up-dating project plans for changes occurring between the time of project authorization and actual project construction.

NORTH COASTAL DEVELOPMENT INVESTIGATION

The long-range objective of the North Coastal development investigation is the formulation of economically sound plans for development of the water resources of the North Coastal Area to meet anticipated needs in local areas and in deficient areas of the State; to preserve or possibly enhance the anadromous fisheries of the area; to develop the hydroelectric power and water-associated recreational potential; and to provide protection against recurring floods.

The 1962-63 work program will be directed toward more detailed study of the most favorable initial export projects to the end that the best first project can be recommended for future authorization in a report proposed for publication in June 1964. The scope of the investigation will be broadened as necessary to incorporate the additional requirements imposed by Senate Concurrent Resolution Number 47, which calls for a comprehensive investigation of the Eel River watershed area with respect to water supply, flood control, and watershed management.

UPPER SACRAMENTO RIVER BASIN DEVELOPMENT INVESTIGATION

There is a need for a comprehensive reappraisal of development potential for water resources within the 2,600 square-mile portion of the Sacramento River watershed between Shasta Dam and Red Bluff. Runoff from this area is virtually uncontrolled at present.

The objectives of the investigation are: long-range planning to outline the manner in which the water resources of the basin can most economically be developed to meet future water requirements; and definite evaluation of the project units considered likely for near-future construction. Both of these objectives are considered within the broad framework of the overall comprehensive development of the water resources of the State, recognizing the alternative possibilities for importation of water into the basin from the North Coastal Area. The investigation encompasses virtually all aspects of water development, control, and utilization.

The 5-year investigation, which began July 1958, is scheduled for completion in June 1963. A progress report, published in May 1961, set forth the status of the investigation at that time. The work program for the 1962-63 fiscal year will include preliminary determination of development sequence and scale for each new project unit in the overall program. Preliminary studies of cost allocation and repayment schedules will be initiated, using approximate methods where possible to indicate the financial integration of the development program. Integrated operation studies of project units with the water development system of the Central Valley will be undertaken. A report will be prepared which will make recommendations relative to future water development in the basin.

YUBA AND BEAR RIVERS DEVELOPMENT INVESTIGATION

The original objective of this investigation contemplated an intensive program of several years' duration, directed towards formulation of plans for comprehensive and orderly development of the Yuba and Bear Rivers, and conforming essentially with feasibility investigational standards. Without reducing the geographical scope of the investigation, these standards have been reduced to a level to provide reliable general guidance for any agency concerned with water development in the investigational area. The investigation will also establish the potential for construction of additional state water facilities on the Yuba River as originally contemplated.

The 1961-62 fiscal year will be the final year of investigation under the modified study program. Much of the major effort during the 1961-62 fiscal year will be devoted to preparation of the report of investigation and appropriate appendices relating thereto. Minor field work and some refinement of the development plans is anticipated. Considerable effort will be devoted to further study of the operational aspects of the projects, particularly as they may affect the water supplies available at the Delta.

During the 1962-63 fiscal year, it is anticipated that several months of work will be required to complete the final report, have it reviewed within the department, and have it printed. In addition, the several appendices and office reports will be completed.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

PROJECT PLANNING—Continued

SACRAMENTO VALLEY EAST SIDE STREAM INVESTIGATION

This is the second year of a 4-year comprehensive water resources investigation of water problems and possible plans for water development of the 2,200 square-mile drainage area east of the Sacramento River between the Feather River and Battle Creek. The investigational area comprises portions of Butte and Tehama Counties and includes Paynes, Antelope, Mill, Deer, Chico, and Butte Creeks.

Studies will be made to determine the present and future water requirements for irrigation and domestic purposes for both foothill and valley lands, flood control needs, and hydroelectric power development. Plans for multipurpose water development projects will be formulated to provide for the future needs of the area. The information and plans developed will guide local interests in water development, and will provide eng neering data for use by the department in its long-range studie of water project staging.

The work program for the 1962-63 fiscal year will be directe toward preliminary geologic investigation of potential dam an reservoir sites, mapping of proposed dam and reservoir sites an conduit routes, and compilation of land classification and lan use data for agricultural use on the valley floor. During thi second year emphasis will be placed upon engineering study c preliminary plans and alternatives to determine those plan which will be reported upon in detail. A report upon the investigation is scheduled for June 1965.

UPPER PUTAH CREEK INVESTIGATION

This investigation is an extension of the general reconnaissance investigation initiated in 1960-61. The objectives will be to determine the engineering, economical, and financial feasibility of specific water development projects for which there is a definite local interest and need.

1962-63 will be the initial year of the feasibility study. Majo effort during the fiscal year will be devoted to investigation o the Dry Creek Reservoir project and the potential service are in Collayomi and Long Valleys, and the preparation of a interim report.

COASTAL SAN MATEO COUNTY INVESTIGATION

Coastal San Mateo County is developing rapidly, and the northern portion of the area, around Half Moon Bay, is already experiencing a water supply problem. The Coastside County Water District in the Half Moon Bay area filed a preliminary request in January 1960 for state financial assistance for a proposed Pilarcitos Creek Dam under the Davis-Grunsky Act.

The Coastal San Mateo County Investigation will refine and update the California Water Plan for this area and make it possible for the State to effectively co-ordinate the plannin activities of the various agencies at federal, state, and loca levels to achieve the optimum development and utilization o all resources involved. The investigation will be of value i evaluating feasibility studies submitted in support of loca projects by providing basic planning data and indicating th most promising development possibilities.

FISH SLOUGH DAM AND RESERVOIR FEASIBILITY INVESTIGATION

The work program during 1962-63 will be a continuation of the geologic investigations of potential dam sites and borrow areas; studies of water supply; studies of the diversion structure, dam sections, spillway design, and studies of the overall dam and reservoir costs; recreational studies, and analyses o annual cost and revenue balances to determine financial feasibility.

CENTRAL COASTAL PLANNING STUDIES

The objective of this program is to gather and analyze data to refine the broad outlines in the California Water Plan with respect to the most urgent water-related problems of the coastal basins of the central area of the State. Reconnaissance studies will be made that will determine where more detailed investigations are needed. The proposed studies will be of much value to the State in co-ordinating the planning activities of the various agencies at federal, state, and local levels to achieve the optimum development and utilization of all resources involved. They will also be of much value to local agencies in making final feasibility studies of local projects by providing basic planning data, encouraging local co-ordination, and indicating the most promising development possibilities, considering water supply, flood control, recreation, fish and wildlife, and other purposes.

The work under this program in the first year will consist of general reconnaissance studies of water supplies for the Tomales-Bodega area in Marin and Sonoma Counties, and coastal areas of Sonoma and Mendocino Counties. This will include studies of the water supply, use, and future water needs to define the scope of future studies.

FEASIBILITY OF WASTE WATER RECLAMATION

The purpose of this program is to evaluate data on quantity and quality of waste discharges and to conduct studies determining the feasibility of reclaiming water for beneficial purposes from such sources.

In Southern California, the greatest quantities of water presently wasted to the ocean are from sewered areas in metropolitan Los Angeles and San Diego. The department is conducting a comprehensive and detailed survey in these metropolitan areas to determine the quantities of water available for reclamation. These surveys include a study of potential markets for reclaimed water, facilities for the reclamation and distribution of water, and rough estimates of the cost of water reclaimed.

During 1962-63, work on this program will extend the studies on differentiation of the sewage and industrial wastes in the Upper Santa Ana River Valley that can be reclaimed from those which should be exported and wasted to the ocean.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

PROJECT PLANNING—Continued

MADERA AREA INVESTIGATION

The Madera Area Investigation originally was scheduled as a 3-year investigation to be completed in June 1963. However, only a minor amount of work was completed in the 1960-61 fiscal year, and the investigation is now scheduled for completion in June 1964.

The objective of the investigation is to compile data on water resources and water needs and to develop a comprehensive plan to serve as a guide for developing local water supplies.

Consideration will be given to providing water for irrigation, municipal, industrial, domestic, recreation, and fish and wildlife purposes within Madera County, and certain adjacent areas. In addition, studies will be made on potential hydroelectric energy production.

During 1962-63, planning studies of water development projects and evaluation of water needs will be continued. A progress report is scheduled for completion during January 1963.

DELTA WATER PROJECT PLANNING *(Capital Outlay)*

The Salinity Control Barrier Investigation was initiated in 1953. In 1959 funds were provided for construction of levee test sections in the delta and for an investigation of the water requirements and plans for service in the western delta area. The basic studies for western delta investigation will be completed in 1961-62. Fieldwork on the levee test sections will be completed in 1961-62.

Advanced planning studies of delta problems and the Delta Water Project are required to confirm and refine certain design and operational criteria, define more adequately existing physical conditions, and evaluate minor revisions to the selected plan, as needed, in preliminary negotiations for construction and operation of the facilities.

The investigational area covers the Sacramento-San Joaquin Delta in Contra Costa, Sacramento, San Joaquin, and Solano Counties.

Advanced planning studies needed for the operation of the Delta Water Project and negotiation of operation standards and allocation of cost, must continue for several years.

During 1962-63, continuous outflow measurements will be continued at various points within the delta to aid in developing additional knowledge of channel flow distribution and for refinement of salinity-outflow relationships. Limited field measurements using tracer material will be continued to aid in further refinement of channel flow distribution. Use will be made of the electronic analog to assist in determining salinity-outflow relationship, channel depletions, net flow patterns, and other related phenomenon. Analysis of sedimentation data will continue with additional, though limited, collection of sediment samples.

Data collected from the levee test studies, seismic field measurements, and seismic model studies will be analyzed and a report prepared. A comprehensive level survey will be made to provide additional data for final confirmation of the subsidence studies.

Assistance will be provided to the United States Corps of Engineers and United States Bureau of Reclamation, which will both be conducting delta studies to determine the extent of federal interest in the Delta Water Project.

Advance planning will be done toward selection and development of a final plan with respect to the delta water facilities. This planning will be dependent upon local option as experienced at public hearings conducted in 1961-62.

SAN JOAQUIN VALLEY DRAINAGE INVESTIGATION *(Capital Outlay)*

The objectives of this program are to formulate a comprehensive drainage plan for the entire valley, and to develop specific initial projects to the point of legislative authorization where economic justification and financial feasibility can be shown.

The program of investigation consists of a determination of the potential drainage disposal requirement of each of the various subdivisions of the valley, an evaluation of the benefits and detriments to be derived from drainage disposal, and finally, the design of the physical features required.

Economic studies will be made to evaluate revenue from agricultural and other enterprises during the proposed project repayment period, both with and without the disposal system in operation as a means of measuring the benefits.

Finally, preliminary designs and estimates of costs for alternative locations and systems of conduits will be compared in order to select the most economic solution to the problem, and the cost of these facilities will be utilized to determine the economic justification for the system.

During 1962-63 a final determination will be made of the facilities required, studies of methods of cost recovery will be carried out and the report will be written.

UPPER FEATHER RIVER BASIN ADVANCE PLANNING *(Capital Outlay)*

The Advanced Planning Program provides for the constant and timely evaluation of the state water projects in the Feather River Basin. Advanced planning studies are currently being carried on for the Antelope Valley Project, Frenchman and Grizzly Valley Projects, and their potential service area, Sierra Valley. During the 1962-63 fiscal year, it is planned to complete reformulation studies of the Grizzly Valley Project. These studies will involve a review of hydrologic data; sizing of reservoir, spillway, and outlet facilities; evaluation of potential service area including irrigation, domestic, and recreational uses; and development of operational criteria to provide maximum net benefits. On the Lower Feather River, operating schedules for Thermalito Forebay and Afterbay will be evaluated for their effect on the maintenance and preservation of the fisheries resource. Studies will be made to determine the measures necessary to prevent a loss to both warmwater species and salmon spawning in the river channel below Oroville Dam.

DELTA PROJECT FISH AND WILDLIFE PROTECTION STUDY *(Capital Outlay)*

The Delta Fish and Wildlife Protection Study was established by agreement between the Departments of Water Resources and Fish and Game to assure adequate protection of the fish and wildlife resources of the delta areas with construction of delta water facilities. It is anticipated the study will continue up to 5 years.

The objectives of this investigation are to determine the effects of the following facets of a delta project on delta fish and wildlife: The isolation of sloughs; changes in the aquatic environment outside of isolated sloughs; the creation of impoundments behind Chipps Island Barrier and other control structures; reduction of outflow to the sea; interference with upstream and downstream migrating fishes; and water quality problems.

The Department of Fish and Game will carry out the technical studies necessary to achieve the stated objectives. The Department of Water Resources will provide assistance to Department of Fish and Game by providing engineering services. These engineering services will include design of fish passing facilities, land use evaluations, cost estimates, and analyzation of tidal hydraulic data as might be required.

[a] Program completed in 1961-62 fiscal year.

DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

OPERATIONS

(See page 687 for expenditure detail.)

The operations program includes activities related to the management, and physical operation and maintenance of the State Water Facilities. This comprises both the operations activities necessary for project formulation and the activities directly applicable to the delivery of water to customers from completed facilities. The program also includes flood control project maintenance, flood operations, watermaster service, and other related activities.

1962-63 will see the operation and maintenance of the South Bay Project and Frenchman Dam and Reservoir. Work will continue with the Bureau of Reclamation on joint operation of the San Luis Facilities to co-ordinate operational requirements. Negotiations for the sale of Oroville power will be in progress. Operating criteria will be developed and technical standards set for the storage, release, pumping, and diversion of water to be delivered by the State Water Facilities. Criteria also will be developed for automatic operation for all or part of the State Water Facilities. Staff co-ordination and review will be continued of economic and financial feasibility studies and the provision of cost and repayment data as a prerequisite for contract negotiations with potential water service customers. Increased emphasis will be placed on billing customers with executed contracts. First sizeable net project revenues under the transportation capital component will be realized by January 1, 1963. Participation and assistance in the negotiation of initial water service contracts will be accelerated. Administration and management functions in the contract area will increase in proportion to the number of contracts executed. The Snow Surveys, Flood Operations, and Watermaster Service programs will continue approximately at the 1961-62 level.

SACRAMENTO RIVER FLOOD CONTROL PROJECT MAINTENANCE

The department operates and maintains approximately 200 miles of levee, ditches and canals, weirs, pumping plants, and related facilities in the Sacramento Valley. Levees are patrolled during high water conditions and during dry seasons the crews work in continuous clearing of several thousand acres of overflow channels and bypass areas. These activities will continue at a uniform level during 1962-63.

FLOOD OPERATIONS PROGRAM

The objective of this program is to provide a nucleus of trained personnel and equipment to operate the flood operation center and to provide training for department personnel and local flood control agencies.

FLOOD CONTROL PROJECT INSPECTION

The program includes making semiannual inspections of federally constructed flood control projects in the Central Valley drainage and Truckee River Basin and the preparation of the report entitled "Status of Project Levee Maintenance" setting forth the condition of protective works comprising a levee system aggregating 1,120 miles in length, situated in 93 public districts and areas. Also included in the program is co-operative work with the United States Army Corps of Engineers in the latter's planning for repair and construction of flood control works. Technical assistance is also rendered local districts in assisting them with their maintenance programs.

This program includes the engineering review, and preparation of letter reports on application to the Reclamation Board for encroachment on the physical works of the Sacramento-San Joaquin River Flood Control Projects. Following approval, inspection of work is made for compliance.

WATERMASTER SERVICE

Watermaster service was created by statutes of the Water Code in 1913, with actual service beginning in 1924. The purpose of this service is to distribute available water supplies, both surface water and ground water, on an equitable basis, in areas where such supplies are inadequate to meet all demands. Water right owners who have had their rights defined by court decree or agreement, and recorded, may petition the department for watermaster service. At present there are 16 service areas, involving surface water adjudication, under the administration of 9 field watermasters in the northern portion of the State and 3 basins, involving ground water adjudication, under watermaster service in the Southern California District. Activities in the presently adjudicated areas will remain at the same level as those of the 1961-62 fiscal year.

FLOOD CONTROL MAINTENANCE AREAS

Features of the Sacramento River Flood Control Project are maintained by local agencies. If they desire, these agencies can request the State to perform this function for them with the local agencies reimbursing the State for the entire cost of work done. There are provisions in the Water Code which enables the State to also form a maintenance area if it is found that the local agency fails to provide maintenance in accord with federal regulations. During 1962-63, the department will perform maintenance work for 13 maintenance areas with an estimated 167 miles of levees in addition to 2 pumping plants.

FEDERAL-STATE CO-OPERATIVE YUBA RIVER DEBRIS CONTROL

The Yuba River Debris Control Project provides for the storage of over 300,000,000 cubic yards of mining debris in the Yuba River overflow area upstream from Marysville, which would otherwise pass into the navigable channels of the Feather and Sacramento Rivers.

Plans for the work are prepared by the Corps of Engineers for the California Debris Commission and submitted to the Department of Water Resources for approval. Over $1,000,000 of state funds have been appropriated for debris control to date. A budget request for $50,000 is being made for the 1962-63 fiscal year to match an equal amount proposed to be appropriated by the Federal Government for the continuation of this work.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

OPERATIONS—Continued

RIVER FORECASTING AND FLOOD HYDROLOGY

This program provides river forecasting and flood hydrology studies required for the operation of the State Flood Operations Center and the State-Federal River Forecast Center. During the flood season, river forecast bulletins for the Central Valley area are issued by the State-Federal River Forecast Center. This function requires continuous, close co-ordination with the United States Weather Bureau.

The program includes the development of criteria for forecasting techniques, and hydraulic and hydrologic studies of stream basins. The program includes studies of channel carrying capacities, flow-stage relationships, methods of estimatin probable maximum precipitation, and related items. It also includes responsibility for the river and rainfall hydrologic reporting network necessary for the operation of the Flood Operations Center.

Additional work to be accomplished under this program involves instituting flood forecasting services that will be mad available to the North Coastal Areas with particular attentio to the Klamath and Eel River Basins.

CO-OPERATIVE SNOW SURVEYS

The California Snow Survey program is the activity, which, with field and financial assistance from co-operators, gathers and correlates snow data and allied information for the purpose of forecasting California water supplies in general, and stream flow in particular. As part of this program, regularly scheduled measurements are made at about 300 snow courses in the mountainous areas of the State. Additional snow data are obtained from general area photographs, radioactive snow gages, and aerial snow depth markers. Allied data on precipitation, stream flow, reservoir storage, and other water conditions factors are gathered, compiled, correlated, and reported on as part of the program. About 80 percent of the field work is performed by program co-operators other than the State agency. The State, as co-ordinating agency for this program, plans, directs, and co-ordinates the activities of all co-operators wherein snow surveys and allied activities are concerned. Additional allied activities include investigation of certain specific phases of snow hydrology, supplying specialized snow information, and providing consulting services relative to snow occurrence, accumulation, melt, snow-load design factors, etc.

During 1962-63, the continuing co-ordination, data collection maintenance, forecasting, and publishing activities will be carried on. Also, with the aid of several machine programs and the data from comprehensive field checks, a review of all snow courses will be made, with the object of eliminating unnecessary courses and revising measurement schedules to correlate with the expanded aerial marker program. Various aspects of snow science and hydrology will be investigated, including temperature snowmelt studies, wind effects, and sublimation. Work wil begin on editing and augmenting the California snow data summary, with the objective of republication in 1963 or 1964

COMMUNICATION SYSTEMS ENGINEERING *(Support and Capital Outlay)*

This program provides the department with a mobile radio system designed to cover potential flood areas for data collecting and flood fighting purposes and to provide other communications services for the department. The network is made up of 104 mobile units, 26 telemetering stations, and 20 portable units with coverage throughout the Sacramento and San Joaquin Valleys and initial coverage in the North Coast area. The program also provides a river stage and precipitation radio telemetering system to furnish immediate information on the river stages and precipitation data at key locations in the Sacramento-San Joaquin River Basins and the North Coast area The program also provides the necessary planning of communications requirements and co-ordination with other departments in the development of the communications services and facilities required for overall project operation.

ENGINEERING STUDIES FOR ATTORNEY GENERAL'S OFFICE

The Attorney General's office relies upon the department as its engineering staff in matters pertaining to flood damage where legal action is taken against the State. In 1962-63, the department will assist the Attorney General's office during the flood damage litigation resulting from the 1955-56 floods.

STATE PARTICIPATION IN FEDERAL CO-OPERATIVE PROJECTS

The State assumed an interest in both the New Hogan and Black Butte projects of the Corps of Engineers by underwriting the repayment of the costs allocated to water conservation. An organized program of review of construction programs, accrual of capital costs, plans of operation, sale of water, and other factors is required to protect the State's interest and to prepare for possible future sale of Black Butte and/or New Hogan water by the State. The objective is to take all possible steps to insure that the financial obligation assumed by the State is no more than a fair and equitable share and that the obligation will ultimately be recovered from the water users.

This is a continuing program authorized by Water Code Section 11252, and will be terminated only if the Bureau of Reclamation makes contracts with others for sale of the entire water yield within 7 years after the individual project is ready to begin the storage of water, or if one or both of the projects are integrated into the federal Central Valley Project.

PACIFIC NORTHWEST-CALIFORNIA POWER INTERTIE

The objective of this study is to protect and represent state interest in a possible power interconnection with the Northwest. A consultant's report favorable to a Pacific Northwest-California power intertie was submitted to the California Legislature in January, 1961. Partly as a result of that report, a federal task force study was undertaken which was reported on late in 1961. The report will be reviewed and recommendations prepared relative to further action to be taken by the State. This will include study of use of power made available by an intertie, use of an intertie to transmit state project power and possible state participation in financing, construction, and operation of intertie facilities. The State will also participate in the drafting and review of protective and enabling legislation.

DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

OPERATIONS—Continued

WATER CONTRACTS NEGOTIATION AND ADMINISTRATION *(Capital Outlay)*

This program has as its objectives the preparation, negotiation and administration of contracts for water service from state water facilities and for other project services. Pertaining to each water contract a factual report will be prepared, including all relevant, physical, economic, and financial information for the contracting entity. Insofar as possible, contracts for the delivery of the project yield will be executed prior to December 31, 1963, the option date contained in the contract with the Metropolitan Water District of Southern California. Contract administration will include maintaining liaison with contractors regarding delivery schedules, preparation of statements of various charges to the contractors, negotiations of amendments to the contracts, and other similar activities.

CO-ORDINATED POWER AND WATER OPERATIONS *(Capital Outlay)*

The objectives of this program are to develop plans for the optimum operation of state water facilities, taking into consideration water and power demands, power production capabilities, flood control requirements and relation of cost to revenues under various alternative methods of operation. Also, as a part of this program, work will be done in co-operation with other agencies to develop a co-ordinated plan for joint interagency water and power operation, including operation of the joint state-federal San Luis facilities.

POWER CONTRACT STUDIES *(Capital Outlay)*

This program includes analysis and negotiations of power contracts for the purchase, sale, interchange, and transmission of power as required for the state power plants and pumping plants. Also included in this program are the management, administration, and servicing of existing power contracts.

Work during 1962-63 will include negotiation for the sale and interchange of Oroville power, including studies of the power value, generation and transmission costs; negotiation for Trinity power from the Central Valley Project for South Bay Aqueduct pumping requirements; negotiation with utilities concerning the cost of power for pumping project water under alternative methods of operation; continuing negotiation with the Bureau of Reclamation concerning power for the joint state and bureau facilities; negotiation for Pacific-Northwest power, management of the South Bay Aqueduct power contract.

PROJECT POWER DEVELOPMENT *(Capital Outlay)*

This program has for its main purpose the study of power sources and power markets, including value and cost of power. The program provides, in anticipation of project operations, a continuing analysis of power production facilities and power requirements and load characteristics of power systems affecting the State Water Facilities. The proposed program in 1962-63 will involve contacting possible customers for project power, analysis of the optimum method of disposing of power including exchanging, wheeling, sale or use within the project, and economic comparison of the methods of power disposal and purchase.

POWER OPERATION AND MAINTENANCE *(Capital Outlay)*

This program will provide staff direction and guidance in initiating and continuing programs of operation and maintenance of project power facilities. Under this program, upon reaching operational status, completed portions of project facilities are turned over to the appropriate operating unit with all instructions and procedures set forth in manuals or directives.

During 1962-63, the program will consist of the following: preparation of a plan of operation of power facilities for the South Bay Aqueduct Project consistent with water service contracts and other contracts and agreements; review designs and operating instructions and initiate preparation of operations and maintenance manuals for power features of the State Water Facilities; review the power operation and maintenance programs of the branches; co-ordinate studies of formulation of power operational requirements; determine projected power operation and maintenance costs.

WATER OPERATIONS CRITERIA AND TECHNICAL STANDARDS *(Capital Outlay)*

Under this program operating criteria and technical standards will be developed for the storage, release, pumping, and diversion of water developed by the State Water Facilities. The necessary operation studies will be made and criteria will be established for the co-ordinated operation of the State Water Facilities with federal and local projects; operating standards and criteria will be developed for automatic operation of all or part of the State Water Facilities; operation and maintenance manuals and reports for the State Water Facilities will be prepared as State operated projects are constructed.

During 1962-63, studies will be made to develop operating criteria and procedures for the co-ordinated operation of the State Water Facilities with the Central Valley Project. Studies will be made to develop the operating criteria of the Feather River Project as a separate project. This is to determine that the criteria established for the co-ordinated operation will not adversely affect the State project.

PROJECT REPAYMENT AND FINANCIAL ANALYSES *(Capital Outlay)*

This program will include a periodic review of cost and repayment data as required for final water service contract negotiations and for customer billings. It will also assess the resulting financial requirements of the State Water Facilities upon the General Fund, California Water Fund, and California Water Resources Development Bond Fund. Periodic comprehensive reports and analyses of the State Water Facilities including the staging of construction, capital expenditures, operating costs, allocation and repayment of costs, and financial aspects, will be prepared. Financial analyses will include consideration of required expenditures and anticipated revenues as a basis for decisions relative to sale of bonds and management of the California Water Fund and the California Water Resources Development Bond Fund, including investment of surpluses, treatment of replacement reserves, and related matters.

DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

OPERATIONS—Continued

STATEWIDE POWER AND WATER OPERATIONS CENTER *(Capital Outlay)*

The objectives of this program are to provide an operation center for the Power and Water Operations of the State Water Facilities; provide a center staffed with the necessary personnel to make final operating decisions required in the operations of the State Water Facilities; provide an operation center which may be staffed at a future time jointly by Department of Water Resources, United States Bureau of Reclamation, United States Army Corps of Engineers, and if required, personnel from other agencies; provide direct liaison with all water and power operating agencies in order that the maximum benefits may be obtained from the operation of water resources developmen in the State.

Work during 1962-63 will be directed to develop the co-ord nation with the United States Bureau of Reclamation and oth agencies to establish joint operating criteria, establish and defi the necessary relationships with federal and other agencies insure maximum benefits from the operation of water resourc projects in California, and to implement the operation cent for the operation of the South Bay Aqueduct Project. This is new program for 1962-63.

STATE WATER FACILITIES MAINTENANCE CO-ORDINATION *(Capital Outlay)*

Under this program, maintenance standards and criteria for the California Water Development Facilities are being prepared.

The work will consist of the sizing, locating, and layout of maintenance facilities in order to meet the schedule for acquisition of necessary property in conjunction with regular property acquisition schedules; the development of maintenance stan ards for all works, including canals, control structures, dam reservoirs, roads, bridges, and fences; establish the maintenanc programs for completed project units.

PROJECT OPERATIONS AND MAINTENANCE *(Capital Outlay)*

This program provides for the operation and maintenance of the South Bay Aqueduct Project and Frenchman Dam, the operation and maintenance of the South Bay Aqueduct Project which will include the interim canal from the Delta-Mendota Canal to Bethany Forebay Dam, interim pumping plant at Bethany, Bethany Dam and Reservoir, South Bay Pumping Plant, and aqueduct facilities to and including Patterson Reservoir.

The Frenchman Project will be operated and maintained in accordance with the prescribed operation and maintenance manual for Frenchman Dam and Reservoir.

Water releases will be made in conformance with agreements with downstream water users. The structures will be maintained in a suitable operating condition.

Part of the cost of this activity is allocable to customers being served from completed portions of facilities and part of the cost applies to construction. Of the $288,091 for operation and maintenance of Frenchman Dam and the South Bay Aqueduct included here $229,172 is allotted to customers and $62,080 applies to construction.

System revenues are specifically provided for in the Bond Act. The following schedule indicates the source and disposition of system revenues as provided in Section 12937(b) of the Water Code. The section provides as follows:

"(b) All revenues derived from the sale, delivery or use of water or power, and all other income or revenue, derived by the State, from the State Water Resources Development System shall be deposited in a special account or accounts in the California Water Resources Development Bond Fund and shall be accounted for and used annually only for the following purposes and in the following order, to wit:

1. The payment of the reasonable costs of the annual maintenance and operation of the State Water Resources Development System and the replacement of any parts thereof.

2. The annual payment of the principal of and interest on the bonds issued pursuant to this chapter.

3. Transfer to the California Water Fund as reimbursement for funds utilized from said fund for construction of the State Water Resources Development System.

4. Any surplus revenues in each year not required for the purpose specified in the foregoing subparagraphs (1), (2) and (3) of this subdivision (b) of Section 12937 and not required to be transferred to the General Fund pursuant to subpara graph (a) of this Section 12937, shall, during the time any o the bonds authorized herein are outstanding, be deposited in special account in the California Water Resources Developmen Bond Fund and are hereby appropriated for use and shall b available for expenditure by the department for acquisition an construction of the State Water Resources Development Syste as described in Section 12931 hereof."

In the disposition of system revenues, the entire amount ha been allocated to category 1 in the priority schedule. Of thi amount, $229,172 has been allocated to operation, maintenance and replacement on projects operational in 1962-63. The balanc of $803,368 is being held in suspense in category 1 pending th results of an analysis of reserve and other operations and main tenance requirements.

Revenues From Operations

	1962-63
Water Sales	
Frenchman Dam	$10,500
South Bay Aqueduct	464,040
Totals, Water Sales	$474,540
Advances From Local Districts	
Metropolitan Water District	$528,000
San Bernardino County Water District	30,000
Totals, Advances From Local Districts	$558,000
TOTALS, SYSTEM REVENUES	$1,032,540

Disposition of System Revenues (Section 12937(b))

1. System operations	$1,032,540
2. Principal and interest on bonds	—a
3. Transfer to California Water Fund	—a
4. Surpluses to California Water Resources Development Bond Fund	—a
TOTALS, SYSTEM REVENUES	$1,032,540

OTHER ACTIVITIES

(See page 689 for expenditure detail.)

Certain statutory and regulatory activities and projects otherwise differentiated from the Basic Data, General Investigations, Project Planning, and Operations programs are grouped herein.

---

[a] Included with river forecasting and flood hydrology for 1962-63 fiscal year.

[b] Program dropped in 1962-63.

[c] The portion of the cost of operations to be financed from the California Water Development Bond Fund in the 1962-63 Budget is the estimated cost of operations management activities and project operations and maintenance allocable to customers who have contracted for water from completed portions of systems facilities.

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

OTHER ACTIVITIES—Continued

LOCAL PROJECTS CO-ORDINATION

This is a continuing activity of co-ordinating water resources development planning by federal, state, and local agencies with the primary objective of ensuring conformance with The California Water Plan. Work includes liaison with other agencies where water development is under study, and the necessary engineering and economic studies to provide the guidance directed by Division I, Section 104 of the Water Code.

ENGINEERING METHODS SURVEY

The Engineering Methods Survey Program will develop and recommend the introduction of new or improved methods and procedures in those fields of engineering encompassed by planning activities. This program will include the following: review of procedures and methods for collection of basic data and the use, application, and possible correlation of those data; development of a method for appraising quantity and rate of solution of mineral salts contained in subsurface soils; assistance in the co-ordination of planning methods procedures; continuing review of new theory of procedures that may be applied to the definition and resolution of planning problems; and study and consideration of the possible instrumentation of some planning procedures.

PLANNING MANUAL PREPARATION

In order to insure that water projects in all of their aspects are formulated on a common and rational basis, there is need to standardize, insofar as possible, basic planning criteria and methods of approach to proper planning.

The objective of this program which began in 1961-62 will be the preparation of a comprehensive manual covering all aspects of water project formulation. When completed, it is anticipated that the manual can serve the purposes of general guidance to the entire department and to the planning engineer in particular, on matters associated with water project formulation. The manual will establish uniform, but necessarily flexible, guidance and procedures for the conduct of an investigation including the preparation of reports.

The work program for 1962-63 will be a continuation of the preparation of the planning manual with emphasis in developing the technical material to be included.

ADVISORY SERVICES TO WATER POLLUTION CONTROL BOARDS

The objective of this program is to furnish technical information and advice to the water pollution control boards regarding municipal and industrial waste discharges in support of the board's regulatory activities in establishing waste discharge requirements. The department submits comments and recommendations regarding specific municipal and industrial waste discharges. In addition, it notifies water pollution control boards regarding applications to this department for construction and enlargement of dams and forwards information on water quality, water rights, beneficial water uses, and known or suspected pollution hazards.

REVIEW OF REPORTS OF OTHER AGENCIES

The objective of this activity is to review and prepare the views and recommendations for the State of California on proposed federal projects, and local projects for which federal financial assistance is requested. In its review, the State makes recommendations with respect to such aspects as project service areas, upstream development and protection, capacities of project facilities, water rights, sequence of construction, and other matters, all with the objective of encouraging the optimum, timely, and co-ordinated development of the State's water resources. The California Water Plan, together with subsequent studies of all agencies, is utilized as a principal guide to this objective.

FORMATION AND SUPERVISION OF PUBLIC WATER DISTRICTS

This activity protects and furthers the public interest in the formation of public water districts by prior determination of the overall feasibility and propriety of district organizations, as well as by supervision of operating districts, to the extent required by law. The department provides assistance on the formation and supervision of irrigation and water storage districts.

ADMINISTRATION OF FLOOD CONTROL UNITS

The State Water Resources Law of 1945 and the Flood Control Fund Law of 1946, established the policy of financial assistance by the State on federally authorized flood control projects.

As provided by this legislation, the State reimburses local agencies for the costs of lands, easements, rights-of-way, and relocation of utilities on federal flood control projects approved by the Legislature. Under this activity, the department receives and reviews claims submitted by the local agencies and makes eligibility findings thereon.

ADMINISTRATION OF BEACH EROSION CONTROL FUNDS

The objective of this program is to provide for the administration of the State's share of funds distributed to other agencies for planning, designing, and constructing beach erosion control works. In addition, this program provides for staff study of beach erosion problems and proposed solutions.

MANAGEMENT OF STATE WATER RIGHTS FILINGS

The objectives of this program are to acquire water rights for the State Water Facilities, to insure that applications for these facilities are protected to the maximum extent consistent with the Water Code, to provide co-ordination among various sections of the department in matters relating to water rights, and to prepare applications for appropriation of water in accordance with Section 10500 of the Water Code. In addition, continuing review is made of requests submitted to the California Water Commission for assignment or release from priority of state filings previously made in order to assist that commission in carrying out its responsibilities.

DEPARTMENT OF WATER RESOURCES—Continued

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

OTHER ACTIVITIES—Continued

CALIFORNIA-NEVADA INTERSTATE COMPACT COMMISSION

The primary function delegated to each of the 2 state commissions is "to co-operate in formulating and submitting to the legislatures of both states for their approval an interstate compact relative to the distribution and use of the waters of Lake Tahoe, and the Truckee, Carson and Walker River Basins." The commissions have approved in principle many of the basic terms of a compact and are now working to finalize compact language to accomplish these principles. They are also negotiating the more complex problems to determine mutually acceptable language for inclusion in the compact.

The department provides the California Commission with such technical information and services as the commission may require in formulating such a compact.

INVESTIGATIONS FOR OTHER STATE AGENCIES

State agencies frequently request the Department of Water Resources to provide engineering information and advice on questions of water resources and related matters. The agencies most frequently involved are the Districts Securities Commission, Department of Finance, Division of Forestry, Division of Architecture, Division of Beaches and Parks, Wildlife Conservation Board, and the Division of Highways. Costs of these investigations are reimbursed by the requesting agency.

SPECIAL INVESTIGATIONS FOR WATER POLLUTION CONTROL BOARDS

The objective of this program is to furnish information to the water pollution control boards which they need for evaluation and establishment of requirements for specific waste discharges, and for formulation of long-range plans and policies. These investigations are conducted under specifications prepared by the boards, normally after consultation with personnel of this department. Any of the following items may be included in these investigations: collection, evaluation, and reporting of basic data on ground and surface water quality; geology; ground water hydrology; surface water flow; waste discharge practices; quantities and quality of water; and other water quality data as required.

The cost of these investigations is reimbursed by the State Water Pollution Control Board under provisions of an interagency agreement executed each fiscal year.

SUPERVISION OF SAFETY OF DAMS

The statutory function is a regulatory activity, its primary duty that of supervision of the safety of design, construction, maintenance, repairs, alterations, and operation of all dams in the State, except those controlled by the Federal Government. The total number of dams to be inspected has been growing steadily, and increased expenditures in 1962-63 reflect this increase.

AUTOMOTIVE POOL *(Support and Capital Outlay)*

The automotive pool provides for the central procurement, operation, and maintenance of automotive equipment for the Department. Rates are based on estimated actual cost. Purchase of additional equipment is financed from the General Fund and advances from the California Water Fund. The amount from each fund is based on the work for which the additional automobiles are required.

HEAVY EQUIPMENT POOL *(Support and Capital Outlay)*

The heavy equipment pool provides for heavy equipment procurement, replacement, use, preventive maintenance, lubrication, repairs, and distribution. The pool sets intradepartmental rentals for equipment, based on general contractors' rates. It is a nonprofit activity and rental rates reflect only the actual costs of service rendered to the department. Purchase of additional equipment is financed from the General Fund and advances from the California Water Fund. The amount from each fund is based on the work for which the additional equipment is required.

STATEWIDE DRAFTING STANDARDS PROGRAM

The object of this program will be to collect and compile a basic set of drafting standards to be used statewide within the Department of Water Resources. It will cover standard symbols, sheet, and lettering sizes, and standards for design and planning.

MAP INFORMATION OFFICE

The purpose of this function is to maintain a central office to collect, review, and disseminate information on mapping and surveying activities throughout the State. As a clearinghouse, it facilitates the reutilization of survey data of state, county, and private agencies to minimize duplication of mapping and surveying work.

ADMINISTRATION OF STATE FINANCIAL ASSISTANCE FOR LOCAL PROJECTS *(Capital Outlay)*

The objective of this program is to administer the program of state financial assistance to public agencies for development of needed and economically justified local water projects. This program also provides for administration of state financial participation in the construction of local projects where the objectives of The California Water Plan indicate that a project should be constructed to a capacity beyond the needs of the public agency, and for administration of state grants for costs allocated to incidental recreational and fish and wildlife benefits of local projects.

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

TECHNICAL SERVICES

These technical services are provided by specialty units to all divisions, branches, and offices, for the programs of the department. These services are totally reimbursed by charges to the programs, and include:

1. Engineering Laboratories—statewide laboratory standards, and testing in concrete, soils, chemical, and fluid mechanics.
2. Geologic Services—staff geology review, ground water geology, geotechnics, and subsurface exploration.
3. Graphic Services—drafting services.
4. Mapping and Surveying—statewide mapping co-ordination, aerial photo control, special instrument crews, photogrammetry, and planimetry services.
5. Engineering Computations—engineering problem programming and electronic computer and data processing operations.

PROGRAM EXPENDITURES DETAIL	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

CALIFORNIA WATER DEVELOPMENT PROGRAM

The California Water Development Program consists of the detailed design and implementation of the State Water Facilities as defined in Chapter 1762, Statutes of 1959 (Water Code Section 12934(d)). The facilities, which are the initial features of the California Water Resources Development System, are incorporated in the following projects:

Feather River Project
Delta Water Project
North Bay Aqueduct Project
South Bay Aqueduct Project
California Aqueduct Project
San Joaquin Valley Drain Project

The detailed design and implementation of these projects, with the exception of the San Joaquin Valley Drain Project, the Delta Water Project, and the North Bay Aqueduct Project, will be in progress in fiscal year 1962-63.

This part of the budget includes the staff and related expenses for the design, acquisition, and construction supervision activities necessary for the implementation of the California Water Development Program. The staff costs of these functions are financed in the Capital Outlay budget and reimbursed to the State Operations budget to provide specific staff and related expenses.

The proposed schedule of accomplishment of the three major work categories, design, right-of-way acquisition and construction for the current California Water Development Program is presented for fiscal years 1961-62 through 1967-68 as part of the explanation of each project. These schedules are based on the best current estimates of project emphasis and production potential. The following definitions of the work categories that are used to present the California Water Development Program in the budget are provided to give a general understanding of the significant elements of the program.

Design:

The design category is made up of two phases, preliminary design and final design.

Preliminary Design—Preliminary design is the initial step in the design activity—the purpose being to perform detailed surveys and explorations to finalize hydraulic design, establish structure location and alignment, and define the limits of right-of-way requirements.

Final Design—Upon completion of preliminary design, the project moves to the final design phase, which includes:

1. Detailed design, which is the engineering studies and computations necessary for the proper selection and precise delineation of each element of the project;
2. Construction plans, which are the detailed engineering drawings of each element of the project from which the works are constructed;
3. Specifications, which are the required legal and technical provisions necessary for the definition of the type and quality of materials to be incorporated in the work, and the workmanship required to provide the finished structure as delineated in the plans;
4. Construction cost estimate, which is the engineering cost estimate for the project and is the basis upon which the director authorizes advertisement for bids and award of a construction contract.

Right-of-way Acquisition:

The phases of the right-of-way function to be performed by the Department of Water Resources' personnel include right-of-way engineering, utility relocations, permits from public agencies, management of acquired properties, and clearance of improvements prior to construction. The appraisal and negotiation for purchase of private property, except condemnation judgments, are being handled by the Division of Highways on a contract basis subject to the review and approval of the Department of Water Resources.

The co-ordination and liaison of the right-of-way activities between the Division of Highways, the Department of Water Resources and, in eminent domain proceedings, the Attorney General's office, will be handled by the right-of-way liaison personnel of the Department of Water Resources. The Department of Water Resources liaison personnel will review and approve appraisals and settlements, and schedule payments. They will also certify that rights-of-way are available prior to calling for construction bids.

The Right-of-way Engineering Section will prepare maps, legal descriptions, and acquisition documents. Relocations of public and private utility facilities will be done by the Relocation Section.

Construction Supervision:

Construction supervision involves contract administration, the necessary field surveying, interpretation of plans and specifications, and enforcement of specifications and contract provisions through inspection of the construction work to insure that the work performed by the contractor is in accordance with the plans and specifications.

FEATHER RIVER PROJECT

The Feather River Project embraces the entire Feather River Basin and consists of five reservoirs in the upper basin, designated the "Upper Feather River Division," and Oroville Dam and Reservoir and associated facilities, designated the "Oroville Division."

The Upper Feather Division includes the Frenchman, Grizzly Valley, Antelope Valley, Dixie Refuge and Abbey Bridge Units. The Frenchman Unit, completed in 1961, consists of the Frenchman Dam and Reservoir located on Little Last Chance Creek about one mile downstream from its confluence with Frenchman Creek. The reservoir, with a storage capacity of 51,000 acre-feet, will regulate the waters of Little Last Chance Creek for downstream irrigation use, provide incidental downstream flood control, and form the basis for enhancement of an outdoor recreation area.

The 1962-63 Budget includes $106,866 for the completion of the development of the Frenchman Reservoir recreational area. Item 339.1 of the 1961 Budget Act included $100,000 for this purpose in the Division of Beaches and Parks.

The Oroville Division consists of the following principal features:

1. Oroville Dam, Spillway and Reservoir
2. Oroville Power Plant
3. Thermalito Diversion Dam
4. Thermalito Power Canal
5. Thermalito Forebay Dam
6. Thermalito Power Plant
7. Thermalito Afterbay Dam

In addition to these "main" features, numerous facilities must be relocated to allow for dam construction and filling the reservoirs.

Oroville Dam will be an earth and graded-gravel fill structure which will be about 735 feet high containing approximately

DEPARTMENT OF WATER RESOURCES—Continued

LINE	PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

FEATHER RIVER PROJECT—Continued

78,000,000 cubic yards of embankment material. The storage will be 3,484,000 acre-feet forming a water surface area of 15,500 acres. The facilities downstream of Oroville Dam are for river reregulation after power generation at Oroville and for added power generation utilizing the remaining head available before returning the flow to the river in the vicinity of the present Sutter-Butte Diversion Dam. The Thermalito Afterbay will contain sufficient storage to permit pump-back operation through the system to the Oroville Reservoir enabling the maximum firm power generation for peaking purposes. To make the project fully operational, certain auxiliary features, such as fish facilities and various permanent buildings and roads, will be required.

It is anticipated that the Western Pacific Railroad and U. S. Highway 40 Alternate will be completely relocated and that the other necessary relocations will be completed rendering the Oroville Dam site clear for construction by June 1, 1962. At that time major contracts can be awarded to begin construction of the principal Oroville Division facilities.

Preliminary design on many of the principal features listed above will be completed prior to fiscal year 1962-63. The funds required for the 1962-63 budget year activities will be utilized for preliminary design, preparation of final designs and construction for the elements of the project as delineated on the following schedule.

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	

SOUTH BAY AQUEDUCT PROJECT

The South Bay Aqueduct will convey water from the California Aqueduct (initially from the U.S. Bureau of Reclamation Delta-Mendota Canal) to serve areas in the Livermore Valley portions of Alameda and Contra Costa Counties, the southern "Bayside" portion of Alameda County, and Northern Santa Clara County.

The main conduit will extend some 39 miles from Bethany Forebay, located on the proposed California Aqueduct approximately 10 miles northwest of Tracy in Alameda County, to Airpoint Reservoir located approximately 4 miles northeast of Milpitas, Santa Clara County. The water will be lifted by the Sounth Bay Pumping Plant from Bethany Forebay to an elevation from which it will flow by gravity to the several service areas. A temporary canal 2 miles long and a temporary pumping plant will supply water to Bethany Forebay from the U.S. Bureau of Reclamation's Delta-Mendota Canal until water becomes available from the California Aqueduct.

Regulatory storage for part of Livermore Valley and for the Alameda Bayside and the Santa Clara service areas will be provided by Del Valle Reservoir located on Arroyo Del Valle 6 miles south of Livermore. Del Valle Reservoir will be connected to the main aqueduct by a short branch in which a pumping plant will be included. The plant will pump water between the main aqueduct and the reservoir with the direction of pumping depending on the reservoir water surface elevation and the water demands. Del Valle Reservoir will also provide flood protection for the Livermore Valley and for the downstream portion of the Alameda Creek Basin. Airpoint Reservoir will provide terminal reservoir storage for the Santa Clara service area.

The Doolan Unit of the South Bay Aqueduct consists of 12 miles of conduit along the northeast edge of Livermore Valley and a terminal storage reservoir.

PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	

CALIFORNIA AQUEDUCT PROJECT

The California Aqueduct Project comprises all of the State Water Facilities south of the Delta necessary to convey water to the project service areas in San Joaquin Valley and Southern California.

This project is comprised of the following divisions: North San Joaquin Division, San Luis Division, South San Joaquin Division, Tehachapi Division, Coastal Division, Antelope Division, East Branch Division, and the West Branch Division.

The North San Joaquin Division includes the intake channel from the Delta to the Delta Pumping Plant and the necessary fish protection works; Delta Pumping Plant, discharge lines and appurtenant features; the extension of Bethany Forebay dikes; and concrete lined canal which extends from Bethany Forebay to San Luis Forebay, a distance of approximately 70 miles. These facilities will be located along the west side of the San Joaquin Valley, in Contra Costa, Alameda, San Joaquin, Stanislaus, and Merced Counties.

The San Luis Division (Joint State-Federal Facilities) includes the San Luis Forebay; the Forebay intake canal; San Luis Pumping Plant, discharge lines and appurtenant features; San Luis Dam and Reservoir and appurtenances; a canal of varying capacity which will extend from San Luis Reservoir approximately 108 miles south to Kettleman City; and a Mile 18 Pumping Plant located on the canal alignment about 18 miles southerly of San Luis Dam. These facilities will be located along the west side of San Joaquin Valley in Merced, Fresno, and Kings Counties. This division is coincident with the federal San Luis Project and is to be developed as a joint state-federal undertaking. The U. S. Bureau of Reclamation will have prime responsibility for design and construction of these facilities. The Department of Water Resources will be responsible for a major part of the right-of-way acquisition. The funds included herein are for advance to the U. S. Bureau of Reclamation for work to be carried out by them in the San Luis Division and for liaison and co-ordination with the U. S. Bureau of Reclamation to insure that the State's requirements are met and for the necessary acquisition work scheduled for the budget year.

The South San Joaquin Division includes a canal of varying capacity which extends approximately 93 miles from Kettleman City to the base of Wheeler Ridge. From this point a system of 3 pumping plants and connecting canals extending approximately 17 miles southeasterly to the Tehachapi Pumping Plant begins. These aqueduct features will be located along the west and southwesterly side of the San Joaquin Valley in Kings and Kern Counties crossing the Kern Lake Bed and passing east of Buena Vista Lake to Wheeler Ridge. From Wheeler Ridge the aqueduct will extend generally eastward to the vicinity of Pastoria Creek.

The Tehachapi Division includes Tehachapi Pumping Plant and appurtenant features, and an aqueduct consisting of discharge lines, tunnels, and siphons which will extend from the Tehachapi Pumping Plant to the south portal of the Tehachapi Tunnels. These facilities are located in southern Kern County and begin in the vicinity of Pastoria Creek.

The Coastal Division consists of those portions of the aqueduct system from Los Perillas Forebay at the California Aque-

CALIFORNIA AQUEDUCT PROJECT—Continued

duct near Avenal Gap in Kings County to a terminus at the Santa Maria River and includes all aqueduct facilities required to make water deliveries to San Luis Obispo and Santa Barbara Counties. The facilities in this division will be located in Kings, Kern, San Luis Obispo, and Santa Barbara Counties.

The Antelope Division includes all aqueduct facilities required to deliver water from the south portal of the Tehachapi Tunnels to the beginning of West Branch Division and East Branch Division and includes the conduit from the forebay at the south portal of the Tehachapi Tunnels to the Cottonwood Power Development; the Cottonwood Power Development, penstocks and appurtenant features; concrete lined canal and pipeline extending to the beginning of the East and West Branch Aqueducts, a distance of 19 miles.

The East Branch Division consists of those portions of the aqueduct system from south end of the Antelope Division to Perris Reservoir and includes the concrete lined canal and pipeline extending to the forebay of the Pearblossom Pumping Plant, a distance of approximately 34 miles; Pearblossom Pumping Plant, discharge lines and appurtenant features; a concrete lined canal and pipeline extending from the Pearblossom Pumping Plant to Cedar Springs Reservoir, a distance of approximately 47 miles; Cedar Springs Dam and Reservoir; approximately 4 miles of tunnel extending from Cedar Springs Reservoir to the Devil Canyon Power Development; the Devil Canyon Power Development, penstocks and appurtenant features; pipeline extending from the Devil Canyon Power Development to Perris Reservoir, a distance of about 29 miles; and Perris Dam and Reservoir. These facilities will be located in Los Angeles, San Bernardino, and Riverside Counties.

The West Branch Division includes all aqueduct facilities required to deliver water from the south end of the Antelope Division to the vicinity of Castaic, a distance of about 20 miles. These facilities will be located in Kern and Los Angeles Counties.

LINE	PROGRAM SUMMARY	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

OTHER CONSTRUCTION ACTIVITIES

LOWER SAN JOAQUIN RIVER FLOOD CONTROL PROJECT

The Lower San Joaquin River Flood Control Project will provide flood control on the San Joaquin River and tributaries from Friant Dam to the Merced River. To provide the desired channel capacity, the existing San Joaquin River Channel will be supplemented by a system of bypass channels extending from the head of Lone Willow Slough to the junction of Bear Creek and the San Joaquin River. The system of bypass channels will vary from 5,500 to 17,000 cubic feet per second in capacity throughout their approximate 48 miles of length and will be leveed on both sides of the channel throughout a major portion of this length. In addition to the bypass channel construction, approximately 110 miles of natural river channel will be improved to provide capacities varying from 2,000 to 22,000 cubic feet per second. The project will also include construction of 13 all weather bridges crossing these channels.

To accomplish this project, the Department of Water Resources provides planning, design, right-of-way, and construction engineering services to the Reclamation Board in conformance with service agreements between the two agencies. Funds for this project are budgeted by the Reclamation Board and those funds required to accomplish the engineering work on the project are transferred to this department for expenditure.

LOWER SAN JOAQUIN RIVER
FLOOD CONTROL PROJECT

GENERAL ANALYSIS

Objectives

The State Water Rights Board was established as an independent state agency on July 5, 1956, by Chapter 52, First Extraordinary Session of 1956. The board, composed of 3 members appointed by the Governor for 4-year terms, is in charge of maintaining orderly procedure in the administration of the following programs outlined in Division 2 of the Water Code, State of California:

1. Administration of appropriation of unappropriated water through the application, permit, and license procedure and to maintain records and make observations to verify compliance with the law in putting the appropriated water to beneficial use.
2. Investigation of physical facts and assistance to the courts in water rights controversies, and implementation of statutory procedures whereby an administrative determination of water rights can be made prior to court action.
3. Administration of the act requiring the recordation of data relating to the extraction of ground water in the counties of Riverside, San Bernardino, Los Angeles, and Ventura.
4. Administration of the act authorizing the retention of ground water rights when extractions are reduced by use of water from an alternate source, which applies to 8 counties of Southern California, and consists of recording statements filed by water users.

Program and Performance

During the 1960-61 fiscal year the board completed a 75-day hearing on applications of the United States Bureau of Reclamation to appropriate water from the Sacramento River and Sacramento-San Joaquin Delta in furtherance of the federal Central Valley Project and issued an 89-page decision which was uncontested. Other major hearings on which decisions were issued included applications of the Bureau of Reclamation on the San Luis Project, Merced Irrigation District development on Merced River, Pacific Gas and Electric Company's power project on McCloud River, City of San Francisco municipal water development on LaCosta Creek, County of Yolo power and irrigation development on Cache Creek, and City of Los Angeles power development on Rock Creek. The board issued 44 other decisions for various projects of a minor nature.

During the 1961-62 fiscal year, a rehearing will be held on applications of the United Water Conservation District and the Calleguas Municipal Water District on Santa Clara River, and major hearings probably will be initiated on applications of the Bureau of Reclamation for the Black Butte Project on Stoney Creek and New Hogan Project on Calaveras River, both features of the federal Central Valley Project, and on applications of Richvale Irrigation District on Middle Fork Feather River, and possibly others. Applications involving a number of minor projects also will be heard.

During the 1962-63 fiscal year, hearings of a major nature are expected to be initiated on application to appropriate water from the Feather, Yuba, Kings, and Stanislaus Rivers. Other protested applications, which have advanced to the hearing stage, also will be scheduled for hearing.

During the 1960-61 fiscal year, there were 770 new applications to appropriate unappropriated water filed with the board. This is 14 percent more than the previous all-time high year of 1959-60. In June 1961, a record high of 129 new applications were filed. Processing the increased number of applications will produce an extremely heavy workload on the staff during the current fiscal year and the budget year.

During the 1960-61 fiscal year, adjudication activities of the board proceeded in 4 court references. One of these is in Southern California and involves ground water in the San Fernando Valley, Los Angeles County. The report of referee is expected to be filed by the board in this proceeding in the near future. The remaining 3 references, 1 of which was initiated in the 1960-61 fiscal year, are in Northern California and involve surface streams in Mariposa, Santa Clara, and Butte Counties.

Filings of notices pertaining to recordation of water extractions and diversions in 4 Southern California counties continued, with 267 first notices and 5,782 annual notices filed in the 1960-61 fiscal year.

GENERAL ANALYSIS

Objectives

This board co-operates with the Corps of Engineers, United States Army, in construction of flood control projects through the acquisition of rights-of-way for such projects; acts as a governing body for the Sacramento and San Joaquin Drainage District; approves the construction of levee systems and flood channels; and fulfills such construction obligations as have been assumed by the State in its agreement with the Federal Government.

Program and Performance

The agency program involves work on a number of flood control projects in the Sacramento and San Joaquin Valleys. The presently active projects of the board are the Sacramento River Flood Control Project, the Sacramento River Bank Protection Project, the San Joaquin River Flood Control Project, and the Calaveras-Littlejohn Flood Control Project. Construction work on all of these projects is done by the Corps of Engineers with the exception of the portion of the San Joaquin Project lying above the mouth of the Merced River. The construction work on this project is being accomplished by the Department of Water Resources under an agreement with the Reclamation Board.

The primary function of this agency is the acquisition of the necessary lands, easements, and rights-of-way for these projects and the relocation of roads, bridges, and utilities as may be necessary in conjunction with their construction. In addition the board also is responsible for the control of encroachments upon the works of these various flood control projects and is responsible for the enforcement of sound maintenance standards.

With respect to the San Joaquin River Flood Control Project, all of the channel and bypass work on this project between Sand Slough and Merced River will be complete except for the improvements in the vicinity of Bear Creek. A contract which covers this work will be advertised shortly. Field surveys and final designs are under way and the first construction contract in the area above Sand Slough is scheduled for advertising on May 1, 1962. Right-of-way negotiations for this portion of the project have recently begun.

During 1961-62 and 1962-63 the staff of the board will be required to supervise construction of 21 county bridges, 15 other stream crossings, 1 siphon, and will participate in the design and construction of 4 railroad and 4 state highway bridges. In addition to this basic flood control program, the design section will make cost estimates, review Corps of Engineers work performed at state expense, review reports and encroachment applications, and prepare engineering data for legal actions. Three new positions are proposed for establishment in the current year in the design section to augment the present staff of 7 in an effort to meet expanded workload.

The preparation of descriptions and maps of the land being acquired has seriously delayed the appraisal and acquisition process. In order to bolster this phase of the program, 3 additional engineering positions are included for establishment in the current year.

All 6 of the preceding positions are financed through charges to the local assistance projects.

GENERAL ANALYSIS

Objectives

The Colorado River Board was created by Chapter 838, Statutes of 1937, for the purpose of protecting California's rights pertaining to the Colorado River. The Board, and its staff collects, compiles and analyzes engineering and legal data on this existing and proposed utilization of the Colorado River water supply, appears before congressional committees and interested federal agencies, and confers with representatives of other Colorado River basin states regarding legislation and developments affecting their rights and interests.

Program and Performance

The Board comprises six members appointed by the Governor, each representing one of the six agencies having rights to the use of water or power from the Colorado River. These agencies are: The Metropolitan Water District of Southern California, Department of Water and Power, City of Los Angeles; San Diego County Water Authority; Imperial Irrigation District; Coachella Valley County Water District; and Palo Verde Irrigation District.

Major phases of the Board's work program as anticipated for the current fiscal year and the fiscal year 1962-63 are summarized as follows:

1. Preparation of engineering and legal material for appearances before congressional committees and for conferences with interested federal agencies and legislators regarding legislation pending before the Congress affecting the Board's interests on the Colorado River.
2. Exhaustive study of reports on proposed projects for development, control and utilization of waters of the Colorado River and preparation of formal views and recommendations of this Board to be transmitted to appropriate Federal authorities and the Congress.
3. Collection, compilation and analysis of basic information on the water supply of the Colorado River to the extent that the interests of the member agencies are concerned.
4. Engineering studies and research needed in connection with the suit, Arizona v. California, et al., on which a decision is pending from the United States Supreme Court.
5. Legal and engineering studies necessary to inform the Board as to whether projects are operated in accordance with the provisions of the Colorado River Compact, the Upper Colorado River Compact, the Mexican Water Treaty, Colorado River Storage Project Act, the Boulder Canyon Project Act, and other relevant laws.

KLAMATH RIVER COMPACT COMMISSION

Headquarters at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	$572	$5,698	$5,697	—$1

GENERAL ANALYSIS

Objectives

The major purposes of this compact, with respect to the water resources of the Klamath River Basin, are:

A. To facilitate and promote the orderly, integrated and comprehensive development, use, conservation, and control thereof for various purposes, including, among others: the use of water for domestic purposes; the development of lands by irrigation and other means; the protection and enhancement of fish, wildlife, and recreational resources; the use of water for industrial purposes and hydroelectric power production; and the use and control of water for navigation and flood prevention.

B. To further intergovernmental co-operation with respect to these resources and programs for their use and development and to remove causes of present and future controversies by providing (1) for equitable distribution and use of water among the 2 states and the Federal Government, (2) for preferential rights to the use of water after the effective date of this compact for the anticipated ultimate requirements for domestic and irrigation purposes in the Upper Klamath River Basin in Oregon and California, and (3) for prescribed relationships between beneficial uses of water as a practicable means of accomplishing such distribution and use.

Program and Performance

The commission was created effective September 11, 1957, with the passage of an act of the Congress of the United States consenting to the provisions of that certain compact designated as the "Klamath River Basin Compact Between the States of Oregon and California." The Legislature of the State of California ratified and approved the compact by Chapter 113, Statutes of 1957.

The compact provides that the commission consist of 3 members. The Director of the Department of Water Resources represents the State of California. The representative of the Stat of Oregon is the State Engineer. The federal representative i appointed by the President. The representative of the Unite States services as chairman of the commission without vote.

California's share of the expense of the commission togethe with the State of Oregon's share is deposited in a trust accoun from which all expenses are paid.

During 1962-63, the work program of the commission will continue on about the same level as last year. The land use study of the Upper Klamath River Basin in Oregon will continue

Field work for the area outside the Klamath Indian Reservation will be completed and the preparation of a map to indicate land use as of 1957, the effective date of the compact will be initiated.

A program initiated in 1961-62 for determining a solutio of the algae problem in the Klamath River will continue.

Provision has been made in the budget for expenses relate to hearings and investigations required to transact the term of the compact. The routine administrative work will be continued.

The total California appropriations to date for this commission have been as follows:

Chapter 113, Statutes of 1957	$12,000
Budget Act of 1959, Item 265	2,343
Budget Act of 1960, Item 260	572
Budget Act of 1961, Item 270	5,698

The status of the trust account is shown below in order to complete the financial history of the commission.

Funds on deposit in bank, July 1	$23,804	$20,526	$15,482

GENERAL ANALYSIS

Objectives

The California-Nevada Interstate Compact Commission of California was created by Chapter 1810, Statutes of 1955. Its function is "to co-operate with a similar commission representing the State of Nevada in formulating and submitting to the legislatures of both states for their approval an interstate compact relating to distribution and use of the waters of Lake Tahoe and the Truckee, Carson, and Walker Rivers." The commission consists of the Director of the Department of Water Resources and 6 other members, appointed by the Governor, from electors residing, owning property, or engaged in business in the areas comprising the basins of the Truckee, Carson, and Walker Rivers, and Lake Tahoe. The chairman of the commission is selected by the members.

Program and Performance

Entering its sixth year of extensive negotiations with its counterpart commission from the State of Nevada, the California commission is now hopeful that the end of the 1962-63 fiscal year will see a successful culmination of its efforts to create an interstate compact. The work of the California commission during 1961-62 will be aimed toward completion of the negotiations.

During 1962-63 the commission may:

1. Negotiate with federal, state, and local agencies on final provisions of the compact;
2. Hold public hearings in Sacramento and Carson City and the county seats of 5 counties in California and 6 counties in Nevada which are directly affected by the compact terms;
3. Present the completed compact to the state legislatures of California and Nevada for their approval during the period January through March 1963;
4. Introduce consent legislation in Congress to obtain federal approval of the compact by both houses during the period April to July 1963.

The 1961-62 and 1962-63 fiscal year budgets include funds for an executive secretary for this commission. Heretofore this function had been performed in the Department of Water Resources and that budget reflects the elimination of 1 position for this purpose. The contractual services by the Department of Water Resources have been reduced from the 1961-62 budgeted level.

This position will also continue to serve as secretary to the Klamath River Compact Commission and a reimbursement from that commission is included.

GENERAL ANALYSIS

Objectives

The principal objective of the state water pollution control program is to regulate the disposal of domestic sewage and industrial waste so as to preserve and protect the recognized beneficial uses of the waters of the State. Another objective is to prevent nuisances resulting from unreasonable waste disposal practices. The regulation of waste discharges is the primary responsibility of the 9 regional water pollution control boards. Prescribed waste discharge requirements must, in the final analysis, be reasonable and must be promulgated after balancing the interests of both the water users and the waste dischargers. For this reason, the regional boards are composed of local people appointed by the Governor and associated with 7 specified fields of interest.

In addition to the major task of prescribing, checking, and enforcing waste discharge requirements, the regional boards have the following other statutory duties and responsibilities:

1. To formulate and adopt long-range plans and policies for control of water pollution.
2. To co-ordinate the actions of the various state and local agencies in the control of water pollution.
3. To investigate conditions of pollution or nuisance.
4. To report cases of suspected contamination (actual hazard to the public health).
5. To recommend water pollution control projects needing financial assistance.
6. To request enforcement of water pollution control laws by appropriate federal, state or local agencies.

---

[a] Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

WATER POLLUTION CONTROL BOARD—Continued

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS—Continued

Objectives—Continued

The 14-member State Water Pollution Control Board has the following principal responsibilities:

1. To formulate and adopt statewide policy for control of water pollution.
2. To review actions of any regional board which may fail to take or obtain appropriate action to correct conditions of pollution or nuisance.
3. To refer cases of uncorrected contamination (hazard to public health) to any state agency having jurisdiction.
4. To administer statewide programs of financial assistance for sewerage construction.
5. To administer statewide programs of research in the technical phases of water pollution control.

Program and Performance

The program of the state and regional boards for the 1962-63 fiscal year is essentially a continuation of the current program. However, 4 factors have affected the planning of the 1962-63 Budget and program. These factors also have necessitated an adjustment in the 1961-62 Budget and program. They are:

1. The workload of prescribing, checking, and enforcing waste discharge requirements, which began a steady rise in 1957, is continuing in much of the State.
2. The federal (Public Law 660, 84th Congress) program grants, which were scheduled to terminate in the 1960-61 fiscal year were reinstated by the 87th Congress (Public Law 88). These grants are made available for use in extending or improving State Water Pollution Control programs and in the past, have been used primarily to augment the state board's research program. In 1961-62 and 1962-63, it is planned to continue augmenting the research program with grant funds and to also use these funds to supplement the operating cost of the board and to finance necessary field and laboratory services. The state board has assigned $144,220 of federal funds to specific activities in the 1961-62 Budget and $211,530 in the 1962-63 Budget.
3. The growing need for applied research in the fields of ground water pollution from refuse dumps and from synthetic detergents in waste discharges.
4. Creation of an interagency technical committee established as a result of state board action in 1960-61 and assigned the responsibility of co-ordinating the technical aspects of water pollution control and water quality management. Represented on the committee is the State Water Pollution Control Board and the departments of Finance, Fish and Game, Public Health, and Water Resources. This committee has met and is meeting frequently to review proposed research programs with the contractors and is presently engaged in preparing a statement on the overall conditions of California waters. This committee is also reviewing water pollution activities in state agencies engaged in this area to eliminate any overlap.

Federal grant funds will provide for 6 new positions in the 1961-62 fiscal year. These are: 4 assistant engineers to be used primarily on the waste monitoring programs (2 on the staff of the Central Valley Regional Board and 1 each on the staffs of the Santa Ana and San Diego boards) and an associate engineer and senior account clerk on the state board staff.

The boards are delegated the responsibility of administering the federal (Public Law 84-660) construction grant program. This program was expanded in the 87th Congress, by Public Law 88. California's allocation, which has been approximately $2 million annually, will be increased to almost $4 million in 1961-62 and will be about $4½ million in 1962-63. Eligible communities may receive grants for construction of waste treatment works up to 30 percent of the cost, with a present maximum of $250,000 in California (after the 1962-63 fiscal year, the maximum will become $600,000). Each year since the start of the program in 1956, requested grants have totaled several times the available funds. Priorities are based on water pollution control needs determined by the regional boards and on financial needs found by the state board. Actual grants are made by the U.S. Public Health Service upon certification by the state board.

RESEARCH IN TECHNICAL PHASES OF WATER POLLUTION CONTROL

Objectives

The program of applied research in the field of water pollution control is conducted to provide technical data to aid the boards in properly discharging their statutory responsibilities.

Program and Performance

The research program sponsored by the state board is carried out by contracting special projects with organizations or individuals competent in the particular field of research. A basic program has been supported since 1950 at a state level of approximately $80,000. In 1956-57 the research studies were expanded using federal (Public Law 660, 84th Congress) program grant funds in an amount of approximately $113,000 annually. Because the federal grants were scheduled to terminate in th 1960-61 fiscal year, the 1961-62 research program had been cu back to $65,000. However, Public Law 87-88 reinstated th program grants and, as a result, the state board has expande the 1961-62 research program to conduct investigations in number of fields in which technical knowledge is urgentl needed by water pollution control authorities.

FIELD AND LABORATORY SERVICES BY OTHER AGENCIES

Program and Performance

This category covers the cost of contracting with other agencies for field and laboratory services. Such services consist of technical investigations, inspection of waste discharges, sampling and analysis of wastes and receiving waters, and financing the bacteriological and radiological aspects of the statewide stream sampling program. These services are contracted with state or other agencies best qualified to perform the required technical work. The physical and chemical aspects of the stream sampling program are performed by the Department of Water Resources.

For 10 months of each year, the Department of Water Resources makes partial analyses and physical examinations of all samples collected in the statewide stream sampling program. The samples collected during the remaining 2 months are subjected by the department to a more complete mineral analysis, and, in addition, heavy metals determinations are made. These data are utilized to determine existing water quality conditions in the surface waters of the State; to evaluate trends and changes in water quality and ascertain causes; to advise appropriate regulatory agencies regarding existing and potential water quality problems; and to assemble, collate, and publish water quality data.

The comprehensive study of San Francisco Bay, started in 1959-60 under Chapter 1909, Statutes of 1959, is being continued in 1962-63 under contract with the University of California.

GOOSE LAKE COMPACT COMMISSION

Headquarters at Sacramento

SUMMARY AND GENERAL ANALYSIS	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63	CHANGE FROM 1961-62
SUMMARY				
TOTAL EXPENDITURES				
Support *(General Fund)*	–	$3,000	$5,000	$2,000 (66.7%)

GENERAL ANALYSIS

Objectives

The major function of this commission is to co-operate with a similar commission representing the State of Oregon in formulating and submitting to the legislatures of California and Oregon for their approval an interstate compact relative to the waters of Goose Lake. The Federal Government will be represented and will participate in the compact negotiations.

Program and Performance

This commission was established by Chapter 1389, Statutes of 1961. The commission consists of 5 members, including the Director of Water Resources or his representative, the Director of Fish and Game and 3 members appointed by the Governor from persons residing in Modoc County. The members shall be appointed from qualified persons engaged in the following fields: (a) agriculture, (b) fishing, and (c) other industries.

The commission, through review of existing data on the area, will endeavor to reach an understanding and conclude an agreement with its Oregon counterpart and the Federal Government as to the usage of the waters of Goose Lake.

Los Angeles World Trade Center Authority

GENERAL ANALYSIS

Chapter 2400, Statutes of 1957 provided for an advance to the Los Angeles World Trade Center Authority. The amount appropriated is to be repaid to the General Fund out of the proceeds from the sale of the first revenue bonds sold by the authority under the provision of the World Trade Center Authorities Act.

Availability of the appropriation made by Chapter 2400, Statutes of 1957, terminated September, 1960 in accordance with Section 16304, Government Code.

GENERAL ANALYSIS

Objectives

The San Francisco World Trade Center Authority is established under the provisions of Chapter 1508, Statutes of 1947, to foster and develop domestic and international trade for the benefit of the entire State.

Program and Performance

The authority is composed of 11 members, including the Director of Public Works, the Director of Finance, and the President of the San Francisco Port Authority, and 8 persons appointed by the Governor for 4-year terms. The chairman is selected by the authority from its membership.

The Authority may obtain land, buildings, works, and property and operate and maintain them to foster and develop domestic and international trade for the benefit of the entire State. The offices are in the World Trade Center, Ferry Building, San Francisco.

The San Francisco World Trade Center was operated through June 30, 1960, under management of the San Francisco Bay Area Council, Inc., by contract. Beginning with the 1960-61 fiscal year the San Francisco World Trade Center Authority has assumed full management and fiscal responsibility for the operation of the center and its program of trade promotion.

Rental management of exhibit and display space in the World Trade Center is performed by authority personnel. Rentals in the center have been averaging in excess of 90 percent capacity, with approximately 110 tenants, including 4 consulates and 6 Chambers of Commerce representing foreign countries, several travel agencies, numerous import-export firms, a branch office of an international bank, freight forwarders, and customs brokers. In addition, employees of the authority carry out the responsibilities of the enacting legislation by promoting domestic and international commerce. The World Trade Center Libraries, composed of 8,000 publications, is operated on the premises by authority personnel.

Another facet of the work of the authority will be to help increase tourism from foreign nations to the State. This has been a neglected aspect of world trade and it is the intention of the authority to remedy this neglect.

The authority furnishes import-export opportunity information to both local and foreign businessmen and serves as liaison for the State with foreign government officials who come on trade missions.

During 1961-62 it became necessary for the authority to take some action due to the urgency of the shifting economic problems in connection with the counties of the European Common Market. As the agricultural problems specifically required immediate attention the California Agricultural Export Promotion Committee was established. At the request of this committee, the authority chairman discussed restrictions against fresh fruit products in Paris with French officials, and as a result of these discussions, restrictions on pears and apples were eased. Because California is an agricultural state, the agricultural economy, as well as transportation, banking, and allied activities, will benefit by this action and by future programs of this nature. Efforts of this type require a great deal of research and promotion, and will be undertaken on behalf of other segments of our agricultural community, manufacturing, and other facets of the state economy.

During 1962-63 it is proposed to expand the program by the addition of a modest state commercial attaché service in common market countries. This service would include highly qualified people on a part-time basis to keep California business and agricultural interests informed of the current export opportunities in selected countries. These employees would help sell California products and would assist in bringing about a better climate for expansion of California exports in international trade. To carry out this additional service an increase of about $50,000 is included in the budget. Also, an additional part-time promotional person is included on a contractual basis to handle the increased activity in promotional and publicity area.

Totals	$1,340,666	$1,256,483	$1,108,499

GENERAL ANALYSIS

Additional capitalization in the form of new equipment amounting to $587,687 is proposed for the Service Revolving Fund. The Automotive Pool requires $304,290 primarily for 168 additional vehicles to meet the estimated 39,800,000 miles to be driven in 1962-63. This is an increase of 2,800,000 miles or 7.6 percent over the 37,000,000 miles estimated for 1961–62. In Radio Maintenance, $32,740 is required for testing equipment and vehicles for staff added in the 1961-62 budget. The necessary tools for these positions were deleted in error as part of other reductions to last year's augmentation. $14,082 is proposed for the Reproduction Section primarily to obtain an additional duplicator and an additional collator to meet increased workload. Automatic feeding devices for two presses at $100,000 apiece are the primary needs of a $236,000 increase in the Printing Division. Small miscellaneous items amounting to $375 in Central Stores and $200 in office machines make up the remaining additional total.

Proposed financing of this additional equipment for the Service Revolving Fund is composed of $126,878 in depreciation reserve, excess to current replacement needs; $102,310 profit from operations primarily in the automotive management function; $174,284 available from prior year augmentation appropriations; and $184,215 in a proposed new appropriation for 1962-63. A schedule of "Augmentations To Net Current Assets" explaining this financing appears in the Service Revolving Fund budget printed in the Appendix Section of this budget.

Section 8352(g) of the Revenue and Taxation Code appropriates $750,000 annually from the Motor Vehicle Fuel Fund to the Small Craft Harbor Revolving Fund. This sum represents the amount of money attributable to taxes imposed on motor vehicle fuel used in propelling vessels.

Program information and detailed budgets for each permanent revolving fund appear in the Appendix Section of this budget.

GENERAL ANALYSIS

Objectives

The commission was created by Chapter 2139, Statutes of 1961, to study the problems of the American Indians residing in California, and needed revision of any and all state laws pertaining to the Indians and the 3 relocation centers in California.

Program and Performance

The commission consists of 9 members: the Director of Social Welfare, the Director of Public Health, the Director of Education, 3 members of the Senate, and 3 members of the Assembly. The commission shall report its findings, together with any suggested legislation, to the Governor and the Legislature not later than June 15, 1962. The commission shall cease to exist after September 15, 1964.

GENERAL ANALYSIS

Objectives

The Capitol Building and Planning Commission was created by Chapter 1952, Statutes of 1959. The commission consists of 13 members appointed by and serving at the pleasure of the Governor. Three members are nominated by the City of Sacramento and 3 members by the County of Sacramento. The duties of the commission are to establish a master plan for the orderly development of future state buildings and other facilities in the capitol area of the City of Sacramento.

The commission is required to submit at each general session a report on projects completed or initiated and may recommend revision of the master plan adopted by the Legislature.

Program and Performance

The commission is to review all factors affecting the plan including any changes in the needs of the State relative to the location and design of buildings to be constructed, parking facilities, and landscaping, the ordinances, plans and proposed improvements of the County and City of Sacramento including zoning regulations, population trends, and plans for rapid transit development. In addition, the commission has agreed to advise private developers of property within the area covered by the master plan on the status of the plan and its effect on such developers.

The commission is to report to the Legislature at each general session on the state building construction projects initiated, completed or proposed and to set forth the commission's appraisal of the degree to which such projects conform to the master plan. The commission may also include in its report recommendations of revisions of the plan from time to time as such changes become necessary.

In 1961-62 the Commission is conducting an architectural contest to determine the design of the Governor's Mansion. Out of 366 applicants, 197 drawings were submitted to the jury for the competition. The field has been narrowed to 10 finalists who will submit more extensive designs for final determination of which design shall be adopted for the future mansion.

The Budget Division in the Department of Finance is providing the necessary staff services for the Commission.

The 1962-63 budget provides for preparation of the commission's report to the Legislature and general office expense of the commission.

GENERAL ANALYSIS

Under the provisions of the Meyers-Geddes State Employees' Medical and Hospital Care Act (Chapter 1236, Statutes of 1961) the State is authorized to pay up to a maximum of five dollars per month per eligible employee and annuitant toward the cost of a basic health benefits plan. In addition the act provides for the payment of 5 percent of the total of both the State's and the employees' payments for administrative expenses and contingencies.

Insofar as practicable, the expenditures for these purposes are reported in the budgets of the several state agencies. Certain expenditures under this act cannot be assigned to specific agencies or programs and for this reason are reported here.

STATE EMPLOYEES' CONTINGENCY RESERVE FUND

Receives contributions from the State to be used for payment of the administrative expenses of the Meyers-Geddes State Employees' Medical and Hospital Care Act and to maintain a contingency reserve for the same program. In accordance with Section 22826, Government Code, an amount not to exceed 2 percent of the total of the contributions made by the employee or annuitant, and the State on behalf of the employee or annuitant can be assessed the employer for meeting administrative expense and no more than 3 percent for maintaining the contingency reserve. The maximum of 2 percent and 3 percent is being assessed in both 1961-62 and 1962-63.

Provision for Salary Increases

SUMMARY

TOTAL EXPENDITURES			
General Fund	–	$12,267,096	$28,439,625
Special Fund	–	5,045,430	11,376,890
Other funds [a]	–	2,315,543	5,181,278
Total Expenditures, All Funds	–	$19,628,069	$44,997,793

GENERAL ANALYSIS

In addition to existing salary schedules budgeted under the various departments of State Government, a special salary increase fund is provided during years when the State Personnel Board finds that salaries of State employees are sufficiently out of line with comparable employment elsewhere to justify such an increase.

This budget contains a general 5 percent increase for all state employees, retroactive to January 1, 1962, in accordance with the State Personnel Board recommendation. A deficiency appropriation to provide a retroactive adjustment for 1961-62 fiscal year will be submitted to the 1962 Special Session of the Legislature. Sufficient funds to carry this 5 percent increase through the 1962-63 fiscal year is provided in the Budget Bill of 1962.

In addition, $3,000,000 is requested for special adjustments to those classes found to be most seriously and critically out of line with comparable classes, and where management difficulties are occurring as a result.

The funds provided under this special provision for salary increases are distributed proportionately in accordance with need to the various salary-fixing authorities in the State. A special adjustment for California Highway Patrol officers has been included in the budget of that department.

No funds have been included for any additional increase for justices or judges, or for positions whose present salary is $25,000 or above.

General Emergencies

SUMMARY

TOTAL EXPENDITURES			
Unallocated balance *(General Fund)*	–	$161,565	$1,000,000

GENERAL ANALYSIS

To provide funds for various state agencies for unseen contingencies for which no appropriation or insufficient appropriation has been made by law. Amounts as necessary are allocated to agencies by the Department of Finance upon finding of need.

Program and Performance

Unanticipated demands during the 1960-61 fiscal year required allocations for emergency fire suppression ($410,000), increased cost of workmen's compensation benefits for state employees ($283,585), and increased workload in licensing and inspection of agencies caring for aged and children ($105,000).

Major allocations during the 1961-62 fiscal year were for Japanese bettle eradication in Sacramento ($102,750); electronic data processing conversion, State Controller's office ($158,644); additional costs related to processing OASDI and health and welfare payroll deductions ($145,000); conversion of data processing, Franchise Tax Board ($115,963); legal service, Department of Justice ($112,290); unusually high emergency fire suppression needs ($1,680,000); unrealized service fees, Department of Parks and Recreation ($585,000); and increased adoption cases, Department of Social Welfare ($322,466).

It is proposed that a deficiency appropriation be made available in 1961-62 to finance required allocations in the amount of $3,200,000. It is also proposed that $1,000,000 be appropriated for 1962-63. This is a minimum amount as indicated by past requirements.

In the detail of the allocations below, there is included allocations from the Emergency Fund and the Salary Increase Fund made in the past and current fiscal years. All these allocations are shown as available funds in each agency budget. The unallocated balance, if any, is shown as an expenditure in this section of the budget.

GENERAL ANALYSIS

Objectives

To pay the interest and principal redemption charges for state general obligation bonds.

Program and Performance

The State Construction Program Bond Act of 1955 and the State Construction Program Bond Act of 1958 authorized a $200,000,000 bond issue in each instance to meet part of the building construction requirements for the departments of State Government that are financed primarily from General Fund revenues.

All authorized bonds under the State Construction Program Bond Act of 1955 have been issued prior to the 1960-61 fiscal year. Bond sales have been completed under authorization of the State Construction Program Bond Act of 1958 in the amount of $50,000,000 in April 1961 and $100,000,000 in October 1961 to finance authorized projects under construction. Additional sales amounting to $25,000,000 each are tentatively scheduled to occur in October 1962 and in June 1963.

Interest and redemption charges on highway bonds are withheld from motor vehicle license fee revenues for the payment of debt service.

Interest and redemption charges on bonds issued for construction of state and university buildings, and for acquisition of areas for state park purposes were paid from funds which were set aside from General Fund Surplus and placed in the Bond Sinking Fund of 1943. Though the funds required to meet all debt service payments to final muturity were set aside, $5,000,000 was transferred to the State Highway Fund to used as a loan to the Golden Gate Bridge and Highway Distri to be repaid from toll revenues.

Sufficient money has been transferred to the Sacramento Sta Building Interest and Sinking Fund to retire the outstandi Sacramento State Building Bonds.

Debt service requirements for the school building bonds a considered as local assistance and included in the local assis ance part of the budget.

This debt service statement does not include the cost of bon issued for San Francisco Harbor Development, Small Cra Harbor Development, or the Veterans' Farm and Home Pu chase Program. Though these bonds are general obligation bon of the State of California, the debt service costs are primari obligations of the public service enterprise funds and are pa from the respective funds.

Small Craft Harbor Development Bonds are authorized tota ing $10,000,000 and of this amount $6,000,000 has been issu and sold and the remaining $4,000,000 balance will be so during 1962. The debt service from small craft harbor bonds a pears in the local assistance part of the budget.

The California Water Resources Development Bond Pr gram totaling $1,750,000,000 will probably have its first sa during 1963. Revenue from operating projects after mai tenance and operating costs is available for payment of bor interest and redemption. To the extent the revenue is insufficie to pay debt service, the expenses will be paid from the Gener Fund.

STATE BUILDING PROGRAM

SUMMARY OF PROPOSED NEW CAPITAL OUTLAY APPROPRIATIONS FOR 1962-63

The following table summarizes the proposed new appropriations for the 1962-63 fiscal year for the State Building Program b departments. Detailed explanation and description of each project is contained in the agency detail budget.

AGENCY AND PROJECT	PROPOSED NEW APPROPRIATIONS		
	FROM GENERAL FUND	FROM STATE CONSTRUCTION PROGRAM FUND †	FROM OTHER FUNDS
Department of Agriculture:			
Minor construction and improvements	$79,050	–	–
Department of Corrections:			
Conservation Center:			
Construct conservation center branch—Tuolumne	–	$9,300,700	–
Equip conservation center—Lassen County—phase II	–	375,000	–
Correctional Training Facility:			
Construct industries warehouse	–	172,056	–
Deuel Vocational Institution:			
Construct industries warehouse	–	74,300	–
Equip in-service training building	–	10,000	–
Institution for Men:			
Construct inmate activity building	–	114,700	–
Medical Facility:			
Construct psychiatric unit	–	1,564,600	–
Institution for Women:			
Construct adjustment center	–	797,000	–
Equip reception-guidance center	–	80,000	–
Minor construction and improvements	$396,282	–	–
Totals, Department of Corrections	$396,282	$12,488,350	–
Department of the Youth Authority:			
Fricot Ranch School for Boys:			
Replace men's dormitory	–	$147,700	–
Fred C. Nelles School for Boys:			
Equip living unit	–	13,000	–
Convert kitchen-dining room into chapels	–	137,200	–
Equip two chapels	–	26,100	–
Construct storm water drainage system—phase II	–	60,000	–
Construct two living units	–	499,900	–
Northern California Youth Center:			
Construct central administrative and service facilities	–	1,602,000	–
Equip central administrative and service facilities (partial)	–	10,000	–
Construct first 400-bed institution	–	5,048,000	–
Youth Training School:			
Construct additional vocational and academic facilities—phase IV	–	689,900	–
Ventura School for Girls:			
Equip new school	–	35,000	–
Construct living unit	–	414,900	–
Construct additional classroom and offices	–	103,300	–
Minor construction and improvements	$414,300	–	–
Totals, Department of the Youth Authority	$414,300	$8,787,000	–
Department of Education:			
Special Schools:			
Minor construction and improvements	$110,137	–	–
University of California:			
Berkeley Campus:			
Equip education-psychology building	–	$300,000	–
Equip alterations to Hearst mining building	–	220,000	–
Equip chemistry unit 1	–	570,000	–
Equip alterations to life sciences building	–	50,000	–
Land acquisition—Anna Head School property	–	200,000	–
Construct alterations to Stephens Union	–	566,500	–
Construct and equip alterations to LeConte Hall	–	139,400	–
Construct utility improvements on campus	–	552.000	–
Construct utility improvements at Gill Tract	–	75,000	–
Construct and equip physical sciences lecture hall	–	647,500	–
Construct and equip facilities and improvements at the Richmond Field Station	–	334,300	–
Construct and equip alterations to Gilman Hall	–	266,000	–
Construct general campus improvements	–	74,000	–
Site clearance for chemistry—unit 2	–	40,000	–
Land acquisition—Newman Hall property	–	400,000	–
Davis Campus:			
Equip physical sciences unit 1	–	244,000	–
Equip veterinary medicine—laboratory animal housing unit 2	–	29,000	–
Equip biological sciences unit 2	–	652,200	–
Provide air conditioning for classroom and office unit 2	–	89,400	–
Construct utilities	–	420,000	–
Construct west central campus road improvement and drainage—step 1	–	161,500	–
Construct low energy nuclear research laboratory	–	401,400	–
Working drawings for humanities building	–	98,200	–
Working drawings for physical sciences unit 2	–	124,100	–
Construct and equip veterinary medicine isolation housing for large animal research	–	447,400	–
Construct and equip animal husbandry beet cattle feeding facility	–	161,500	–
Construct vegetable crops controlled temperature storage facilities	–	559,700	–
Construct administration building	–	2,174,100	–
Relocate and construct pomology field headquarters facilities	–	161,500	–
Construct residence hall unit 6	–	627,400	–

DEPARTMENT OF AGRICULTURE

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS

The work of this department is of a regulatory and service nature. It is headquartered in Sacramento and has offices, field crews, advisors, and consultants operating throughout the State. A major portion of the departmental responsibility is accomplished in co-operation with the 56 offices of the county agriculture commissioners and consists of protection of plants and animals from infectious diseases, pest animals, weeds and injurious insects and the prevention of the introduction and spread of crop and livestock pests and diseases.

This budget provides $79,050 for 2 minor construction projects in 1962-63 including the renovation of office and laboratory space in the 1220 N Street Building in Sacramento, and the construction of an addition to the Sacramento Animal Pathology Laboratory on Meadowview Road.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Minor Projects: [b]			
Renovate office and laboratory space in 1220 N Street Building—Sacramento	–	–	$50,000
Construct addition to Sacramento Animal Pathology Laboratory—Meadowview Road, Sacramento	–	–	29,050

POULTRY IMPROVEMENT COMMISSION

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS

This commission provides California's poultry industry with accurate production data on the various types and strains of chickens and turkeys. The work is divided into 2 distinct areas, the chicken project which is located near Modesto and the turkey project which is located near Keyes.

No expenditures are proposed for the 1962-63 fiscal year.

GENERAL ANALYSIS

The 5-year building program of this department is designed to provide facilities which will meet the anticipated population growth and ultimately permit housing of inmates in accordance with the following standards.

For cell buildings—1 bed and 1 prisoner per cell.

For a dormitory—1 bed per 50 square feet.

The 1962-63 major construction program is primarily directed toward an expansion of capacity to meet the needs of an increasing inmate population and to progress toward the goals set forth above. Additional construction to increase rated capacity is proposed, including a 1,200-inmate capacity Conservation Branch in Tuolumne County, a 129-inmate capacity acute psychotic unit at the Medical Facility, Vacaville, and a 72-inmate capacity adjustment center at the Institution for Women, Corona.

Auxiliary buildings are proposed to meet the requirements at the various institutions to handle the increasing inmate population. These facilities include industry warehouses at the Correctional Training Facility, Soledad, and at Deuel Vocational Institution, Tracy, and an inmate activity building at California Institution for Men, Chino. Also included in the major Capital Outlay program are items of equipment for projects previously authorized. These include equipment for the Reception-Guidance Center, Institution for Women; equipment for phase II for the Conservation Center, Susanville; and equipment for the inservice training building at Deuel Vocational Institution, Tracy.

The 1962-63 minor construction program proposes essential projects at the older institutions, as well as projects to correct deficiencies and provide some improvement of the physical plants at all institutions.

---

Conservation Program

The Conservation Center is being constructed on 1,120 acres located in Lassen County, approximately 7 miles east of Susanville. It was authorized by Chapter 1583, Statutes of 1959, and has a projected completion date of June 30, 1962. It is to consist of reinforced concrete and brick to house 1,200 inmates consisting of 600 minimum and 600 medium custody types. The Conservation Center and the future branches are to serve as material and inmate manpower support centers for the conservation camps operated by the Division of Forestry and the Division of Highways.

The Southern Conservation Center Branch at Chino, which will temporarily house nonfelon narcotic addicts in 1961-62 an 1962-63 until the Rehabilitation Center is available, is to b completed in the 1961-62 fiscal year. The Mono-Inyo Conserva tion Camp, with 80 capacity, is planned to open in early 196 Money for the construction of a bridge, access road, and war house is budgeted in the 1961-62 fiscal year for the North Coas Conservation Center Branch.

The Conservation Center Branch at Tuolumne has been pro grammed for a 1,200 inmate capacity and additional funds t reflect this increased capacity are included in the 1962-6 Budget.

STATE BUILDING PROGRAM			
PROPOSED 1962-63 EXPENDITURES [a]			
Construct Conservation Center Branch—Tuolumne County—phase II	–	–	$9,300,700
This project is proposed to provide a branch facility of 1,200 inmate capacity to meet conservation program requirements.			
Equip Conservation Center—Lassen County—phase II	–	–	375,000
This project will provide the balance of the equipment for the Lassen County Center.

Correctional Training Facility

This is a medium security institution with agricultural, industrial, academic, and vocational training programs. It is located on 907 acres of land in the Salinas Valley about 4 miles north of Soledad.

The central facility is of permanent, reinforced concrete construction and was completed in December, 1951, with a rated capacity of 1,547 inmates. The north unit has a rated capacity of 1,224. A temporary barracks-type facility with rated capacity of 272, but an administrative population of 630, operates as a farm unit while 4 camps with a capacity of 320 inmates are administered from the central institution.

Included in this budget is a warehouse for necessary capacity for paper products and raw goods to meet increased demand for production. Minor projects are proposed to increase capacity by 28, to correct deficiencies, and improve the physical plant.

Deuel Vocational Institution

This medium-security institution is located on 783 acres of land in San Joaquin County, 4 miles east of Tracy and 15 miles south of Stockton. It is primarily an academic and vocational training institution for younger offenders with some industrial and farming activities also available.

The institution operates a reception-guidance center, processing Youth Authority wards committed by the criminal courts, and an adjustment center unit handling behavior problem cases in the younger age group.

The institution has a capacity of 1,515, which includes a reception-guidance center with a capacity of 300.

The proposed construction projects include an additional warehouse for the expanding industrial program, equipment for a previously authorized project and minor projects to correct deficiencies and improve the physical plant.

STATE BUILDING PROGRAM

DEPARTMENT OF CORRECTIONS—Continued

State Prison at Folsom

The original construction was completed in 1858 on Folsom State Prison which is located on 1,700 acres of land about 2 miles northeast of the City of Folsom. This is a maximum security prison with emphasis upon industrial and work programs. The total rated capacity is 2,019 inmates excluding camps, which will be transferred to the Conservation Center in the 1962-63 fiscal year. The budget provides for minor construction projects to correct deficiencies and improve the physical plant.

Institution for Men

The institution is located in San Bernardino County about 2 miles south of Chino on 2,435 acres of land. This is primarily a minimum security prison with an extensive agricultural and industrial program. It was opened in 1941 and consists of reinforced concrete permanent main buildings, semi-permanent steel industrial buildings, frame farm buildings, and temporary steel barracks buildings. The institution has a rated permanent-type capacity of 818 with a capacity of 217 in the temporary barracks. The state conservation camps operated from this institution have a capacity of 520. The southern reception-guidance center is located on a 15-acre portion of the Chino site, and is reinforced concrete construction with a capacity of 550 inmates. A 100-man road camp was dropped from the capacity in the 1961-62 year as the road project was completed, and an additional 38 capacity will become available in 1961-62 through the activation of the hospital addition. The Tehachapi branch of this institution has a capacity of 380.

The proposed construction program provides for an inmate activity building to replace the warehouse previously used for this purpose but now assigned to the California Rehabilitation Center branch. Minor projects are proposed to correct deficiencies and improve the physical plant as well as provide 70 more capacity through reuse of the salvaged barracks.

STATE BUILDING PROGRAM

Medical Facility

The Medical Facility is located in Solano County, about 2 miles south of Vacaville, and consists of 903 acres of land, of which approximately 100 acres are used for inmate and employee building areas.

This institution, with a rated capacity of 1,935, includes the central facility with a rated capacity of 1,342 and a reception-guidance center unit with a rated capacity of 593. The central facility provides medical and psychiatric treatment and special custodial care for inmates suffering from mental illness, chronic physical illness, sexual deviation, severe emotional disturbance and tuberculosis. Due to the types of inmates, emphasis is placed on the psychiatric and medical program areas rather than the vocational, academic, industrial and farming programs carried on throughout other institutions in the department. Included in the budget is the construction of a new psychiatric treatment unit with a capacity of 129 for the treatment of acute psychotic inmates. No minor projects are included for 1962-63.

Men's Colony—East Facility

The Men's Colony—East Facility is located at Los Padres, which is 5 miles west of the city of San Luis Obispo and approximately 12 miles east of Morro Bay on the north side of State Highway No. 1. The East Facility of the Men's Colony, completed late in the 1960-61 fiscal year, is a medium security institution with a capacity of 2,400 inmates. No new Capital Outlay projects are proposed for 1962-63.

Men's Colony—West Facility

The Men's Colony is located at Los Padres which is 5 miles west of the City of San Luis Obispo. The West Facility is a minimum security facility utilizing the hospital section of the army installation at Camp San Luis Obispo to provide capacity for 1,350 inmates in barracks-type wooden buildings. The program has been designed especially to handle the older inmates No new projects are proposed for 1962-63.

Rehabilitation Center

The Rehabilitation Center was authorized under Section 6550 of Chapter 12 of the Penal Code. Facilities for 2,300 nonfelon addict inmates are planned to be obtained and activated at an undetermined site by July 1, 1962, with the initial reception and processing commencing on October 1, 1962. It is anticipated that property will become available by the projected activation date. The Rehabilitation Center will contain a reception-guidance center for nonfelon addicts as well as all other auxiliary services. To accommodate the community living concept of the proposed program, the planned physical facilities will provide for 60-man housing units. No new projects are proposed for the 1962-63 fiscal year.

State Prison at San Quentin

This is a close-medium security prison with extensive industrial activities as well as extensive educational and treatment programs. The institution is located on 404 acres adjacent to San Francisco Bay in Marin County about 3 miles southeast of San Rafael. The activation of the Konocti conservation camp in the 1962-63 year will bring the total capacity of San Quentin, including camps, to 3,541 in 1962-63. Minor projects are proposed to correct deficiencies and improve the physical plant.

Institution for Women

This institution is located in San Bernardino County some 7 miles northwest of the City of Corona on 120 acres of ground, 62 of which are within the custodial enclosure.

All women committed to the Department of Corrections are confined in this institution, which must be able to handle all types of security, serve as a reception center, and provide necessary medical attention. The medical program has been stressed, as well as the academic, vocational and industrial program. The funded capacity of the institution is 921 beds.

Included in the budget are funds for the construction of a ne treatment-adjustment center which will increase capacity by ' and provide control and treatment of the most severe behavi problem cases. Also included are funds to equip the previous funded reception-guidance center and for minor projects to i prove the physical plant.

GENERAL ANALYSIS

The Capital Outlay program for the Department of the Youth Authority is planned to meet the capacity requirements resulting from the increasing California juvenile population and the gradual increase in the rate of commitment from the counties. The demand for additional capacity is being alleviated to some extent by a program of encouraging improvements in juvenile law enforcement and probation, increased use of county juvenile homes and camps through maintenance and construction subsidies, and increased use of parole.

Construction of central administrative and service facilities and the first 400-bed institution at the Northern California Youth Center to be located at Stockton is proposed for the 1962-63 fiscal year. The central facilities unit will service three 400-bed institutions and expansion of this unit in the future will eventually provide services for twelve 400-bed institutions over the next 25 years.

Two 50-bed living units to expand capacity and provide replacement of unsafe units are proposed for the Fred C. Nelles School for Boys in 1962-63. In addition, conversion of the old dining room building into 2 chapels and construction of the second phase of a storm drainage disposal system are also proposed for Nelles.

Completion of the major construction of vocational shop and academic facilities is proposed for the Youth Trainin School. This project will provide the last phase of the necessar academic and vocational facilities for the institution's educational program.

One 50-bed living unit, additional classrooms, offices, an partial cost of equipment for the new Ventura School for Girl are proposed in the 1962-63 fiscal year. These projects will provide bed and program capacity necessitated by the increase population.

Replacement of a men's dormitory which has been declare unsafe at the Fricot Ranch School for Boys is proposed fo 1962-63.

Minor construction projects are proposed for all institution with the exception of the Southern California Reception Cente and Clinic, Conservation Camps for Boys, Northern Californi Youth Center, Youth Training School, and Ventura School fo Girls. Minor projects will provide for necessary alterations improvements, and small additions which will improve efficiency.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

Northern California Reception Center and Clinic

This institution is located on a 17-acre site approximately 7 miles east of Sacramento, near Perkins. This facility receives all boys and girls from Northern California. The major purpose is to centralize intake and to make diagnostic studies and training recommendations on each case. Intensive medical, dental, psychological and psychiatric treatment is given. Serious medical and psychiatric cases developing in Northern California institutions are also treated.

The project proposed in 1962-63 is to correct deficiencies and to improve the physical plant.

Youth Authority Conservation Camps for Boys

Four youth conservation camps are in operation in co-operation with the Division of Forestry. The camps are located at Pine Grove in Amador County, Mt. Bullion in Mariposa County, Ben Lomond in Santa Cruz County, and the new Washington Ridge Camp, opened in September 1961, in Nevada County. In addition to the 4 main camps, 3 spike camps are operated as branches of the main camps on a year-round basis. Total capacity of these conservation camps is 360.

No additional camp projects are proposed for the 1962-63 fiscal year.

Fred C. Nelles School for Boys

This institution was constructed at Whittier in 1890. Remodeling and rebuilding of this institution began in the 1959-60 fiscal year. The institution will have, upon completion of the projects funded through the 1962-63 fiscal year, a capacity of 542 plus 37 hospital and detention beds. The projects proposed for 1962-63 fiscal year provide facilities for increased population, equipment for previously funded projects, a remodeling project to provide 2 chapels and minor items to correct deficiencies and improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Equip 1 50-boy living unit	–	–	$13,000
This will provide equipment for a previously funded living unit.			
Convert kitchen-dining room into chapels	–	–	137,200
This project will remodel the old kitchen-dining room building into 2 chapels.			
Equip 2 chapels	–	–	26,100
Construct storm water drainage system—phase II	–	–	60,000
This is the final phase of a project to alleviate a serious storm water disposal problem.			
Construct 2 50-boy living units	–	–	499,900
This project will replace 2 old unsafe living units and increase capacity.			
Minor Projects: [b]			
Demolish 2 unsafe living units	–	–	12,500
Convert bakery area in old kitchen into barber shop, hold room, and psychiatric treatment activity room	–	–	50,000
Install lawn irrigation system—phase II	–	–	20,000
Install security lighting at perimeter fence	–	–	33,200
Construct perimeter road	–	–	30,100

Northern California Youth Center

The Northern California Youth Center to be located in Northern California is the first of 2 such centers planned for California. With the possible exception of additions to the northern reception center, all of the department's capacity requirements for Northern California in the next 20-25 years will be provided here. It is anticipated that 12 400-bed institutions served by 1 central administrative and business services unit will be constructed on a large site near Stockton in San Joaquin County. While each institution's treatment program will be complete and self-contained, the overall supervision, business services, maintenance, feeding, hospital care, and communications will be provided by the central unit. Thus the operational economies of a large institution are expected with the program benefits of small units.

The 1962-63 program provides for the central service facilities and the first 400-bed institution of the Youth Center.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Construct central administrative and service facilities This project will provide for the initial core facilities to serve satellite institutions.	–	–	$1,602,000
Equip central administrative and service facilities (partial)	–	–	10,000
Construct first 400-bed institution This will provide for the initial institution to be constructed at the Youth Center.	–	–	5,048,000

Paso Robles School for Boys

The Paso Robles School for Boys is located near Paso Robles in San Luis Obispo County. The school site covers 203 acres and the institution occupies an area of approximately 40 acres. The facilities have a capacity of 455 beds plus hospital and detention capacity of 39. All buildings are of single-story reinforced brick construction with radiant heating. Each cottage houses 50 boys and contains single rooms and a dormitory.

The projects proposed in 1962-63 are to correct deficiencies and to improve the physical plant.

Youth Training School

The Youth Training School is located on the site of the Institution for Men, Chino. Capacity for 1,200 wards in the 18-21 age group plus 72 hospital and detention beds will be completed and occupied during the 1961-62 fiscal year. The major program at this institution is vocational education. The additional shops and classroom provided in the 1962-63 fiscal year will complete the construction of the educational unit for the present program.

Ventura School for Girls

The Ventura School for Girls will move to a new institution, located in Ventura County, in April 1962. The new 400-bed institution replaces a temporary institution built in 1916. One 50-bed living unit to provide additional capacity along with necessary educational and office facilities is proposed in this budget. Equipment for the new institution is also included for the 1962-63 fiscal year.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Equip new school (partial cost) This project will provide for the final items of equipment necessary to complete the furnishing of the first units of the new institution.	–	–	$35,000
Construct one 50-bed living unit This project will provide for additional living unit capacity, needed for this institution.	–	–	414,900
Construct additional classrooms and offices This project will provide for the necessary academic classrooms, home economics laboratories, and other offices necessary for the planned capacity of this institution.	–	–	103,300

GENERAL ANALYSIS

The Department of Education administers 3 production centers for the blind, an orientation center for the adult blind, and 5 special schools for physically handicapped children including 1 for the education of the blind, 2 for the education and diagnosis of the cerebral palsied, and 2 for the education of the deaf.

Two major projects are currently funded for construction. The School for Cerebral Palsied Children, Southern California, now occupies rented quarters in Altadena, and will be moved to new facilities adjacent to Los Angeles State College in time for the beginning of school in September 1963.

The Orientation Center for the Blind now in State-owned facilities in Oakland will be relocated in new facilities to be constructed in Albany by April 1963. Leased facilities will be required from September 1962 to the completion date as the Division of Highways needs possession of the Oakland site for freeway purposes.

Persons Served in Facilities for the Physically Handicapped

Los Angeles Center, Industries for the Blind

This center provides sheltered employment to blind and other physically handicapped persons in the Los Angeles area to enable them to contribute to their own support. The 1962-63 Capital Outlay program proposes a minor project for the renovation of an elevator.

Orientation Center for the Blind

This school, located in Oakland, trains newly blinded adults to overcome their handicap and to resume as normal a life as possible. Present facility has to be vacated by September 1, 1962, due to freeway construction through the site. Lease facilities will be used until the completion of the facilities in April 1963.

UNIVERSITY OF CALIFORNIA

The University of California is a statewide institution of higher learning operating on 7 major campuses and on a number of experiment stations. Major campuses include Berkeley, San Francisco, and Davis in Northern California, and Los Angeles, Riverside, San Diego (La Jolla), and Santa Barbara in Southern California. New campuses are planned for Santa Cruz, Irvine in Orange County, and San Diego.

The 1962-63 Capital Outlay program totals $54,307,000 from state funds. Included is $282,300 for an addition to the Hastings College of Law building which is owned by the University. A summary of proposed expenditures by campus is, as follows:

Campus:	*Major*	*Minor*	*Total*
Berkeley	$4,434,700	$484,100	$4,918,800
Davis	6,351,400	257,500	6,608,900
Irvine	1,502,500	–	1,502,500
Los Angeles	7,370,400	195,700	7,566,100
Los Angeles—Medical	12,077,600	141,000	12,218,600
Riverside	$4,218,100	$294,200	$4,512,300
San Diego	3,491,300	125,000	3,616,300
San Francisco	4,310,400	169,900	4,480,300
Santa Barbara	6,418,600	130,300	6,548,900
Santa Cruz	500,000	–	500,000
Statewide	1,350,000	202,000	1,552,000
Hastings	282,300	–	282,300
Totals	$52,307,300	$1,999,700	$54,307,000

Projects requested will provide for the following:

Classrooms and facilities for operation of such classrooms, which are required to accommodate student enrollment at time of completion of the projects; research facilities related to the teaching staff and postgraduate students; and auxiliary facilities required for the operation of campuses.

Enrollment projections upon which this budget is based, are as follows:

SUMMARY OF FULL-TIME EQUIVALENT STUDENTS[f]

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
BERKELEY CAMPUS			
Equip education-psychology building	–	–	$300,000
To complete funding of equipment for the education-psychology building. Construction was funded in the Budget Act of 1958. A first increment of equipment was funded in the Budget Act of 1961.			
Equip alterations to Hearst Mining Building	–	–	220,000
To equip alterations to Hearst Mining Building funded in the Budget Act of 1961.			
Equip chemistry unit 1	–	–	570,000
To complete funding of equipment for the chemistry unit 1. Construction was funded in the Budget Act of 1958 and 1960. Favorable construction bids permitted a first increment of equipment funds to be reserved out of previously appropriated construction funds.			
Equip alterations to life sciences building	–	–	50,000
To equip alterations to life sciences building funded in the Budget Act of 1961.			
Land acquisition—Anna Head School property	–	–	200,000
To provide the second payment on the purchase of the 1.9 acre Anna Head School property. Four hundred thousand dollars has already been paid against the cost of $675,000. The final payment of $75,000 is scheduled for 1963-64.			
Construct alterations to Stephens Union, step 1	–	–	566,500
To prepare working drawings for, construct and equip the first step of alterations to Stephens Union to convert for the social sciences the space vacated by student association activities by their move to the new student center buildings.			
Construct and equip alterations to LeConte Hall	–	–	139,400
To provide matching funds for non-state funds to prepare working drawings for, construct, and equip alterations to room 310 LeConte Hall to provide a mezzanine and convert the new and old space into research laboratories and offices.			

---

[a] From State Construction Program Fund unless otherwise indicated.

[f] Excluding Physical Education and Military Science.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
BERKELEY CAMPUS—Continued			
Construct utility improvements on campus	–	–	$552,000
To prepare working drawings for and construct utility improvements required by campus expansion; work includes installation of new steam generating unit improvements and extensions to campus utility systems.			
Construct utility improvements at Gill Tract	–	–	75,000
To prepare working drawings for and install additional capacity in and extensions of steam and electrical systems.			
Construct and equip physical sciences lecture hall	–	–	647,500
To construct and equip a 550-seat demonstration-lecture hall with ancillary facilities (including television) for classes in the physical sciences.			
Construct and equip facilities and improvements at the Richmond Field Station	–	–	334,300
To prepare working drawings for, construct and equip various facilities and improvements at the Richmond Field Station; work includes additions to the Institute of Traffic and Transportation Engineering building and the Soil Mechanics and Bituminous Materials Laboratory, and improvements to building 450 and to utility systems.			
Construct and equip alterations to Gilman Hall	–	–	266,000
To prepare working drawings for, construct, and equip alterations to Gilman Hall (1) to convert for chemical engineering the space to be vacated by chemistry in its move to the new chemistry unit 1 and (2) to make the building as a whole more effectively usable for teaching and research in chemical engineering.			
Construct general campus improvements	–	–	74,000
To prepare working drawings for and construct general campus improvements; work includes pedestrian bridges across Strawberry Creek and site development.			
Site clearance for chemistry unit 2	–	–	40,000
Carry out demolition to clear site for a building with laboratories, offices, and special service and supporting facilities for research and teaching in chemistry.			
Land acquisition—Newman Hall property	–	–	400,000
To purchase the Newman Hall site and buildings for temporary use by institutes, bureaus and other research activities, or parts of academic departments. The site will ultimately serve an integral part of the residence halls-parking-recreational development north of the campus.			
Minor Projects:[b]			
Life sciences building—alter Room 1560 to provide specialized teaching laboratory for department of zoology	–	–	45,400
Harmon Gymnasium—alter Rooms 111 and 175 to provide 2 faculty offices, seminar room, faculty research laboratory, and workshop for department of physical education	–	–	15,500
Alter space in Cowell Annex, Dwinelle Annex and South Hall Annex to provide faculty offices	–	–	40,000
Life sciences building—alter laboratory Rooms 3525 and 3551 to provide for 4 additional graduate students by installing sinks, benches, cabinets, utilities and fume hoods	–	–	19,500
Kroeber Hall—provide furniture and exhibit equipment to complete Lowie Museum of Anthropology	–	–	21,600
Forest products laboratory—install automatic sprinkler system in sawmill shed to eliminate fire hazard to main forest products laboratory building	–	–	6,000
Install back-siphoning-prevention devices on various buildings to protect against possible contamination of domestic water system	–	–	21,000
Hesse Hall—provide sound insulation in rooms 30 and 130 for student-preparation lectures and laboratory computations for department of engineering	–	–	15,000
Gill tract—construct two hot frames for tree seedling research for department of forestry	–	–	10,000
Life sciences building—rehabilitate room 5093 and add mezzanine for department of zoology	–	–	50,000
Heating plant—modify heating plant by installation of enlarged fuel oil pump and heating equipment and recording meters	–	–	27,300
Cory Hall—provide wooden deck over north half of roof for research on a radiometer and broad-bend antennas for department of engineering	–	–	8,800

---

[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
BERKELEY CAMPUS—Continued			
Minor Projects—Continued			
Kroeber Hall—provide a laboratory in undeveloped basement area by installing benches, sinks, utilities and fume hood for department of anthropology	–	–	$21,000
Forest products laboratory—provide wet-storage tank for research on logs and other wood materials	–	–	8,500
Improve lighting in several older permanent campus buildings	–	–	25,000
Gill tract—construct two cold storage rooms in east end of insectary and modify air circulation system to control organisms for department of biological control	–	–	17,000
Doe Library—install fire detection system above book stacks in main library	–	–	12,700
Gill tract—remodel greenhouse No. 5 for department of plant pathology	–	–	23,000
Oxford tract—construct 324 tables for new greenhouses for department of soils and plant nutrition	–	–	17,000
Life sciences building—construct constant temperature facilities in room 1595 for department of physiology	–	–	6,900
Wheeler Hall—improve ventilation system in auditorium to prevent reverse flow of air	–	–	10,000
Install telephone ducts in various campus areas to accommodate extended and enlarged cabling system	–	–	27,000
Install sanitary sewer line to Strawberry Canyon area	–	–	10,800
Extend utility line to site of student office building	–	–	25,100
DAVIS CAMPUS			
Equip physical sciences unit 1	–	–	244,000
To provide ventilation of interior spaces in classroom and office building unit 2 funded in the Budget Acts of 1960 and 1961, based on present restrictive criteria.			
To complete the funding of equipment for the physical sciences unit 1. Construction was funded in the Budget Act of 1959. The first increment of equipment was funded in the Budget Act of 1961.			
Equip veterinary medicine-laboratory animal housing unit 2	–	–	29,000
To equip the veterinary medicine-laboratory animal housing facilities funded in the Budget Act of 1961.			
Equip biological sciences unit 2	–	–	652,200
To equip the biological sciences building funded in the Budget Act of 1960.			
Provide air conditioning for classroom and office unit 2	–	–	89,400
To provide air conditioning for the classroom and office building funded in the Budget Acts of 1960 and 1961.			
Construct utilities	–	–	420,000
To prepare working drawings for and construct utility improvements and extensions required by campus expansion.			
Construct west central campus road improvement and drainage—step 1	–	–	161,500
To prepare working drawings for and construct extensions of west central campus road and storm drains to serve married student housing development and plant growth research center.			
Construct low energy nuclear research laboratory	–	–	401,400
To provide matching funds for nonstate funds to construct a low energy nuclear research laboratory to house a 60-inch cyclotron and related service, laboratory and office facilities for research and teaching in physics and related subjects. The cyclotron is to be moved from the Berkeley campus.			
Working drawings for humanities buildings	–	–	98,200
To prepare working drawings for a complex of buildings with laboratories and supporting service facilities, offices, classrooms and a little theater facility for teaching and research in art, dramatic art, speech, and music.			
Working drawings for physical sciences unit 2	–	–	124,100
To prepare working drawings for a building with laboratories and supporting service facilities, offices, classrooms, and a branch library for teaching and research in chemistry.			
Construct and equip veterinary medicine isolation housing for large animal research	–	–	447,400
To provide matching funds for nonstate funds to prepare working drawings for, construct, and equip facilities for housing large animals under conditions of isolation and controlled environment for research on communicable diseases of domestic animals.			
Construct and equip animal husbandry beef cattle feeding facility	–	–	161,500
To prepare working drawings for, construct, and equip field facilities for research and teaching in nutrition of beef cattle.			

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
DAVIS CAMPUS—Continued			
Construct vegetable crops controlled temperature storage facilities	–	–	$559,700
To prepare working drawings for and construct constant temperature units and supporting laboratory, service, and office facilities for physiological and biochemical studies related to problems of handling, transporting, storing, and marketing both fresh and processed vegetables.			
Construct administration building	–	–	2,174,100
To prepare working drawings for and construct a building with offices and supporting service facilities for campus administrative departments.			
Relocate and construct pomology field headquarters facilities	–	–	161,500
To prepare working drawings for and construct a relocated pomology field headquarters facility in order to clear the site of the existing headquarters facilities for construction of residence hall unit 6.			
Construct residence hall unit 6	–	–	627,400
To provide one-third of funds needed to prepare working drawings for and construct a residence hall for 400 students; the remaining need will be met by loan funds.			
Minor Projects:[b]			
Home economics building—convert classroom and service room to chemical laboratory, fadeometer room and constant temperature room for teaching and research in textiles	–	–	30,000
Veterinary medicine—construct feed storage and milling facilities, disposal facility, and sheep barn on Armstrong tract land areas	–	–	40,000
Construct outdoor wall for teaching of mural art courses for department of art	–	–	3,000
Construct industrial-type building for housing farm machinery and convert released space in Walker Engineering Building for teaching of department of engineering	–	–	30,000
Construct building to house laboratory animals for departments of bacteriology and plant pathology	–	–	49,000
Enology building—construct screened addition to house grape crushing press of department of viticulture	–	–	13,500
Physics cyclotron building—construct annex to cyclotron building to house radioactive magnets and provide a chemical laboratory to prepare target materials	–	–	8,000
Hunt Hall—alter and improve rooms 107, 110 and 112 by installing fume hoods, distilled water outlets and cabinets for department of agronomy's graduate student teaching laboratories	–	–	15,000
Old horticulture building—rehabilitate substandard laboratories and other facilities to permit more effective use for teaching and research of department of zoology	–	–	50,000
Install irrigation sprinkler system in main quadrangle area and extend system to new lecture hall and student center-cafeteria building	–	–	19,000
IRVINE CAMPUS			
Construct utilities and site development	–	–	1,008,000
To prepare working drawings for and construct basic site improvements and utility systems for the new campus area.			
Working plans for academic buildings—step 1	–	–	494,500
To prepare working drawings for the first increment of buildings to include (1) offices, classrooms, laboratories, and supporting service facilities for teaching and research in the natural sciences, social sciences, and humanities, (2) facilities for library, physical education, administration, and food service, and (3) a dormitory.			
LOS ANGELES CAMPUS			
Equip theater arts unit I	–	–	185,600
To equip the theater arts unit 1 funded in the Budget Act of 1958.			
Equip addition to chemistry-geology building	–	–	400,000
To provide a first increment of equipment for the addition to the chemistry-geology building funded in the Budget Act of 1960.			
Construct west campus utilities and site development	–	–	480,000
To provide working drawings for and construct utility extensions to the site of funded resident hall units 3 and 4 and site improvements related to these units.			

---

[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
LOS ANGELES CAMPUS—Continued			
Construct steam plant expansion	–	–	$625,300
To prepare working drawings for, construct, and equip an addition to the campus steam plant building with additional steam generating capacity.			
Construct extension of utilities, roads, and walks to north campus—step 3	–	–	528,900
To prepare working drawings for and construct step 3 of (1) utility tunnel and utility line extensions and interconnections to serve the north campus area, and (2) minimum development of roads and walks in the same area.			
Construct art unit 2	–	–	3,329,600
To construct a building with laboratories, studios, and supporting service facilities, classrooms, offices, and instructional exhibition and branch library facilities for teaching and research in art.			
Construct university activities memorial center	–	–	1,821,000
To provide matching funds for nonstate funds to construct a multipurpose building with gymnasium and related facilities for the physical education, and intramural and intercollegiate athletic programs, and for meetings and other campus activities with large attendance.			
Minor Projects: [b]			
Engineering building—alter rooms 3286 and 3292 by installation of acoustical tile, special flooring, increased air conditioning for installation of IBM 7090 computer	–	–	43,000
Law building—alter rooms 376 and 376-B for use as faculty offices and seminar room	–	–	20,000
Building E—install desmogification equipment on ornamental horticulture greenhouses to prevent smog and heat damage to experimental plants	–	–	20,000
Life sciences building—construct exhaust system for exhausting live steam from 11 rooms equipped with autoclaves, glassware washers and sterilizers to eliminate damage to paint, plaster and pipes	–	–	8,600
University elementary school—alter and improve heating system for control of temperature in rooms 1245 and 1256	–	–	7,700
Home economics buildings—convert room 3221 into a research laboratory by installing a chemical hood, work bench and utilities for the Department of Public Health	–	–	4,900
Life sciences building—alter rooms 5318, 5318-A, 5322, 5326 and 5328 for storeroom and cleaning purposes by removing section of wall, extending pipette cleaning area and installing large glassware washing machine and sink for Department of Bacteriology	–	–	25,000
Install aisle lights in Royce Hall auditorium and in Schoenberg Hall to eliminate public safety hazard	–	–	6,000
Royce Hall—convert classroom 170 to a 30-station language laboratory for Department of Spanish and Portuguese	–	–	49,500
Home economics building—provide water still and system for research areas on second floor of building for Department of Public Health	–	–	11,000
LOS ANGELES MEDICAL CENTER			
Construct basic sciences unit 2A	–	–	11,373,400
To construct an addition to the medical school unit 1 building with classrooms, teaching and research laboratories, related service facilities, offices, and various supporting facilities, including vivarium and library, to provide the basic science facilites needed to permit an increase in medical class size from 72 to 128 and corollary increases in academic graduate students and post-doctoral fellows and trainees, and to provide various supporting facilities for the new school of dentistry.			
Construct west medical campus utilities and site development—step 2	–	–	466,600
To prepare working drawings for and construct utility extensions and improvements and site development on the west medical campus.			
Working drawings for school of dentistry unit and expansion of student Health Service Facilities	–	–	237,600
To prepare working drawings for an addition to the medical center structure with teaching and research laboratories, outpatient clinics, supporting service facilities, and offices for the new school of dentistry. At ground floor, addition will provide expansion of Student Health facilities.			

---

[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
LOS ANGELES MEDICAL CENTER—Continued			
Minor Projects:[b]			
Medical center vivarium—modify tile base and walls in animal rooms to protect against deposits of infectious materials and vermin	–	–	$47,000
U. C. Hospital—improve lighting in all patient rooms	–	–	49,000
Medical center vivarium—modify research areas in Brain Research Institute by correcting deficiencies in partitions, utility services, and by installing acid-resistant floor and wall finish in animal rooms	–	–	45,000
RIVERSIDE CAMPUS			
Equip humanities building	–	–	350,000
To equip humanities building funded in the Budget Act of 1961.			
Construct boiler addition	–	–	182,000
To prepare working plans for and construct an additional boiler in the existing steam plant building to provide for projected increases in steam demand resulting from campus expansion.			
Construct electrical improvements—citrus experiment station area	–	–	96,100
To prepare working drawings for and construct extensions of electrical ducts and cables and a new substation to increase electrical service to the citrus experiment station area facilities.			
Construct and equip Custodial and Grounds Department headquarters	–	–	170,000
To prepare working drawings for, construct, and equip a building to provide facilities for campus custodial and grounds personnel. Present location of this personnel is within steam plant, which space is now required for expansion of services.			
Construct physical sciences unit 3	–	–	2,601,000
To prepare working drawings for and construct a building with laboratory, specialized equipment, service and shop, office, computer, and demonstration-lecture facilities for teaching and research in physics.			
Construct site development	–	–	115,000
To prepare working drawings for and construct general campus site improvements.			
Construct agrichemicals and produce quality laboratory and environmental pollution laboratory	–	–	323,000
To provide matching funds for nonstate funds to prepare working drawings for and construct a project combining (1) an agrichemicals and produce quality laboratory including preparation, inspection, processing, packing and controlled temperature storage facilities and research laboratories; and (2) an environmental pollution laboratory including laboratories, specialized experimental facilities, office, and a shop.			
Construct improvements to citrus experiment station irrigation, runoff, and salvage systems	–	–	323,000
To provide working drawings for and construct improvements to the citrus experiment station irrigation, runoff, and water salvage systems.			
Construct and equip purchasing department facility	–	–	58,000
To prepare working drawings for, construct and equip an addition to the receiving and storehouse building with offices for the purchasing department.			
Minor Projects:[b]			
Library building—alter building by enclosing existing entrance and converting office area and workroom to student study room	–	–	50,000
Social sciences-humanities building—alter vacated areas to serve laboratory and other needs of departments of anthropology, geography, and education	–	–	50,000
Entomology building—convert second-floor open-deck area to 40-station biological-control teaching laboratory	–	–	50,000
Physical sciences building—double capacity of lockers in rooms 2226, 2223 and 2265 by constructing partitions	–	–	3,200
Life sciences building—provide electrical service and wiring to 300-station classroom for television installation	–	–	20,000
Alter and improve glasshouses and headhouses 1 to 5 by installing electrical controls, wiring, 6 temperature control tanks, auxiliary deionizer unit and construction of soil storage bins	–	–	35,000

---

[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
RIVERSIDE CAMPUS—Continued			
Minor Projects—Continued			
Life sciences building—alter room 2121 by providing structural changes to benches and by adding cabinets and drawers to increase laboratory student capacity from one section to four sections	–	–	$6,000
Construct concrete pads in asphalt highway to accommodate crossings of heavy duty farm machinery from corporation yard to experimental agricultural growing fields	–	–	6,000
Life sciences building—construct an observation room and 6 concrete bin cages for reptiles and other animals for use of various departments in building	–	–	10,000
Webber Hall—convert Rooms 2101, 2314, and 2338 to chemical laboratory-offices	–	–	43,000
Webber Hall—install 3 cold storage boxes for department of vegetable crops	–	–	15,000
Physical sciences building—alter stockroom to provide 2 offices for new staff members	–	–	6,000
SAN DIEGO CAMPUS			
Equip building B—school of science and engineering	–	–	475,300
To provide an additional increment of equipment for school of science and engineering building B funded in the Budget Acts of 1960 and 1961.			
Equip building C—school of science and engineering	–	–	500,000
To provide a first increment of equipment for school of science and engineering building C funded in the Budget Act of 1961.			
Construct utilities and site development—school of science and engineering	–	–	107,400
To construct utility extensions and site improvements related to school of science and engineering building D.			
Construct building D—school of science and engineering	–	–	1,842,400
To provide matching funds for nonstate funds to construct a building with classrooms, laboratories, specialized equipment and service facilities, and offices, which will complete provision for the first-stage academic program of the school of science and engineering for 455 graduate students and 80 faculty.			
Construct and equip institute of geophysics and planetary physics building—school of science and engineering	–	–	468,000
To provide matching funds for nonstate funds to construct and equip a building with laboratory, office, library, shop, and service facilities for the institute of geophysics and planetary physics for basic research in the earth sciences.			
Working drawings for building E	–	–	98,200
To prepare working drawings for a building with a library and with classrooms and offices to accommodate the initial undergraduate enrollments and faculty in the social sciences and humanities.			
Minor Projects: [b]			
Scripps library building—complete remodeling of building by installing elevator, stairs and exits; constructing new mezzanine; and altering ground floor	–	–	50,000
Construct storage building for scientific equipment	–	–	50,000
Provide alternate electrical supply system for Scripps campus and increase electrical service capacity to corporation yard and pier	–	–	10,000
Ritter Hall—rehabilitate substandard laboratories by rewiring and installing chemical hoods and benches	–	–	15,000
SAN FRANCISCO MEDICAL CENTER			
Construct addition to clinics building	–	–	3,923,700
To construct an addition to the clinics building with outpatient clinics and laboratories and supporting service facilities, classrooms, and offices to accommodate increased undergraduate classes in medicine and dentistry, and to provide for the expanded activities of various other hospital, clinical, and medical center administrative and service departments.			
Construct and equip storehouse relocation to Richmond service and storage facility	–	–	63,300
To prepare working drawings for, construct, and equip alterations to and improvements of areas of the Richmond service and storage facility to accommodate principal storehouse operations of the San Francisco campus.			

---

[b] Minor projects from General Fund unless otherwise indicated.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
SAN FRANCISCO MEDICAL CENTER—Continued			
Land acquisition	–	–	$250,000
To provide an initial increment of funds for orderly acquisition of sites required by projects scheduled in the University's 1962-67 Capital Outlay program.			
Carry out demolition and site clearance for additional campus research facilities	–	–	73,400
To prepare working drawings for and carry out demolition and site clearance for additional campus research facilities funded from non-state sources.			
Minor Projects: [b]			
Department of pediatrics—provide laboratories in former dormitory for research in virus diseases of children	–	–	27,500
Provide slide control measures on cross-campus road	–	–	10,400
Alter dental casting laboratory room 637-C to provide for increased student enrollment by installing new benches, acid hoods, and sinks	–	–	8,200
Relocate telephone switchboard and equipment rooms from Moffitt Hospital and the medical sciences building to Millberry Union and convert vacated space to lobby area and television control center	–	–	29,000
Alter space in TOB-4 to provide experimental surgery laboratories for 4 new staff	–	–	24,300
Moffitt Hospital—alter emergency patient-receiving area to provide nurse's office, treatment room, patient interview room and expand waiting room facilities	–	–	32,500
Moffitt Hospital—design and construct corrosion-resisting air-filter banks to eliminate excessive maintenance costs	–	–	38,000
SANTA BARBARA CAMPUS			
Equip classroom and office unit 2—step 2—classroom unit	–	–	104,000
To equip classroom unit of classroom and office unit 2—step 2 funded in the Budget Act of 1961.			
Equip central laboratory for radioactive materials	–	–	255,000
To equip central laboratory for radioactive materials funded in the Budget Act of 1961.			
Land acquisition	–	–	516,100
To provide the second payment on the purchase of a 111-acre site for general campus expansion. Five hundred ninety-six thousand seven hundred dollars was funded in the Budget Act of 1961 against the total cost of $1,588,800, and a third and final payment will be required in 1963-64.			
Construct speech and drama building	–	–	1,944,200
To prepare working drawings for and construct a building with classrooms, offices, specialized teaching laboratories, and a little theater complex for teaching and research in speech and drama.			
Construct psychology building	–	–	1,641,400
To prepare working drawings for and construct a building with general assignment classrooms, offices, and specialized laboratory and service facilities for teaching and research in psychology.			
Working drawings for marine biology laboratory	–	–	21,300
To prepare working drawings for a building with specialized sea-water laboratories, and supporting and service facilities for teaching and research in the marine sciences.			
Construct administration building	–	–	1,936,600
To prepare working drawings for and construct a building with offices and supporting service facilities for campus administrative departments.			
Minor Projects: [b]			
Physical education—prepare site for and construct two tennis courts and bangboards, and expand irrigation system in turfed game areas	–	–	50,000
Building 528—alter phonetics laboratories to provide 24 additional listening booths, and improve 20 existing booths for instruction of foreign languages	–	–	38,000

---

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
SANTA BARBARA CAMPUS—Continued			
Minor Projects—Continued			
Student health service—convert wing of temporary building 478 for outpatient department to accommodate increased enrollments	–	–	$25,200
Arts building—convert unfinished storage area to locker room, and use present locker room for a seminar room; provide for improvements to 115 station visual aids classroom by a raised platform seating area in rear portion	–	–	9,500
Construct two aviaries for student instruction and staff research for departments of zoology and biology	–	–	7,600
SANTA CRUZ CAMPUS			
Construct initial improvements	–	–	500,000
To prepare working drawings for initial campus improvements and to grade, improve the site, and install roads and utilities.			
STATEWIDE			
General planning studies, preliminary plans and programming	–	–	600,000
To provide for (1) the preparation of preliminary plans for projects to be proposed for funding of working drawings in 1963-64, (2) programming of projects to be proposed for funding for preliminary plans in 1963-64, and (3) general planning not related to specific projects.			
Construct and equip San Joaquin Valley westside field station development—step 2	–	–	250,000
To prepare working drawings for, construct, and equip the second step of station improvements, including site, irrigation, and utility improvements, personnel housing, and storage facilities.			
Provide television facilities and equipment	–	–	200,000
To purchase and install equipment, distribution systems, and studio facilities for instructional television on several campuses.			
Acquisition of books for new campuses	–	–	300,000
To acquire books for library collection for three new campuses—step 1.			
Construct and equip addition to Hastings College of Law building—step 1	–	–	282,300
To prepare working drawings for, construct, and equip an addition to and alterations to the Hastings College of Law building to provide additional faculty offices and library stacks, seating and work areas.			
Minor Projects:[b]			
Imperial Valley Field Station—alter existing laboratory to provide additional research stations and chemical fume hood	–	–	18,000
Antelope Valley Field Station—provide addition to existing personnel housing	–	–	6,000
South Coast Field Station—construct irrigation sprinkler system for avocado experiment plots	–	–	16,000
Hopland Field Station—construct bridge and crossing over creek for all-weather access to all parts of field station	–	–	24,000
Sierra Foothill Range Field Station—develop ranch by constructing fences, water storage facilities, firebreaks, roads, and by clearing brush and trees	–	–	50,000
Imperial Valley Field Station—provide surfacing for ranch roads to make passable in winter	–	–	5,500
Mt. Hamilton:			
Provide dome for 24-inch photometric telescope	–	–	15,000
Construct and install 5-mirror coude system for 120-inch telescope	–	–	30,000
Fire protection program—install sprinkler system in administration and shop buildings; install booster pumps, and increase size of laterals to hydrants	–	–	37,500
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES[c]			
STATEWIDE			
Preliminary Plans:			
State Construction Program Fund	–	$127,200	–
General Fund	$1,122,100	–	–
Residence halls	–	3,000,000	–
New campuses—campus planning and development *General Fund*	3,000,000	–	–

---

[b] Minor projects from General Fund unless otherwise indicated.

[c] Unless otherwise indicated major projects from General Fund in 1960-61 and from State Construction Program Fund in 1961-6 minor projects from General Fund in both years.

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES—Continued			
STATEWIDE—Continued			
Acquire, remodel and equip California Farm Bureau Federation Building, Berkeley, for University extension administration	$480.954	–	–
General Fund			
Alter and equip Ford plant in Richmond for off-campus storage building	375,000	–	–
General Fund			
Mt. Hamilton:			
Construct and equip staff apartment building	89,475	–	–
General Fund			
Auxiliary equipment for 120-inch telescope, step 3	73,920	–	–
General Fund			
Minor Projects:			
Imperial Valley Field Station—improve surface drainage system	–	$48,500	–
Hopland Field Station—construct supply building, glasshouse and potting shed	–	32,500	–
Imperial Valley Field Station—construct feed preparation building, glasshouse, lathhouse and potting shed	–	28,000	–
South Coast Field Station—for undeveloped 80 acres, level and install irrigation system	48,000	–	–
Hopland Field Station—construct sheep barn, hay storage shed, and feeder shed	35,000	–	–
Tulelake Field Station—provide electrical improvements	4,500	–	–
Mt. Hamilton:			
Provide 24-inch photometric telescope	–	20,000	–
Rehabilitate and modify 36-inch telescope	–	22,300	–
Make a topographic and utility map of Mt. Hamilton	–	9,800	–
Provide recording microphotometer	40,000	–	–
BERKELEY CAMPUS			
Equip education-psychology building	–	457,400	–
Construct and Equip Agricultural Greenhouses:			
State Construction Program Fund	–	49,500	–
General Fund	755,500	–	–
Construct environmental design building	–	5,612,900	–
Construct photosynthesis laboratory	–	387,200	–
Construct and equip sanitary engineering building	–	220,900	–
Construct and Equip Alterations to Haviland Hall:			
State Construction Program Fund	–	326,700	–
General Fund	21,000	–	–
Construct Alterations to Hearst Mining Building:			
State Construction Program Fund	–	570.200	–
General Fund	21,500	–	–
Construct alterations to life sciences building	–	593,100	–
Construct alterations to home economics building	–	202,300	–
Working drawings for physical sciences lecture hall	–	21,900	–
Construct biochemistry building	–	2,631,700	–
Construct utilities	–	365,100	–
Working drawings for chemistry unit 2	–	186,500	–
Land Acquisition:			
State Construction Program Fund	–	680.000	–
General Fund	242.000	–	–
Equip earth sciences building	533,713	–	–
General Fund			
Construct chemistry unit 1 (additional cost)	1,981,000	–	–
General Fund			
Construct utilities	352,500	–	–
General Fund			
Construct engineering unit 1	5,000,000	–	–
General Fund			
Construct LeConte Annex	3,383,470	–	–
General Fund			
Alter and equip 3d floor of Mulford Hall (completion)	154,403	–	–
General Fund			
Acquire Stephen Union and Eshleman Hall	1,620,000	–	–
General Fund			
Minor Projects:			
Building T-6—alter building to provide space for student and alumni placement center	–	12,000	–
Campbell Hall—install second elevator car in existing shaft	–	36,000	–
Optometry building—alter room 121 for use as a contact lens clinic	–	4,700	–

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES—Continued			
BERKELEY CAMPUS—Continued			
Minor Projects—Continued			
Life sciences building—alter rooms 2051 and 2059 to provide graduate instruction and research facilities for department of botany	–	$16,300	–
Environmental design—70 Rincon Drive—construct headhouse and fence for department of landscape architecture	–	23,900	–
Life sciences building—alter room 5559 to provide 4 faculty offices for department of bacteriology	–	13,100	–
Engineering building—alter rooms 407, 409, 410, 412 and 416 for use as civil engineering design instruction facilities	–	23,700	–
Strawberry Canyon storm damage prevention, step 2	–	50,000	–
2227 College Avenue—rehabilitate building for faculty office use	–	21,000	–
Mulford Hall—expansion of laboratory equipment and facilities in Room 26 to provide for 15 additional students	–	28,500	–
Life sciences building—rehabilitate animal Room 5507 and add mezzanine for department of physiology	–	50,000	–
Lewis Hall—improve ventilation in basement rooms	–	16,600	–
Life sciences building and Wheeler Hall—improve lighting and public address system in large classrooms	–	14,500	–
Forest products laboratory—construct sawmill shed and convert shop area to laboratories and offices	–	50,000	–
Morrison Hall—complete library bookstacks for department of music	–	6,900	–
Cowell Hospital—complete replacement of steam lines	–	22,000	–
Kleeburger Field—install lighting for intramural activities for department of physical education	–	26,500	–
Harmon Gymnasium—alter Room 18 to consolidate storage and equipment issue facilities, and to release issue room for use as laboratory	$6,000	–	–
Forest products laboratory—provide improvements to controlled environment room	21,000	–	–
Forest products laboratory—construct water cooling tower	8,800	–	–
Doe Library—install instructional exhibit facilities in wide corridors of third floor for department of art	6,000	–	–
Life sciences building—rehabilitate Rooms 2556 and 2558 for department of physiology	13,200	–	–
Botanical gardens—construct 2 greenhouses	12,000	–	–
Forest products laboratory—construct storage shed	8,800	–	–
Provide electron microscope for inter-department use	57,000	–	–
Life sciences building—replace ammonia refrigeration system with freon system	20,000	–	–
Improve lighting in various buildings	50,000	–	–
Life sciences building—alter rooms 1030 and 2040 for increased effectiveness as botany teaching laboratories	7,841	–	–
LeConte Hall—construct lead shield around fume hood for protection from radioactivity	7,700	–	–
Hesse Hall—replace roof membrane over room 240 and install rollaway metal door in north wall of room 240	2,300	–	–
Cowell Hospital—provide auxiliary electrical generator	42,000	–	–
Agriculture Hall—develop room 204 as a teaching laboratory	4,500	–	–
Botanical gardens—install new electrical distribution system	3,000	–	–
Harmon Gymnasium—alter rooms 5-B, 5-C, and 5-D to provide expanded class areas	4,000	–	–
Sproul Hall—provide ventilation for room 108	15,139	–	–
Doe Library—rehabilitate men's washrooms	20,000	–	–
Blodgett Experimental Forest—construct garage, workshops and storage shed	49,500	–	–
Cowell Hospital—replace steam lines	21,000	–	–
Life sciences building—rehabilitate room 3545 for department of bacheriology	6,900	–	–
Life sciences building—remodel rooms 2024 and 2024-A and put display cabinets in corridor	17,000	–	–
Harmon Gymnasium—alterations and repairs to swimming pools	36,000	–	–
Life sciences building—refurnish room 3530 for bacteriology	32,500	–	–
Various buildings—rehabilitation of 4-KV switches	27,500	–	–
Strawberry Canyon—storm damage prevention, step 1	40,000	–	–
Hesse Hall—purchase and install main electrical panel, room 120 for engineering	6,000	–	–
Poultry—botanical garden—rehabilitate gas line	7,000	–	–
Gill Tract—remodel headhouse No. 1 for agriculture-biological control	10,477	–	–
Donner Laboratory—alteration and extension of teaching laboratories rooms 315, 317 and 321	9,743	–	–

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES—Continued			
BERKELEY CAMPUS—Continued			
Minor Projects—Continued			
Richmond field station—enlarge towing channel and building	$23,000	–	–
General campus—repair water pressure valves—various buildings	10,000	–	–
Life sciences building—increase distilled water facilities	22,500	–	–
DAVIS CAMPUS			
Equip physical sciences unit 1	–	$50,000	–
Construct and equip addition to physical education building	–	633,600	–
Construct office section of classroom and office building unit 2	–	1,096,600	–
Construct library addition to and make alterations to library-administration building	–	1,678,600	–
Construct veterinary science laboratory animal housing unit 2	–	141,500	–
Construct and equip poultry husbandry building for experimental birds	–	144,200	–
Construct biological sciences unit 2	3,247,000	–	–
General Fund			
Construct general campus utilities	765,600	–	–
General Fund			
Construct classroom unit 2	1,325,000	–	–
General Fund			
Horticulture—viticulture building—completion	620,000	–	–
General Fund			
Minor Projects:			
Purchase fire department pumper	–	30,000	–
Construct storage compound building for departments of botany, viticulture and entomology-parasitology	–	25,000	–
Provide distilled water system for Hunt Hall and horticulture and landscape horticulture greenhouse ranges	–	32,000	–
Landscape horticulture field headquarters buildings—convert rooms 103 and 108 into 6 offices and 2 small laboratories for staff use	–	20,000	–
Chemistry building—provide air cooling equipment to eliminate fumes and contaminated air from laboratories	–	45,000	–
Veterinary medicine—construct sheep barn, hay storage building and livestock facilities on land areas B-3 and B-4	–	40,000	–
Demolish old viticulture building—fire and public safety hazard	–	7,000	–
Complete remodeling of psychrometric chamber for animal husbandry	16,000	–	–
Construct access roads to new residence hall unit 4	17,500	–	–
Food technology building—repair equipment in pilot plant	30,000	–	–
Poultry husbandry building—provide sun control	3,400	–	–
Remodel barn on Hopkins Tract for animal husbandry	21,900	–	–
Provide improvements to building on Hopkins Tract for better use as poultry husbandry field headquarters	3,200	–	–
Provide drinking fountains in older campus buildings	11,000	–	–
Dairy industry building—correct health and safety hazards	17,200	–	–
Provide sump and return flow in area E-4 for control of run-off water from irrigation experiments	6,100	–	–
LOS ANGELES CAMPUS			
Equip graduate school of business administration building	–	257,300	–
Equip Engineering Unit 3:			
State Construction Program Fund	–	335,000	–
General Fund	722,919	–	–
Complete Addition to Chemistry-Geology Building—Step 1:			
State Construction Program Fund	–	255,572	–
General Fund	4,215,800	–	–
Construct north campus library unit 1	–	4,609,700	–
Construct Physics Unit 2:			
State Construction Program Fund	–	5,043,800	–
General Fund	203,200	–	–
Working drawings for art unit 2	–	123,100	–
Construct life sciences graduate instruction and research unit 2	–	1,209,600	–
Construct utilities, roads and walks to north campus area	–	181,900	–
Working drawings for university activities memorial center	–	152,000	–
Equip areas in physics building	68,640	–	–
General Fund			
Construct additions to campus electrical system	367,300	–	–
General Fund			
Complete Franz Hall addition and alter and equip areas in Franz Hall	426,500	–	–
General Fund			
Construct addition to cyclotron building	77,150	–	–
General Fund			

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES—Continued			
LOS ANGELES CAMPUS—Continued			
Minor Projects:			
Moore Hall—room 100—improve 500-seat lecture hall by acoustically treating walls, relocating ventilating ducts, installing public address system, and painting	–	$25,000	–
University elementary school—provide ventilating system for rooms 1028, 1046, 1056 and 1068	–	11,000	–
Mechanics building—reconstruct roof trusses and other areas to make reasonably safe from earthquake damage	–	50,000	–
Install 30-inch storm drain between Westwood Boulevard and Gayley Avenue as part of campus physical drainage plan	–	30,700	–
Royce Hall—replace old (1929) electrical wiring in stage and auditorium to coincide with installation of new switchboard	–	7,800	–
Haines Hall—renovate old (1929) lecture hall—room 39—by providing new lights, floor covering, seats and painting	–	50,000	–
Home economics building—convert room B-113 into vivarium for instruction and research in nutrition	–	40,000	–
Royce Hall—replace hazardous (1929) stage counterweight system	–	49,500	–
Royce Hall—convert classroom 240 to language laboratory for department of Italian	–	27,300	–
Art building—install exterior metal louvers on south wing of second floor to reduce excessive heat and sun glare	–	5,000	–
University elementary school—provide storage space in basement area of administration building	–	15,000	–
Music building—equip organ instruction rooms with 3 practice organs		30,000	–
Provide cement lining, "in place," for maintenance of all unlined water mains 4 inches or more in diameter	$63,800	–	–
Life sciences building—equip rooms 4126 and 4128 for bacteriology research laboratory	5,000	–	–
Home economics building—convert rooms 2201, 2201A, and 2211 into laboratories for nutrition research	28,000	–	–
Royce Hall—convert classroom to language laboratory	50,000	–	–
Ornamental horticulture area—alter and repair building A for plant pathology	29,800	–	–
Law building—convert room 233 into 3 faculty offices	5,500	–	–
Subtropical horticulture greenhouses—provide smogremoval equipment	35,500	–	–
Correct effects of settling of court on northwest corner of music building	5,000	–	–
Royce Hall—replace switchboard and portion of stage floor	47,500	–	–
Art building—provide ventilation for inside basement rooms of west wing of building	24,000	–	–
Music building—complete unfinished area in basement	40,000	–	–
Chemistry building—replace corroded fume hoods	118,000	–	–
Theater arts building—augmentation	7,300	–	–
LOS ANGELES MEDICAL CENTER			
Construct physical rehabilitation unit	–	3,311,500	–
Equip areas in medical center to serve neuropsychiatric institute	132,000	–	–
General Fund			
Equip research laboratories of neuropsychiatric institute	224,343	–	–
General Fund			
Construct heating plant on west medical campus	230,355	–	–
General Fund			
Construct parking structure	546,000	–	–
General Fund			
Minor Projects:			
U. C. Hospital—dietary—alter and add to kitchen facilities to provide faster service in serving area	–	33,000	–
Medical Center—Cancer Research Institute—replace exhaust fans for 14 fume hoods	–	7,000	–
Construct air conditioning for medical center building to provide for Cancer Research Institute air conditioning for A level and insulate air ducts in mechanical equipment room	–	15,000	–
U.C. Hospital—nursing—alter patient nursing areas to provide suction outlets, handrails in corridors and isolation area for patients having communicable diseases	–	13,500	–
U.C. Hospital—medical records—alter medical records area to gain additional working and filing space	–	10,000	–
Hospital—complete rooms A6-229 and A6-230 in conjunction with activation of neuropsychiatric institute	18,400	–	–
Expand food service facilities in cafeteria area	41,000	–	–
Convert rooms 32-077 and 32-075 D to offices, classroom, and storage facilities for school of nursing	48,000	–	–

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES—Continued			
RIVERSIDE CAMPUS			
Construct Humanities Building:			
State Construction Program Fund	–	$3,059,128	–
General Fund	$100,400	–	–
Construct addition to the library building	–	1,582,200	–
Land acquisition	–	650,000	–
Construct improvements to field 9	–	56,200	–
Construct protective filters and coolers for glasshouses—step 1	–	229,900	–
Equip health service building	103,482	–	–
General Fund			
Equip alterations to physical education building	26,000	–	–
General Fund			
Equip education fields and facilities	16,896	–	–
General Fund			
Construct utilities	226,300	–	–
General Fund			
Construct general campus site improvements	250,000	–	–
General Fund			
Minor Projects:			
Make site improvements on newly acquired 9-acre area adjacent to new administration building	–	26,000	–
Construct glasshouse and screenhouse for virus indexing of foreign citrus importations	–	50,000	–
Social sciences-humanities building—modify 2 classrooms to provide 8 small offices and 2 special-use laboratory rooms for department of psychology	–	50,000	–
Soils and plant nutrition building—rewire building to correct electrical overload	–	22,300	–
Develop experimental area for life sciences—step 1	–	43,500	–
Physical sciences building—install fume hood in room 2268-A	5,500	–	–
Library building—install enclosures for noise control and additional working areas, and provide additional book stacks	38,500	–	–
Provide improvements to campus electrical system for safety	43,000	–	–
Construct storehouse for department of vegetable crops	20,000	–	–
Construct storage and service facility for entomology spray and dust equipment	21,000	–	–
Construct glasshouse addition to headhouse 16 for college of letters and science	50,000	–	–
SAN DIEGO CAMPUS			
Construct and Partially Equip Building B for School of Science and Engineering:			
State Construction Program Fund	–	520,000	–
General Fund	3,836,940	–	–
Construct building C for school of science and engineering	–	2,298,800	–
Construct Utilities and Site Development—Steps 1 and 2 for School of Science and Engineering:			
State Construction Program Fund	–	233,100	–
General Fund	1,665,500	–	–
Working drawings for school of science and engineering building unit 2 (buildings C and D)	219,000	–	–
General Fund			
Land acquisition for laboratory unit 4	108,000	–	–
General Fund			
Minor Projects:			
Make repairs and improvements to pier and sea water system	–	38,000	–
Service building—remodel building for expansion of purchasing, storehouse and receiving operations	–	15,000	–
Marine geology—construct underground storage facility for ocean research specimen cores	–	50,000	–
Alter and improve library building to provide additional bookstacks, a receiving and workroom area, and better heating and ventilation	50,000	–	–
SAN FRANCISCO CAMPUS			
Construct primary electrical system expansion	–	275,600	–
Working drawings for addition to and alterations to clinics building	–	162,300	–
Construct and equip alterations to University of California Hospital	652,000	–	–
General Fund			
Construct health sciences instruction and research unit 1	8,375,275	–	–
General Fund			

UNIVERSITY OF CALIFORNIA—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM—Continued			
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES—Continued			
San Francisco Campus—Continued			
Land acquisition	$430,000	–	–
General Fund			
Minor Projects:			
Medical sciences building—construct greenhouse for school of pharmacy	–	$21,300	–
Medical sciences building—alter room S-214 for bed-patient lecture-demonstration room	–	5,000	–
Medical sciences building—convert part of the nursing arts laboratory to 6 faculty offices	–	26,000	–
Clinics building—alter Room C-645 for dental clinic laboratory use	–	4,200	–
Medical sciences building—modify ventilation system to reduce noise level and maintenance work	–	8,600	–
Medical sciences building—alter and improve physiology and biochemistry chemical laboratories for school of pharmacy	–	44,000	–
Moffitt Hospital—modify ventilation system in dietary department to eliminate excessive heat-humidity areas	–	5,700	–
Moffitt Hospital—alter radioactive isotope handling rooms for use as office-patient radioactivity measurement rooms	–	7,500	–
Construct rear service road and ramp to medical research building	6,300	–	–
Moffitt Hospital—modify acid and glass washing facilities for clinical laboratories	13,000	–	–
Provide enclosures and window modification for suicide deterrence	47,500	–	–
Moffitt Hospital—alter refuse and linen chutes to prevent flow of contaminated air into hospital areas	40,000	–	–
Moffitt Hospital—expand telephone exchange	10,300	–	–
Add afterburner to campus incinerator to reduce smog production	3,500	–	–
SANTA BARBARA CAMPUS			
Equip library unit 2	–	191,000	–
Construct classroom wing of classroom and office unit 2	–	1,002,200	–
Construct utilities and site development	–	156,500	–
Construct central laboratory for radioactive material	–	597,800	–
Land acquisition	–	596,700	–
Construct utilities	186,400	–	–
General Fund			
Construct and equip alterations to science unit 1—step 2	86,000	–	–
General Fund			
Construct general campus site improvements	160,000	–	–
General Fund			
Minor Projects:			
Science unit 1—complete equipping by providing distilled water still, specimen cabinets, steel shelving and 200 steel trays for specimen cabinets	–	27,000	–
Auditorium—alter and improve seating area, stage and lighting	–	42,300	–
Provide environment control for animal house	–	12,000	–
Relocate and alter upper half of temporary building 422 to provide additional facilities for military science department	–	38,000	–
General electrical improvements—replace overhead wiring with underground wiring, increase electric panel capacities	10,000	–	–
Construct greenhouse and lathhouse for biological sciences	25,000	–	–
Construct additional animal house facilities for department of biology and psychology	40,000	–	–
Unallocated balance	300	–	–
TOTAL EXPENDITURES, CAPITAL OUTLAY	$50,693,435	$48,000,000	$54,307,000

Enrollments

The construction programs for the 17 state colleges are based on a projected enrollment of 103,000 regular students (FTE) in 1965-66. This enrollment estimate is an increase of 26,250 over the regular students (FTE) anticipated in 1962-63. This differs from enrollment estimates for support budget purposes where full-time equivalents of all students are considered. In California, enrollments in the state colleges during the next several years are estimated to increase at a rate many times that of the growth of the population as a whole.

These enrollments have been estimated from statistics based on prior experience of the progression of students from high schools to the colleges and through the various collegiate levels. The state college data includes a compilation of the numbers of students by county of origin in order to allow a reasonably accurate distribution of students by college or university area. The projects also assume a continual increase in the percentage of population attending college in tax-supported institutions.

The following table outlines actual enrollments of regular students in the state colleges from 1959-60 to 1960-61 and estimated enrollments from 1961-62 through 1965-66.

---

[d] Expenditures from bond funds not included in budget totals.

STATE COLLEGES

SUMMARY—Continued

Full-time Equivalent Enrollments of Regular Students[1]—1959-65

	Actual		Estimated				
	1959-60	1960-61	1961-62	1962-63	1963-64	1964-65	1965-6

Totals	52,955	60,966	69,080	76,750	84,225	92,675	103,000

Capacity

The basic unit measuring classroom student capacity is the student station. The stations are weighted depending upon whether they are in lecture rooms, activity rooms, or laboratories. A room is categorized by its primary use. A student station count is assigned the room based on accepted measurements, and weighting, based upon the time of required attendance per unit of student credit in each type of classroom.

The weighting is predicated on utilization standards which fix minimum utilization at 30 hours per week for lecture rooms, 25 hours per week for activity rooms and 20 hours per week for laboratories. Lecture rooms are programed to be occupied an average of 75 percent of student station capacity each hour of use, while activity rooms and laboratories are programed to be occupied an average of 85 percent of student station capacity each hour of use.

The categorization of a room as lecture, laboratory, or activity can shift from year to year depending on its planned use. For example, a large enrollment in art courses will result in the shifting of lecture classrooms to art activity classrooms. These shifts can result in changes in the measured capacity of any given college plant from one school year to the next.

A fourth categorization is that of earned capacity. This is the capacity that results from actual enrollments in courses that use facilities which cannot be measured in terms of student stations. The best example of this type of capacity is the gymnasium.

The existing and funded capacity of the various college plants based on planned 1965 use is shown below.

The total of the presently existing and funded capacity for the Fall of 1965 is programmed at 89,123 FTE. Enrollments for the Fall of 1965 are estimated at 103,000 FTE; this would indicate a deficiency of 13,877 FTE to meet capacity needs in September of 1965. The construction projects proposed in this budget will provide a capacity for 9,323 FTE, and projects for which working drawing funds are requested will provide capacity for 4,317 FTE, raising the total capacity to 102,763.

The difference between the total programmed capacity of 102,763 FTE and projected enrollments of 103,000 FTE, is 237 FTE.

Status of Presently Authorized Capacity and 1962-63 Budget Provisions

	Enrollment	Capacity
1965-66 enrollment of regular students (FTE)	103,000	–
1965 existing and funded capacity	–	89,123
1962-63 proposed projects (construction)		9,323
1962-63 proposed projects (working drawings)	–	4,317
Totals	103,000	102,763

[1] Includes FTE of physical education and production activities (earned FTE).

[2] These colleges will be operating in rented facilities during this time.

[3] The opening date of these colleges has not been set by the Board of Trustees of the California State Colleges.

STATE COLLEGES—Continued

SUMMARY—Continued

Master Plan Maximum Enrollments for State Colleges

In accordance with the recommendation of the Master Plan of Higher Education Survey Team establishing new maximum enrollments for state colleges, which was acted upon by the Board of Education on December 18, 1959, the Department of Education reviewed state college capacities and recommended the following maximum enrollments for master planning purposes:

State College for Alameda County	15,000
Chico State College	8,000
Fresno State College	10,000
Humboldt State College	5,000
Long Beach State College	20,000
Los Angeles State College	20,000
Orange County State College	20,000
Sacramento State College	10,000
San Diego State College	15,000
San Fernando Valley State College	20,000
San Francisco State College	10,000
San Jose State College	17,000
Sonoma State College	6,000
Stanislaus State College	6,000
State Polytechnic College:	
Kellogg-Voorhis Campus	20,000
San Luis Obispo Campus	12,000
	214,000

The trustees of the California State Colleges have undertaken studies of curriculum in the state college system and of admission requirements to the state colleges. It is anticipated that the trustees will also undertake plant utilization studies in the state colleges. Following the completion of these studies changes may be made in the maximum enrollment figures listed above.

PROJECTS PROPOSED FOR FINANCING IN 1962-63

The total Capital Outlay program for the state college system is $61,470,765. This amount includes $268,000 from prior year appropriations. The balance is budgeted for appropriation in the 1962-63 fiscal year with $60,118,260 financed from the State Construction Program Fund and $1,084,505 financed from the General Fund. Expenditures for major construction projects total $55,407,860 or 90 percent of the total. The balance is composed of projects for the purchase of equipment $5,128,400, and minor construction projects of $934,505.

Campus Master Planning

The support budgets include funds for campus master planning. The Trustees of the California State Colleges have appointed private architects for 14 of the state college campuses and the State Division of Architecture as campus master planner for 4 of the state college campuses. The consulting architects will serve on the campus planning committees which have been established at each college campus. The committees will direct their attention primarily to the development of campus master plans.

Project Architects

All projects in the 1962-63 Budget for which the Division of Architecture had been given responsibility for working drawings and construction prior to October 6, 1961 were retained by the Division of Architecture. On October 6, 1961 the Trustees of the California State Colleges distributed 26 additional new projects equally between private architects and the Division of Architecture. Twenty-one of these projects are included in this budget—9 of them are private architect projects and 12 are Division of Architecture projects.

Trustees

One project at $350,000 is included which will provide for the purchase of a permanent site for the future construction of an office building for the Trustees of the California State Colleges. The site will be located in the Los Angeles area.

New Colleges

Two projects are included for the purchase of permanent sites for 2 new colleges. Five million dollars is budgeted for South Bay State College and $1,000,000 is budgeted for San Bernardino-Riverside State College.

There are 5 projects included in the budget to provide the first permanent buildings at Sonoma and Stanislaus State Colleges. Working drawings totaling $310,000 for general classroom-administration facilities will provide the first instructional capacity on the new campus of Sonoma State College. Two site development projects, a general classroom-administration building, a library building, and a boiler plant totaling $5,141,200 will provide the initial permanent facilities on the new campus of Stanislaus State College and replace temporary facilities on the Stanislaus Fairgrounds at Turlock. In addition, $150,000 is included for equipment at Sonoma.

Science and Engineering Facilities

The importance of science and engineering programs has resulted in an expanded enrollment in these areas, necessitating a continuing expansion of existing facilities. Included in this budget to meet these expanded enrollments are 4 projects (Fresno, Sacramento, San Fernando Valley, and Kellogg-Voorhis, including 1 remodeling project) totaling $9,651,210 which is 17.5 percent of the Capital Outlay expenditures for construction.

Physical Education Facilities

There are 10 projects for construction or working drawings in the budget to provide physical education facilities. These projects total $1,773,400 and are located at Alameda, Humboldt, Long Beach, Orange, San Diego, and Kellogg-Voorhis.

Music, Speech, and Drama Facilities

Three projects are included to build music, speech, and drama facilities in the amount of $9,014,150 which is 16 percent of the total Capital Outlay expenditures for construction. These projects are for Orange, San Diego, and San Francisco State Colleges. Sixty-eight thousand dollars is provided for working drawings for a music building at the State College for Alameda County.

Other Instructional Facilities

A total of $15,385,000 or 28 percent of the Capital Outlay expenditures is proposed for other instructional facilities. These 7 projects, located on 6 campuses, are classroom buildings to provide lecture, activity, and laboratory capacity required to serve the increasing enrollments. Sixty-five thousand dollars is provided for working drawings for an addition to classroom building No. 3 at San Francisco State College.

Site Development

Five projects totaling $3,144,500 for site development are included. Four of these are to provide for utility and road improvements including lighting. The fourth project is for campus development at Alameda State College.

Site Acquisition

Two projects are included to purchase land for future construction at Chico and Sacramento State Colleges.

Parking Facilities

A parking program is included in the amount of $589,100. These appropriations will provide additional parking spaces for students and employees. Projects are included for 5 colleges which are: Orange, San Diego, San Fernando Valley, and California State Polytechnic College (San Luis Obispo and Kellogg-Voorhis Campuses).

STATE COLLEGES—Continued

SUMMARY—Continued

PROJECTS PROPOSED FOR FINANCING IN 1962-63—Continued

Other

The remaining appropriations for Capital Outlay total $2,813,300 which include construction of a corporation yard at the State College for Alameda County; construction of a boiler plant at the State College for Alameda County; construction of cafeterias at San Diego State College and working drawings for residence hall cafeterias at Chico, San Jose, and Kellogg-Voorhis; construction of a student health building at Long Beach State College; improvement of heating and ventilating in humanities-social science building at San Diego State College; remodeling of tower hall at San Jose State College; and working drawings for an addition to the administration building at Los Angeles State College.

Equipment

Four million, eight hundred twenty-eight thousand, four hundred dollars is included in this budget for equipment, buildings and facilities which are scheduled for completion in 1962-63. The total cost of this equipment is 8 percent of the total Capital Outlay appropriations.

Library Books

Four hundred fifty thousand dollars is included in this budget to purchase and process 50,000 new books for the libraries at the following new colleges: Alameda, Orange, Sonoma, and Stanislaus. Three hundred thousand dollars of the amount will be used to purchase books and the balance used to hire temporary staff to process the books for library use.

Air Conditioning

Two projects are included to air condition the libraries at Chico State College and San Fernando Valley State College. These projects are needed to achieve satisfactory year-round utilization of these facilities.

Minor Capital Outlay

The final portion of the Capital Outlay program is a total of $934,505 which is included in this budget for projects for minor Capital Outlay including a number of equipment projects for new instructional programs.

FUND CONDITION	ACTUAL 1960-61	ESTIMATED 1961-62	ESTIMATED 1962-63

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

Trustees of the California State Colleges

The Board of Trustees of the California State Colleges was established by Chapter 49, Statutes of 1960, First Extraordinary Session. On July 1, 1961, the trustees succeeded to the powers, duties, and functions with respect to management, administration, and control of the colleges previously vested in the State Board of Education and the Director of Education. The board is charged with the responsibility of governing the state college system. In carrying out its objectives the board has a central administrative staff for the systematic development of policies and the furnishing of administrative services to the various colleges.

On August 4, 1961, the trustees voted to establish a headquarters office in the Los Angeles area. Temporary quarters are currently being rented in the City of Los Angeles. A staff of 93 authorized positions will carry on operations from this location until the establishment of permanent facilities.

This budget provides $350,000 for the acquisition of real property somewhere in the Los Angeles area on which a permanent headquarters building will be constructed.

STATE COLLEGES—Continued

State College for Alameda County

State College for Alameda County was established by Chapter 1681, Statutes of 1957. A site in the hills east of Hayward was selected and occupancy of the permanent buildings is scheduled for the fall of 1963. A regular student enrollment of 2,075 students (FTE) is estimated for 1965-66. Presently existing and funded capacity totals 1,704 students (FTE).

This budget includes the construction of a boiler plant, outdoor physical education facilities including a fieldhouse, initial corporation yard; working drawings for a classroom-music building, gymnasium; site development; equipment for instruction and maintenance; and an initial complement of library books.

STATE BUILDING PROGRAM

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
PROPOSED 1962-63 EXPENDITURES[a]			
Construct boiler plant	-	–	$355,100
This project will provide for the construction of a central boiler plant to serve the entire campus. Equipment is included for the initial buildings and space is provided for future boiler equipment.			
Equip boiler plant	–	–	12,000
This project will provide for boiler plant and maintenance yard equipment			
Construct outdoor physical education facilities—phase I	–	–	380,000
This project will provide for the initial outdoor playfields including tennis courts and general purpose fields and other similar facilities to serve the educational programs on the permanent site.			
Construct physical education fieldhouse	–	–	190,000
This project will provide for the construction of a locker and shower facility to serve the initial enrollments in physical education.			
Construct corporation yard—phase I	–	–	150,000
This project will provide for the construction of the first phase of the corporation yard facility which will be used for storage and various maintenance activities.			
Working drawings for classroom-music building	–	–	68,000
This project will provide for working drawings for a classroom-music building which will provide classroom and auxiliary facilities to meet the increasing enrollments. This project provides for an ultimate capacity of 340 students (FTE).			
Working Drawings for Gymnasium:			
State Construction Program Fund	–	–	73,400
General Fund	–	–	99,600
This project will provide working drawings for a gymnasium which will include activity rooms, lockers and showers, and necessary auxiliary facilities. This project will provide an initial capacity of 600 students (FTE).			
Site development—phase III	–	–	1,746,000
This project will provide necessary site development including campus roads, on-site utilities, landscaping, and errosion control.			
Initial complement of equipment—phase III	–	–	367,000
This project will provide equipment to serve the increasing enrollments and expanding curriculum of this college.			
Initial complement of library books	–	–	100,000
This project will provide an initial complement of books for the college library.			
Initial complement of library books—staffing	–	–	50,000
General Fund			
This project will provide the staff needed to process the initial complement of books for the college library.

Chico State College

Chico State College, established in 1887, offers courses in teacher education, general education, arts and sciences, and certain occupational fields including engineering and agriculture.

The college is located on a site totaling 111 acres in the city of Chico, and there is an additional 647 acres on the college farm. The estimated enrollment in 1965-66 is 3,100 students (FTE). The instructional plant capacity existing and funded at this time provides 3,109 capacity (FTE). Additional land is currently being acquired for an engineering building and a site for the future development of the campus.

Included in this budget is site acquisition for the music-drama building and corporation yard, working drawings for a residence hall cafeteria, air conditioning for the library and equipment for the remodeled administration building.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM			
PROPOSED 1962-63 EXPENDITURES[a]			
Site acquisition	–	–	$250,000
This project is to acquire one-half square block adjacent to the campus for the speech-drama building and an existing maintenance plant to be used for a corporation yard.			
Working drawings for residence hall cafeteria	–	–	43,000
This project will fund the preparation of working drawings for a residence hall cafeteria.			
Install air conditioning in library	–	–	121,400
This project will provide equipment to air condition the new library building.			
Equip remodeled administration building—phase II	–	–	8,400
This project provides the equipment for the remodeled administration building—phase I financed by the Budget Act of 1961.			
Minor Projects:[b]			
Improve electrical distribution system	–	–	20,000
Refinish science equipment	–	–	15,000
Equip engineering program—phase III	–	–	50,000
Alteration and improvement projects under $5,000	–	–	5,090
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES[c]			
Remodel administration building—phase II	–	$410,600	–
Working drawings for engineering building	–	65,000	–
Equip remodeled administration building—phase I	–	4,060	–
Equip men's gymnasium	–	98,930	–
Remodel administration building—phase I	$133,800	—2,444[e]	–
General Fund			
Construct education-psychology building	1,030,000	–	–
Working drawings for music building	–	75,000	–
General Fund			
Install air conditioning in cafeteria	19,000	–	–
Site acquisition for corporation yard and engineering building	1,386	451,614	–
General Fund			
Construct surface parking	–	45,000	–
General Fund			
Equip physical science and agriculture building	245	69,839	–

Fresno State College

Fresno State College is a 5-year institution offering programs in teacher training, agriculture, and general education. The college is located on a site of 1,428 acres northeast of the City of Fresno. The estimated enrollment for 1965-66 is 5,075 students (FTE). Presently existing and funded capacity totals 6,740 students (FTE). This budget provides for remodeling 2 lecture classrooms into specialized facilities and providing necessary equipment. Funds for minor projects are primarily for the development of the college farm.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES [a]

Remodel biology classrooms	–	–	$126,100
This project provides for remodeling 2 lecture classrooms into laboratories for biology.			
Equip remodeled biology classrooms	–	–	45,700
This project will provide the equipment necessary to place the above remodeled laboratories into operation.			
Minor Projects: [b]			
Install farm wells and pumps—phase II	–	–	12,000
Install pellet mill	–	–	18,000
Alteration and improvement projects under $5,000	–	–	9,265

---

Humboldt State College

Humboldt State College is a 5-year institution offering programs—both graduate and undergraduate—in liberal arts, teacher education, and vocational training. The latter includes curriculums in forest management, fisheries, and game management. Humboldt State College is located on a site of approximately 96 acres in the city of Arcata. An enrollment of 2,025 regular students (FTE) is predicted for 1965-66. Presently existing and funded capacity totals 2,100 (FTE).

This budget includes funds for physical education improvements and a marine fisheries facility which will be located on a 5-acre site on Trinidad Bay.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES [a]

	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Construct physical education facilities	–	–	$261,700
This project provides for improvement of the men's and women's gymnasiums and development of a multi-purpose women's playfield.			
Construct marine fisheries facility	–	–	512,000
This project will provide instructional capacity for 48 students (FTE) plus auxiliary facilities for research and an oceanography preservatorium.			
Minor Projects: [b]			
Improve sidewalks on "B" Street	–	–	7,720
Install 8-inch water main	–	–	8,500
Remodel storage area for engineering laboratory	–	–	6,600
Remodel laboratory school—phase I	–	–	5,500

Long Beach State College

This college was established in 1949 as an upper division liberal arts college, and beginning in the fall of 1953, the college was authorized to offer lower division courses. In the fall of 1951 it was moved to a permanent 320-acre site donated by the City of Long Beach. An enrollment of 9,825 students (FTE) is estimated for 1965-66. Presently existing and funded capacity totals 11,410 students (FTE). Two projects are included in this budget: construction of a health service building and worki drawings for a gymnasium addition. Health services are cı rently being provided on a limited basis in temporary faciliti The existing gymnasium was planned for a college of less th 4,000 students (FTE). Equipment is provided for classroc building No. 5 which will be completed during the 1962- fiscal year.

Los Angeles State College of Applied Arts and Sciences

Los Angeles State College, established in 1947, offers courses in business, economics, education, fine arts, applied arts, music, social sciences, natural sciences, biological sciences, technical sciences, physical education, and special education.

The campus of the college at the intersection of Eastern Avenue and the San Bernardino Freeway consists of 97 acres. Classroom buildings completed or funded have a capacity of 8,865 regular students (FTE) for 1965 use, while the projected total enrollment of regular students (FTE) for 1965-66 is 10,425. This budget provides construction funds for classroom building No. 2, working drawings for an administration building addition, and equipment for classroom building No. 1 and the health service building.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Construct classroom building No. 2	–	–	$3,900,000
This building will provide additional general classroom space for approximately 1,635 students (FTE) and related auxiliary facilities to meet the increasing enrollments.			
Working drawings for administration building addition	–	–	53,300
This project will provide for working drawings for an administration building addition to house the administrative and service staff of this rapidly growing campus.			
Equip classroom building No. 1—phase I	–	–	650,000
This project is to provide equipment for classroom building No. 1 which was funded by the Budget Act of 1960.			
Equip health service building—phase II	–	–	25,000
This project will provide the final complement of equipment for the student health service building.			
Minor Projects:[b]			
Remodel radio-television studio	–	–	33,500
Remodel temporary buildings for administrative offices	–	–	50,000
Install plant growth facilities—science building	–	–	8,500
Relocate fume hoods in science building	–	–	33,600
Alteration and improvement projects under $5,000	–	–	2,500

STATE COLLEGES—Continued

Orange County State College

Orange County State College is located on a site of 238 acres in the City of Fullerton. The college is currently offering instruction in temporary facilities on the permanent site. Funds for construction of the first permanent building were appropriated in 1961. The 1965-66 enrollment is estimated at 2,750 students (FTE). The 1965-66 capacity which consists of the temporary facilities and permanent buildings will be 2,782 students (FTE).

This budget provides construction funds for a music-speech-drama building, outdoor physical education facilities, site development, and funds for working drawings for a gymnasium. Also included is an initial complement of equipment for the science classroom building and an initial complement of library books.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Construct music, speech and drama building This project will provide capacity for 581 students (FTE) plus the auxiliary facilities required for approved programs in music, speech and drama.	–	–	$4,635,700
Working drawings for gymnasium This project will fund the preparation of working drawings for a gymnasium. The auxiliary facilities for the physical education program in the project are planned to handle a campus enrollment of 5,900 students (FTE) and will include instructional classroom capacity for 120 students (FTE).	–	–	82,000
Construct outdoor physical education facilities This project provides the auxiliary facilities and turfed areas to conduct the physical education program.	–	–	205,100
Construct perimeter roads and curbs, gutters and walks This project is to pay the State's share of a city development project to handle automobile and pedestrian traffic.	–	–	381,700
Site development—phase II This project will provide the necessary mechanical and electrical services, and ground improvements.	–	–	367,000
Construct parking This project will provide for 500 additional parking spaces for students and faculty.	–	–	100,000
Equip science classroom building—phase I This project will provide an initial complement to equip the science building which was funded by the Budget Act of 1961.	–	–	1,000,000
Initial complement of library books This project will provide an initial complement of books for the college library.	–	–	100,000
Initial complement of library books—staffing *General Fund* This project will provide the staff needed to process the initial complement of books for the college library.	–	–	50,000

Sacramento State College

Sacramento State College, established in 1947, offers courses in teacher training, liberal arts and general education, and occupational curriculums leading to a bachelor's degree in various fields.

The college moved to its present 265-acre site in 1953 to accommodate the increase in student enrollments.

A regular student enrollment of 4,750 students (FTE) is estimated for 1965-66. Presently existing and funded capacity available for 1965-66 totals 4,364 students (FTE). This budget provides working drawings for a 400 student (FTE) capacity science building addition, equipment for the art building addition, and site acquisition funds.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Site acquisition	–	–	$460,000
These funds will provide for the purchase of approximately 23 acres of land adjacent to the southern boundary of the campus, necessary for future development.			
Working drawings for science building addition	–	–	230,000
This project will provide approximately 400 student capacity (FTE) to meet laboratory and enrollment requirements in 1965.			
Equip art building	–	–	150,000
This project will equip the art building addition which was funded by the Budget Act of 1960 and is expected to be occupied in the fall of 1963.			
Minor Projects: [b]			
Alterations in equipment—advanced physics laboratory	–	–	40,000
Install air conditioning in television studio	–	–	5,000
Improve sunshades on campus buildings	–	–	8,000
Alteration and improvement projects under $5,000	–	–	4,000

---

[a] From State Construction Program Fund unless otherwise indicated.

[b] Minor projects from General Fund unless otherwise indicated.

[d] Expenditures from bond funds not included in overall budget totals.

San Bernardino-Riverside State College

San Bernardino-Riverside State College was authorized by the Legislature by Chapter 64, Statutes of 1960, First Extraordinary Session. It is scheduled to be a fully accredited 5-year state college with programs designed to meet the needs of the area which it will serve.

This budget provides $1,000,000 for the acquisition of the permanent site to be located somewhere in San Bernardino County.

San Diego State College

This college is located on a 278-acre site within the City of San Diego. An enrollment of 11,775 regular students (FTE) is anticipated for 1965-66. Presently existing and funded capacity total 9,276 students FTE.

San Diego State College offers 57 approved undergraduate majors and 34 master's degree curricula. Major growth during recent years has occurred in the sciences, including mathematics, and in business administration, both at the graduate and undergraduate levels.

This budget includes: construction for 2 major classro
buildings, the business administration and mathematics buil
ing, which has an FTE capacity of 2,155 students, and t
little theater which has an FTE capacity of 136 students;
modeling of the women's gymnasium; conversion of the heati
and ventilating system in the humanities-social science buildin
construction of a cafeteria; improvements to 2 parking lots; si
development; and equipment for the women's gymnasium a
the life science and psychology building.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Construct business administration and mathematics building	–	–	$3,445,500
This project provides for construction of a general classroom building to provide capacity for 2,155 students (FTE) in business administration and mathematics.			
Remodel women's gymnasium	–	–	109,600
This project provides for the remodeling of the women's gymnasium to provide additional shower rooms, lockers, faculty offices, and activity areas.			
Convert heating and ventilating system in humanities-social science building	–	–	404,200
This project provides for necessary improvements of the ventilation system of the humanities-social science building.			
Construct speech-drama building	–	–	2,642,450
This project will provide for the construction of a little theater of 500 seats with the necessary stage, drama production facilities and classrooms to serve 136 students (FTE).			
Construct parking	–	–	118,000
This project will provide for the installation of parking control gates on 2 existing parking lots and the resurfacing of 1 existing parking lot.			
Construct west cafeteria	–	–	841,500
This project will provide for construction of a west campus cafeteria with 700 seats to serve the increasing enrollments.			
Site development, phase I	–	–	142,000
This project will provide for development of Campanile Drive as the major access road to the campus and construction of interior walks for pedestrian traffic.			
Equip life science building, phase II	–	–	650,000
This project provides a second increment of equipment for the life science and psychology building financed by the Budget Act of 1960.			
Equip women's gymnasium	–	–	10,000
This project will provide equipment for the remodeled women's gymnasium.			
Minor Projects:[b]			
Install new water main	–	–	50,000
Improve gas lines	–	–	12,300
Remodel classrooms and offices	–	–	15,000
Install sprinkler system in paint shop	–	–	6,500
Alterations and improvements under $5,000	–	–	11,470

San Fernando Valley State College

San Fernando Valley State College became a separate state college July 1, 1958, by authority of Chapter 2265, Statutes of 1957. The campus, located in Northridge, currently comprises 245 acres, with an additional 55 acres in the process of acquisition. An enrollment of 10,450 regular students (FTE) is anticipated for 1965-66. Presently existing and funded capacity totals 8,084 students (FTE). This budget includes construction for an administration-education building, an engineering building, additional parking for students and employees, air conditioning of the library, and equipment for the science and engineering programs.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM			
PROPOSED 1962-63 EXPENDITURES[a]			
Construct administration-education building	–	–	$3,443,000
This project will provide construction for an administration-education building. The initial instructional capacity of this building will be 717 students (FTE). This project also includes a faculty office wing.			
Construct engineering building	–	–	4,240,000
This project will provide construction for an engineering facility with a student capacity of 971 (FTE). The project will include general classrooms, engineering laboratories, and faculty offices.			
Construct parking	–	–	162,900
This project will provide construction for surface parking for 497 cars.			
Air condition library	–	–	121,600
This project will provide for purchase and installation of air conditioning equipment in the library building.			
Equip science building, phase II	–	–	700,000
This project will provide for the second increment of equipment for the science building.			
Initial complement of equipment—engineering; phase II	–	–	200,000
This project will provide for phase II of the initial equipment complement for the engineering program.			
Minor Projects:[b]			
Remodel and equip home economics building	–	–	20,000
Construct speech-hearing center	–	–	22,400

San Francisco State College

STATE BUILDING PROGRAM

San Francisco State College, first established in 1899, now occupies a site of 93 acres between 19th Avenue and Lake Merced Boulevard.

Presently existing and funded capacity totals 7,335 students (FTE). The enrollment estimate of regular students for 1965-66 is 10,000 students (FTE). The master plan figure for this campus is 10,000 regular students (FTE). Current enrollment of regular students (FTE) is 8,510. Additional facilities proposed in this budget includes the construction of the psychology and air science building, classroom building No. 2 addition, music-speech addition, and working drawings for classroom No. 3 addition. The completion of these buildings will bring the capacity of this campus up to 8,802 students (FTE). Also included in this budget is equipment for the engineering program.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES [a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Construct psychology and air science building	–	–	$1,235,400
This project provides for the construction of a classroom building for 162 students (FTE). Working drawing funds were provided in the 1961 Budget Act. This project includes psychology laboratories, auxiliary facilities, lecture, and specialized facilities for the Air Force ROTC program.			
Working drawings for classroom No. 3 addition	–	–	65,000
This project is for working drawings for a classroom building for 1,070 students (FTE). In addition to general classrooms, faculty offices and auxiliary facilities are included.			
Construct music-speech building addition	–	–	1,736,000
This project was funded for working drawings in the 1961 Budget Act and includes instructional facilities for music and drama, a music hall, and an instructional television facility. Instructional capacity totals 235 students (FTE).			
Construct classroom building No. 2 addition	–	–	329,100
This project provides 79 faculty office spaces and additional clerical facilities. This project was funded for working drawings in the 1961 Budget Act.			
Equip engineering curriculum, phase III	–	–	75,000
This is the third phase of equipment to serve the engineering curriculum.			
Minor Projects: [b]			
Remodel microbiology laboratory, phase II	–	–	46,300
Convert storage area into 35 two-man faculty offices	–	–	30,450

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

San Jose State College

The San Jose campus was established in 1870, and is a 5-year college offering programs in general education and teacher training. This college is located on a 107-acre site in the City of San Jose. The enrollment estimate of regular students for 1965-66 is 14,250 students (FTE). Presently existing and funded capacity totals, 12,301 students (FTE). Additional facilities proposed in this budget include construction of clas room building No. 1, working drawings for a residence ha cafeteria, remodeling of tower hall, provision of campus stre lighting, and equipment for the education building, the women gymnasium addition, and the multistory garage.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Construct classroom building No. 1	–	–	$2,520,000
This project will replace temporary capacity which is being lost due to the construction of the women's gymnasium addition. It will provide a total capacity of 850 students (FTE) and auxiliary facilities.			
Working drawings for residence hall cafeteria	–	–	42,800
This project will provide working drawings for a residence hall cafeteria with a seating capacity of 600 in the main dining hall and 300 in the snack bar.			
Remodel tower hall	–	–	257,000
This project will provide for structural reinforcement of the building to meet construction standards. Other modifications will be made to meet fire and safety regulations.			
Provide campus street lighting	–	–	94,200
This project will provide lighting for city streets adjacent to and traversing the college campus.			
Equip education building	–	–	150,000
This project will provide equipment for the education building financed by the Budget Act of 1959.			
Equip women's gymnasium addition	–	–	38,000
This project will provide equipment for the women's gymnasium addition financed by the Budget Act of 1960.			
Equip multistory garage	–	–	30,000
This project will provide equipment for the multistory garage financed by the Budget Act of 1960.			
Minor Projects:[b]			
Equip and install foreign language laboratory	–	–	28,000
Roof alterations to old engineering building	–	–	21,550
Provide air conditioning, radio-television studio	–	–	25,000
Improve ventilation system of old engineering building	–	–	13,000
Equip graduate chemistry program	–	–	28,700
Install fence at south campus physical education field	–	–	20,600

STATE COLLEGES—Continued

Sonoma State College

Funds for site acquisition for a new state college in one of four north San Francisco bay area counties were appropriated by Chapter 1681, Statutes of 1957. On March 2, 1960, the State Public Works Board selected a site 2 miles east of Cotati in Sonoma County.

Chapter 66, Statutes of 1960, First Extraordinary Session, provided for the establishment of Sonoma State College. The college opened in rented facilities in the summer of 1961 with a summer session program. The fall semester 1961 has an enrollment of 140 students (FTE). The temporary facilities have a capacity of 150 students (FTE) with provisions for expansion through 1964-65. An enrollment of 1,075 students (FTE) is anticipated for 1965-66.

This budget provides working drawings for a science-classroom building with a capacity of 1,627 students (FTE) and sufficient space to house the balance of the administrative and science facilities required during the initial year of operation. Also included are complements of instructional equipment and library books.

South Bay State College

South Bay State College was authorized by the Legislature by Chapter 65, Statutes of 1960, First Extraordinary Session. It is scheduled to become a fully accredited 5-year state college with programs designed to meet the needs of the area which it will serve.

This budget provides $5,000,000 for acquisition of the permanent site to be located somewhere in the south bay area of Los Angeles County.

Stanislaus State College

Funds for site acquisition for a new state college in Stanislaus County were appropriated by Chapter 1681, Statutes of 1957. On December 9, 1959, the State Public Works Board selected a site of 220 acres 1 mile north of the City of Turlock and the property has been acquired.

Stanislaus State College opened classes on September 19, 1960, in rented facilities on the Stanislaus County Fairgrounds. An enrollment of 2,925 students (FTE) is anticipated for 1965-66. To accommodate this enrollment, this budget includes site development, phase I; construction of a library, a classroom building, and a boiler plant; working drawings for site development, phase II; and an initial complement of books to establish the library. These facilities will be completed at the earliest possible time in order to facilitate moving the college to the permanent site. Early estimates of the completion date for the projects in this budget indicate possible occupancy by February 1964 and certain occupancy by July 1964. At the time the college occupies these buildings it will admit its first freshman class.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Site development, phase I This project will provide for clearing, initial grading, installation of necessary utility lines, and soil treatment.	–	–	$1,147,600
Construct library This project will provide for construction of a library building which will house the college library, faculty offices, the student personnel function, and temporarily a snack bar.	–	–	1,489,600
Construct classroom building This project will provide for construction of a multipurpose building with an initial capacity of 914 students (FTE). The building will serve all curriculums and the administration of the college initially. Ultimately it will become a general classroom building.	–	–	1,700,000
Construct boiler plant This project will provide for construction of a boiler plant which will house a central heating and cooling plant. Equipment will be installed to serve a college of 1,000 FTE.	–	–	754,000
Working drawings for site development, phase II This project will provide for working drawings for planning streets, secondary utility runs, sidewalks, and other necessary site development projects including flood control.	–	–	50,000
Initial complement of books This project will provide an initial complement of books for the college library.	–	–	50,000
Initial complement of books—staffing *General Fund* This project will provide the staff needed to process the initial complement of books for the college library.	–	–	25,000

STATE COLLEGES—Continued

California State Polytechnic College

State Polytechnic College provides accredited educational programs at the collegiate level in agriculture, engineering, and the arts and sciences.

The campus at San Luis Obispo is located on a site of 2,838 acres and including existing and funded buildings has a capacity of 6,526 regular students (FTE). An enrollment of 5,800 students (FTE) is anticipated for 1965-66. This budget includes projects to construct parking for 520 cars; site development; and a second increment of equipment for the engineering building.

The Kellogg-Voorhis campus, located near Pomona, has an existing and funded capacity of 5,186 regular students (FTE). An enrollment of 6,150 students (FTE) is anticipated for 1965-66. To accommodate this enrollment this budget includes construction of an engineering addition. Other projects include working drawings for a residence hall cafeteria, construction of parking facilities for 213 cars, and a swimming pool.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM			
PROPOSED 1962-63 EXPENDITURES [a]			
San Luis Obispo Campus:			
Construct parking	–	–	$154,400
This project will provide for construction of new parking facilities with a total capacity of 254 cars and improve 1 existing facility with a capacity of 266.			
Site development	–	–	413,600
This project will provide for the State's share of the cost of expanding the San Luis Obispo sewage treatment plant which is necessary due to the growth of the campus. The project also includes construction of a campus agricultural water distribution system.			
Equip engineering building, phase II	–	–	451,300
This project will provide a second increment of equipment for the engineering building financed by the Budget Act of 1960.			
Minor Projects: [b]			
Install pellet mill	–	–	29,350
Provide fixed louvers on east engineering building	–	–	14,760
Improve mechanical equipment in music building	–	–	10,000
Improve ventilating system in agriculture classroom building	–	–	15,000
Alteration and improvement projects under $5,000	–	–	7,340
Kellogg-Voorhis Campus:			
Construct engineering addition	–	–	5,055,110
This project provides construction for an engineering addition to provide laboratories and auxiliary facilities for electronic, aeronautical, industrial and mechanical engineering. The capacity of this project is 919 students (FTE).			
Construct swimming pool	–	–	298,000
This project provides for the construction of a swimming pool.			
Working drawings for cafeteria	–	–	40,000
This project provides for working drawings for a residence hall cafeteria with a seating capacity of 400 and will include a bakery facility that will serve the entire campus.			
Construct parking	–	–	53,800
This project provides for construction of 2 parking facilities with a combined capacity of 213 cars.			
Minor Projects: [b]			
Instructional equipment for civil engineering program	–	–	29,810
Instructional equipment for machine shop	–	–	20,000
Alterations to roof of beef unit	–	–	9,270
Alteration to gymnasium	–	–	8,400
Alteration and improvement projects under $5,000	–	–	8,200

MARITIME ACADEMY

This school is located at Vallejo and will have an average enrollment of 250 students in 1962-63. Permanent facilities consist of a classroom building, engineering building, administration building, messhall, residence hall, and a gymnasium with pool.

The construction program proposed for 1962-63 consists of minor projects totaling $57,600 necessary to correct deficiencies and to improve the physical plant.

DEPARTMENT OF EMPLOYMENT

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS

For the 1959-60 and preceding fiscal years the Capital Outlay program for the Department of Employment was financed from the Department of Employment Contingent Fund. For the 1960-61 and 1961-62 fiscal years the major part of the funds for this program were appropriated from funds made available to the department under Section 903 of the Social Security Act, as amended (Reed Act). The enabling legislation for this appropriation (Chapter 1814, Statutes of 1959) was enacted in the 1959 legislative session and provided authorization for use of such funds, after appropriation by the Legislature. For the 1962-63 fiscal year it is proposed to continue funding the major part of this program from funds made available under the Reed Act.

The Federal Bureau of Employment Security will provide rental grants to the Department of Employment to amortize the cost of the building projects over a number of years. The amortization amounts will be returned to the Unemployment Trust Fund, thereby restoring to this fund the full amount expended for the building project. Of the total amount of $13,351,082 of Reed Act allocations credited to the Unemployment Fund, an amount of $2,870,191 remains available for appropriation in the 1962-63 fiscal year. If these funds are to be used for administrative purposes, under federal law they must be obligated within 5 years of the date credited to the Unemployment Fund. This restriction makes it necessary that this part of the Capital Outlay request in the amount of $1,335,400 be submitted for consideration in the 1962-63 fiscal year budget.

An appropriation of $396,800 is proposed from the Department of Employment Contingent Fund. Two hundred seventy-one thousand eight hundred dollars of this amount is needed because the proposed construction of additions to existing buildings in Los Angeles, Santa Barbara, and Indio will necessitate substantial alterations to existing buildings. The Bureau of Employment Security will not provide rental grants to amortize these costs if funds made available under the Reed Act are used for alterations. If, however, the alteration work is financed from funds appropriated from the Department of Employment Contingent Fund, the Bureau of Employment Security will provide rental grants to amortize the costs, thereby ultimately returning to the Contingent Fund the amounts expended. Funds for this alteration work will also be requested in the first instance from regular Bureau of Employment Security administrative grants for repair and alteration work and no more will be expended from the Contingent Fund than is necessary, as determined by the action on the federal grants. The remaining $125,000 is proposed to provide alterations to the air-conditioning system in the electronic data processing machine room in the Sacramento Central Office and to provide a new floor for that room. Funds for this alteration work will also be requested in the first instance from regular Bureau of Employment Security administrative grants for repair and alteration work and no more will be expended from the Contingent Fund than is necessary as determined by the action on the federal grants.

The 1962-63 Capital Outlay program of the department may be divided into the following major categories consisting of:

1. Construction of additions to 2 existing buildings to provide facilities required by growth in the communities served by such offices.
2. Construction of an additional building in San Francisco. The additional facilities are needed because of growth in the communities served by the existing offices.
3. Land acquisition adjacent to an existing Department of Employment building to provide for future expansion and adequate parking facilities.
4. Construction of parking lots adjacent to 2 existing Department of Employment buildings to provide adequate parking facilities.
5. Alterations to air-conditioning system in the electronic data processing machine room in the Sacramento Central Office building and replacement of floor of machine room.

This proposed program is essential to protect the investment of the State in the existing land and structures. Buildings previously constructed were built with the expectation that they would be adequate for 10 years. This has been true in a number of locations. In others, accelerated growth in the communities has made the buildings inadequate in less than a 10-year period. In the light of these developments and forecasts of the future, construction of additional buildings and additions to existing buildings is imperative. The program also provides for the acquisition of land for future expansion and the construction of adequate off-street parking facilities for the public. The department is continuing its efforts to build an outstanding employment service in California; and experience here and elsewhere in the nation indicates that suitable premises definitely contribute to employer and applicant acceptance of the program. With properly designed facilities the department can give better service to employers, applicants, and claimants.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[1]

Site acquisition for parking lot—Long Beach This project is to provide more adequate off-street parking area for the public while transacting business at our Long Beach office.	–	–	$100,000
Alter existing building—Los Angeles *Department of Employment Contingent Fund* This project will provide for necessary alterations to the 1400 South Hill Street, Los Angeles building which will bring it up to present day standards.	–	–	173,100
Construct additional building—San Francisco This project will provide an additional building to relieve space needs in our existing San Francisco building, and to provide for future growth.	–	–	750,000
Construct building addition—Santa Barbara This project will provide building addition to correct existing deficiencies and to provide for future growth.	–	–	375,000
Alter existing building—Santa Barbara *Department of Employment Contingent Fund* This project provides alteration work which will include some demolition of existing structure in relation to the construction of the building addition shown above.	–	–	50,000
Construct building addition—Indio This project will provide building addition to correct existing deficiencies and to provide for future growth.	–	–	69,300
Alter existing building—Indio *Department of Employment Contingent Fund* This project provides alteration work which will involve major interior and some exterior demolition of existing building in relation to the construction of the building addition shown above.	–	–	48,700

General Activities

The proposed Capital Outlay program provides in part for the initial complement of equipment for the new San Diego State Building scheduled for completion on November 1, 1962.

New state office buildings are being constructed under the authority of the State Building Construction Act of 1955 and are financed through issuance of revenue bonds or trust certificates by the State Public Works Board. The anticipated expenditures under this program are shown in the Appendix Section of the budget.

Six minor construction projects are also proposed: (1) installation of new water wells for the State Printing Plant; (2) phase II of installing automatic sprinkler system in a portion of the Capitol grounds; (3) alterations to the Library and Courts Building; (4) construction of a new sidewalk for the old Los Angeles State Building; and (5) and (6) installation of air conditioning and shade screens on the 5th floor of the old San Francisco State Building.

STATE BUILDING PROGRAM

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
PROPOSED 1962-63 EXPENDITURES [a]			
Equip San Diego State Building:			
General Fund	–	–	$30,485
This will provide initial complement of equipment for new state office building to be completed November 1, 1962.			
Minor Projects: [b]			
Install water wells for State Printing Plant	–	–	33,700
Install automatic sprinkler system for part of Capitol grounds—phase II	–	–	35,000
Alterations to Library and Courts Building	–	–	15,000
Construct new sidewalk for Los Angeles State Building	–	–	4,400
Install air conditioning on 5th floor in San Francisco State Building	–	–	9,000
Install shade screens on 5th floor in San Francisco State Building	–	–	12,280
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES [c]			
Acquisition of site, planning, construction and equipment of Governor's Mansion:			
General Fund	–	$475,000	–
Elevator modernization, Los Angeles State Building	–	100,000	–
Remodel Capitol Annex	–	262,000	–
Elevator modernization, Office Building No. 1, Sacramento	–	797	–
Remodel 5th floor, Capitol Annex	$74,000	–	–
Expansion of Treasurer's vault	127,500	1,500	–
General Fund			
Los Angeles State Building, alterations and improvements	1,008,000	–	–
Alterations and improvements to existing state buildings, San Francisco	118,184	195,000	–
State Construction Program Fund			

---

[a] From State Construction Program Fund unless otherwise indicated.

[b] Minor projects from General Fund unless otherwise indicated.

[c] Unless otherwise indicated major projects from General Fund in 1960-61 and from State Construction Program Fund in 1961-62; minor projects from General Fund in both years.

State Fair and Exposition

Chapter 1071, Statutes of 1957, appropriated $3,747,843 in 1957-58 and a like amount in 1958-59 from the General Fund together with the proceeds from the sale of present facilities, and Chapter 1072, Statutes of 1957, authorized the State Public Works Board to issue either certificates or revenue bonds in the amount of $6,500,000 annually for a period of 2 years, to finance the construction of buildings and facilities for a new State Fair.

Item 323.1, Budget Act of 1960, extended the availability of Chapter 1071, Statutes of 1957. Availability of the funds was further extended to June 30, 1963, by Section 19.7 of the Budget Act of 1961. This budget does not anticipate expenditures of the major portion of the funds from these sources on the new fair site in the 1962-63 fiscal year; however, it is anticipated that the State's participation in the sewage disposal system for the new fair site will be paid for during the current year.

STATE BUILDING PROGRAM

ESTIMATED 1960-61 AND 1961-62 EXPENDITURES

Payment to Sanitation District No. 2 for sewage disposal at new State Fair site (State's share)	–	$201,912	–
Financial analysis of new State Fair	$10,500	–	–
Preliminary planning for new fair site	2,800	–	–
Minor Projects:			
Alterations and improvements to jockeys' building	7,646	–	–
Improve plumbing utilities	10,231	–	–
Improve electrical utilities	14,337	–	–
Alterations to concession stands	4,772	–	–
Grounds work	7,277	–	–
Alterations and improvements under $5,000	4,854	–	–
TOTAL EXPENDITURES, CAPITAL OUTLAY *(General Fund)*	$62,417	$201,912	–

Sixth District Agricultural Association

(California Museum of Science and Industry)

The California Museum of Science and Industry is located in Exposition Park, in Los Angeles, and contains permanent and special short-term audio-visual educational exhibits, demonstrating the industrial and scientific progress of the State of California and illustrating the importance of industries, industrial enterprises, resources, and products of every kind and nature as a vital factor in the economy of the State of California.

In March 1961 the museum's new Science Wing was officially dedicated with the event being highlighted by the opening of "A World of Numbers and Beyond." This exhibit on the science of mathematics was sponsored entirely by a major firm in the computer industry. Scheduled to be opened to the public during 1961-62 is a permanent exhibit on electronic communications. Indications are that a major phase of the Hall of Health will be completed during the 1961-62 fiscal year. The preliminary research and design of the Hall of Health was completed in July 1961. Committments are being received from private industry to sponsor the Hall of Health, Physics and Chemistry, and Mechanical Science exhibits. In September 1961 the museum through matching funds from the electronics industry installed the first phase of a closed circuit television security program for the Science Wing. The monitor booth was designed to serve as a surveillance center and electronics exhibit. This is the first installation of its kind in a museum in the western United States. The television coverage will be expanded as new exhibits in the Science Wing are completed.

Negotiations are underway with the Federal Government and certain major foundations to secure financial participation to match State funds for the construction of an Atomic Energy Wing authorized by the Legislature in 1960. This wing will display permanent and changing exhibits demonstrating the peaceful uses of atomic energy.

Remodeling of the museum-owned National Guard Armory, which will house the new Space Age Museum, first of its kind in the nation, will be completed in May 1962 with the target date for the opening soon after. This museum was authorized by the Legislature in 1959 and is being developed with major participation from leaders in the aero space industries.

Remodeling of the second floor East Wing of the main museum, which will house the permanent exhibit on the Science of Aviation, will be completed in early 1962. Target date for the opening of a major portion of this new exhibit is late Spring 1962. Final research, design and working drawings covering phase I of this exhibit was completed in late 1961. This exhibit demonstrates through "storytelling-public participation" exhibits the importance of aviation as part of the community and economy of the State. This exhibit is being financed jointly by the State and private industry on a matching fund basis.

The alterations and improvements to the exterior of the museum main entrance will be completed in early 1962. This improvement conforms the old museum structure to the developments within the museum complex in accordance with the approved master plan for the "Cultural Area" within Exposition Park. Improvements to fire protection facilities serving the Los Angeles County Museum and California Museum of Science and Industry will be completed in early 1962. This project is financed jointly by the State (60 percent) and County (40 percent).

Minor projects for the 1962-63 fiscal year include (1) alterations and improvements to change, modify, and update Agricultural Hall, Industry Hall and Mineral Hall to reflect the advancement in exhibit communication methods and techniques to provide more accurate and effective displays; (2) construct a concrete block wall and metal fence as part of the master plan development of the "Cultural Area" in Exposition Park; and (3) construct concrete gutters and curbs along State Drive, which is the main drive used by visitors to and from the museum. The drive was constructed in 1924 and as a result of substantial increase in vehicular traffic, deterioration by the elements and improper drainage, the surface has become unsafe, unsanitary and generally defective throughout. This project will tie in with the Los Angeles County Flood Control Basins to be installed in 1962 at the west end of State Drive.

---

[1] Legislation will be required to extend availability after June 30, 1963.

District Agricultural Associations

DISTRICT FAIR CONSTRUCTION PROGRAM

The detailed expenditure of funds available for Capital Outlay at district and county agricultural fairs and citrus fruit fairs are included in this statement for the purpose of showing the total program for capital improvements at fairs in one place. The amount budgeted for Capital Outlay at county agricultural fairs and citrus fairs is reported in Local Assistance for Other Purposes. The Capital Outlays Programs of the State Fair and Exposition and the Sixth District Agricultural Association are not included in this section but are shown immediately preceding this section.

The 1961-62 and 1962-63 expenditures for Capital Outlay at district and county agricultural fairs and citrus fruit fairs will be met from the continuing appropriation made by Business and Professions Code Section 19630, the allocation of which is approved by the Public Works Board.

The projects shown for each fair are those included in the recommended 5-year program for fairs.

DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL

GENERAL ANALYSIS

This statewide traffic law enforcement agency functions through a Sacramento headquarters, with field offices strategically located throughout the State. The Department operates approximately 1,650 mobile units with approximately 2,700 uniformed officers. Its jurisdiction is principally limited to streets and highways outside incorporated areas.

This budget provides for the construction of a substation at Alta, site acquisition and working drawing funds for an office at Truckee, and the incorporation of the Academy area with the city drainage system. Also proposed in 1962-63 is an additional $128,400 to augment a 1961-62 appropriation of $240,000 for a Highway Patrol combination area and zone office in Fresno.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[1]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Purchase of site for Truckee office building	–	–	$10,000
The present leased location at Truckee is not satisfactory due to space deficiencies. In addition, the recently completed freeway makes the present location undesirable since ingress and egress is difficult. It is proposed that the site will be purchased from the Division of Highways.			
Working drawings—Truckee office	–	–	8,000
Construction of Alta substation	–	–	110,000
The highway has been relocated in this area and the present office will be some distance from the traffic center. In addition, the present leased facility is deficient spacewise.			
Construct office building—Fresno	–	–	240,000
Construct office building—Fresno—phase II	–	–	128,400
It is necessary to augment a 1961-62 appropriation for this combination zone and area office due to the insufficiency of the original appropriation.			
Incorporation with Sacramento city drainage system—academy	–	–	122,000
Due to the city development in the academy area the normal storm runoff to the rear of the state property will shortly be precluded. The city is planning a storm drainage system for this area and has invited the Patrol to participate. A study by the Division of Architecture demonstrates that this procedure will be more economical than an independent system.			
Minor Projects:			
Repair skidpan—emergency vehicle operations course	–	–	15,000
Perimeter landscaping—Acadamy	–	–	24,320
Road improvement—Academy	–	–	7,500
Sewage tie-in—Academy	–	–	18,200

ESTIMATED 1960-61 AND 1961-62 EXPENDITURES[1]

GENERAL ANALYSIS

The Department of Mental Hygiene currently operates 8 hospitals for mentally ill patients, 4 hospitals for mentally retarded patients, 2 hospitals housing both mentally ill and mentally retarded patients, and 2 training and research institutes in conjunction with the University of California. These facilities are distributed throughout the State.

The Langley Porter Neuropsychiatric Institute which was established for teaching and research, and the necessary clinical provisions connected with these functions is operated by the department in conjunction with the University of California Medical School at San Francisco. A similar facility, the Neuropsychiatric Institute, a part of the Los Angeles Medical School of the University of California, was activated in December 1960, and will operate at a rated bed capacity of 188. With the 117 bed capacity of the Langley Porter Institute, a total institute capacity of 305 beds is available.

During the 1960-61 fiscal year, available beds for mentally ill continued to exceed actual population. On June 30, 1961, 36,393 beds for the mentally ill were available which exceeded by 1,012 the actual population of 35,381. It is estimated that capacity will continue to be greater than population through June 30, 1964, at which time capacity will exceed the population by 199. This estimate is based on an anticipated continuing reduction in the hospitalization rate for mentally ill which was 303.2 per 100,000 population in 1950. It is estimated that the rate will be 212 per 100,000 population on June 30, 1962, and further reduced to 180 by June 30, 1968. On June 30, 1962, 36,138 beds will be available for an estimated population of 35,500. The loss in capacity of 255 is due to remodeling and modernization projects now in progress or funded and scheduled deactivation projects. The tables that follow set forth in detail actual and estimated populations and indicate the latest estimates of capacity resulting from presently funded projects.

Additional mentally retarded patients are admitted as bed capacity and related treatment facilities become available, and a moderate amount of overcrowding occurs in order to fully utilize available resources. As of June 30, 1961, 11,305 beds were available. No change in the number of beds for this purpose is anticipated in 1961-62. By June 30, 1963, capacity will have increased to 11,528 due to the conversion of 223 beds from mentally ill to mentally retarded. During 1963-64, 969 currently financed additional beds will be activated giving a net increase of 897 beds bringing total capacity to 12,297 on June 30, 1964. The tables that follow include population and capacity estimates for the mentally retarded.

The major projects proposed in this budget provide for the construction of patient service facilities, remodeling of existing

GENERAL ANALYSIS—Continued

wards, equipment for units nearing completion, and correction of special ward and utility service problems. The construction and installation of additional laundry facilities at Camarillo and Fairview State Hospitals, the construction of an auditorium at Fairview State Hospital and a chapel at Agnews State Hospital together with the remodeling of wards at Mendocino, Patton and Stockton State Hospitals, comprise the principal part of the major project proposals. Also included is a proposal for preparation of working drawings for a receiving and treatu unit at Modesto State Hospital and funds for the initial chase of a site, on which a replacement of Langley Po Neuropsychiatric Institute will be constructed. These proj are explained in more detail in the budgets of the various pitals. Essential minor construction projects are included correct deficiencies and to improve physical plants. These p ects are also detailed in the individual budgets.

* Populations shown are as of the last Wednesday of month.

[1] Population growth for 1964 and 1965 is not allocated by hospital. Population calculated on 200 and 195 patients per 100,000 civilian population for 1964 and 1965, respectively. The excess population can be equalized by transfer of patients.

[2] Populations June 30, 1963, are actual and budgeted. Thereafter population calculated on 80 patients per 100,000 civilian population. Construction needs 1964 and 1965 include overcrowding and waiting list.

[3] Needs in 1964 and 1965 include overcrowding and waiting lists.

DEPARTMENT OF MENTAL HYGIENE—Continued

Langley Porter Neuropsychiatric Institute

This institute, in conjunction with The University of California School of Medicine in San Francisco, operates a research, training, and treatment center in Northern California. It has a rated bed capacity of 117, and in addition operates a large outpatient clinic. Site acquisition funds are included for a site on which a replacement of this institute will be constructed. Minor projects totaling $50,950 are included to correct deficiencies and to improve the physical plant.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM			
PROPOSED 1962-63 EXPENDITURES[a]			
Site acquisition for new institute—partial	–	–	$250,000
This will provide the first phase of acquisition for the replacement of the existing institute. The ultimate replacement will permit an expansion of research activities in the field of mental retardation. The existing institute cannot be economically expanded for additional research activities but can be utilized by the University of California for additional teaching facilities to meet the increasing demands for trained people in medicine and the related fields of medicine.			
Minor Projects:[b]			
Install electrical power line	–	–	5,000
Complete screened play area	–	–	18,100
Improve children's playground	–	–	15,000
Construct general storage building	–	–	5,750
Alteration and improvement projects under $5,000	–	–	7,100

DEPARTMENT OF MENTAL HYGIENE—Continued

Agnews State Hospital

This hospital for the mentally ill had a rated bed capacity of 4,158 as of June 30, 1961. Currently funded projects to be completed during 1962-63 will result in a reduction of 3 beds leaving a total capacity of 4,155 as of June 30, 1963. The major construction program proposed for 1962-63 fiscal year provides for the construction and equipping of a chapel and related facilities. Minor construction projects totaling $118,390 are included to correct deficiencies and improve the physical plant.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM			
PROPOSED 1962-63 EXPENDITURES[a]			
Construct chapel building and related facilities	—	—	$467,400
Equip chapel building and related facilities	—	—	35,000
To construct chapel facilities including related units and to provide necessary and appropriate equipment furnishings.			
Minor Projects:[b]			
Install steam line to ward buildings	—	—	15,000
Remodel and equip special diet kitchen, west area	—	—	39,340
Ground improvement, east area	—	—	45,000
Install new dishwashing machines, ward dining rooms	—	—	5,750
Enclose porches on buildings 22, 24, and 25	—	—	5,100
Alterations and improvement projects under $5,000	—	—	8,200
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES[c]			
Remodel and modernize wards 19 and 21	$206,100	—	—
Equip remodeled and modernized wards 19 and 21	—	$5,000	—

Camarillo State Hospital

This hospital for the mentally ill has a rated bed capacity of 6,242. Projects to be completed during the 1961-62 fiscal year will result in an increase of 19 beds. Previously funded ward remodeling scheduled for completion in 1962-63 will further increase bed capacity by 25 beds, and bring the capacity to 6,286 on June 30, 1963. The major construction program for the 1962-63 fiscal year provides for an addition to the laundry. Minor construction projects totaling $87,090 are included to correct deficiencies and to improve the physical plant and grounds.

DeWitt State Hospital

This hospital for the mentally ill and mentally retarded had a rated capacity of 1931 mentally ill and 477 mentally retarded beds on June 30, 1961. No additional beds are under construction or funded; however, in the 1962-63 fiscal year it is proposed to convert 223 mentally ill beds to mentally retarded. This change will result in a rated capacity of 1,708 mentally ill and 700 mentally retarded beds. Minor construction projects totaling $92,370 are included to correct deficiencies and to improve the physical plant.

Mendocino State Hospital

This hospital for the mentally ill had a rated bed capacity of 2,360 on June 30, 1961. Ward remodeling projects currently financed will result in a reduction of 51 beds by June 30, 1963, leaving a capacity of 2,309. The major construction program proposed for the 1962-63 fiscal year provides for the second phase of remodeling and modernizing wards 7 and F plus the necessary equipment for the project. The remodeling will reduce bed capacity by 145, leaving a capacity of 2,164 upon completion of the project. Minor projects totaling $75,050 are included to correct deficiencies and to improve the physical plant.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

Metropolitan State Hospital

This hospital for the mentally ill had a rated capacity of 3,868 on June 30, 1961. Remodeling and deactivation projects to be completed during the 1961-62 fiscal year will result in a decrease of 94 beds. Major construction proposed for the 1962-63 fiscal year provides for water treatment facilities. Minor construction projects totaling $65,450 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES [a]

Construct water treatment facilities	–	–	$100,000
This project provides for construction of water softening facilities having a capacity adequate to meet the demands of the hospital's daily water requirements.			
Minor Projects: [b]			
Install automatic sprinkler system in attic of ward building	–	–	20,450
Construct curbs and sidewalks	–	–	5,000
Install larger capacity sewage comminutor	–	–	16,500
Install sprinkler system-ward yard	–	–	6,000
Install new water main in west ward area	–	–	10,000
Install cooling facilities in the patients industrial building	–	–	5,000
Alteration and improvement projects under $5,000	–	–	2,500

Modesto State Hospital

This hospital for the mentally ill and mentally retarded had a rated bed capacity of 2,519 mentally ill and 72 mentally retarded beds on June 30, 1961. No additional bed capacity is funded or under construction. Major capital outlay proposed for the 1962-63 fiscal year provides for working drawings for a receiving and treatment unit having a capacity of 200 to 250 beds. Minor construction projects totaling $78,550 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[a]

Working drawings for receiving and treatment unit	–	–	$100,000
This project would provide for preparation of working drawing for a basic unit to serve as a receiving and all-purpose treatment center having a capacity of 200 to 250 beds for acute phychiatric treatment and medical surgical care of patients.			
Minor Projects:[b]			
Alterations to surgery wing	–	–	12,500
Alterations to medical-surgical wards	–	–	6,950
Construct patients toilets and showers	–	–	20,000
Install partitions in toilet areas	–	–	5,000
Install floor covering—wards	–	–	11,000
Modernize electrical fixtures—dining rooms	–	–	6,000
Alteration and improvement projects under $5,000	–	–	17,100

ESTIMATED 1960-61 AND 1961-62 EXPENDITURES[c]

Master plan for new facility	–	$50,000	–
Minor Projects:			
Modernization of medical-surgical wards	–	10,000	–
Replace laundry equipment	–	14,000	–
Install floor covering—wards	–	20,000	–
Addition to laundry building	$5,817	1,893	–
Replacement well	4,904	596	–
Linoleum renewal in corridors	6,019	637	–
Purchase and install larger X-ray machine	20,125	254	–
Construction of clinical laboratory	5,852	334	–
Alteration and improvement projects under $5,000	26,687	14,625	–

DEPARTMENT OF MENTAL HYGIENE—Continued

Patton State Hospital

This hospital for the mentally ill had a rated bed capacity of 4,876 on June 30, 1961. Ward remodeling to be completed during the 1961-62 fiscal year will reduce capacity by 68. Currently funded remodeling scheduled for completion in the 1962-63 fiscal year will decrease capacity by another 68 beds leaving a total capacity of 4,740 on June 30, 1963. Major construction proposed for the 1962-63 fiscal year provides for remodeling of wards, equipment for the remodeled wards, and air conditioning for 2 ward buildings. The remodeling project will reduce the bed capacity by 52. Minor construction projects totaling $69,800 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Remodel wards 14 and 15	–	–	$368,600
Equip remodeled wards 14 and 15	–	–	10,400
These projects are for the remodeling of wards to provide facilities more nearly conforming to present day standards, and equipment for the remodeled wards. This remodeling will reduce bed capacity by 52. All necessary and related mechanical and electrical work is included.			
Air conditioning for 2 ward buildings	–	–	274,000
This project provides for adding a mechanical refrigeration system to the forced air heating and ventilating system, with separate refrigeration system for each ward.			
Minor Projects:[b]			
Replace domestic well No. 2	–	–	15,000
Eliminate fire and safety hazards	–	–	16,300
Construct sidewalks and curbs	–	–	5,000
Install partitions in wards	–	–	5,000
Install dishwashers—wards	–	–	10,200
Improve and widen road	–	–	7,200
Alteration and improvement projects under $5,000	–	–	11,100

Stockton State Hospital

This hospital for the mentally ill had a rated capacity of 3,694 on June 30, 1961. The alterations to Cottage F project, scheduled for completion during the 1961-62 fiscal year, will decrease beds by 20, leaving a capacity of 3,674. In the 1963-64 fiscal year, a net of 98 beds will be added as a result of previously authorized projects. Major construction proposed for the 1962-63 fiscal year provides necessary equipment for alterations made to Cottage F; air conditioning of the new additions to Cottage G; and remodel Cottage 1, which will reduce bed capacity by 11. Minor construction projects totaling $96,000 are included to correct deficiencies and to improve the physical plant.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Equip alterations to Cottage F	–	–	$6,600
To provide additional equipment necessary to furnish treatment and utility space resulting from alterations to this cottage.			
Air condition new additions to Cottage G	–	–	129,000
To provide for the addition of a mechanical refrigeration system to the heating and ventilation systems of the new addition to Cottage G. The project includes the necessary modification of existing system in the original Cottage G areas and includes all other necessary electrical and mechanical work.			
Remodel Cottage 1	–	–	250,000
Equip remodeled Cottage 1	–	–	4,000
This project provides for the necessary alterations to convert this 1-ward building into a 2-ward building to provide for more efficient and adequate patient treatment. The remodeling will result in a reduction of 11 beds. All necessary and related mechanical and electrical work is included. The necessary equipment for the project is also included.			
Minor Projects:[b]			
Remodel cottage A	–	–	16,000
Install sand traps on well No. 4	–	–	6,500
Remodel cottage 9	–	–	9,300
Replace plaster in receiving and treatment building	–	–	20,000
Reroute utility lines	–	–	20,000
Construct yard toilet facilities	–	–	7,000
Demolish abandoned substandard buildings	–	–	10,000
Alteration and improvement projects under $5,000	–	–	7,200

MILITARY DEPARTMENT

GENERAL ANALYSIS

The Capital Outlay program of the Military Department comprises the construction of armories, warehouses, rifle ranges, and other facilities essential to the organization, training, and morale of the California National Guard and the California Air National Guard. The long-range construction program would provide armories and other facilities to house and train all units.

Since the 1951-52 fiscal year the Federal Government under Public Law 783, Eighty-first Congress, has participated in the construction of armories on a cost-sharing basis. Federal funds have been made available on the basis of up to 75 percent of qualifying phases of the construction.

In addition to federal participation in the construction of armories, certain facilities such as motor vehicle storage buildings, warehouses, airplane hangars, and shop buildings primarily for the care and maintenance of federal equipment issued fo state use are financed entirely from federal funds except fo the cost of planning and supervision of construction which is provided by the State.

The 1962-63 Capital Outlay program proposes that present authorized funds be used to construct 6 armories in various areas as approved by the Budget Act of 1957. Delays in construction of armories have occurred due to problems in site acquisition and failure of Federal Government to administratively release sufficient appropriated construction funds to match state appropriations. Minor projects include repairs to the various existing armories and expenditures for site survey and title insurance.

DEPARTMENT OF MOTOR VEHICLES

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

GENERAL ANALYSIS

This service and tax collection agency, headquartered in Sacramento, functions through a network of field offices located in various population centers throughout the State. During the budget year, the department will register and collect the taxes and fees on approximately 9,548,000 vehicles, and issue new and renewed drivers' licenses to about 2,827,300 applicants.

Continued population growth during recent years with the resultant increase in workload, has caused many of the present facilities to be inadequate. This department's capital outlay program provides for state-owned buildings where it has been determined that adequate privately owned leasing facilities at reasonable cost are not available for the department to provide satisfactory services to the people in the area.

Capital outlay expenditures for the budget year provide fo purchase of sites for state office buildings at San Rafael an Bakersfield and for working drawings for a building at Sa Rafael, and for additional off-street parking at the new Sacra mento headquarters office building No. 2.

New construction funds for an El Centro office building ar proposed and a previous appropriation for this purpose whic was insufficient is being reverted.

Minor appropriations in 1961-62 for repair of the Los Angeles office have not proven sufficient and are being augmente in the 1962-63 Budget.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[1]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Purchase of site for office building and parking facilities—San Rafael	–	–	$110,000
The present leased facilities have become inadequate in office space and parking area. Searches in the area have indicated that adequate rental facilities would be very costly. The contemplated location will also serve an area originally planned to be served by a second office, thereby precluding the necessity of an office at the second location.			
Purchase of site for office building and parking facilities—Bakersfield	–	–	250,000
The present leased facilities have become inadequate to handle the workload of this office. Searches in the area have indicated that adequate leased facilities would be very costly.			
Purchase of additional parcels for headquarters parking area—Sacramento	–	–	350,000
This property to be used to provide additional off-street parking facilities for new headquarters building.			
Construct office building—El Centro	–	–	161,800
The present leased facilities are not adequate for the existing staff. The original appropriation for this project (Budget Act of 1957, Item 400(b), reappropriated by Section 10, Budget Act of 1961) was not sufficient to cover latest construction estimates. This old appropriation will be reverted.			
Working drawings—San Rafael	–	–	15,000
Minor Projects:			
Revamp lighting system, second floor—Los Angeles	–	–	10,000
Enlargement of office—Santa Barbara	–	–	15,000
Revamp lighting system, first floor—Los Angeles	–	$20,000	22,500
Alteration of office—Los Angeles	–	45,000	34,900

DEPARTMENT OF CONSERVATION

(Formerly Department of Natural Resources)

Division of Forestry

The capital outlay for the 1962-63 fiscal year includes funds for the acquisition of 2 new conservation camp sites as well as funds to complete acquisition at locations where the acquisition process has already begun. It is proposed to purchase a buffer strip around the Nevada Ranger Unit Headquarters in Nevada City to prevent adverse city development in the area and also to provide land for needed shop and warehouse buildings. Funds are also provided to continue the program of acquiring sites for strategically located fire control stations and lookouts.

Major construction projects include: equipment for the District V headquarters at Monterey; the construction of a barracks and messhall at the Lassen County Ranger Unit; the construction of a warehouse with office at the Butte County Ranger Unit; the construction of a combination barracks and equipment storage facility at the Irvine Lake Forest Fire Station in Orange County; the relocation of the Cambria Forest Fire Station in San Luis Obispo County; the relocation of the Hilton Forest Fire Station in Sonoma County; and water and site development at the Arnold Forest Fire Station in Calaveras County.

The continuing Conservation Camp Program provides for the construction phase of a conservation camp located in Sonoma County; the replacement of deteriorated facilities at the Rainbow Conservation Camp in San Diego County; the initial phase in the construction of 2 new conservation camps; and the equipping of the Mono-Inyo Conservation Camp.

Minor construction provides $313,032 for forest fire station and lookout projects. The larger projects (over $20,000) provide for a barracks kitchen at Warner Springs Forest Fire Station, an office replacement at Middletown, a warehouse at Tehama Ranger Unit headquarters, and a lookout at Shadequarter (Tulare County). Some 33 other projects of too diverse a nature to categorize comprise the balance of this portion of the minor construction request.

Another large portion of the minor construction program proposed consists of conservation camp projects. This portion amounts to $237,800. Most of the projects included are for roads and firebreak construction for fire control purposes.

Two projects proposed for minor construction deal with the small watershed program (P. L. 566). These projects are the application of land treatment features for flood prevention. One of these projects is at Llagas Creek in Santa Clara County where $7,200 is proposed as phase I of a total forestry project of $18,900. Total land treatment costs for all agencies will be $225,300. The other project is at Escondido Creek in San Diego County. This budget proposes $5,000 as a phase I cost. The total forestry project will amount to $12,000 while the total cost to all agencies will be $254,000 for land treatment measures.

STATE BUILDING PROGRAM

PROPOSED 1962-63 EXPENDITURES[a]

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Site acquisition for conservation camps	–	–	$50,000
Purchase of 2 sites plus funds to complete acquisition at locations currently being negotiated.			
Site acquisition for county headquarters	–	–	12,000
Nevada Ranger Unit Headquarters in Nevada County.			
General Fund			
Present site is in the path of city development. These funds will allow acquisition of a buffer strip to prevent adverse development. Also land will be needed for shop and warehouse buildings.			
Site acquisition for lookouts and forest fire stations	–	–	24,100
General Fund			
Various locations.			
To provide funds for continuation of the program of acquiring strategically located fire control stations and lookout sites.			
Engineering, planning and inspection services	–	–	127,944
General Fund			
To provide 8 technical positions, a survey crew, 3 clerical positions, and operating expenses required in connection with the division's Capital Outlay program.			
Equip District V headquarters	–	–	22,480
To provide for necessary equipment in new headquarters building.			
Construct Lassen County Ranger Unit barracks and messhall	–	–	134,250
Equip Lassen County Ranger Unit barracks and messhall	–	–	2,135
To consolidate operations in 1 location. This unit is now operating out of 2 facilities several miles apart.			
Construct Butte County Ranger Unit warehouse with office	–	–	78,950
Equip Butte County Ranger Unit warehouse with office	–	–	6,860
To replace existing facilities which do not warrant remodeling due to age and condition. The existing warehouse was originally an office building and is totally inadequate for warehouse purposes. As a result a portion of the unit's material has to be stored at some distance from the main location.			
Construct Irvine Lake Forest Fire Station combination barracks and 3-bay equipment storage	–	–	115,700
Equip Irvine Lake Forest Fire Station combination barracks and 3-bay equipment storage	–	–	3,384
To construct station to house crew provided in 1957. At present the crew is housed at Orange County Headquarters and makes daily trips to the protection area.			

---

[a] From State Construction Program Fund unless otherwise indicated.

(Formerly Department of Natural Resources)

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Division of Forestry—Continued			
STATE BUILDING PROGRAM—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
Construct Cambria Forest Fire Station	–	–	$87,160
Equip Cambria Forest Fire Station	–	–	1,695
To relocate this station on new site away from ocean. The present station is housed in old steel buildings which are rusting out. The water supply source for the old station has been purchased by the Division of Highways for freeway purposes.			
Construct Hilton Forest Fire Station	–	–	87,075
Equip Hilton Forest Fire Station	–	–	2,195
To relocate station at new site in Russian River area. Old station is located inside the Armstrong Redwoods State Park approximately 3 miles from main highway along Russian River. New site is next to this main highway and will give better access to the protection area of the station.			
Construct Arnold Forest Fire Station water and site development *General Fund*	–	–	10,000
To begin initial phase of construction at new site. Crew is operating from tents at this station.			
Equip Mono-Inyo Conservation Camp	–	–	248,313
This camp is scheduled to open in May 1963. This equipment will be needed to activate the camp.			
Construct Sonoma County Conservation Camp	–	–	524,423
Equip Sonoma County Conservation Camp	–	–	119,445
To provide funds for construction phase of an 80-man conservation camp to house Department of Corrections inmates. Crews from this camp will be available for fire fighting and conservation projects.			
Construct Rainbow Conservation Camp	–	–	461,909
Equip Rainbow Conservation Camp	–	–	54,091
To replace existing barracks, recreation building, messhall, equipment building, shop and warehouse, and oil and gas house at Rainbow Conservation Camp, San Diego County. Facilities to be replaced are inadequate and in need of replacement. Existing structures do not justify the expenditure of funds.			
Construct 2 conservation camps—1st phase	–	–	238,126
Equip 2 conservation camps—1st phase	–	–	71,580
To provide working drawings and site development for 2 80-man conservation camps to house Department of Corrections inmates. Inmates will be used for conservation projects and will be available for forest fire fighting.			
Minor Projects:[b]			
Land Treatment—Watersheds—Road and Firebreak:

DEPARTMENT OF FISH AND GAME

GENERAL ANALYSIS

The proposed 1962-63 Capital Outlay Budget provides for projects in the amount of $310,000. The major projects include funds for the construction of a bioassay laboratory on a site at Nimbus Hatchery near Folsom Dam in Sacramento County. In addition, funds are provided for the Phase II rehabilitation of Hot Creek Hatchery. Phase I rehabilitation was completed with funds made available in the 1961-62 Budget.

The only minor project proposed is the replacement of 3,200 feet of 6-inch water supply line at the Mt. Whitney Hatchery. This system is essential to the supplying of domestic water to 11 permanent residences, to the broodstock ponds, irrigation system and fire fighting facilities. The present line is old and is rusted in many places. Annual repairs have been made for some time and it is no longer practical or economical to continue this practice.

WILDLIFE CONSERVATION PROGRAM

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
PROPOSED 1962-63 EXPENDITURES[1]			
Construction of bioassay laboratory	–	–	$160,000
Funds are provided for the construction of a departmental bioassay laboratory.			
Rehabilitation of the Hot Creek Hatchery—Phase II	–	–	140,000
Rehabilitation consists of constructing road and drainage systems, construction of 12 California-type raceway ponds and water control structures and the installation of a central propane and electrical system.			
Minor Projects:			
Region V—Inland Fisheries:			
Mt. Whitney Hatchery	–	–	10,000
Replacement of 3,200 feet of 6-inch water supply line which is over 11 years old and is rusted in many places.			
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES[1]			
Rehabilitate Hot Creek Hatchery—Phase I	–	$312,500	–
Purchase of building site from Federal Bureau of Reclamation—Tulelake Lake Patrol Station	$497	–	–
Construct additional rearing facilities at San Joaquin Hatchery	38,620	–	–
Construct shop and garage at Mojave Hatchery	45,075	–	–
Remodel hatchery structure at Mt. Shasta Hatchery	66,669	–	–
Minor Projects:			
Region I—Headquarters:			
Devil's Garden Unit:			
Construct storage building	2,539	–	–
Region I—Inland Fisheries:			
Cedar Creek Hatchery:			
Staff housing additions	8,649	–	–
Red Bluff Screen Shop:			
Dixon Ditch, Thomas Creek	–	2,250	–
Clear Creek Falls	–	2,725	–
Battle Creek, Shasta County	—121 [e]	2,470	–
Antelope Creek, Tehama County (West Ditch)	63	2,652	–
Antelope Creek, Tehama County (East Ditch)	62	2,653	–
Yreka Screen Shop:			
Fish screens, perforated plate, various locations	–	1,000	–
Scott River, Siskiyou County:			
Farmer's Co-op No. 1	—156 [e]	313	–
Farmer's Co-op No. 2	—730 [e]	1,042	–
Repair Ladder—Ward Dam:			
Diversion, Mill Creek	–	5,000	–
Region I—Game Management:			
Doyle State Game Area:			
Construct storage cabin	1,128	–	–
Region II—Headquarters:			
Remodel warehouse	3,755	–	–
Region II—Inland Fisheries:			
Central Valley Hatchery:			
Rewire hatchery	4,732	–	–
Construct Intake Dams:			
Greenhorn	60	–	–
Fiddle Creek	—116 [e]	–	–
Elk Grove Screen and Ladder Shop:			
Rewire shop	926	574	–
Stream Flow Maintenance:			
Construct Wheeler Lake saddle dam, Alpine County	1,076	–	–
Construct Winnemucca Lake saddle dam, Alpine County	1,076	–	–
Region II—Game Management:			
Gray Lodge Waterfowl Management Area:			
Construct check station restrooms	6,201	–	–
Drill well at check station	663	–	–
Enclose equipment shelter for shop	5,359	–	–
Grizzly Island Waterfowl Management Area:			
Repair bridge	2,761	3,239	–
Construct bulkhead extension	18,605	–	–

---

DEPARTMENT OF FISH AND GAME—Continued

Wildlife Conservation Board

Continuation of the acquisition, construction, and improvements of wildlife conservation projects is planned. The $9,000,000 appropriated by Chapter 1327, Statutes of 1947, the $3,000,000 in revenue provided by Chapter 1401, Statutes of 1951, and the revenue of $750,000 each fiscal year provided by subsequent legislation such as Chapter 1313, Statutes of 1955, and Chapter 1828, Statutes of 1959, has been allocated to projects by the Wildlife Conservation Board. The budget reflects the actual and estimated expenditure of funds previously allocated to specific projects by the Wildlife Conservation Board, and estimated expenditures from revenue.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
WILDLIFE CONSERVATION PROGRAM			
PROPOSED 1962-63 EXPENDITURES[1]			
Warm water and other fish projects	–	–	$900,129
For the acquisition and development of additional warm water fish lakes in various parts of the State.			
Flow maintenance and stream improvement projects	–	–	58,600
For the construction of small dams to provide stream flow during summer months and for stream clearance. This will improve the fishing on many miles of streams.			
Fish screen and ladder projects	–	–	50,000
To prevent loss of fish through water diversions and to permit passage of fish over stream obstructions.			
Waterfowl projects	–	–	75,000
For the acquisition and development of waterfowl management areas to provide for duck depredation control and public hunting.			
General projects	–	–	633,563
For the preservation and restoration of wildlife and to provide roads, trails, and parking areas to assist in access to ocean beaches and fishing and hunting areas.			
Special projects	–	–	5,000
For projects evaluation, land acquisition, and engineering studies of potential projects by the Wildlife Conservation Board staff.			
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES[1]			
Fish hatchery and stocking projects	—$542 [e]	$29,960	–
For construction and equipping of facilities for fish hatching and stocking.			
Warm water and other fish projects	245,021	665,825	–
For the acquisition and development of additional warm water fish lakes in various parts of the State.			
Flow maintenance and stream improvement projects	29,668	35,395	–
For the construction of small dams to provide stream flow during summer months and for stream clearance. This will improve the fishing on many miles of streams.			
Fish screen and ladder projects	–	50,000	–
To prevent loss of fish through water diversions and to permit passage of fish over stream obstructions.			
Waterfowl projects	141,154	55,375	–
For the acquisition and development of waterfowl management areas to provide for duck depredation control and public hunting.			
General projects	131,592	455,141	–
For the preservation and restoration of wildlife and to provide roads, trails, and parking areas to assist in access to ocean beaches and fishing and hunting areas.			
Special projects	1,268	5,000	–
For projects evaluation, land acquisition, and engineering studies of potential projects by the Wildlife Conservation Board staff.

DIVISION OF SMALL CRAFT HARBORS			
Development loan (Lake Elsinore)	–	–	$750,000
TOTAL EXPENDITURES, CAPITAL OUTLAY	$11,452,987	$11,459,319	$9,490,951
General Fund	–	*11,459,319*	*8,740,951*
State Beach and Park Fund	*11,452,987*	–	–
Small Craft Harbor Revolving Fund[2]	–	–	*750,000*

The Capital Outlay program proposed for this department in the 1962-63 fiscal year consists of two parts: (1) expenditures proposed for projects pertinent to the program of the Division of Beaches and Parks and (2) expenditures proposed for projects originating with the Division of Small Craft Harbors.

The new appropriations proposed for the State Park System consist of $532,000 for site acquisition and $6,000,000 for development. Only two items are proposed for site acquisition: (1) purchase of Bureau of Land Management lands for recreational use at $2.50 an acre on an annual allotment of 12,800 acres and (2) a lump sum amount to provide the means whereby sites with unusual recreational potential, which become available from time to time, may be purchased as the opportunity is afforded. The expenditure of funds from this proposed opportunity purchase item would only be made after careful consideration of the State Public Works Board. All future site acquisition projects for the State Park System will be the subject of a bond issue to be proposed.

A new $6,000,000 development program is proposed, consisting of major construction projects at 19 locations amounting to $4,882,665 and minor construction projects at 39 locations amounting to $1,117,335. The major construction program will provide 693 new campsites and 104 new picnic sites to meet the increasing public demand. The new camping facilities are proposed at Atascadero Beach, Butano, Clear Lake, Folsom Lake, Grover Hot Springs, Henry Cowell Redwoods, Humboldt Redwoods, La Costa Beach and McGrath Beach. Boating facilities are proposed at Angel Island, Benicia Beach, Clear Lake, Folsom Lake, and Millerton Lake. Additional redevelopment and restoration is proposed at Columbia Historic State Park, Pueblo de Los Angeles, and Monterey Monuments.

A major development is proposed for Ocean Beach in the City of San Diego. Upon completion of this development, the area will be maintained and operated by the City of San Diego.

Funds are proposed to complete the visitor center development at Hearst-San Simeon State Historical Monument as well as to provide an adequate road to handle the increased travel necessitated by the additional tours.

---

[1] Appropriations reported for the 1960-61 fiscal year are from the State Beach and Park Fund. Appropriations reported for the 1961-62 and 1962-63 fiscal years are from the General Fund.

[2] A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals.

DEPARTMENT OF PARKS AND RECREATION

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

A project is proposed at Seacliff Beach State Park to relocate the service area and provide a larger public use area on the beach.

The minor construction program consists of a variety of projects aimed primarily at providing increased public access and use as well as preserving the natural areas of the State Park System.

Several items within minor construction merit comment. An office building is proposed for $20,000 at Folsom State Park to house the regional planning team which is presently working in Sacramento. Physical separation of the regional planning team from headquarters office is considered desirable. Two other regional offices are located at Monterey and Goleta. This facility will also release needed space at the headquarters location.

An item of $20,000 is provided for final site development to complete the Donner Memorial Museum where increasing costs resulted in the construction cost exceeding the appropriation originally made for this purpose in 1957.

Extensions of old appropriations amounting to $1,889,340 and amounts currently available and extended into the budget year in the amount of $319,611 together with the new appropriation of $6,532,000 accounts for the total proposed expenditure program of $8,740,951.

Expenditures proposed for projects originating with the Division of Small Craft Harbors consist of a development loan in the amount of $750,000 to the Division of Beaches and Parks under provisions of Chapter 2056, Statutes of 1961, which will be used at Lake Elsinore State Park for the purchase of water for filling the lake and providing boating facilities. Use fees collected from the public are set forth as the source of revenue provided to repay the loan.

REAL PROPERTY ACQUISITION[3]

PROPOSED 1962-63 EXPENDITURES

New Appropriations

	Actual 1960-61	Estimated 1961-62	Proposed 1962-63
Public domain lands controlled by the United States Department of Interior, Bureau of Land Management	–	–	$32,000
Land is available for recreational purposes at a fee of $2.50 per acre. State and local agencies are authorized to acquire up to 12,800 acres per year for the years 1960, 1961, and 1962. After 1962 maximum authorization is for 6,400 acres per year. These lands can be acquired to assist in completion of acquisitions at existing state parks.			
Opportunity purchases of park lands	–	–	$500,000
At various times, sizeable land holdings become available to the State at favorable prices which would provide prime recreational developments for the public. In order to take advantage of these opportunities this item is proposed. Purchases from this item would be subject to review of the State Public Works Board as to intended use proposed and price.

e Unexpended balances previously reported as expended in a prior year.

[11] Budget Act of 1959, Section 8.6 transferred $250,000 from Royal Palms, $100,000 from Palos Verdes Beach Access, $150,000 from Livingston Upland, $400,000 from La Mirada and $100,000 from Surfriders Beach to Santa Monica and Point Dume.

[20] Augmented from savings $40,000.

[21] Augmented from savings $3,200.

[22] Augmented from savings $20,000.

[23] Augmented from savings $33,936.

[24] Augmented from savings by $19,000.

[25] Chapter 1713, Statutes of 1959 reappropriates the unexpended balance set forth for Thornton and Miramontes Beach acquisition in Item 400.1 of Budget Act of 1956 for acquisition of Francis-Dunes, Montara, Pomponis and Pescadero Beaches. Budget Act of 1960, Item 347.1 transferred $200,000 to development.

[26] Reconciliation of this total to the original appropriation follows:

Budget Act of 1956, Items 400, 400.1 and 400.3	$29,366,045
Transfers from Item 400(h) (Columbia Historic) to Development	—250,000
Reversion of Item 400(gg) (Henry Cowell Redwoods), Budget Act of 1959, Section 10	—60,000
Transfer from Item 400.3 (Reservoir Areas) to the Department of Water Resources	—300,000
Transfer to Development, Budget Act of 1960, Item 347.1	—200,000
Budget Act of 1956, Items 400, 400.1 and 400.3 (Adjusted)	$28,556,045

[27] Chapter 287, Statutes of 1959, redefined areas to be acquired at Mount Tamalpais.

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1962-63 EXPENDITURES

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Angel Island State Park:			
Pier replacement	–	–	$92,091
Boating facilities	–	–	19,568

The existing pier is about 50 years old and badly infested by wood-eating insects. The pier structure above waterline is badly rotted and steel supporting members are corroded beyond salvage. A new concrete structure is needed because of its more permanent nature and the fact that all vessels now landing at the island use this facility.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Atascadero Beach State Park:			
Roads and parking	–	–	69,385
Utilities—electric	–	–	2,160
Utilities—gas system	–	–	2,256
Utilities—water system	–	–	13,429
Camp units (100)	–	–	21,000
Sanitary facilities	–	–	67,200
Office building	–	–	9,600
Grading and landscaping	–	–	3,150
Signs	–	–	840

The need for more overnight camping facilities in this area is urgent as indicated by the large number of cars turned away from the campground at Morro Bay State Park (7 miles south). Overnight use of this prime state-owned beach area will help alleviate the pressure on existing camping facilities which do not come close to meeting present, much less future, demands.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Benicia Beach State Park:			
Picnic units (100)	–	–	16,636
Roads and parking	–	–	116,201
Sanitary facilities	–	–	59,930
Harbor dredging	–	–	88,843
Area cleanup	–	–	5,562
Channel erosion and bank protection	–	–	41,640
Office and contact station	–	–	27,760

---

* Expenditures for Riders' and Hikers' Trails are shown in a separate section.

DEPARTMENT OF PARKS AND RECREATION—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Division of Beaches and Parks—Continued			
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
Benicia Beach State Park—Continued			
Utility and shop building	–	–	$13,880
Grading and landscaping	–	–	33,323
Utilities—water system	–	–	44,396
Utilities—electric	–	–	11,125
Utilities—sewage	–	–	55,521
The widespread use of the Delta and the Carquinez Strait area for water recreation plus the increasing population growth in the area make development of the park increasingly necessary. No state parks exist in Solano County at the present time and this is one of the only projected boat use areas on Carquinez Strait which has natural protection from wind and currents.			
Butano State Park:			
Camp units (90)	–	–	21,780
Roads and parking	–	–	90,130
Bridges, vehicular	–	–	11,025
Sanitary facilities	–	–	45,500
Office building	–	–	11,000
Residence and garage	–	–	18,500
Utility and shop buildings	–	–	12,800
Utilities—water system	–	–	50,484
Utilities—electric	–	–	16,560
Utilities—telephone	–	–	960
Signs	–	–	250
Forestry projects	–	–	7,250
Trails and footbridges	–	–	3,750
Clearing and grubbing	–	–	5,000
Area cleanup	–	–	4,500
There are no coastal state park campgrounds between San Francisco and Santa Cruz. These developments are requested for the relief of the extreme stortage of camping facilities.			
Clear Lake State Park:			
Roads and parking	–	–	29,432
Boating facilities	–	–	4,300
Camp units (11)	–	–	2,563
Grading and landscaping	–	–	68,700
Trails and footbridges	–	–	4,100
Utilities—electric	–	–	1,035
Utilities—water system	–	–	4,600
Sanitary facilities	–	–	17,500
Area cleanup	–	–	2,560
This proposal will add 11 camp sites to be developed on the lake shore. Development at this stage calls for the placement of fill by dredging to raise portions of this area above high lake level, making complete development possible in the future. It will also make possible the development of a swimming beach and related parking area, boat mooring facilities, boat ramp and parking area, none of which now exist.			
Columbia Historic State Park:			
Historic building restoration	–	–	60,000
Continuous restoration program work will primarily consist of strenghthening and/or replacing foundations, restoring walls, roofs, and other elements to their original condition.			
Folsom Lake State Park:			
Area cleanup	–	–	6,800
Camp units (100)	–	–	25,500
Sanitary facilities	–	–	49,750
Office and contact station	–	–	8,850
Utility and shop buildings	–	–	11,500
Residence and garage	–	–	19,000
Fencing	–	–	2,400
Boating facilities	–	–	25,000
Roads and parking	–	–	84,600
Utilities—water system	–	–	118,800
Utilities—electric	–	–	23,400
At present there are no overnight facilities in this park. A very large portion of the visitors continuously express a desire for camping facilities. Recreation facilities exist, properties ideally suited for camping also exist and the public demand indicates the urgency of developing an initial campground of at least 100 units. The Peninsula Area

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
Division of Beaches and Parks—Continued			
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
Folsom Lake State Park—Continued			
of this park comprises sufficient state-owned land to accommodate 5,000 overnight users in family and group campgrounds. An initial development of 100 family camp units developed in accordance with the approved Master Plan will have a very high yearly unit use.			
Grover Hot Springs State Park:			
Area cleanup	–	–	$5,000
Camp units (100)	–	–	39,000
Sanitary facilities	–	–	53,250
Utilities—electric	–	–	11,000
Utilities—water system	–	–	26,000
Roads and parking	–	–	112,450
Signs	–	–	2,400
This is the only State Park in Alpine County and is located in one of the State's best known hunting and fishing areas. The 12 present camp units are pathetically inadequate to meet public needs and desires.			
Hearst San Simeon State Historical Monument:			
Roads and parking	–	–	275,610
Site development—visitor center area	–	–	282,820
The road from the visitor center to the castle is being serviced 5 days a week to keep it in operating condition at a total cost to date of over $30,000 for labor and materials. A standard road to adequately and safely handle increasing bus traffic is badly needed. The parking lot at the visitor center area does not accommodate the large number of cars needing parking space during the summer months. A larger parking area is therefore proposed. Also landscaping around the 2 permanent buildings presently in existence will control the wind so that costly large buildings and windbreaks will not be necessary for protection of the many visitors waiting for their tour.			
Henry Cowell Redwoods State Park:			
Roads and parking	–	–	39,482
Sanitary facilities	–	–	37,275
Camp units (85)	–	–	17,850
Office and contact station	–	–	4,000
Park residence	–	–	18,500
Grading and landscaping	–	–	3,100
Fencing	–	–	4,500
Utilities—electric	–	–	1,695
Utilities—sewage	–	–	2,700
Utilities—water system	–	–	44.531
This will be the first phase in the development of a 400-unit campground in this section of the park. The campground is close to Santa Cruz and its associated beaches as well as being easily accessible via Highway 17 from the large San Jose metropolitan area. This development will help relieve the serious shortage of camping facilities in Santa Cruz County.			
Humboldt Redwoods State Park:			
Area cleanup	–	–	8,550
Roads and parking	–	–	31,250
Utilities—water system	–	–	16,850
Utilities—electric	–	–	7,650
Sanitary facilities	–	–	44,100
Campfire center	–	–	8,000
Camp units (55)	–	–	8,250
To increase the facilities at Hidden Springs by adding 55 camp sites and two comfort stations with necessary adjuncts.			
La Costa Beach State Park:			
Roads and parking	–	–	109,500
Sanitary facilities	–	–	34,375
Trails and footbridges	–	–	18,750
Relocating or razing structures	–	–	10,000
Camp units (52)	–	–	7,280
Grading and landscaping	–	–	8,190
Lifeguard facilities	–	–	1,500
Office and contact station	–	–	3,125
Fencing	–	–	9,560
Utility and shop buildings	–	–	15,625
Utilities—electric	–	–	6,050

DEPARTMENT OF PARKS AND RECREATION—Continued

Division of Beaches and Parks—Continued

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
PROPOSED 1962-63 EXPENDITURES—Continued			
La Costa Beach State Park—Continued			
Utilities—gas station	–	–	$2,500
Utilities—sewage	–	–	133,125
Utilities—water system	–	–	10,780
This is the only state park on the 123-mile San Diego County coastline to provide overnight beach camping facilities. The demand in this area is especially great due to the close proximity of the vast San Diego-Los Angeles population centers. The existing facilities are far below state park standards in health, comfort and safety.			
McGrath Beach State Park:			
Roads and parking	–	–	78,450
Camp units (100)	–	–	21,000
Grading and landscaping	–	–	27,140
Sanitary facilities	–	–	67,200
Signs	–	–	1,050
Utilities—electric	–	–	3,000
Utilities—water system	–	–	10,585
To alleviate the camping shortage in this section of Southern California it is proposed to add 100 camp units, 2 comfort stations and 2 combination buildings.			
Millerton Lake State Park:			
Boating facilities	–	–	245,045
Office building	–	–	10,000
Sanitary facilities	–	–	10,500
Utilities—sewage	–	–	4,725
Utilities—electric	–	–	3,350
Millerton Lake is one of our most popular parks; therefore, continuous development is necessary to meet the public's demands. This phase of the development will consist of constructing four boat ramps, an office and contact station and a comfort station.			
Monterey State Historical Monuments:			
Grading and landscaping	–	–	73,535
This block is to be developed as a landscaped plaza in co-operation with an Urban Renewal Project instituted by the City of Monterey.			
Ocean Beach State Park:			
Roads and parking	–	–	234,330
Office and contact station	–	–	18,000
Lifeguard facilities	–	–	24,000
Sanitary facilities	–	–	126,000
Utility and shop buildings	–	–	14,400
Picnic units (4)	–	–	38,400
Fencing	–	–	17,400
Utilities—sewage	–	–	11,760
Utilities—electric	–	–	51,600
Utilities—telephone	–	–	12,000
Utilities—water system	–	–	24,830
Grading and landscaping	–	–	6,210
This undeveloped beach area is within the city limits of San Diego and adjoins a populated residential and commercial section. The beach receives moderate to heavy use throughout the entire year. There are inadequate sanitary facilities as well as inadequate lifeguard facilities for public protection. The public now competes with local residents for curbside parking on adjoining residential and commercial streets. Since parking is inadequate some people are not able to use this beach. The construction of these facilities will help to eliminate this problem.			
Pueblo de Los Angeles State Historical Monument:			
Historic building restoration	–	–	400,000
This work is the next logical phase to be completed for the overall restoration of the Pueblo de Los Angeles project.			
San Francisco Maritime State Historical Monument:			
Relocating or razing structures	–	–	69,000
Funds to reimburse San Francisco Port Authority for relocating facilities and buildings at Hyde Street Pier.

ACQUISITION AND RESTORATION OF HISTORIC SHIPS

Analysis

Because of the part played by the early day sailing and steam schooners in the development of California, this project was established to create a fitting monument. The expenditures are for restoration and rehabilitation to make them ready f exhibit purposes.

ACQUISITION, DEVELOPMENT AND IMPROVEMENT OF STATE PARK IN SAN FRANCISCO

Analysis

This project includes the acquisition and development of a site for a state park to be located in the City of San Francisco. Budget Act of 1956, Item 400.2 appropriated $2,000,000 for this purpose. Budget Act of 1958, Item 417, transferred $276,000 from this appropriation to augment an appropriation made for the acquisition and restoration of historic ships. Budget Act of 1961, Section 10, extends the appropriation to June 30, 1962.

Acquisition of real property and development of a state park in San Francisco	$195,774	$776,671	$739,555
TOTAL EXPENDITURES (State Park in San Francisco)	$195,774	$776,671	$739,555

RIDERS' AND HIKERS' TRAILS

Analysis

The Riding and Hiking Trail, authorized by Chapter 112, Statutes of 1946, was to be a 3,000-mile statewide loop. This was later amended to authorize secondary trails after completion of the statewide loop. Chapter 1536, Statutes of 1955, authorized lateral trails concurrently with the statewide loop to accelerate the program and provide more effective use.

ESTIMATED 1960-61 AND 1961-62 EXPENDITURES

ACQUISITION AND DEVELOPMENT AT SQUAW VALLEY STATE PARK

Analysis

Budget Act of 1960, Item 173, provided funds for additional support and for capital outlay payable upon executive order of the Director of Finance. Budget Act of 1961 extends to June 30, 1962 schedules (a), (b), (c), (d) and (e) of the appropriation.

[1] These items are proposed for extension of availability until June 30, 1963 by special section in the budget act. Expenditure of the funds is contingent upon the acceptance of a master plan at this facility.

[2] Budget Act of 1960, Item 347.1 made $200,000 available for development of state-owned beaches in San Mateo County and Sectic 13 of the same act made $100,000 available for development at Columbia Historic State Park.

[3] This budget proposes a transfer of $50,000 to development at Humboldt Redwoods State Park (Bull Creek Unit) from fun extended in Chapter 2024, Statutes of 1959.

[4] Includes $100,000 made available for development at Columbia Historic State Park.

[5] Appropriations reported for the 1960-61 fiscal year are from the State Beach and Park Fund. Appropriations reported for tl 1961-62 and 1962-63 fiscal years are from the General Fund.

[6] This budget proposes a transfer of $50,000 to development at Humboldt Redwoods State Park (Bull Creek Unit) from funds extend in Chapter 2024, Statutes of 1959.

[7] Includes $200,000 made available for development of San Mateo Beaches State Park.

Division of Small Craft Harbors

DEVELOPMENT LOAN TO DIVISION OF BEACHES AND PARKS

Chapter 2056, Statutes of 1961, authorizes a loan to the Division of Beaches and Parks for purchasing water for filling and replenishment of water and for the construction of necessary recreational facilities at Lake Elsinore State Park. This loan is to be made on the same terms as loans made to local agencies. Funds for the loan of $750,000 are to come from the Small Craft Harbor Revolving Fund and are to be repaid from revenues collected by the Division of Beaches and Parks for use of the facilities provided.

Development of Lake Elsinore recreational area	–	–	$750,000
Small Craft Harbor Revolving Fund [2]			

---

[1] State Beach and Park Fund abolished by Chapter 892, Statutes of 1961 and balance transferred to General Fund.

[2] A nonrevenue fund. Neither this revenue nor the expenditures are included in the budget totals.

GENERAL ANALYSIS

In accordance with the provisions of Chapter 124, Statutes of 1955, the California Olympic Commission, in co-operation with other organizations, provided facilities for, promoted participation in, and staged the VIII Olympic Winter Games in Squaw Valley, February 18-28, 1960.

Currently the commission is engaged in terminating its fiscal affairs. The life of this commission will terminate June 30, 1962, in accordance with Chapter 2035, Statutes of 1961.

DEPARTMENT OF PUBLIC HEALTH

The Department of Public Health, in co-operation with local health departments, is responsible for the prevention of disease and the provision of a healthful environment for the people of California.

Additional space is required to provide for present needs, normal expansion, and special project research. Of primary need, is expansion of the Division of Laboratories facilities; it provides laboratory services to the department and local health departments without laboratories; and also more advanced services to local areas with laboratories. In addition to the overcrowding within the existing state building, 16,680 square feet of office space is also rented.

The proposed Capital Outlay program includes the acquisition of a small parcel of land contiguous to the Public Health Building in Berkeley during the current year and the completion of working drawings in the budget year. These expenditures have been authorized in prior budgets.

GENERAL ANALYSIS

The proposed expenditure program for highways is related to allocations of Federal Aid subventions and increased rates and fees for motor vehicle fuel and diesel fuel tax and motor vehicle registration and weight fees, which expired in the 1959-60 fiscal year, but were extended by the 1959 Legislature.

Recapitulation of Proposed Expenditures and Obligations for Construction of State Highways for 1962-63 Fiscal Year, Showing Allocation of Construction Funds by County Group, Pursuant to Section 188, Streets and Highways Code

EXPENDITURE CATEGORY	NORTHERN COUNTY GROUP	SOUTHERN COUNTY GROUP	TOTAL	
Major construction and improvement projects	$144,428,500	$165,545,000	$309,973,500	
Thin blanket program and deferred seal coat	3,035,100	1,957,000	4,992,100	
Traffic stripe, pavement markings, and signs	900,000	1,100,000	2,000,000	
Construction engineering	16,000,000	15,000,000	31,000,000	
Minor improvement and betterment	550,000	450,000	1,000,000	
Rights-of-Way	50,805,238	85,022,079	135,827,317	
Preliminary engineering and design	17,000,000	18,000,000	35,000,000	
Bank protection and damage repair—Eel River	100,000	–	100,000	
Contingencies	3,667,553	3,715,899	7,383,452	
Totals, Reconditioning, Resurfacing, and Construction of State Highways[a]	$236,486,391	$290,789,978	$527,276,369	
State aid county highways, federal, and matching funds[b]	2,900,000	1,300,000	4,200,000	
Federal aid secondary urban extensions[c]	414,500	1,000,000	1,414,500	
Railroad grade separations[d]	2,250,000	2,750,000	5,000,000	
Totals, Expenditures Subject to Allocations Under Section 188, Streets and Highways Code	$242,050,891 (45%)	$295,839,978 (55%)	$537,890,869 (100%)	

---

[a] Excludes honor camp construction which is not subject to allocations by county group pursuant to Section 188.7, Streets and Highways Code.

[b] Included in county group allocation pursuant to Section 2210.5, Streets and Highways Code.

[c] Included in county group allocation pursuant to Section 143.3, Streets and Highways Code.

[d] Railroad grade separation allocation to cities and counties pursuant to Section 190, Streets and Highways Code.

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
RECONCILIATION WITH APPROPRIATIONS			
State Highway Fund			
APPROPRIATIONS			
Continuing appropriation prescribed by Section 183, Streets and Highways Code (Expenditures)	$329,536,910	$302,237,797	$259,860,952
Bank protection and damage repair along the Eel River:			
Budget Act appropriation	–	100,000	–
Prior Year Balance Available:			
Budget Act of 1961, Item 340.1	–	–	100,000
Balance available in subsequent year	–	—100,000	–
Total Expenditures, Eel River	–	–	$100,000
San Diego—Coronado Crossing Engineering and Design Studies:			
Budget Act appropriations	–	$525,000	–
Prior Year Balance Available:			
Budget Act of 1961, Item 402.2	–	–	225,000
Available in subsequent year	–	—225,000	—225,000
Total Expenditures, San Diego—Coronado Crossing	–	$300,000	–
TOTAL EXPENDITURES (State funds)	$329,536,910	$302,537,797	$259,960,952
Note:			
In addition to the amounts expended for state highways the following amounts are expended for or on behalf of local streets and highways and other agencies:			
Local Streets and Highways:			
State Funds:			
City streets construction and maintenance (Sections 194 and 2107, Streets and Highways Code)	$35,684,992	$34,787,596	$36,616,548
City streets, engineering administration (Section 2107.5, Streets and Highways Code)	1,341,254	1,500,000	1,500,000
Grade crossing protection, Chapter 1739, Statutes of 1953, Budget Acts of 1956 and 1958, and Chapter 2042, Statutes of 1959, Budget Act of 1960	139,986	226,555	400,000
Railroad grade separations, Chapter 2091, Statutes of 1957	4,464,531	3,400,286	5,000,000
Aid to counties, federal aid matching (Section 2210.5, Streets and Highways Code)	4,512,113	6,199,286	4,200,000
Federal aid secondary urban extensions (Section 143.3 of Streets and Highways Code)	859,000	1,380,500	1,414,500
Totals, State Funds	$47,001,876	$47,494,223	$49,131,048
Other Funds:			
County Highway Construction—Federal Aid Secondary:			
Federal funds	$7,940,639	$12,640,820	$9,215,600
Contributions—FAS projects (counties)	2,899,617	2,365,872	–
Contributions—FAS urban extension (cities)	439,581	124,950	–
Total County Highway Construction—FAS	$11,279,837	$15,131,642	$9,215,600
Emergency Damage Repairs—County and Other Agencies:			
Federal funds	$221,291	$475,247	–
Contributions	19,251	78,395	–
Total Emergency Damage Repairs	$240,542	$553,642	–
Totals, Other Funds	$11,520,374	$15,685,285	$9,215,600
TOTALS, LOCAL STREETS AND HIGHWAYS	$58,522,255	$63,179,507	$58,346,648
Work for other agencies	3,220,282	481,754	–

Detail of Major Project Allocations for Construction of Highways and Bridges as Recommended by the California Highway Commission for the 1962-63 Fiscal Year

COUNTY	ROUTE	DESCRIPTION	APPROXIMATE MILEAGE	ESTIMATED COST
		NORTHERN GROUP OF COUNTIES		
Alameda	5	Distribution structure to 0.3 mile west of Grand Avenue; landscape	2.3	$170,000
Alameda	5	0.3 mile west of Grand Avenue to Park Boulevard; landscape	1.2	195,000
Alameda	5	0.25 mile west of Buell Street to Kuhnle Avenue; grade, pave, and structures	1.1	4,200,000
Alameda	5	East city limits of Oakland near Durant Avenue to 0.5 mile east of Sybil Avenue; grade, pave, and structures	1.9	4,500,000
Alameda, Contra Costa	69, 7	North of El Cerrito Overhead to San Pablo Dam Road; median barrier	4.7	115,000
Alameda	69	First Avenue Interchange; structure and approaches	–	400,000
Alameda	75, 206, 227	West of Route 227 to Caldecott Tunnel (portion); grade, pave, and structure	1.5	2,715,000
Alameda	108	Alden Lane to El Caminito; grade and pave	0.9	95,000
Alameda	226	Posey Tube; entrance revisions, lighting, ventilation, and tiling	–	1,100,000
Alameda	227	Carson Street to New Route 5 near Calaveras Avenue; grade and structure	0.6	600,000
Alameda, San Joaquin	110	Route 5 west of Tracy to Route 110-B 6 miles west of Vernalis; grade, pave, and structures	11.5	6,080,000
Alpine	23, 24	0.3 mile east of Woodfords to 2.6 miles east of Picketts; grade, pave, and structures	3.8	1,070,000
Alpine	24	Raymond Meadow Creek Bridge No. 31-10; bridge and approaches	–	65,000
Amador	34	2.5 miles east of Corral Flat to 2.5 miles west of Alpine County line; grade and pave	8.7	1,180,000
Butte	3	Little Chico Creek to East First Avenue; grade, pave, and structures	1.3	1,700,000
Butte	21	West Branch Feather River Bridge No. 12-134; bridge and approaches	–	615,000
Calaveras	65	Route 24 to Mokelumne Hill; grade and structures	6.5	1,100,000
Colusa	7, 15	On 7th and "E" Streets in Williams; drainage	0.2	30,000
Colusa, Sutter	15	4.5 miles east of Colusa to Drexler Road; grade, pave, and structures	5.1	1,980,000
Contra Costa	7	Barrett Avenue off-ramp; grade, pave, and structures	–	420,000
Contra Costa	75	Junction Routes 75E and 75H to 0.2 mile north of Solano Way; grade, pave, and structures	2.9	3,150,000
Contra Costa	107	1 mile south of Danville to Walnut Creek; grade, pave, and structures	6.8	12,900,000
Del Norte	1	Collier Tunnel; lighting and ventilating	–	200,000
El Dorado	11	West city limits of Placerville to Railroad crossing; tree planting	3.9	80,000
El Dorado	65	0.4 mile south Hastings Creek to 0.9 mile south of Greenwood Creek; grade, pave, and structures	2	280,000
Fresno	4	Tulare County line to 0.5 mile north of Highland Avenue; grade, pave, and structures	6.9	4,490,000
Fresno	4	Dry Creek Canal to north of West Olive Avenue Interchange; landscape	1.6	125,000
Fresno	4	North of West Olive Avenue Interchange to San Joaquin River; functional and tree planting	8	75,000
Fresno	138	Zapato Cheno Creek Bridge No. 42-115; bridge and approaches	–	25,000
Glenn	45	Walker Creek to Glenn; grade, pave, and structures	8.3	950,000
Humboldt	1	1.3 miles south of Sylvandale (or 2.6 miles south of Phillipsville) to Maple Hills Road; grade, pave, and structures	5.8	5,600,000
Humboldt	35	2.5 miles to 7.7 miles east of Bridgeville (portions); grade and pave (casual labor)	5.2	100,000
Humboldt	46	Miners Creek; culvert and approaches	0.3	180,000
Humboldt	56	Salt River overflow Bridge No. 4-99; bridge and approaches	0.2	70,000
Kings	135	1 mile north of Corcoran to Tulare County line; grade and pave	3.3	278,000
Lake	15	0.5 mile west to Morrison Creek in Lucerne; grade and pave	0.5	105,000
Lake	89	2.4 miles south to Cobb Post Office (portions); grade and pave	1.6	265,000
Lassen	28	1.6 miles to 0.6 mile west of Kramer Road in Nubieber; grade and pave	1	130,000
Lassen	29	1 mile east of Johnstonville to 0.4 mile east of Baxter Creek; grade and pave	4.2	700,000
Lassen, Modoc	73	0.8 mile south of Modoc County line to 4 miles north of Likely (portions); grade and pave	5.4	550,000
Madera	4	0.2 mile north of San Joaquin River to Road 30 (portions); grade, pave, and structures	5.5	2,000,000
Mariposa	65	1.5 miles south of Coulterville to Tuolumne County line; grade, pave, and structures	5.8	850,000
Mariposa	110	4 miles west of Coulterville to junction Route 65 in Coulterville; grade, pave, and structures	4	685,000
Marin	1	Miller Creek Road to north of Entrada Drive; grade, pave, and structures	2.7	3,500,000
Marin	1, 8	Routes 1 and 8 Interchange and frontage roads; grade, pave, and structures	1.2	4,000,000
Marin	56	Stinson Beach to Bolinas Road (portions); pave and drainage	–	100,000
Mendocino	1	6 miles north of Hopland to Norgard Lane south of Ukiah; grade, pave, and structures	4.8	2,250,000

Accumulated Surplus, June 30	$23,351	$100,000	$100,000

HIGHWAY PROPERTIES RENTAL FUND

Chapter 2157, Statutes of 1959 as amended by Chapter 1260, Statutes of 1961 (Section 104.6 of Streets and Highways Code). The department is authorized to lease any lands which are held for state highway purposes and to maintain and care for such property in order to secure rent therefrom.

Rents required under the California Toll Bridge Authority Act, or any bond indenture under such act, to be deposited in a particular fund are deposited in the fund designated and rents received from property acquired for the National System of Interstate Highways are deposited in the State Highway Fund. Under the original act, all other rents were deposited in the Highway Properties Rental Fund for distribution in the ratio of 76 percent to the State Highway Fund and 24 percent to counties.

The amendment to the act provided that 100 percent of rents deposited in the Highway Properties Rental Fund prior to the 1960-61 fiscal year and 76 percent of rents so deposited after the 1959-60 fiscal year to the effective date of the act were to be transferred to the State Highway Fund and the balance paid to the counties. After the effective date of the amendment, only 24 percent of the subject rents are deposited in the Highway Properties Rental Fund for disbursement to counties.

Accumulated Surplus, July 1	$1,952,815	$4,273,503	$550,000
Prior year adjustments	1,765,056	–	–

		TOTALS, MAJOR PROJECT ALLOCATIONS		$285,072,000	$314,388,254	$29,316,254

REASONS FOR REVISIONS

[1] Savings—funds in excess of project requirements.
[2] Project deferred.
[3] Decrease due to change in scope of work.
[4] Decrease, project or portion of project financed from other funds.
[5] Additional funds to cover increases in project costs.
[6] Additional funds required because of revision of design standards or scope of work.
[7] Additional funds required because of low budget estimate or higher construction costs.
[8] Additional project; transfer from prior budget.
[9] Additional project to improve deficient roadway or structure.
[10] Additional project to improve drainage.
[11] Additional project to improve traffic service.
[12] Additional project to relieve traffic congestion.
[13] Additional project to improve traffic safety.
[14] Additional project to install or revise traffic regulatory or safety devices.
[15] Additional project to replace a deteriorated or destroyed structure.
[16] Additional project to repair a deteriorated roadway or structure.
[17] Additional project to provide for roadway delineation.
[18] Additional project to restore or reconstruct roadway at slipout.
[19] Additional project for freeway or expressway construction.
[20] Additional project for erosion control and/or restoration.
[21] Additional project to stabilize slide area or remove underground water.
[22] Additional project to place roadway in acceptable condition for relinquishment.
[23] Additional project to construct weighing facilities or loadometer stations.
[24] Additional project to acquire material site for use on construction.
[25] Additional project to facilitate highway maintenance.
[26] Additional project to comply with fish and game requirements.

REASONS FOR REVISIONS

[1] Savings—funds in excess of project requirements.
[2] Project deferred.
[3] Decrease due to change in scope of work.
[4] Decrease, project or portion of project financed from other funds.
[5] Additional funds to cover increases in project costs.
[6] Additional funds required because of revision of design standards or scope of work.
[7] Additional funds required because of low budget estimate or higher construction costs.
[8] Additional project; transfer from prior budget.
[9] Additional project to improve deficient roadway or structure.
[10] Additional project to improve drainage.
[11] Additional project to improve traffic service.
[12] Additional project to relieve traffic congestion.
[13] Additional project to improve traffic safety.
[14] Additional project to install or revise traffic regulatory or safety devices.
[15] Additional project to replace a deteriorated or destroyed structure.
[16] Additional project to repair a deteriorated roadway or structure.
[17] Additional project to provide for roadway delineation.
[18] Additional project to restore or reconstruct roadway at slipout.
[19] Additional project for freeway or expressway construction.
[20] Additional project for erosion control and/or restoration.
[21] Additional project to stabilize slide area or remove underground water.
[22] Additional project to place roadway in acceptable condition for relinquishment.
[23] Additional project to construct weighing facilities or loadometer stations.
[24] Additional project to acquire material site for use on construction.
[25] Additional project to facilitate highway maintenance.
[26] Additional project to comply with fish and game requirements.

DIVISION OF HIGHWAYS—Continued

Statement No. 5—Expenditures for Maintenance by Routes for the Fiscal Year July 1, 1960 to June 30, 1961

(Includes Maintenance to Toll Bridges Under Section 188.3 of Streets and Highways Code)

ROUTE	AMOUNT
1. Golden Gate Bridge to Oregon line via Crescent City and Smith River	$1,726,005
2. Route 56 in San Francisco to the Mexican line near Tiajuana via San Diego and National City; Orcutt to Route 2 north of Santa Maria; Harrison to Route 2 near Los Alamos	2,818,527
3. Sacramento to Oregon line via Yreka	987,611
4. Sacramento to Los Angeles	1,843,699
5. Stockton to Santa Cruz via Hayward, with a connection from Hayward to the San Francisco-Oakland Bay Bridge; Route 4 near Stockton to Route 65 near Mokelumne Hill	658,875
6. Route 7 to Sacramento; Route 49 near Napa to Route 7 near Davis	194,566
7. Route 69 in Albany to Route 3 near Red Bluff	892,149
8. Ignacio to Route 7 near Cordelia via Napa	63,890
9. Route 79 near Saticoy to Route 4 near San Fernando; near San Fernando to San Bernardino	344,568
10. Route 2 near San Lucas to Sequoia National Park line via Coalinga, Hanford, and Visalia	236,413
11. Route 75 near Antioch to Nevada line near Lake Tahoe via Sacramento and Placerville	713,916
12. Point Loma to El Centro via San Diego	317,952
13. Route 4 at Salida to Route 23 via Sonora and Long Barn	224,097
14. Oakland to Route 7 in Richmond at Cutting Boulevard	39,157
15. Route 56 near Fort Bragg to Route 37 near Emigrant Gap via Willits, Williams, and Colusa	501,395
16. Route 1 to Lakeport	36,312
17. Route 3 south of Roseville to Nevada City	105,040
18. Merced to Yosemite National Park near El Portal via Mariposa	81,549
19. Route 9 west of Claremont to Beaumont via Riverside; Pomona to Route 2 near Santa Ana	194,838
20. Route 1 near Arcata to Lassen National Park via Weaverville and Redding; Route 83 near Old Station to Route 29 west of Susanville; Route 29 near Susanville to Route 73 near Ravendale	579,513
21. Route 3 near Richvale to Route 29 near Chats via Quincy and Beckwourth Pass	392,841
22. Route 32 to Route 2 near The Rocks via Hollister and San Juan Bautista; Route 56 near Castroville to Route 2 near Prunedale	34,459
23. Los Angeles to Route 11 near Meyers Station via Antelope Valley, Independence, Bridgeport, and Markleeville	879,589
24. Route 4 near Lodi to San Andreas; Route 65 near Angels Camp to Route 23 near Mount Bullion via Murphys, Calaveras, Big Trees, and Dorrington; Route 23 near Woodfords to the Nevada State line	167,126
25. Route 37 near Colfax to Route 17 near Grass Valley; Nevada City to Route 83 near Sattley via Downieville	274,733
26. Los Angeles (Aliso Street) to Calexico via Ramona Boulevard, Monterey Park, Pomona, Colton, Brawley, and El Centro; a cut-off approximately 2 miles west of Brawley	950,140
27. El Centro to Yuma	92,174
28. Redding to Nevada line via Alturas and Cedarville	332,081
29. Red Bluff to the Nevada line via Susanville; Route 35 to Route 3 near Red Bluff	563,551
31. San Bernardino to Nevada line near Calada via Barstow	333,169
32. Route 56 near Watsonville to Route 249 near Sharon via Hecker Pass and Pacheco Pass	142,970
33. Route 4 near Bakersfield to Route 2 in San Luis Obispo County via Cholame Pass; Route 56 near Cambria to Route 2 near Paso Robles	129,968
34. Route 4 near Arno to Route 23 near Picketts in Hope Valley via Jackson, Irishtown, Pine Grove, Silver Lake, and Kirkwood	179,968
35. Route 1 near Alton to Route 20 near Douglas City, passing near Kuntz and Peanut	282,258
36. Mount Pleasant Ranch to Downieville	327
37. Auburn to Route 38 via Emigrant Gap	630,059
38. Route 11 near May's Junction to Nevada line near Verdi, Nevada, via Tallac, Emerald Bay, McKinney's, Tahoe City, the Truckee River, Truckee, and the Truckee River Canyon	329,883
39. Tahoe City to Nevada line at Crystal Bay	37,651
40. Route 13 to Route 23 near Mono Lake via Big Oak Flat and Buck Meadows; Route 23 near Mono Lake to Route 76 near Benton Station; Route 23 north of Mono Lake to the Nevada line, in the vicinity of the Pole Line Road	181,814
41. Route 5 near Tracy to Route 4 near Fresno; Route 4 near Fresno to General Grant National Park; General Grant National Park to Kings River Canyon	262,254
42. Route 5 near Los Gatos to Governor's Camp in California Redwood Park via Saratoga Gap	64,248
43. Newport Beach to Route 31 at Victorville, via Santa Ana Canyon, San Bernardino, Waterman Canyon, "Crest Drive" into Bear Valley, Big Bear Lake, Baldwin Lake, and around Big Bear Lake	794,960
44. Route 116 near Boulder Creek to Route 42 at Governor's Camp in California Redwood Park	10,477
45. Route 3 near Biggs to Route 7 near Willows	48,078
46. Route 3 near Klamath River Bridge to Route 1	324,742
47. Route 7 near Orland to Chico; Route 3 near Chico to Route 29 near Deer Creek Meadows	130,245
48. Route 1 near Cloverdale via McDonald's to Route 56 at mouth of Navarro River	151,847
49. Route 8 near Napa to Route 15 via Calistoga and Lower Lake	119,349
50. Route 15 to Sacramento via Rumsey and Woodland	123,245
51. Route 56 near Valley Ford to Route 8 near Sonoma via Santa Rosa	50,973
52. Route 1 to Tiburon	9,917
53. Route 7 near Fairfield to Route 4 near Lodi via Rio Vista	153,891
54. Route 11 near Perkins to Drytown passing near Michigan Bar and via Huot's Ranch	40,666
55. San Francisco to Route 5 (Skyline Boulevard)	135,771
56. Route 2 near Las Cruces via the vicinity of Lompoc and Guadalupe to Route 2 near Pismo; San Luis Obispo to San Francisco along the coast via Cambria, San Simeon, and Santa Cruz; Route 1 near southerly end of Marin Peninsula to Route 1 near Fernbridge via the coast route through Jenner, Westport, and Ferndale, including lateral connection with Route 1 near Leggett Valley	1,369,930
57. Route 2 near Santa Maria to Route 23 near Freeman via Bakersfield and Walker Pass	233,004
58. Route 2 near Santa Margarita to the Arizona line near Topok, Arizona via Bakersfield, Mojave, Barstow, and Needles, with a connection from near Needles to Arizona line	522,891
59. Route 4 near Gorman to Route 31 near Cajon Pass; Route 31 near Cajon Pass to Route 43 via Lake Arrowhead	192,890
60. Route 2 near El Rio to Route 2 south of San Juan Capistrano	473,381
61. Route 162 near Avenue 36 in Los Angeles to Route 59 via Glendale and Wrightwood	254,480
62. Route 171 near Buena Park to Route 61 via San Gabriel Canyon	88,911
63. Big Pine to Nevada line via Oasis	54,391
64. Route 2 near San Juan Capistrano to Route 78 near Perris; Route 78 near Perris to Route 26 near Indio; Mecca via Blythe to the Arizona line at the Colorado River; a point near Shaver's Summit to Route 26 near Indio	334,367

Statement No. 6—Comparison of Revised Revenue Estimates for the 1961-62 Fiscal Year With Budget Estimates Submitted to the 1961 Session of the Legislature

ESTIMATED REVENUES AND RECEIPTS	1961-62 BUDGET 1961 SESSION	REVISED ESTIMATES	DIFFERENCES
STATE HIGHWAY FUND			
State Funds:			
Apportionment from State Revenue Collected by Other Agencies:			
Transfer from Highway Users Tax Fund	$357,029,362	$351,039,845	—$5,989,517
Revenues:			
Supervision of Outdoor Advertising:			
License fees	$46,000	$46,000	–
Permits and penalties	81,000	81,000	–
Totals, Supervision of Outdoor Advertising	$127,000	$127,000	–
Martinez-Benicia Ferry tolls	200,000	200,000	–
Interest from investments	1,000,000	2,000,000	$1,000,000
Interest from condemnation deposits	600,000	600,000	–
Totals, State Funds	$358,956,362	$353,966,845	—$4,989,517
Federal and Other Funds:			
Federal Aid Subventions:			
For state highways	$265,113,005	$265,106,390	—$6,615
For county highways	8,457,807	8,457,807	–
Totals, Federal Aid Subventions	$273,570,812	$273,564,197	—$6,615
Federal Government Reimbursements:			
For state highways	–	$237,538	$237,538
For county agencies	–	98,747	98,747
Totals, Federal Government Reimbursements	–	$336,285	$336,285
Miscellaneous Contributions:			
For state highways	–	$6,700,396	$6,700,396
For county and other agencies—emergency damage repairs	–	65,000	65,000
For county highways—federal and secondary	–	575,464	575,464
Totals, Miscellaneous Contributions	–	$7,340,860	$7,340,860
Reimbursements—work for other agencies	–	306,781	306,781
Totals, Federal and Other Funds	$273,570,812	$281,548,123	$7,977,311
TOTALS, REVENUE AND RECEIPTS, STATE HIGHWAY FUND	$632,527,174	$635,514,968	$2,987,794

DEPARTMENT OF VETERANS AFFAIRS

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

Veterans' Home of California

The Veterans' Home, a 2,412-bed facility is located in Napa County. It is a home for aged and disabled, honorably discharged former members of the armed forces. The site of the home is on a hillside near Yountville with both single and 2-story buildings and a 4-story hospital. Most of the structures of the institution have been replaced in recent years or are in good condition.

The construction program for 1962-63 provides for alteratio in the kitchen and conversion of the main dining room fro family to cafeteria style feeding. The change in the method dining room feeding is expected to reduce the home's food ser ice staff by 10 positions. This will represent an annual saving of $39,000 in operating costs effective in 1963-64. A mino project provides for improved ventilation in the laundry.

SUMMARY OF POPULATION AND CAPACITY—ANNUAL AVERAGE POPULATION

TYPE OF CAPACITY	ACTUAL 1960-61	ESTIMATED 1961-62	ESTIMATED 1962-63
Population	1,769	1,800	1,800
TOTAL CAPACITY	2,412	2,412	2,412

Hospital	449	449	449
Receiving	14	14	14

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
STATE BUILDING PROGRAM			
PROPOSED 1962-63 EXPENDITURES[a]			
Alteration and additions to main culinary unit	–	–	$187,300
Minor Projects:[b]			
Alteration and improvement projects under $5,000	–	–	2,700
ESTIMATED 1960-61 AND 1961-62 EXPENDITURES[c]			
Hospital alterations and additions, and medical treatment center	$140,200	–	–
Construct, replace chapel	—2,782[e]	–	–
Construct water supply improvements	—1,234[e]	–	–
Minor Projects:			
Equip hospital alterations, and medical treatment center	–	$7,600	–
Install domestic water strainers	–	5,500	–
Install outside fire escapes	–	14,700	–
Install panic exit doors	–	6,560	–
Complete fire alarm system—1st increment	–	10,000	–
Alteration and improvement projects under $5,000	–	5,140	–
Roads and grounds improvements	—4,043[e]	–	–
Develop and landscape around sections	—675[e]	–	–
Enlarge disposal plant workshop and testing laboratory	1,833	–	–
Miscellaneous road and sidewalk repairs	–	628	–
Minor bathroom, toilet room and attic alterations of "B" and "C" wards	2,400	700	–
Complete remodeling, surgical area	–	2,500	–
Install central oxygen and nitrous oxide system	–	850	–
Install bed pan washer and sterilizer, hospital annex No. 1	579	271	–
Replace steam and return lines, security station	–	2,600	–
Remodel dental area, administration building	–	3,000	–
Provide entrance to classroom	–	850	–
Fire walls, attics "A" and "B"	–	3,300	–

---

[a] From State Construction Program Fund unless otherwise indicated.

[b] Minor projects from General Fund unless otherwise indicated.

[c] Unless otherwise indicated major projects from General Fund in 1960-61 and from State Construction Program Fund in 1961-62; minor projects from General Fund in both years.

[e] Unexpended balance reported as expended in prior year.

[1] Does not include any allowance for vacancies due to members on pass, or for turnover.

Local Projects Assistance Fund	*1,261,921*	–	–
California Water Resources Development Bond Fund	–	–	*229,172*

The Capital Outlay budget presents the expenditures for the California Water Development Program and for construction of department facilities under the State Building Program. The Capital Outlay expenditures for the California Water Development Program include the cost of the construction and acquisition phases of the state water facility projects, the state contributions to federal-state projects, and state financial assistance to local projects.

A general explanation of the state projects under the California Water Development Program is presented in the State Operations budget on page 691 with a description of the significant units of each project and a timetable of design, acquisition, construction, and operation. The timetable is based on the best current estimates of project emphasis and production potential. Each expenditure for state projects in the Capital Outlay budget relates directly to the timetable which indicates the beginning and progress of all projects active during the current and budget years.

CALIFORNIA WATER PROGRAM

STATE PROJECTS

CAPITAL OUTLAY EXPENDITURES	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63
GENERAL INVESTIGATIONS[3]	–	$101,204	$313,382
PROJECT PLANNING[3]	$898,629	$1,176,510	$1,190,511
DESIGN, RIGHT-OF-WAY AND CONSTRUCTION			
Feather River Project			
UPPER FEATHER DIVISION			
Frenchman Dam and Reservoir:			
Estimated program accomplishment	$739,292	$733,000	–
Less amount reported as expenditure in 1959-60	—683,859	—584,738	–

---

[1] Includes expenditures of $109,686 in 1960-61, $254,705 in 1961-62 and $258,834 in 1962-63 for administration shown in Other Activities in the support budget.

[2] Includes expenditures of $28,040 in 1960-61 and 1961-62 for administration shown in Other Activities in the support budget.

[3] Detail shown in State Operations section of budget.

STATE FINANCIAL ASSISTANCE FOR LOCAL PROJECTS

To assist local agencies in the financing of water projects, the Legislature enacted Chapter 2052, Statutes of 1957, entitled "State Financial Assistance for Local Projects." Chapter 1752, Statutes of 1959, amended and added to this program and appropriated $15,000,000 for a loan and grant fund. Chapter 1762/59 provides for a program of state financial assistance to local projects of $130,000,000.

This program provides state financial assistance to public agencies for development of needed and economically justified local water projects. To encourage public agencies to develop the public recreational potential of these projects, the program also provides for state grants for cost properly allocated to the incidental recreational and fish and wildlife benefits of the project.

In administering this program, the department prescribes procedures and gives information to interested agencies pertaining to applications, receives and processes applications, makes findings of feasibility based on complete engineering, economic, and financial analyses of project reports prepared by applicants and reports to the Legislature on each application.

Under Chapter 1752, Statutes of 1959, the Department of Water Resources, with prior approval of the California Water Commission, can make loans up to $4,000,000 and grants up to $300,000. Larger loans and grants may be made only after approval by the Legislature.

	ACTUAL 1960-61	ESTIMATED 1961-62	PROPOSED 1962-63

CALIFORNIA WATER PROGRAM—Continued

FEDERAL-STATE PROJECTS

SEA WATER CONVERSION PLANT

The plant is being built by the Federal Government at Point Loma, San Diego County. It will be the multiflash distillation type, having a capacity of 1,000,000 gallons per day. Steam to operate the distillation plant will be provided by an oil-fired steam boiler. Distilled water produced by the plant will be cooled to a temperature of 80° F., and purchased by the City of San Diego at the plant boundary. San Diego will build a pipeline to a city reservoir approximately 3 miles away and will provide pumping equipment for conveying the water to the reservoir. The site for the plant was selected and designs and specifications were nearly completed in 1959-60. Construction began in 1960-61 and should be completed in 1961-62.

BLACK BUTTE AND NEW HOGAN DAMS

Contracts have been negotiated with the U. S. Department of Interior for state participation in the construction and operation of the Black Butte and New Hogan projects. While these projects are primarily flood control facilities, certain conservation features are also involved, and the department is committed to reimburse the Federal Government for those costs of construction, operation, and maintenance allocated to purposes of irrigation. Funds for this purpose have been made available in Item 425.4 of the Budget Act of 1958, and Item 385 of the Budget Act of 1959.

The Corps of Engineers started construction on the Black Butte Dam and Reservoir in June 1960. The project, located in Glenn and Tehama Counties, is scheduled for completion November 30, 1962. The State's share in this project has been set at 39.9 percent of the total cost of construction, or approximately $7,300,000, for which it will receive the right to all water conservation benefits in addition to the flood control provided by the project without reimbursement. Water conserved by this project will be utilized for service in the local areas as the demand there grows; the surplus will be used as a source of supply for the Delta Pool.

New Hogan Dam and Reservoir, situated on the Calaveras River in Calaveras County, is a similar project. Construction was begun in December 1960, with completion July 31, 1964. The state share of the cost is expected to be $6,440,000, the conservational features being estimated at 36.2 percent of the total costs of construction.
